

# Table of Contents

## Preface, Committees, Sponsors

## Chapter 1: Abrasive Machining

<b>Fabrication of Nanotwinned Surface on a Nickel Alloy Using a Developed Diamond Panel with Tips Array</b>	
B. Wang, Z.Y. Zhang, N.D. Duan, J.L. Lyu, G.X. Chen, Z.H. You, Z.F. Shi and S.L. Huang	3
<b>Simulation Research for the Effect of KDP Crystal Defect and Initial Internal Stress on Sawing Stress</b>	
P.Q. Ge, W.B. Bi, P.Q. Ge, Y. Jiao and C.H. Lu	9
<b>Effects of Electricity Parameters on Surface Quality of Reaction Bonded Silicon Carbide Ceramic with Electrical Discharge Diamond Grinding</b>	
X.S. Rao, F.H. Zhang and C. Li	15
<b>A Mechanical Model of Diamond Wire Sawing of Steel Structures</b>	
B. Denkena, T. Grove and L. Tatzig	22
<b>Grinding of Riblets on Curved Paths</b>	
B. Denkena, T. Grove and J. Harmes	28
<b>New Evaluation Method of Polishing Pad Property for Estimating Edge Roll-Off of Silicon Wafer</b>	
Y. Obayashi, U. Satake and T. Enomoto	34
<b>Development of a Novel Shell Shaping Method with CFRTP: Forming Experiment Using Localized Heating in Processing Point</b>	
T. Ikari, H. Tanaka and N. Asakawa	40
<b>Effects of Cutting Atmosphere on High-Speed End Milling Process for Titanium Alloy Ti6Al4V</b>	
E. Kondo, D. Goto, Y. Nishimura and M. Nakao	46
<b>Influence of Wheel Position Parameters on Flute Profile of Micro-Drill</b>	
S.Y. Zhang, Z.Q. Liang, X.B. Wang, T.F. Zhou, L. Jiao and P. Yan	52
<b>Development of a PCD Burnishing Tool and its Burnishing Performance</b>	
M. Iwai, M. Yamada, P. Chen, B. Lin and K. Suzuki	59
<b>Adaptive Grinding Strategy Development</b>	
X. Chen	64
<b>Optimization of the Removal Function of Dual-Rotation Magnetorheological Finishing</b>	
Y. Zhang and Z.J. Feng	70
<b>A Novel Method for Grinding Wheel Setting Based on Acoustic Emissions</b>	
X.L. Zhu, Z.H. Jiao, R.K. Kang, Z.G. Wang and H. Xu	79
<b>Centrifugal Internal Grinding by Assembled Wheel with Radially Mobile Segments</b>	
D. Blurtsyan	85
<b>Stochastic Simulation of Tape Grinding for Wafer-Like Workpiece</b>	
K. Shimada, A. Watanabe, Y. Takasu, M. Mizutani and T. Kuriyagawa	91
<b>Grinding Characteristics of Waspaloy with High-Speed Reciprocation Grinding</b>	
N. Yoshihara, Y. Fukuda, M. Houman, N. Nishikawa and M. Mizuno	97
<b>Cylindrical Grinding by Structured Wheels</b>	
A. Daneshi and B. Azarhoushang	101
<b>Cutting Performance of PCD Tools Improved by Ultraviolet-Ray Irradiation Polishing</b>	
K. Goto, Y. Izumi, T. Sakamoto, A. Kubota and M. Touge	109
<b>Grinding of Cermets with Cup-Wheels</b>	
J. Badger, R. Drazumeric and P. Krajnik	115

## Chapter 2: Finishing, Lapping and Polishing

<b>Effect of Media Degradation on Finishing Characteristics in Abrasive Flow Machining</b>	
T. Sato, E. Soh, Y. Nakayama, M. Shinagawa and Y. Fukuchi	127

<b>Surface Finishing on Arc-Shaped Inner Surface by Ultraviolet Assisted Polishing</b> H. Miwa, T. Katagi, M. Ota, K. Yamaguchi, K. Egashira and T. Nanbu	133
<b>Mirror-Like Surface Finishing of PCD by Fixed Abrasive Polishing</b> K. Yamaguchi, M. Ota, K. Egashira, H. Miwa, Y. Onchi and K. Tanada	139
<b>Feasibility of Magnetocaloric Application in the Machining Processes</b> Y. Huang, L. Yan, F. Jiang and H. Guo	145
<b>Study on Ultraprecision Polishing of Sapphire – Effects of Crystal Orientation on Polishing Characteristics</b> M. Okada, H. Suzuki, T. Suzuki, Y. Higashi and S. Aoyagi	151
<b>Experimental Research of Cluster Magnetorheological Finishing on Anodic Oxide Film of Aluminum</b> R. Chen, J.B. Lu, Q.S. Yan, X.L. Xiao and D.Y. Li	158
<b>A Novel TEM Sample Preparation by Using Micro Magnetorheological Finishing</b> H. Luo, S.H. Yin and F.J. Chen	167
<b>Experimental Research on Dressing Parameters of the Plate in Planetary Double-Sided Grinding Process</b> D.B. Song, X.L. Zhu, R.K. Kang, Z.J. Jin, S.J. Shi and B. Zhang	172
<b>Estimation of Unsteady and Steady Polishing Force in Magnetic Abrasive Finishing Using a Permanent Magnet End-Mill Tool</b> L. Ma, T. Furuki, W. Wu, T. Hirogaki and E. Aoyama	178

## Chapter 3: Grinding Wheel and Abrasive Grain Technologies

<b>Research Status of the Pendulum High-Speed Single Grain Test</b> Y. Shi, F. Jiang and L. Yan	187
<b>Effect of Li<sub>2</sub>O, K<sub>2</sub>O and ZnO on Vitrified Bond Composites for CBN Grinding Wheels</b> Z.X. Wang, T.B. Yu, J. Zhao, X.Z. Wang, X. Sun and S.X. Liu	193
<b>Preparation and Test of Conventional Composite Abrasives Using Recycled Alumina Grains</b> A. Dutra Golanda, S. Galisteu Luiz, K.C.G. Candioto and C.Y. Shigue	199
<b>Wear of Monolayer Brazed Diamond Beads in Wire Sawing of Granite</b> G.Q. Huang, H. Huang, H. Guo and M.Q. Zhang	205

## Chapter 4: Abrasive Jet Machining

<b>A New Look into the Loose Particle Impact Process for Ductile Materials</b> J. Wang and W.Y. Li	213
<b>Modeling of Kerf Profile Generated in Multi-Layered Laminate Composites with Abrasive Waterjet</b> N.P. Singh, D.S. Srinivasu and N. Ramesh Babu	219

## Chapter 5: Micro/Nano-Machining

<b>Drilling of Rod End Faces Using Micro-Cutting Tools</b> K. Egashira, K. Kuriyama, K. Yamaguchi and M. Ota	227
<b>Critical Feed/Tooth Value Providing Finest Machined Roughness by Peripheral Cutting with Micro Endmills</b> Y. Kobayashi, H. Sakamoto, A. Ishii and M. Itoh	232

## Chapter 6: Brittle Material Machining

<b>Basic Study on Ductile-Mode Grinding of Optical Glass Lenses with Rubber Bonded Diamond Wheels</b> Y. Kawana, R. Sekiguchi, Y. Mizumoto, Y. Kakinuma, K. Tanaka and M. Fukuta	241
<b>Ultrasonic-Vibration-Assisted Micromachining of Sapphire</b> H. Wakabayashi, R. Koike, Y. Kakinuma, T. Aoyama, H. Shimada and S. Hamada	247

**Experimental Research on High Speed Grinding of Silicon Nitride Ceramic Spindle**  
K. Zhang, J. Sun, H. Wang and Y.H. Wu

253

## Chapter 7: Truing, Dressing and ELID

**Analysis of the Temperature Field of the Diamond Wheel Dressed Using Laser Assisted Ultrasonic-Vibration Combined Dressing Method**

Z.B. Yang, Z. Zhang, R.Y. Yang and A.J. Liu

261

**Development of a New Truing Device Based on Electro-Contact Discharge Machining for Metal Bond Grinding Wheels**

M. Mizuno, A. Karibe, N. Yoshihara, N. Nishikawa and T. Iyama

268

**Laser-Profiling of Metal-Bonded Diamond Grinding Wheels**

A. Zahedi and B. Azarhoushang

272

## Chapter 8: EDM, Ultrasonic Machining and Laser Machining

**Fundamental Investigation of Ultrasonic Assisted Pulsed Electrochemical Grinding of Ti-6Al-4V**

S.S. Li, Y.B. Wu and M. Nomura

279

**Pulse Laser Irradiation Control Method for Blind Via-Hole Drilling of Printed Wiring Boards Based on High-Speed Camera Monitoring**

K. Kanki, M. Iozumi, T. Hirogaki, E. Aoyama and K. Ogawa

285

**Characterisation of the Femtosecond Laser Micro-Grooving Process for Germanium Substrates**

L. Li, J. Wang and H.Z. Li

291

**Ultrasonic 3D Shape Milling for Acrylic Resin Optical Products**

S. Inoue and K. Hara

297

**Machinability Improvement on High Speed Ultrasonic Turning - The Effect of Tool Oscillating Direction and Tool Chip Shape**

K. Hara, R. Sasaki and H. Isobe

302

**Effects of Grinding Fluid Excited by Ultrasonic Vibration**

H.N. Trung, J. Ishimatsu and H. Isobe

308

**Experimental Investigation and Optimization in Rotary Ultrasonic Drilling of C/C Composites**

S.M. Yuan and Q. Wu

313

## Chapter 9: Surface Integrity and Materials Characterization

**Nanotwinned Surface on a Ternary Titanium Alloy with Increased Hardness Induced under Nanoindentations**

H.X. Zhou, M.L. Li, N.D. Duan, B. Wang, Z.F. Shi, J.L. Lyu and G.X. Chen

323

**Deformation Twinning of Molecular Dynamics Simulation in a Ternary Titanium Alloy under Nanoindentation**

S.L. Huang, Z.Y. Zhang, J.F. Cui, S. Yang and X.G. Guo

328

**Mechanical Property and Characterization on Diamond Films Deposited on WC-Co Substrates**

H.X. Zhou, M.L. Li and B.Y. Yuan

333

**Analysis of Element Diffusion between Alloy Cast Iron and WC/Co Cemented Carbides**

T. Liu, S. Zhang and J.F. Li

339

**Relaxation of Thermal Residual Stress in Laser Irradiated Fused Silica by Annealing Process**

R.Q. Li, P. Yao, W. Wang, J. Wang, C.Z. Huang, Z.H. Yang and Y. Liu

345

**Multi-Scale Topography Analysis of Multi-Axis Machined Surfaces Based on Dual-Tree Complex Wavelet Transform**

W.Z. Qin, J. Zhao, W.M. Huang and D.W. Wang

351

**Oxide Film Generation during Titanium Alloy Turning in Oxygen-Enriched Atmosphere**

Y. Wan, Z.Q. Liu, R. Zhang and Z. Wang

357

## **Study on Influential Factors of Grinding Surface Residual Stress in Dry for Controlling Workpiece Surface Integrity**

X.M. Zhang, S.C. Xiu, L.J. Liu and X.L. Shi

362

## **Preparation and Research on Microwave Plasma Chemical Vapor Deposition Diamond Films on SiC Substrate**

H. Wang, Y.H. Wu and K. Zhang

368

## **Chapter 10: Tribology in Machining**

### **Quantitative Analysis of the Micro Friction of Single Crystal Silicon**

R. Tian, H.T. Zhu, C.Z. Huang, J. Wang, A. Liu, P.Q. Ge, P. Yao, H.L. Liu and B. Zou

375

### **Study on Tribological Property of Nano-TiO<sub>2</sub> Additive Oil-in-Water Lubricant during Hot Rolling**

W.Z. Xia, J.W. Zhao, H. Wu, S.H. Jiao and Z.Y. Jiang

381

## **Chapter 11: CMP and Semiconductor Wafer Processing**

### **Chemical Mechanical Polishing on Extremely Low Expansion Glass Ceramic Wafers**

Z.F. Shi, Z.Y. Zhang, S.L. Huang, B.Y. Yuan, X.G. Guo, P. Zhou and Z.J. Jin

389

### **Effects of Relative Velocity on Grinding Performances under Si Wafer Rotary Grinding**

J. Kusuyama, T. Kitajima, A. Yui and T. Ito

395

### **Processing Single Crystal SiC with Semi-Consolidated Polishing Film**

J. Lu, G.Q. Hu, H. Guo and X.P. Xu

401

### **Experiment on Chemical Magnetorheological Finishing of SiC Single Crystal Wafer**

H.Z. Liang, Q.S. Yan, J.B. Lu and W.Q. Gao

407

### **Environment-Friendly Chemical Mechanical Polishing Slurry for SiC Wafer**

Z.W. Yuan, Y. He, Q. Wen and H.Y. Du

415

## **Chapter 12: Advanced Cutting Technology**

### **Proposed Stable Machining Condition Search Method Based on Machined Surface Information after End Milling**

K. Aotani, R. Shiota, T. Hirogaki and E. Aoyama

423

### **Characteristic of Tool Wear in Small End Milling of Nickel-Titanium Alloy**

K. Hamaguchi, H. Kodama and K. Okuda

429

### **Study on the Difference of Machinability between Iron-Based Sintered Materials and Steel Materials**

T. Ueno and K. Yamada

433

### **Study on High Speed Milling of Steam Turbine Blade Materials - Difference in Cutting Characteristics by Alloying Elements of Stainless Steel**

T. Kimura, T. Sawa and T. Kamijo

439

### **Study on High Speed Milling of Steam Turbine Blade Materials - Differences in Cutting Characteristics of Titanium Alloy and Stainless Steel**

T. Kimura, T. Kamijo and T. Sawa

445

### **Experimental Investigation of Heat Partition Ratio for the Cutting Tool at a Cutting Speed Ranging from 38 to 6500 m/min**

J. Shinozuka and D. Kidoura

450

### **Identification of Aluminum Alloy Flow Stress to Determine FEM Analysis Constitutive Equation for Machining Material**

T. Nakamura, H. Sasahara, S. Kusunose and I. Nishizaki

457

### **Investigation of cBN Electroplated End-Mill Shape for CFRP Machining**

T. Furuki, T. Hirogaki, E. Aoyama, K. Ogawa, K. Inaba and K. Fujiwara

463

### **An Advanced Support Method of Aircraft Skin Mirror Milling - Fluid Lubricating Support**

Z. Li, Y. Bao, R.K. Kang, Z.G. Dong, P. Zhou and Z.J. Jin

469

### **Development of the Axial Splitting Process for Small Diameter Brass Tubes**

E. Nakanishi, K. Sugiura, M. Tezuka, Y. Koda, I. Yoshino and S. Hachikawa

475

<b>Experimental Research on Small-Diameter Deep-Hole Drilling of Austenite Stainless Steel</b>	481
H. Kodama, K. Okuda and T. Yamaguchi	
<b>Effect of Cutting Speed on the Face Milling of CFRP Using a PCD Tool</b>	487
T. Kitajima, T. Horiuchi, A. Yui and Y. Ito	
<b>Tapping Performance by Use of Strong Alkali Ion Water</b>	492
M. Iwai, M. Yamada and K. Suzuki	
<b>Surface Roughness and Topography Analysis in Precision Milling of 3J33 Maraging Steel</b>	497
Y. Yao, H.T. Zhu, C.Z. Huang, D.C. Zhang, J. Wang, P. Zhang and P. Yao	

## Chapter 13: Machine Tools and Systems, Tooling Processing

<b>Spin Turning of Hardened Steel Using a Rod Tool Made of Cemented Carbide and On-Machine Forming of Rod Tool</b>	505
F. Koga, S. Ninomiya and K. Suzuki	
<b>Development of Automatic Servo Tuning Function in Rotary Axis with DDM for Machine Tools and its Performance for Stable Machining</b>	511
T. Ikegami, T. Hirogaki and E. Aoyama	

## Chapter 14: In-Process Measurement and Monitoring, Metrology

<b>Monitoring Method of Process Temperature and Vibration of Rotating Machining Tool with a Wireless Communication Holder System</b>	519
R. Matsuda, M. Shindou, T. Furuki, T. Hirogaki and E. Aoyama	
<b>Estimation of Machining Error Caused by Deflection of Tool Using Cutting Force in Ball End Milling of Inclined Surface</b>	525
K. Shimana, E. Kondo, S. Yoshimitsu, Y. Kobaru and S. Yamashita	
<b>Quadrant Protrusion Measurement of Ultra-Precision Machine Tool by Real-Time Position Capturing Method</b>	531
H. Duan, T. Hosobata, M. Takeda, S. MORITA and Y. Yamagata	
<b>High Speed Measuring of a Grinding Tool Surface Topography by a Voronoi Diagram</b>	537
A. Sakaguchi, T. Kawashita, T. Kawaguchi, S. Matsui, J. Maeda and S. Matsuo	
<b>Nanopatterning on Nano-Polycrystalline Diamond and Cubic Boron Nitride Using Focused Ion Beam and Heat Treatment to Fabricate Textured Cutting Tools</b>	543
N. Kawasegi, K. Ozaki, N. Morita, K. Nishimura, M. Yamaguchi and N. Takano
