Preface, Sponsors and Members

Chapter 1: Grinding Technology

1.1. Grinding Process and Principles

| | |
|---|----|
| Wheel Based Temperature Measurement in Grinding E. Brinksmeier, J. Eckebrecht and A. Wilkens | 3 |
| Characterization of the Response of Embedded Thermocouples in Grinding I. Pombo, J.A. Sánchez, N. Ortega, B. Izquierdo and S. Plaza | 12 |
| Research on Workpiece Surface Temperature and Surface Quality in High-Speed Cylindrical Grinding and its Inspiration B.Z. Li, D.H. Zhu, Z.X. Zhou, Q. Zhang and Y.C. Yuan | 19 |
| Research on Heat Transfer and Calculation Method of Workpiece Surface Temperature in High Speed Grinding B.Z. Li, D.H. Zhu, Z.X. Zhou, J.Z. Pang and J.G. Yang | 28 |
| Heat Transfer in Grinding-Hardening of a Cylindrical Component T. Nguyen, L.C. Zhang and D.L. Sun | 35 |
| Deformation Mechanisms and Abrasive Machining of Nanoscale Thin Film Multilayered Solar Panels: A Focused Review H. Huang | 42 |
| Single Grain Scratch Tests to Determine Elastic and Plastic Material Behavior in Grinding J.C. Aurich and M. Steffes | 48 |
| Calculation of the Contact Stiffness of Grinding Wheel T. Yamada, M.N. Morgan, H.S. Lee and K. Miura | 54 |
| Analysis of Effective Cutting-Edge Distribution of Grinding Wheel Based on Topography of Working and Ground Surfaces H. Sakamoto, K. Nakamura, Y. Sasaki and S. Shimizu | 60 |
| Nano-Topography Distribution on Non-Axisymmetric Aspherical Ground Surface N. Yoshihara, S. Fujimura, N. Nishikawa, M. Mizuno and T. Iyama | 66 |
| Modeling of Specific Grinding Energy Based on Wheel Topography A. Azizi, H. Adibi, S.M. Rezaei and H. Baseri | 72 |
| Research on Macro Simulation of Surface Grinding Based on FEM W.S. Wang, P. Guan, Y.S. Xian and T.B. Yu | 79 |
| Preparation and Characterization of Self-Lubrication CBN Grinding Wheel Containing Graphite as Lubricant W.F. Ding, J.H. Xu, J.L. Huang, Z.Z. Chen, H.H. Su and S.N. Galyshev | 85 |
| An Experimental Study on a Flexible Grinding Tool C. Vogt, S. Sinzinger, H. Adelsberger, R. Maurer, F. Schneider, R. Mandler, L. Kuepper, R. Rascher and P. Sperber | 91 |
| Effects of Cutting Edge Truncation on Ultrasonically Assisted Grinding K. Hara, H. Isobe, M.F. Ismail and S. Kaihotsu | 97 |

1.2. Grinding of Difficult-to-Cut Materials

| | |
|--|-----|
| Ceramic Balls Machining by Centerless Grinding Using a Surface Grinder Y.B. Wu, W.X. Xu, M. Fujimoto and T. Tachibana | 103 |
| A Study of High Speed Grinding Alumina Ceramic for a Small Diameter of Diamond Tool S.Y. Luo, C.L. Lee, Y.X. Liu and W. Chen | 110 |
| Grinding of Steel-Ceramic-Composites B. Denkena, J. Köhler and D. Hahmann | 116 |
| Wear Behavior of a Vitrified Bond CBN Wheel by Ultrasonic-Assisted Creep Feed Profile Grinding of Inconel 718 T. Tawakoli, B. Azarhoushang and A. Rasifard | 122 |

| | |
|---|-----|
| FEM Analysis of Single Grit Chip Formation in Creep-Feed Grinding of Inconel 718 Superalloy | |
| A. Zahedi and J. Akbari | 128 |
| Experimental Study on Grinding of a Nickel-Based Alloy Using Vitrified CBN Wheels | |
| Z.D. Shi, A. Elfizy, B. St-Pierre and H. Attia | 134 |
| High Speed Grinding of Nickel-Based Superalloy with Single Diamond Grit | |
| Z.Z. Chen, J.H. Xu, W.F. Ding, Z. Cheng and S.N. Galyshev | 140 |
| Analysis of Specific Energy of TC18 and TA19 Titanium Alloys in Surface Grinding | |
| Q.L. Niu, G.G. Guo, X.J. Cai, Z.Q. Liu and M. Chen | 147 |
| Wear Characteristics of Various Diamond Tools in Cutting of Tungsten Carbide | |
| A. Kubo, Y. Mochida, J. Tamaki, K. Harano, H. Sumiya and A.M.M. Sharif Ullah | 153 |
| Effect of Lubricants on Precision Planing of Tungsten Carbide Using Mono-Crystalline Diamond Tool | |
| A. Yui, H. Matsuoka, S. Okuyama, T. Kitajima and G. Okahata | 159 |
| Creep-Feed Grinding of Tungsten Carbide by Using Resin-Bonded Nickel-Coated Diamond Wheel | |
| A. Pak and A. Abdullah | 165 |
| Study on Complex Helical Drill Grinding Using the Grinder with Tripod Parallel Universal Moving Platform | |
| P. Zou, X.L. Yang, J.Z. Xu, M. Hu and W.Y. Tian | 171 |
| Particularities of Grinding High Speed Steel Punching Tools | |
| P. Krajnik, R. Drazumeric, J. Badger, J. Kopač and C.M. Nicolescu | 177 |

1.3. Dressing

| | |
|--|-----|
| Dressing Process of Porous Self-Generation Superabrasive Tool | |
| B.H. Lv, Z. Wu, J.L. Yuan and H.W. Fan | 183 |
| Influence of Picosecond Laser Touch Dressing of Electroplated Diamond Wheels on the Dressing of SiC Vitrified Bond Wheel | |
| M. Rabiey, C. Dold, R. Transchel and K. Wegener | 189 |
| Analysis of EDD Accuracy for Profiling Metal-Bonded Grinding Wheels | |
| N. Ortega, I. Pombo, J.A. Sánchez, S. Plaza and B. Izquierdo | 195 |
| Corrosion Wear Characteristics of ELID-Ground Co-Cr Alloy with Applying Abrasion by Ultra High Molecular Weight Polyethylene (UHMWPE) | |
| M. Mizutani, N. Hisamori, T. Mizuno, A. Ezura, I. Ohuchi, H. Ohmori, K. Fujiwara, K. Doi and K. Kuramoto | 201 |
| Experimental Study on Performance of Monolayer Brazed Diamond Wheel through Chemical-Mechanical Dressing | |
| H.H. Su, J.H. Xu, Y.C. Fu, W.F. Ding and S. Wang | 208 |

1.4. MQL-Fluid-Coolant

| | |
|---|-----|
| Filter-Less Purification of Grinding Fluid by Using PGA Based Flocculant | |
| S. Ninomiya, M. Iwai and K. Suzuki | 213 |
| Improvement of Grinding Performance of a CBN Wheel Using a New Grinding-Fluid-Supply System | |
| T. Kitajima, S. Okuyama and A. Yui | 219 |
| 3-D CFD Parametric Study of the Impact of the Fluid Properties and Delivery Conditions on Flow and Heat Transfer in Grinding | |
| S. Mihić, S. Cioc, I. Marinescu and M.C. Weismiller | 225 |
| Study on the Effects of Abrasive and Coolant-Lubricant Types on Minimum Quantity Lubrication-MQL Grinding | |
| T. Tawakoli, M.J. Hadad, A. Daneshi, M.H. Sadeghi and B. Sadeghi | 231 |

1.5. Non-Traditional Grinding Process, Grinding Tools, AE and Image Processing

| | |
|---|-----|
| Wire Cutting Tool Concepts for Steel Machining | |
| B. Denkena, J. Köhler and A. Ermisch | 238 |

| | |
|--|-----|
| The Mechanics and Mechanisms of Material Removal in Abrasive Drilling C/E Composites | 244 |
| Q. Wen, H. Gao, D.M. Guo and B. Wang | |
| Process Parameters Influence on Semi-Fixed Abrasive Tool Wear | 251 |
| Q.F. Deng, P. Zhao, B.H. Lv, J.L. Yuan and Z.W. Wang | |
| Modeling Effects of Compliance in Coated Abrasive Tools | 257 |
| B. Nagarajan, W.J. Chee and S. Sathyam | |
| Study on Electrolytic Re-Insulation Grinding of Soft Magnetic Powder Cores | 264 |
| T. Ueno, K. Matsunuma and T. Nishioka | |
| Research on the Chemical-Mechanical Grinding (CMG) Tools for Al₂O₃Ceramic | 270 |
| H.Z. Dai, Z.J. Jin, S. Gao and Z.C. Tao | |
| Effect of Complex Electrodischarge Grinding for Electrically Conductive PCD | 276 |
| M. Iwai, S. Ninomiya and K. Suzuki | |
| A Quick-Test Method to Determine the Grinding Wheel Topography Based on Acoustic Emission | 282 |
| W.L. Weingaertner and A. Boaron | |
| Grinding Monitoring through Thermal Acoustic Emission Signatures | 287 |
| X. Chen, A. Mohamed and J. Folkes | |
| Development of Three-Dimensional Measurement System of a Grinding Wheel Surface with Image Processing | 294 |
| A. Sakaguchi, T. Kawashita and S. Matsuo | |
| Evaluation of Vibration Finished Surfaces Using Image Processing Method | 300 |
| S. Higuchi, H. Takai, H. Kato and K. Okawa | |

Chapter 2: Turning, Milling and Drilling

2.1. Machining Process and Tools and Machine Tools

| | |
|---|-----|
| Experimental Study on the Cutting Performance of TiC-Based Nanocomposite Ceramic Tools in Turning 40Cr Steel | 309 |
| H.L. Liu, M. Hong, C.Z. Huang and B. Zou | |
| Effect of Ground Surface Roughness of Tool on Adhesion Characteristics by PVD Coating | 315 |
| M. Furuno, K. Kitajima, Y. Tsukuda and T. Akamatsu | |
| Study on Processing Property of Thin-Walled Titanium Alloy Component with Paraffin Reinforcement | 321 |
| M.J. Ge, J. Sun and J.F. Li | |
| Ultra High-Speed Cutting Experiment under the Cutting Condition that Cutting Speed Exceeds Plastic Wave Speed of Workpiece | 327 |
| J. Shinozuka, M. Sando and T. Horie | |
| Atmosphere Effects on the Machinability of Cutting Tools with Micro- and Nanoscale Textures | 333 |
| N. Kawasegi, H. Sugimori, N. Morita and M.C. Xue | |
| Defect Structures in Diamond Composite Coated Cemented Tungsten CarbideSubstrates | 339 |
| J.N. Boland, X.S. Li, D. Hay, C.M. MacRae, S. Elbracht, R.P. Rassool, V. Luzin and P. Imperia | |
| Aid of End-Milling Condition Decision Using Data Mining from Tool Catalog Data for Rough Processing | 345 |
| H. Kodama, T. Hirogaki, E. Aoyama and K. Ogawa | |
| An Experimental Study on the Effects of Ultrasonic Assisted Drilling on Chip Characteristics and Tool Life | 351 |
| B. Vakili Azghandi and M.R. Razfar | |
| Numerical Study on Constant-Flow Hydrostatic Water Bearing for a Machine-Tool Table | 357 |
| G. Okahata, S. Okuyama and A. Yui | |

2.2. Machining of Composites and Titanium and Nickel-Based Alloys

| | |
|--|-----|
| Drilling CFRP Thermosets Using Mounted Points | 363 |
| D. Biermann and M. Feldhoff | |
| Drilling of CFRP/Ti-6Al-4V Stacks | 369 |
| T. Tashiro, J. Fujiwara and K. Inada | |

| | |
|---|-----|
| Influences of Processing Parameters on Hole Shape Accuracy in Drilling Carbon Fiber Reinforced Composite | 375 |
| G.Y. Li, J.F. Li and J. Sun | |
| Tool Wear and Cutting Temperature at Machining of Composites | 381 |
| J. Líska and J. Kodácsy | |
| High Speed Milling of Titanium Alloy | 387 |
| J. Fujiwara, T. Arimoto and K. Tanaka | |
| The Influence of SiC Particles on Tool Wear in Machining of Al/SiC Metal Matrix Composites Produced by Powder Extrusion | 393 |
| R. Yousefi, M.A. Kouchakzadeh, J. Rahiminasab and M.A. Kadivar | |
| The Cutting Performance of Ultra-Smooth Composite Diamond Coated WC-Co Inserts in Dry Turning Al/SiC-MMC | 400 |
| B. Shen and F.H. Sun | |
| Milling Experimental Investigation on Titanium Alloy Ti6Al4V under Different Cooling/Lubrication Conditions | 406 |
| H. Yong, Y.J. Sun, M.J. Ge, J.F. Li and J. Sun | |
| Machined Surface Analysis in High-Speed Dry Milling of Ti-6Al-4V Alloy with Coated Carbide Inserts | 412 |
| A.H. Li, J. Zhao, H.B. Luo and W. Zheng | |
| Prediction of Surface Roughness Using Back-Propagation Neural Network in End Milling Ti-6Al-4V Alloy | 418 |
| S. Zhang and J.F. Li | |
| Lubricant Applying Effect Mechanism in Inconel 718 Cutting - Effects of Cutting Speed and Depth of Cut - | 424 |
| T. Kaneeda, K. Ishioka, L. Anthony and Y. Goto | |
| Empirical Modeling and Analysis of Surface Roughness in Milling Process of Nickel-Based Super Alloy Nimonic 115 through Response Surface Methodology | 430 |
| H. Hassanpour, M.H. Sadeghi, S. Shajari and M. Emami | |

2.3. Glass Machining

| | |
|--|-----|
| Ultrasonic Coring of Glass Disks Using Double Core Tool | 436 |
| S. Koshimizu | |
| Drilling of Borosilicate Glass with Feedback Control Based on Cutting Force | 442 |
| H. Ohzeki and F. Arai | |

Chapter 3: Polishing and Lapping

| | |
|--|-----|
| An Investigation on the Chemical Effect in Chemo-Mechanical Polishing | 451 |
| X.L. Jin and L.C. Zhang | |
| Research on the Polishing Performance of CMP Slurry for the Sapphire Crystal | 457 |
| S. Gao, R.K. Kang, Z.J. Jin and Z.G. Dong | |
| Tribological Aspects of Chemical Mechanical Polishing Diamond Surfaces | 464 |
| Z.J. Jin, Z.W. Yuan, Q. Li and K. Wang | |
| Precision Polishing of Micro Mold by Using Piezoelectric Actuator Incorporated with Mechanical Amplitude Magnified Mechanism | 470 |
| S.K. Chee, H. Suzuki, M. Okada, T. Yano, T. Higuchi and W.M. Lin | |
| Investigation of a Polishing Pad and a Carrier Film for Decreasing Edge Roll Off of Workpiece | 476 |
| U. Satake, W.X. Wang, T. Enomoto and N. Tabata | |
| Buffing Performance Analysis of Viscoelastic Polymer with Sensor-Less Polishing Pressure Control | 482 |
| K. Igarashi, M. Sato and Y. Kakinuma | |
| Verification of Polishing Phenomena of Nickel Cylinder Using Photocatalyst and Luminous Dye Excited by Ultraviolet Ray -Study of Ultraviolet-Ray Aided Machining- | 489 |
| T. Tanaka | |
| Studies on the Lapping of Polycrystalline Diamond Compact (PDC) | 495 |
| J. Sowers and A. Fang | |

Advanced Diamond Charging Process Using Vibrating Charging Ring in Fixed Abrasive Lapping

H. Tanaka, H. Horita, T. Yoshikawa, K. Iwatsuka and Y. Maeda 502

A Novel Desktop Device for Lapping Milled Micro Thin-Walled Structures

P. Zhang, B. Wang, M.J. Jackson and X. Mao 508

Chapter 4: Magnet Finishing

Finishing of Metal Parts in Magnetic Field Based on Abrasion

J. Kodácsy 517

Machining Characteristics of Magnetic Force-Assisted Electrolytic Machining for Polycrystalline Silicon

P.H. Yu, J.C. Hung, H.M. Lee, K.L. Wu and B.H. Yan 523

Study on Internal Magnetic Field Assisted Finishing Process Using a Magnetic Machining Jig for Thick Non-Ferromagnetic Tube

Y.H. Zou, J.N. Liu and T. Shinmura 530

Composite Tools Design for Electrolytic Magnetic Abrasive Finishing Process with FEM

G.Y. Liu, Z.N. Guo, Y.B. Li and J.W. Liu 536

Influence of Abrasive on Planarization Grinding Based on the Cluster Magnetorheological Effect

Q.S. Yan, J.W. Yan, J.B. Lu, W.Q. Gao and M. Li 542

Characterization of Silicon Carbide Grit for Fickerts Used in Porcelain Tile Honing and Polishing Process

C. Chiamulera, L.L. Evangelista, F.G. Fernandes, W.L. Weingaertner, R.B. Schroeter, M.C. Fredel and O.E. Alarcon 548

Chapter 5: Micro and Nano Machining

A Micro Grinding Experimental Study on AISI 1020 Steel

J. Cheng, Y.D. Gong and Y.M. Liu 557

Ultra-Precision Cutting of Roll Die with Micro Lens Arrays for Plastic Film

T. Yoshikawa, M. Kyo, H. Onozuka, H. Tanaka, Y. Maeda and M. Taya 563

Machining Characteristics of Cylindrical Blasting and Application to Micro Patterning

E. Sogabe, K. Ohashi, N. Lu, M. Fujiwara, T. Onishi and S. Tsukamoto 570

Nano-Grooving on Copper by Nano-Milling and Nano-Cutting

D.D. Cui, K. Mylvaganam and L.C. Zhang 576

Fabrication and Characterization of High Quality Micro Diamonds by Hot Filament CVD

T. Zhang, F.H. Sun, B. Shen and Z.M. Zhang 582

A Study of the Micro-End Milling of Titanium Alloy

K. Tsuda, K. Okuda, H. Shizuka and M. Nunobiki 588

Study on Surface Roughness in Micro End Milling of Mold Material

H. Shizuka, K. Okuda, M. Nunobiki and Y. Inada 594

Statistical Approach Calculating Ground Surface Roughness of Ultrasonic-Assisted Micro-Grinding

K. Shimada, T.F. Zhou, J.W. Yan and T. Kuriyagawa 600

Effect of Tool Tilting Angle on Tool Wear and Surface Roughness in Micro Ball End Milling

K. Hamaguchi, Y. Kagata, H. Shizuka and K. Okuda 606

Chapter 6: Abrasive Jet Machining and Formation

A Study of Material Removal Process in Abrasive Waterjet Milling

K. Dadkhahipour and J. Wang 621

Experimental Research on the Surface Roughness of Metal Kerf by Abrasive Waterjet Cutting

H.T. Zhu, C.Z. Huang, S.G. Zhang, J. Wang and C.L. Che 627

An Experimental Study of the Nanoparticle Colloid Hydrodynamic Cavitation Jet Polishing Performance under Different Nozzle Designs

X. Wang, F.H. Zhang, Y. Zhang and M. Zhou

633

A Study of Jet Formation for Premixed Slurry Jet Nozzle Using the Discrete Phase Model

W.S. Luo, C.Y. Wang, J. Wang and Y.X. Song

638

Chapter 7: Machining of Silicon-Wafer and Glass

Evaluation of Surface Roughness of Quartz Glass Substrate in Fabrication Process for Neutron Focusing Mirror

M. Nagano, F. Yamaga, K. Yamasaki, N. Zettsu, D. Yamazaki, R. Maruyama, K. Soyama and K. Yamamura

647

On-Machine Measurement and Statistical Analysis of Wheel Wear after Grinding Optical Glass

P. Yao, T. Matsuda, T.F. Zhou, J.W. Yan, T. Kuriyagawa and Y.D. Gong

653

Influence of Wafer Grinding and Etching Techniques on the Fracture Strength of Thin Silicon Substrates

C. Landesberger, C. Paschke and K. Bock

659

Silicon Electrochemical Etching for 3D Microforms with High Quality Surfaces

A. Ivanov and U. Mescheder

666

Spectroscopic Measurements of Silicon Wafer Thickness for Backgrinding Process

T. Onuki, N. Takagi, J. Shimizu, H. Ojima and L.B. Zhou

672

Development of CMG Wheels for Stress Relief in Si Wafer Thinning Process

Y. Mikami, L.B. Zhou, J. Shimizu, H. Ojima, Y. Tashiro and S. Kamiya

678

On the Reliability of Nanoindentation on Si Wafer at Elevated Temperatures

684

Chapter 8: ECO-Manufacturing

Evaluation of Hard Materials Using Eco-Attributes

M. Mamunur Rashid, A.M.M. Sharif Ullah, J. Tamaki and A. Kubo

693

Development of Electric Rust Preventive Machining Method -Water Using for Machining: Improvement of Water Recycle System-

N. Nishikawa, Y. Sato, T. Kato, K. Karita, Y. Hagihara, N. Yoshihara, H. Okawai, H. Kato, T. Iyama, M. Mizuno and S. Tsukamoto

699

Chapter 9: Molding, Sintering and Forming

Implementation of Glass Transition Physics in Glass Molding Simulation

H.H. Ruan and L.C. Zhang

707

Ultraprecision Mass Fabrication of Aspherical Fresnel Lens by Glass Molding Press

T.F. Zhou, J.W. Yan, J. Masuda and T. Kuriyagawa

713

Investigation of the Effect of Addition of Zirconia and Talc on Sintering Behavior and Mechanical Properties of B₄C

M. Tajdari, H.R. Baharvandi and A.R. Nezamabadi

719

Deformation Behavior Simulation in Laser Forming of Titanium Sheet -Influence of Free Edge on Deformation Behavior in Laser Forming-

M. Nunobiki, K. Okuda, T. Takagawa and H. Shizuka

725

Study on Surface Roughness Muring Metal Manufacturing Process

Z.Y. Jiang, S.J. Wang, D.B. Wei, H.J. Li, H.B. Xie, X.D. Wang and X.M. Zhang

731

Chapter 10: Peening Process

Effect of Heating and Subsequent Re-Shot Peening on Surface Characteristics of Shot-Peened Carbon Steel

Y. Harada

739

Effect of Microshot Peening on Residual Stress of High-Toughness Spring Steel

Y. Harada, D. Gowa, T. Tsuji and Y. Kobayashi

745

Transfer of Nanocarbon Induced by Fine Particle Peening (FPP) Using Carbon-Black/Steel Hybridized Particles

Y. Kameyama, Y. Mizutani, H. Sato and R. Shimpo

751
