

# Table of Contents

## Preface

|  |     |
|--|-----|
| <b>Chip Formation Behaviour in Ultra-Precision Cutting of Electroless Nickel Plated Mold Substrates</b>                        |     |
| J.W. Yan, T. Sasaki, J. Tamaki, A. Kubo and T. Sugino  | 3   |
| <b>A Controlled Atmosphere Cutting Apparatus for Understanding Tribological Behavior of Lubricants in Near-Dry Machining</b>   |     |
| K. Hayashi, I. Inasaki, T. Wakabayashi, S. Suda, S. Suzuki, H. Yokota, T. Aoyama and M. Nakamura                               | 9   |
| <b>Brittle-Ductile Transition in Nano Bending of Monocrystalline Silicon Carbide Analyzed by Molecular Dynamics Simulation</b> |     |
| H. Tanaka, M. Sano and S. Shimada  | 15  |
| <b>Molecular Dynamics Analysis of Ultra High-Acceleration and Vibration Cutting</b>  |     |
| J. Shimizu, H. Tanaka, L. Zhou and H. Eda  | 21  |
| <b>Abrasive Nanometric Machining: Modelling, Simulation and its Application Promise</b>  |     |
| X.C. Luo and K. Cheng  | 27  |
| <b>A Study of the Molecular Dynamics Simulation in Nanometric Grinding</b>   |     |
| R.K. Kang, X.G. Guo, D.M. Guo and Z.J. Jin   | 33  |
| <b>Measurement and Analysis of AFM-Based Nano-Indentation on Micro-Machined Silicon Surface</b>                                |     |
| Q.L. Zhao, M.J. Chen, Y.C. Liang, S. Dong and K. Cheng   | 39  |
| <b>A Novel FEA Model for the Integral Analysis of a Machine Tool and Machining Processes</b>                                   |     |
| D. Huo, K. Cheng, D. Webb and F. Wardle  | 45  |
| <b>Influence of the Static Stiffness of Grinding System on the Generation of Affected Layers</b>                               |     |
| S. Yokoyama, H.S. Lee and T. Yamada  | 51  |
| <b>Geometric Models of the Ultra-Precision Grinding for Large Non-Axisymmetric Optical Aspheric Surfaces</b>                   |     |
| C.S. Han, S. Dong and Y.Y. Tang  | 57  |
| <b>Energy Limitations in HEDG and Conventional Grinding</b>  |     |
| M.N. Morgan, W.B. Rowe and A. Batako   | 63  |
| <b>Performance of the Speed-Stroke and Creep-Feed Grinding under Constant Removal Rate</b>                                     |     |
| A. Yui, S. Okuyama and T. Kitajima   | 69  |
| <b>A Study of the Crankshaft Pin Grinding Forces</b>   |     |
| A. Walsh, B.C. Baliga and P. Hodgson   | 75  |
| <b>Analysis of the Cam Grinding Mechanism with a CNC Cam Grinder</b>   |     |
| T. Fujiwara and S. Tsukamoto   | 81  |
| <b>Effect of Cutting-Edge Shape on Ductile Regime Grinding of Optical Glass in Single-Grit Diamond Grinding</b>                |     |
| J. Tamaki, T.A. Mahmoud, J.W. Yan, G. Sato and T. Iyama  | 89  |
| <b>Ductile Regime Machining of Single-Crystal CaF<sub>2</sub> for Aspherical Lenses</b>  |     |
| J.W. Yan, J. Tamaki, K. Syoji and T. Kuriyagawa  | 95  |
| <b>Axisymmetric Aspherical Form Generation for Large Diameter Optical Components</b>   |     |
| L.B. Zhou, J. Shimizu and H. Eda   | 101 |
| <b>Single Grit Diamond Grinding of Spectrosil 2000 Glass on Tetraform 'C'</b>  |     |
| Q.L. Zhao, D.J. Stephenson, J. Corbett, J. Hedge, J.H. Wang and Y.C. Liang   | 107 |
| <b>Fundamental Characteristics of a Freezing Chuck System for Brittle Material Machining</b>                                   |     |
| K. Kitajima, T. Fuji, N. Kawashima, M. Kumazawa and I. Ishihara  | 113 |
| <b>A Study of the ELID Grinding for Nano Ceramics</b>  |     |
| F.H. Zhang, Y.Z. Liu, J.C. Gui and H.J. Wang   | 119 |
| <b>Development of Ultra Thin Quartz by Abrasive Machining</b>  |     |
| M. Touge, J. Watanabe, Y. Ohbuchi, H. Sakamoto and N. Ueda   | 123 |
| <b>Platen Belt Grinding of Brittle Materials</b>   |     |
| C.Y. Wang, Y.H. Sun, Z. Qin and L. Zhou  | 129 |
| <b>A Study on Constant-Pressure Grinding with EPD Pellets</b>  |     |
| Y. Yamamoto, H. Maeda, H. Shibusaki, H. Suzuki and O. Horiuchi   | 135 |

|   |     |
|---|-----|
| <b>A Novel Form Error Compensation Technique for Tungsten Carbide Mould Insert Machining Utilizing Parallel Grinding Technology</b> | 141 |
| W.K. Chen, T. Kuriyagawa, H. Huang, H. Ono, M. Saeki and K. Syoji   |     |
| <b>Theoretical Study on the Effect of Form Error of Grinding Wheel Surfaces under Free Form Grinding</b>                            | 147 |
| S. Okuyama, T. Kitajima and A. Yui  |     |
| <b>Fabrication of Off-Axis Aspherical Mirrors with Loose Abrasive Point-Contact Machining</b>                                       | 153 |
| H.B. Cheng, J.F. Zhi and Y.B. Wu  |     |
| <b>Reduction of Lobing in Centreless Grinding via Variation of Set-Up Angles</b>  | 159 |
| A.J.L. Harrison and T.R.A. Pearce   |     |
| <b>A Displacement-Frequency Modulator Based System for Composite Grinding Control</b>   | 165 |
| Y. Gao, S. Tse and K. Chiu  |     |
| <b>Ultraprecision Abrasive Machining of Fibre Optic Connectors</b>  | 171 |
| H. Huang, L. Yin, W.K. Chen and Z. Xiong  |     |
| <b>A Precision Grinding Technique for Radome Inner Surfaces</b>   | 177 |
| Z.Y. Jia, T. Ji, D.M. Guo and G.H. Bian   |     |
| <b>A Practical Method for Improving the Pointing Accuracy of the Antenna-Radome System</b>  | 183 |
| D.M. Guo, M.J. Liu and R.K. Kang  |     |
| <b>Finishing Characteristics and Residual Stress on Workpiece Surface in Dry Barrel Finishing</b>                                   | 189 |
| K. Kitajima, A. Yamamoto and M. Sasai   |     |
| <b>Influence of Different Grinding Processes on Surface and Subsurface Characteristics of Carbide Tools</b>                         | 195 |
| B. Denkena and C. Spengler  |     |
| <b>Factors Influencing the Surface Quality during Ultra-Precision Grinding of Brittle Materials in Ductile Mode</b>                 | 201 |
| M.J. Chen, D. Li, S. Dong and F.H. Zhang  |     |
| <b>High Efficiency Deep Grinding and the Effect on Surface Integrity</b>  | 207 |
| P. Comley, D.J. Stephenson and J. Corbett   |     |
| <b>Experimental Investigation of the Machined Surface Waviness, Vibrations and Cutting Forces in Peripheral Milling</b>             | 213 |
| X.W. Liu, K. Cheng, D. Webb, X.Q. Jiang, S.J. Xiao, A.P. Longstaff, M.H. Widjyarto, L. Blunt and D. Ford                            |     |
| <b>Analysis of a Surface Encoder in Wave Optics</b>   | 219 |
| Y. Watanabe, W. Gao, H. Shimizu and S. Kiyono   |     |
| <b>A Novel Profilometer for Nanometric Form Assessment for Large Machined Surfaces</b>  | 225 |
| H. Yang, S. Kim and D. Walker   |     |
| <b>An Ultra-Low Frequency Parallel Connection Nonlinear Isolator for Precision Instruments</b>                                      | 231 |
| J.Z. Zhang, D. Li, M.J. Chen and S. Dong  |     |
| <b>Development of a Grinding Wheel with Electrically Conductive Diamond Cutting Edges</b>   | 239 |
| K. Suzuki, M. Iwai, T. Uematsu and A. Sharma  |     |
| <b>Performance and Wear Behaviour of Diamond Fibre Grinding Wheels when Grinding Glass</b>  | 245 |
| P. Comley, N.P. Smith, T.R.A. Pearce, D.J. Smith and M.N.R. Ashfold   |     |
| <b>Development and Application of Porous Vitrified-Bonded Wheel with Ultra-Fine Diamond Abrasives</b>                               | 251 |
| T. Tanaka, S. Esaki, K. Nishida, T. Nakajima and K. Ueno  |     |
| <b>Estimation of Tribological Characteristics of Electrolyzed Oxide Layers on ELID-Grinding Wheel Surfaces</b>                      | 257 |
| T. Kato, N. Itoh, H. Ohmori, K. Katahira, W.M. Lin and K. Hokkirigawa   |     |
| <b>A Study on the Contact Stiffness of Grinding Wheels</b>  | 263 |
| T. Yamada, H.S. Lee and H. Matsushita   |     |
| <b>Evaluation of Factors Controlling CBN Abrasive Selection for Vitrified Bonded Wheels</b>   | 267 |
| M. Hitchiner and S. McSpadden   |     |
| <b>Ultra-High Speed Cylindrical Grinding Using CBN Wheel for High Efficiency</b>  | 273 |
| T. Nakayama, M. Wakuda and M. Ota   |     |
| <b>A Study on the CBN Grit Damage of a Newly Developed CBN Cup Quill in Face Grinding</b>   | 279 |
| Q.S. Yan and Z.Q. Zhang   |     |

|  |     |
|--|-----|
| <b>A Standard Grinding Wheel Assessment Method to Support a Sophisticated Grinding Knowledge Based System</b>                              | 285 |
| P. Shore, O. Billing and V. Puhasmagi  |     |
| <b>Hard Fine Machining of Gears through Continuous Generating Grinding</b>   | 291 |
| B. Denkena, J.C. Becker and F. Catoni  |     |
| <b>High-Efficiency Cutting of Granite Blocks with Multi-Blade Diamond Saws</b>   | 297 |
| X.P. Xu and H. Huang   |     |
| <b>Characterization of Vitreous Bonded Grinding Wheels for CNC Crushing</b>  | 303 |
| B. Denkena, J.C. Becker and F. Catoni  |     |
| <b>Effects of the Megasonic Floating Nozzle on Grinding Performance for Hard Materials</b>   | 311 |
| K. Suzuki, Y. Tanaka, M. Iwai, T. Uematsu and K. Tanaka  |     |
| <b>Effect of the Floating Nozzle in Grinding of Mild Steels with Vitrified CBN Wheel</b>   | 315 |
| S. Ninomiya, T. Uematsu, M. Iwai, K. Suzuki and R. Mukai   |     |
| <b>Performance of a Floating Nozzle for Grinding of Glass Edges for Flat Panel Display</b>   | 321 |
| M. Iwai, S. Ninomiya, T. Uematsu and K. Suzuki   |     |
| <b>Effect of a Small Gap Nozzle Facing to Grinding Wheel in Slit Grinding</b>  | 327 |
| S. Ninomiya, K. Suzuki, T. Uematsu, M. Iwai and K. Tanaka  |     |
| <b>Modelling of the Useful Flowrate in Grinding Based on Spindle Power</b>   | 333 |
| V.K. Gviniashvili, M.N. Morgan, N.H. Woolley and W.B. Rowe   |     |
| <b>Analysis of Mist Flow in MQL Cutting</b>  | 339 |
| Y. Kamata, T. Obikawa and J. Shinozuka   |     |
| <b>Application of Air Cooling Technology and Minimum Quantity Lubrication to Relief Grinding of Cutting Tools</b>                          | 345 |
| S. Inoue and T. Aoyama   |     |
| <b>Potential of the Electro Contact Discharge Dressing Method in Truing and Sharpening Super Abrasive Grinding Wheels</b>                  | 353 |
| B. Denkena, J.C. Becker and M. van der Meer  |     |
| <b>A Study on Laser Cleaning of Al<sub>2</sub>O<sub>3</sub> Grinding Wheels</b>  | 359 |
| X. Chen, J.F. Zhi and I.R. Pashby  |     |
| <b>Comparison of Laser Cleaning of Al<sub>2</sub>O<sub>3</sub> and CBN Grinding Wheels</b>   | 365 |
| X. Chen, J.F. Zhi and I.R. Pashby  |     |
| <b>A Study of the Characteristics of the Diamond Dresser in the CMP Process</b>  | 371 |
| Y.S. Liao, P.W. Hong and C.T. Yang   |     |
| <b>A Study on the Dressing Rate in CMP Pad Conditioning</b>  | 377 |
| P.L. Tso and S.Y. Ho   |     |
| <b>Pad Surface Characterization and its Effect on the Tribological State in Chemical Mechanical Polishing</b>                              | 383 |
| H.J. Kim, H.D. Jeong, E. Lee and Y.J. Shin   |     |
| <b>Chemical and Mechanical Characterizations of the Passivation Layer of Copper in Organic Acid Based Slurries and its CMP Performance</b> | 389 |
| D.H. Eom, J.S. Ryu, J.G. Park, J.J. Myung and K.S. Kim   |     |
| <b>A Study of an Ultra-Precision CNC Polishing System</b>  | 395 |
| S.J. Han, J.K. Choi, S.W. Lee and H.J. Choi  |     |
| <b>Pressure-Based Grinding and Polishing of Free-Form Lenses with Spherical Tools</b>  | 401 |
| Y. Zhang, J.F. Zhi and Y.B. Wu   |     |
| <b>Effect of Pre-Thin-Surface Grinding on Copper Chemical Mechanical Polishing</b>   | 407 |
| J. Watanabe, T. Hisamatsu and M. Hirano  |     |
| <b>A Study on the Manufacture of the Next Generation CMP Pad with a Uniform Shape Using the Micro-Molding Method</b>                       | 413 |
| J.Y. Choi, H. Kim, J. Park, S. Chung, H.D. Jeong and M. Kinoshita  |     |
| <b>A New Process for Internal Polishing of Cemented Carbide Using a Vibrating Tool with Two-Dimensional Small Motions</b>                  | 417 |
| C. Yamamoto, I. Nakada, T. Kuboi and T. Shinmura   |     |
| <b>Prediction of Material Removal in Polishing Free-Form Surfaces with Fixed Abrasives</b>   | 423 |
| L. Zhang   |     |
| <b>Improvement of Simulation Accuracy in Precision CMP with Oscillation Speed Control</b>  | 429 |
| K. Yoshitomi, A. Une and M. Mochida  |     |

|   |     |
|---|-----|
| <b>A 3D Numerical Study of the Polishing Behavior during an Oxide Chemical Mechanical Planarization Process</b>                       | 433 |
| D.H. Lee, D.J. Kwon, Y.K. Hong and J.G. Park  |     |
| <b>Fabrication of High-Quality Surfaces on Micro Tools by the ELID Grinding Technique</b>   | 441 |
| K. Katahira, H. Ohmori, Y. Uehara, Y. Watanabe, W.M. Lin, J. Komotori and M. Mizutani   |     |
| <b>Abrasive Micromachining with a Multi-Axes Vibration Tool</b>   | 447 |
| N. Moronuki, F. Yoshida, Y. Sato and A. Kaneko  |     |
| <b>A Study of the Micro Pole Structure Fabrication and Application Technology by Micro End-Milling Process</b>                        | 453 |
| T. Je, J. Lee, D.S. Choi, E. Lee, B. Shin and K. Whang  |     |
| <b>A Study on the Micro Machining of Si Wafer Using Surface Chemical Reaction</b>   | 459 |
| J.M. Park and H.D. Jeong  |     |
| <b>An Investigation on the 3D Micromachining Techniques Based on a SPM</b>  | 465 |
| Y.D. Yan, T. Sun, S. Dong, Y.C. Liang and K. Cheng  |     |
| <b>Improvement of Corrosion Resistance and Mechanical Properties of the Biomaterial Ti-6Al-4V Alloy by ELID Grinding</b>              | 473 |
| M. Mizutani, J. Komotori, K. Katahira, Y. Watanabe and H. Ohmori  |     |
| <b>Micro-Polishing of Complex and Flat Parts Using a Chemical Oil Based ER Fluid</b>  | 477 |
| J.J. Lee, E.S. Lee, S.K. Min, Y. Kim and K.H. Hwang   |     |
| <b>Development of the Electricity Rust Preventive Machining Method in Surface Grinding</b>  | 483 |
| S. Tsukamoto, N. Nishikawa, K. Okamoto and K. Ohashi  |     |
| <b>Smoothing CVD Diamond Films by Wire EDM with High Travelling Speed</b>   | 489 |
| Z.N. Guo, Z.G. Huang and C.Y. Wang  |     |
| <b>Determination of an Optimum Geometrical Arrangement of Workpiece in the Ultrasonic Elliptic-Vibration Shoe Centerless Grinding</b> | 495 |
| Y.B. Wu, Y. Fan, M. Kato, T. Tachibana, K. Syoji and T. Kuriyagawa  |     |
| <b>A Study on the Helical Scan Groove Grinding</b>  | 501 |
| M. Iwai, T. Uematsu, L. Lin, A. Sharma and K. Suzuki  |     |
| <b>A Study on the Magnetic Field Assisted Machining Process for Internal Finishing Using a Magnetic Machining Jig</b>                 | 505 |
| Y.H. Zou and T. Shimura   |     |
| <b>Magnetorheological Finishing of Glass Ceramic</b>  | 511 |
| F.H. Zhang, G.W. Kang, Z.J. Qiu and S. Dong   |     |
| <b>Magnetic Field Characteristics of the Flat Type Electro-Magnetic Barrel Finishing Machine</b>                                      | 515 |
| O. Sugiura  |     |
| <b>Techniques for Enhancing the Cutting Performance of Abrasive Waterjets</b>   | 521 |
| J. Wang   |     |
| <b>A Study on the Abrasive Water Jet Cutting for Granite</b>  | 527 |
| Y. Liu and X. Chen  |     |
| <b>A Study to Use the Electrically Conductive CVD Diamond as Electrodes in Electrical Discharge Machining</b>                         | 535 |
| K. Suzuki, M. Iwai, A. Sharma, T. Uematsu, M. Kunieda and C.S. Liu  |     |
| <b>Plastic Bending of the Magnesium Alloy Plate by a Laser Forming Process</b>  | 541 |
| K. Okuda, S. Shimoyama and M. Nunobiki  |     |
| <b>Development of Cutting Tools with Built-In Thin Film Thermocouples</b>   | 547 |
| J. Shinozuka and T. Obikawa   |     |
| <b>Characteristics of the Fine Grained CVD Diamond Film and its Industrial Applications</b>   | 553 |
| K. Kazahaya, A. Yamakawa and T. Fukunishi   |     |
| <b>High Speed Drilling and Tapping Using the Technique of Spindle through MQL Supply</b>  | 559 |
| Y. Saikawa, T. Ichikawa, T. Aoyama and T. Takada  |     |
| <b>Cutting Accuracy of the Small Radius Ball Endmill in Deep Precision Machining</b>  | 565 |
| T. Akamatsu, K. Kitajima and A. Ueda  |     |
| <b>Tap Cutting Performance Improvement by Granular Abrasive Grain Polishing</b>   | 571 |
| Y. Fukui and K. Yamakawa  |     |
| <b>A Study of the Chip Formation and Chip Removal in Dry Drilling of Aluminum Cast Alloy</b>  | 575 |
| M. Liu, J. Takagi and K. Yanagida   |     |
