## Chapter 1: Concrete Materials

### An Investigation into Mechanical Properties of Self Compacting Concrete Incorporating Fly Ash and Silica Fume at Different Ages of Curing

A. Askari, M.R. Sohrabi and Y. Rahmani 3

### Research on the Basic Mechanical Properties of Fly Ash Fiber Reinforced Concrete

S.S. Li, M.X. Jia and D.Y. Gao 8

### Preparation and Characterization of CCCW/Foamed Concrete Composite

K.Q. Li, D.P. Chen, S.L. Zhang and B.S. Liu 13

### Experimental Research on Main Properties of New Recycled Coarse Aggregate Concrete

D.X. Qian, Y.W. Yun, I.Y. Jang and J.H. Kim 19

### Impact Study on Mechanical Properties of Recycled Concrete Based on Waste Brick Aggregates

Z.Z. Liu, B. Xiao, Y. Liu and X.L. Li 24

### Improvement of Setting Property of Magnesia Phosphate Cement by Recycling Boron Mud

J.H. Xia and D.W. Yuan 29

### Effect of Cement on Compressibility and Microstructure of Tropical Peat

S. Kazemian, A. Prasad, V. Ghiasi and B.B.K. Huat 33

### Triaxial Compressive Behavior of Two Types of Concrete with Curing Conditions of Construction Site

Y.B. Xiong, L. Peng, J. Xu and L. Ma 38

### Research on Secondary Effluent and Reclaimed Water Reusing for Concrete Mixing

Y.S. Shi, L. Wang, Y.Z. Shi and Y.W. Cheng 43

### Beam Test Research on Bond Behavior between Steel Bar and Concrete in Salt-Frost Environment

G. Xu, T.C. Ai, Q. Wang and J.B. Huang 50

### Research on Corrosion Characteristics of Stainless Steel Bar in Stray Current and Chloride Ion Coexisted Environment

G. Xu, H.F. Fei, Y.M. Wang and Q. Wang 56

### Study on Effect of Soaking Time on the Transmission of Chloride Ion in Concrete under Drying-Wetting Cycles

Q.Z. Zhang, X.L. Gu, W.P. Zhang and Q.H. Huang 61

### Study on the Influence of Form Factor of Abrasion Particles on Concrete

X.X. Gao, Y.B. Cai and J.T. Ding 69

### Experimental Study on Compressive Strength of Recycled Concrete

Y. Li, J.L. Tao, T. Lei and J.J. Xie 75

### Experimental Study of Recycled Concrete Columns with Corroded Rebars under Axial Force

J. Xu and J. Wu 79

### Influence of Cracking on Carbonation of Cement-Based Materials

S.P. Zhang, L. Zong, L.F. Dong and W. Zhang 84

### Research on the Creep Material Nonlinearity of UEA Expansive Concrete

Q. Wang, Z.Y. Ren and Z. Zhang 89

### Research on the Durability of Polypropylene Fiber Concrete

C.F. Wang and D.T. Niu 93

### The Properties of Repair Cement Mortar with Insulation Performance under the Composite Deterioration Conditions

S.H. Jeon, M.S. Song, H.J. Kang and Y.J. Song 98

### Chloride Diffusion Characteristics of the New Interface Transition Zone in Recycled Aggregate Concrete

H.L. Wang, J.J. Wang, X.Y. Sun and J. Cheng 104

|                                                                                                                                                                                                                 |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Study on Fatigue Life of Lime Fly-Ash Treated Aggregate Based on SHRP Standard</b><br>S.X. Yu, J.C. Wei and S.J. Ma                                                                                          | 111 |
| <b>Static Mechanical Properties and Impact Resistance of Steel Fiber Reinforced High-Strength Lightweight Aggregate Concrete</b><br>H.W. Song and H.T. Wang                                                     | 115 |
| <b>Experimental Research on Flexural Behavior of Recycled Concrete One-Way Slab Reinforced with CFRP</b><br>J.J. Xie, J.L. Tao, S. Gu, T. Lei and W.J. Hu                                                       | 120 |
| <b>Polyester Fibers in the Concrete an Experimental Investigation</b><br>V. Malagavelli and N. Rao Paturu                                                                                                       | 125 |
| <b>Experimental Research on Restoring Force Characteristics of Light Composite Structure</b><br>S.C. Li                                                                                                         | 130 |
| <b>A Numerical Computation Method for Pipe Cooling Concrete Temperature Field</b><br>Y.S. Jiang, L.T. Pan and C. Su                                                                                             | 137 |
| <b>Study on Sulfate-Attack of Slag-Based Geopolymer Concrete</b><br>Q. Wang, Z.Y. Ding, L. Li, J. Da and Z.T. Sui                                                                                               | 142 |
| <b>Distribution of Chloride Concentration in Modeled Recycled Concrete Simulated by Finite Element Method</b><br>J.W. Ying and H.G. Chen                                                                        | 147 |
| <b>Influence of Recycled Aggregates Volume Fraction on Chloride Diffusion in Model Recycled Aggregates Concrete</b><br>J.W. Ying and H.G. Chen                                                                  | 151 |
| <b>Experimental Study on Flexural Toughness of Steel-Polypropylene Fiber Reinforced Concrete</b><br>Z.G. Ren, P.T. Hu and Y. Zou                                                                                | 156 |
| <b>Preliminary Study on the High-Pressure Equation of State of Concrete</b><br>C.J. Jiao, G.P. Jiang and L. Gao                                                                                                 | 161 |
| <b>Numerical Simulation on Projectile Penetrating Wedge Concrete</b><br>G.P. Jiang, S. Huan, C.J. Jiao and W.J. Tao                                                                                             | 166 |
| <b>Polypropylene Fiber Reinforced Concrete for Airfield Pavements: Modeling of Stress-Strain Curve Under Compression</b><br>T. Merhej and D.C. Feng                                                             | 171 |
| <b>Effect of Crushed Clay Brick as Coarse Aggregate on Creep Behavior of Concrete</b><br>A. Syed Ishtiaq and R. Sushanta                                                                                        | 178 |
| <b>Damage Model of Concrete Durability under Coupled Action of Stress and Freeze-Thaw Cycles</b><br>D. Zheng and J.T. Zhou                                                                                      | 182 |
| <b>Impact Experimental Study for Dynamic Character of Reactive Powder Concrete</b><br>W.P. Wang, Y.L. Hu, X.T. Ren, Y.B. Xiong, K. Zhao and X. She                                                              | 187 |
| <b>Experimental Investigation on Stress-Strain Curves of Reactive Powder Concrete under Uniaxial Compression</b><br>Y.Z. Ju, D.H. Wang and F. Jiang                                                             | 192 |
| <b>Effects of Packing Density and Calcium- Silicon Ratio of Ternary Cementitious Material System on Strength of Reactive Powder Concrete</b><br>T. Ji, B.C. Chen, F. Li, Y.Z. Zhuang, Z.B. Huang and Y.N. Liang | 197 |
| <b>Multi-Objective Optimized Design of High-Performance Concrete Based on Matlab</b><br>X.S. Xie, Y.Z. Zheng and F. Tian                                                                                        | 202 |
| <b>Effects of Sand Particle Size and Gradation on Strength of Reactive Powder Concrete</b><br>T. Ji, B.C. Chen, Y.Z. Zhuang, F. Li, Z.B. Huang and Y.N. Liang                                                   | 208 |
| <b>The Static Mechanical Property of Concrete at Elevated Temperature</b><br>J.L. Tao, L.B. Qin, K. Li and B. Jia                                                                                               | 212 |
| <b>Carbonation Depth of Recycled Aggregate Concrete Incorporating Fly Ash</b><br>F. Tian, W.X. Hu, H.M. Cheng and Y.L. Sun                                                                                      | 217 |
| <b>The Apparent Density, Tensile Properties and Drying Shrinkage of Ultra High Toughness Cementitious Composites</b><br>X.R. Cai, B.Q. Fu and S.L. Xu                                                           | 223 |
| <b>Dynamic Failure Surface of Concrete under Multiaxial Dynamic Loads</b><br>H.L. Wang and J.Y. Yuan                                                                                                            | 228 |

|                                                                                                                                                                                           |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>The Modulus of Elasticity of High-Strength Concrete</b><br>Z.H. Lu, Z.W. Yu and Y.G. Zhao                                                                                              | 233 |
| <b>Nonlinear Constitutive Model Research on Concrete (Uni-Axial or Multi-Axial)</b><br>J.W. Yao, S.Y. Sun and H.R. Chen                                                                   | 238 |
| <b>Investigating Properties of Haydite Concrete by Using Taguchi Method</b><br>N. Zhang, A.Z. Lu, P. Cui and Y.Q. Xu                                                                      | 242 |
| <b>Microstructure and Finite Element Analysis about Ceramic Concrete after High Temperature</b><br>Q.X. Sun, W.Z. Cao, H.R. Xue and Q. Su                                                 | 247 |
| <b>Mechanical Properties and Failure Criteria of Concrete under Biaxial Tension and Compression</b><br>J.W. Yao, Y.P. Song, L.K. Qin and L.X. Gao                                         | 252 |
| <b>Experimental Study on Mechanical Properties of Concrete under Triaxial Compression</b><br>J.W. Yao, Y.P. Song, L.K. Qin and L.X. Gao                                                   | 256 |
| <b>Research on the Biaxial Tensile Strength Test and Formula of Cement Concrete</b><br>J.G. Chen, Z.S. Zhang and G.L. Li                                                                  | 260 |
| <b>Research on Strength and Microstructure of Cement with Sodium Sulfate Corrosion</b><br>X.J. Li and X.X. Feng                                                                           | 265 |
| <b>Effects of Minerals on the Dissolvable Ion Concentration and pH Value of Hardened Cement</b><br>H.B. Zhu, P.M. Wang and J.D. Zhang                                                     | 270 |
| <b>Simulations on Sulfate Ion Diffusivity in Concrete Column under Random Excitations</b><br>X.B. Zuo and W. Sun                                                                          | 275 |
| <b>Study on Fiber Concrete Impermeability Test and its Application in Subway Station</b><br>F. Qi, Y.X. Wu and W.J. Zhang                                                                 | 280 |
| <b>Research on Damage Evolution of Polypropylene Fiber Concrete under Splitting Load</b><br>F. Qi, B. Yang and X.B. Li                                                                    | 287 |
| <b>Analysis of RMS Acceleration Response Spectrum for Random Pedestrian Loads</b><br>J. Song, Z.G. Song and Y.J. Shen                                                                     | 292 |
| <b>Evaluation of Human Comfort under Repeated Intermission Vibrations</b><br>Y.J. Shen, J. Song and Z.G. Song                                                                             | 299 |
| <b>Influence of Fly Ash and Silica Fume on Anti-Corrosion Characteristics of Mortar in Sulfuric Acid</b><br>H.G. Min, Z.G. Song, Y.T. Li and Y.J. Shen                                    | 306 |
| <b>Application of Uniform Design and Non-Parametric Regression in Experimental Study of Permeable Concrete Corroded by Sulfuric Acid</b><br>S.Y. Yang, Z.G. Song, H.G. Min and X.S. Zhang | 313 |
| <b>Influence of Acrylamide on Corrosion-Resistance and Strength of Cement Pastes</b><br>Z. Liu, Q. Wang, P. Song and L.F. Tian                                                            | 318 |
| <b>Advanced Early Strength Agent Development and Mechanism Analysis</b><br>Y.Z. Shi, Q. Wang, P. Song and L.L. Jia                                                                        | 323 |
| <b>Study on Corrosion Resistance of N-Vinyl Pyrrole Modified Cement</b><br>L.L. Jia, Q. Wang, P. Song and Y.Z. Shi                                                                        | 328 |
| <b>Effects of Compressive Strength and Carbonation of HCSA Amount on High Volume Fly Ash Concrete</b><br>J.H. Liu, F.F. Hou, S.M. Song and B.Y. Jia                                       | 333 |
| <b>Durability of High-Volume GGBS Concrete</b><br>K.L. Li, G.H. Huang, J. Lin and X.S. Tang                                                                                               | 338 |

| <b>Waste Clay as a Green Building Material</b><br>S.R. Russell and J. Buchter                                                                                                     | 501 |

### **Chapter 3: Nanotechnology and Nanomaterial**

|                                                                                                                                                                                                   |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Applications of Nanomaterials in Construction with an Approach to Energy Issue</b><br>P. Ahadi                                                                                                 | 509 |
| <b>The Effect of Silica Nanoparticles and Cellulosic Fibers on the Compressive, Tensile and Flexural Properties of Ordinary Concrete</b><br>M. Foroughi, M. Kadivar, M.M. Nabavi and M.R. Kadivar | 515 |
| <b>Application of Nanotechnology in Civil Engineering</b><br>H. Nabizadeh Rafsanjani and M. Kadivar                                                                                               | 520 |
| <b>Nanotechnology in Geotechnical Engineering</b><br>M. Kadivar, K. Barkhordari and M. Kadivar                                                                                                    | 524 |
| <b>Influence of Nano-Fe<sub>3</sub>O<sub>4</sub> Addition on the Stability of Magnetorheological Fluid</b><br>H.L. Cuan, X.M. Luo and S.Q. Liu                                                    | 529 |
| <b>Synthesis and Characterization of CoFe<sub>2</sub>O<sub>4</sub> Nanoparticles</b><br>Z.F. Cui and D. Sun                                                                                       | 533 |
| <b>Research on Melamine Formaldehyde Resin Modified by Vetier (Vetiveria zizanioides) Micro/Nano Fibrils</b><br>X. Wang, Y. Wu and R. Yang                                                        | 537 |

### **Chapter 4: Experimental Study on Material Properties**

|                                                                                                                                                                                           |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Experimental Study to Calibrate Monotonic Micromechanics-Based Fracture Models of Q345 Steel</b><br>F.F. Liao, W. Wang and Y.Y. Chen                                                   | 545 |
| <b>Experimental Study on Alkali Stimulating-Steel Slag Cementitious Materials</b><br>G.X. Wang, K.J. Xu and M.Q. Zhu                                                                      | 551 |
| <b>Numerical Simulation of Mechanical Behaviour of Cement Paste under Compressive Pressure</b><br>X.M. Qiu and H.B. Bian                                                                  | 555 |
| <b>Laboratory Investigation of Compressibility Characteristics of Dredged Fill in the Qianwan Area Shenzhen</b><br>M. Zhang, J. Fan and Y.M. Zhao                                         | 561 |
| <b>Research on Model of Comprehensive Fuzzy Assessment of Projects Post Evaluation</b><br>H.Z. Zhu and J.B. Hu                                                                            | 566 |
| <b>Study on Material Parameters Effects on Smoldering and Transition from Smoldering to Flaming Combustion</b><br>C. Lu, D. Meng and M.G. Yu                                              | 571 |
| <b>Comparing Hysteretic Behavior of Flexible Piers with Different Stirrup Ratio and Slenderness Ratio</b><br>X.J. Yuan and F. Liu                                                         | 576 |
| <b>Experimental Investigation on Residual Strength of Plain Concrete under Fatigue Biaxial Compression with Constant Confined Stress</b><br>X.H. Meng, W.W. Wang, J.H. Zhou and Y.P. Song | 581 |
| <b>The Influence of Geometric Structure of Geogrids on the Pullout Resistance</b><br>D. Wu and C. Xu                                                                                      | 586 |
| <b>Study on Fracture Model of the Blunt Crack in Rock-Type Material under Compression</b><br>Q. Li, Y.L. Shang, Y. Wang and Y.C. Fu                                                       | 591 |

|                                                                                                                                        |     |
|----------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Wire Rope Tension Detection System Research and Experimental Analysis</b><br>C.L. Chen, Q. Zhang and Z.G. Guo                       | 596 |
| <b>Microstructural Investigation of Carbonation of Calcium Silicate Hydrate in Hydrated Cement Paste</b><br>W. Chen, W.B. Xu and Y. Li | 601 |
| <b>Effect of Drought on Dry Shrinkage of Cementitious Materials</b><br>C.R. Lu, X.L. Ge, G.X. Mei, W.B. Liu, H. Wang and Y.L. Qian     | 606 |

## **Chapter 5: New Building Materials**

|                                                                                                                                                                                                        |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Simulation of Solidification for Metal Matrix Composites</b><br>F.S. Hao, S.W. Gao and K.L. Ren                                                                                                     | 613 |
| <b>Efficiency of the Monte Carlo Simulation Method in Evaluation of Liquefaction Potential</b><br>H. Behjati and M.H. Bagheripour                                                                      | 618 |
| <b>The Influence of Annealing Temperatures on the Crystalline and Photocatalytic Abilities of Anodized TiO<sub>2</sub> Nanotube Arrays</b><br>J.W. Lee, Y.J. Chang, G.J. Weng, C.K. Lee and Y.C. Huang | 623 |
| <b>Design Method for Flat Geotextile Tubes filled with Inhomogeneous Slurry</b><br>C. Wang, S.W. Yan and R. Liu                                                                                        | 628 |
| <b>New Waterproof Insulation Roof Building Materials and the Construction</b><br>J. Zhang                                                                                                              | 633 |
| <b>Electromagnetic Interference of Ferrocene-Doped Carbon Fiber-Reinforced Cement Composites</b><br>C. Wang, K. Li, Z.J. Wang and G.S. Jiao                                                            | 638 |
| <b>TSMT Technics to Prepare DSP Mortar</b><br>L.L. Gao                                                                                                                                                 | 642 |
| <b>Serpentine Flat Plate Collector Thermal Performance Testing</b><br>Q.Y. Tang, H. Wang, H.T. Wang and S. Qing                                                                                        | 648 |
| <b>Approach for Quantitative Express of Tire's Foot Print</b><br>H.T. Li, Y.L. Shao and B.L. Wang                                                                                                      | 652 |
| <b>Effects of Initiator Level on Performances of Kraft Fiber Reinforced Unsaturated Polyester Composites</b><br>Z.H. Gao, D.Y. Ma, X.Y. Lv and W.B. Liu                                                | 658 |
| <b>Electromagnetic Properties of Bearing Cement-Based Materials</b><br>A.L. Guo, R. Gao and H.J. Ba                                                                                                    | 663 |
| <b>Study on the Preparation and Properties of Nylon1010/POE-g-MAH</b><br>Q. Wang, C.S. Zhu, H. Chen and S.Q. He                                                                                        | 669 |
| <b>Complex CBR (of BC Soil-RHA-Cement Mix) Estimation: Made Easy by ANN Approach [a Soft Computing Technique]</b><br>A.N. Ramakrishna, A.V. Pradeep Kumar and K. Gowda                                 | 675 |
| <b>Chemo-Micro-Dilatation Modeling of Carbonation Shrinkage Phenomenon of the Porous Mortars</b><br>T.X. Dinh, J. Jeong, H. Ramézani and Z.Q. Feng                                                     | 680 |
| <b>Research on Mechanical Behaviour of Cement Mortar with High-Volume Coal Gangue</b><br>Y.L. Qiu, X.X. Zhang, K.P. Liu, X.Y. Hu and B.W. Guan                                                         | 685 |

## **Chapter 6: Steel & Alloy Materials**

|                                                                                                                        |     |
|------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Microstructure and Mechanical Properties of Aged Mg-12Gd-2Y-0.5Zr Alloy Addition with Sb</b><br>K.J. Li and Q.A. Li | 693 |
| <b>Influence of Biaxial Magnetic Field on Martensite Reorientation in Magnetic Shape Memory Alloy</b><br>Y.P. Zhu      | 697 |
| <b>Stress Strain Analysis of Steel Specimens Not Wholly Quenched</b><br>R.J. Wang, H.M. Cheng, B.D. Shao and J.Y. Li   | 702 |

|                                                                                                                                                         |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>The Criterion of Variable COD and CTOA for Numerical Simulation with Aluminum Alloy 2524</b>                                                         |     |
| L.J. Shi, L.Z. Jiang and B.C. Yang                                                                                                                      | 707 |
| <b>The Grain Refining and Strengthening Mechanism of C-Mn Steel by CSP</b>                                                                              |     |
| C. Zhang, R. Wu, C. Song, Y.F. Zhang, S.L. Li and J.M. Tan                                                                                              | 712 |
| <b>Recycling of Titanium Machined Chips as an Energy Absorption Material</b>                                                                            |     |
| Y.C. Wong, D. Ruan, S.Y. Kim and M. Sesso                                                                                                               | 717 |
| <b>Crack Closure and Shape Restoration Using NiTi Shape-Memory Alloy</b>                                                                                |     |
