

Table of Contents

Chapter 1: Experimental Testing Techniques

Experimental Study on the Size Effect on Flexural Behavior of Larch Glulam Beams X.Y. Zhou, L. Cao and D. Zeng	3
Experimental Research and Application of Super-Retarding Mortar X. Feng and X.Y. Zhou	10
The Comparison and Analysis of Void Fraction of OGFC-13 Asphalt Concrete through Vacuum Method and Volume Method C.Y. Tang, W. Yi, X.F. He and L. Tan	17
Fatigue Behavior of Cement Asphalt Emulsion Mortar D.M. Tian and J. Yin	25
Structural Condition Evaluation of an In-Service Glued-Laminated Timber Bridge Based on the Dynamic and Static Testing Z.F. Wang, X.Y. Zhou and D.H. Zhang	31
Experimental Study on Mechanical Properties of Larch Glulam Columns under Axial Compression X.Y. Zhou, D. Zeng and Z.F. Wang	38
Experimental Investigation on the Compressive Behaviour of Clay Brick Masonry Columns Confined by BFRP or Steel Wires M. Fossetti, G. Minafò and C. Giacchino	46
Test on the Mechanical Performance of Glue-Laminated Timber Reinforced with GFRP for Structural Materials Z.X. Chen, R.L. He, Q.Q. Zhao, X.Y. Zhou and Z.F. Zhang	53
Experimental Investigation of Glass and Carbon FRCM Composite Materials Applied onto Concrete Supports T. D'Antino, J. Gonzalez, C. Pellegrino, C. Carloni and L.H. Sneed	60
Experimental Tests on Composite Steel-Concrete Truss Beams M.A. Kareemi, F. Petrone and G. Monti	68

Chapter 2: Advanced Modeling

A Theoretical Model to Evaluate the Compressive Behaviour of RC Jacketed Columns G. Minafò, M. Fossetti, M. Papia and G. Patti	79
Disproportionate Collapse Simulations A. Fascatelli, S.K. Kunnath and N. Nisticò	87
Microplane Model for Concrete: Part I - State of the Art S. Gambarelli, N. Nisticò and J. Ožbolt	95
Microplane Model for Concrete: Part II - Applications on CFRP Confined Concrete Elements S. Gambarelli, N. Nisticò and J. Ožbolt	106
Random Lattice Modeling of Quasi-Brittle Fracture in Cementitious Materials: A State of the Art A. Fascatelli, J.E. Bolander and N. Nisticò	121
Cyclic Behaviors of Steel Braces in Concentrically Braced Frames Z.H. Zhou, C. Nuti, D. Lavorato and A.V. Bergami	128
Study on Mechanics Performance of Suspension Bridge with 1960 MPa Cable Wire H.L. Wang and C. Zhu	135
Finite Element Calculation for the Tensile Elastic Modulus of Honeycomb Materials with Different Pore Shape S.L. Su	141
Analysis of the Effects of Mortar Thickness and Wall Building Technique in Masonry Structures Using an Anisotropic Model B. Kimence, S. Demirkan and H. Ergun	146

A Novel Conceptual Approach for Predicting the Mechanical Properties of Recycled Aggregate Concrete	156
M. Pepe, E. Koenders, R. Dias Toledo Filho and E. Martinelli	
Modified Monti-Nuti Model for Different Types of Reinforcing Bars Including Inelastic Buckling	166
Z.H. Zhou, C. Nuti and D. Lavorato	
Soil-Structure Interaction on the Dynamic Response of Bridge Piers	173
A. de Angelis, M. Mucciacciaro, S. Sica and M.R. Pecce	

Chapter 3: Earthquake Resistance, Disaster Prevention and Hazard Mitigation

Pounding Response Spectra of Bridge Decks	183
B. Mandal, V. Bianco and G. Monti	
Seismic Assessment of Masonry Building Clusters with a Dedicated NLA Software	191
M. Vailati, G. Monti and G. di Gangi	
Rapid Repair Technique to Improve Plastic Dissipation of Existing Chinese RC Bridges	204
D. Lavorato, C. Nuti, B. Briseghella, S. Santini and J.Q. Xue	
Seismic Energy Demands in Steel Moment Frames	210
S. Doğru, B. Aksar, B. Akbas, J. Shen, O. Seker and R. Wen	
Amplified Seismic Loads in Steel Moment Frames	222
B. Aksar, S. Doğru, B. Akbas, J. Shen, O. Seker and R. Wen	
A Direct Five-Step Procedure for the Dimensioning of Viscous Dampers to Be Inserted in Frame Structures	233
M. Palermo, S. Silvestri, G. Gasparini and T. Trombetti	
Numerical Analysis of Rigid Body Behaviour	240
A. Gesualdo, A. Iannuzzo, M.T. Guadagnuolo, A. Guerriero, M. Monaco and M.T. Savino	
M-N Interaction Effect on the Frames Failure Mechanisms	248
G. Buonocore, A. Gesualdo, A. Iannuzzo, M. Modano, M. Monaco and M.T. Savino	
An Innovative Dual System for New Structures or for the Retrofit of Precast Concrete Industrial Buildings	257
M. Latour, M. Paolillo, G. Rizzano and M. Vergato	
Estimation of Floor Response Spectra Using the Uncoupled Modal Response History Analysis	266
A. Lucchini, P. Franchin and F. Mollaioli	
An Overview of the Current Code Provisions on the Seismic Response of Acceleration-Sensitive Non-Structural Components in Buildings	273
E. Martinelli and C. Faella	
Ductility Enhancement in Reinforced Concrete Structure with Buckling Restrained Braced Frames	281
E. Senol, I. Kose, B. Doran, P.E. Mezrea and B. Akbas	
An Innovative Approach to Assess Seismic Safety of Historical Centres	290
I. Vanzi, S. Biondi, N. Cataldo and C. Sulpizio	
Optimization Analysis of Seismic Damage Evaluation Model Based on Fuzzy Analytical Hierarchy Process	299
Y. Sun, T.H. Chen, W.D. Zhuo, Y. Gu and S.G. Ping	
A Probabilistic Seismic Demand Model for Regular Highway Bridges	307
H.B. Ma, W.D. Zhuo, G. Yin, Y. Sun and L.B. Chen	
Interaction between Building Collapse and Road Serviceability during Seismic Emergency Operations in Urban Centers	319
M.A. Zanini, F. Faleschini, R. Morbin, M. Gastaldi, R. Rossi, C. Pellegrino and C. Modena	
Collapse Behavior of RC Column-Beam Sub-Structure with External Prestressing Tendons	325
Y.L. Fan	

Chapter 4: Rehabilitation and Retrofitting, Reliability and Durability

Proposal of a Modal Pushover Based Incremental Analysis	333
A.V. Bergami, L. Xu and C. Nuti	
Seismic Performance of Masonry Infilled RC Structures via N2 Pushover Assessment Procedures: Outcomes under Different Modeling Hypotheses of a Case Study	339
L. Cavalieri, F. di Trapani and M. Papia	
Seismic Performance of Full-Scale FRP Retrofitted Substandard RC Columns Loaded in the Weak Direction	347
H.F. Ghatte, M. Comert, C. Demir and A. Ilki	
Structural Strengthening of the Portico of the Santa Maria Dei Servi Church in Bologna	354
S. Baraccani, M. Palermo, G. Gasparini, S. Silvestri, T. Trombetti and G. Dallavalle	
Influence of Masonry Infills on the Shear Forces of RC Framed Structures	361
D. Perrone, V. Saponaro, M. Leone and M.A. Aiello	
Overview of the Experimental Works on Steel Reinforced Polymer Systems	369
G. de Felice, S. de Santis, A. Napoli and R. Realfonzo	
Flexural Strengthening of RC Slabs with SRP/SRG: An Experimental-Numerical Comparison	381
A. Napoli, R. Realfonzo, M. Petracca, F. Candeloro, G. Camata and P. Casadei	
Reliability Analysis of Seismic Isolation in Retrofitting of Simply Supported Bridges	391
L. Petti, A. Lodato and A. Mamnone	
Influence of Traffic Load on the Crack Widths of Full Jointless Bridges	401
X.F. Zhan and Y.H. Zhang	
Time-Variant Reliability of RC Structures	407
B. Palazzo, P. Castaldo and A. Mariniello	
Axial-Bending Interaction Diagrams of Reinforced Concrete Columns Exposed to Chloride Attack	415
G.C. Marano and R. Greco	

Chapter 5: Construction Monitoring, Identification and Damage Detection

Study on Deformation Monitoring of Subway Station Deep Foundation Construction	425
L. Huang, S.W. Duan, K.M. Zhu and W.G. Chen	
A Calculation Method of Coupled Nonlinearities in Slender Bridge Piers	431
M. Munoz, M. Iuliano and B. Briseghella	
Application of BP Neural Network in Structural Damage Diagnosis of Bridge behind Abutment	440
Y.H. Zhang	
Behavior of the Leaning Tower of Pisa: Analysis of Experimental Data from Structural Dynamic Monitoring	445
R. Bartelletti, G. Fiorentino, G. Lanzo, D. Lavorato, G.C. Marano, G. Monti, C. Nuti, G. Quaranta and N. Squeglia	
Behavior of the Leaning Tower of Pisa: Insights on Seismic Input and Soil-Structure Interaction	454
R. Bartelletti, G. Fiorentino, G. Lanzo, D. Lavorato, G.C. Marano, G. Monti, C. Nuti, G. Quaranta, F. Sabetta and N. Squeglia	
Study on Vibration-Based Detection Methods for Determining the Elastic Modulus of Glulam Beams	463
J.J. Wang, Y.G. Liu and D.Y. Xia	
Research on Fresh Concrete Water-Cement Ratio Based on Resistivity Method	469
H. Ren, J. Yin, Z.H. Sang and T. Gao	

Chapter 6: Novel Hybrid Structural Systems and Materials

A Long Span Hybrid Truss for a Sport Building	479
M. Mancini, S. Caruso, Z. Li, R. Marnetto and G. Monti	
Highly Standardized Long-Span Hybrid Trusses	485
S. Caruso, R. Wang, Z. Li, R. Marnetto and G. Monti	

Multi-Performance Innovative Infill Panels	492
M. Vailati, G. Monti and G. di Gangi	
Validation of a Shear Model for RC and Hybrid Beams with Two Different Inclinations of Transversal Reinforcement	505
P. Colajanni, L. La Mendola, A. Monaco and A. Recupero	
Steel to Concrete Bond Transferring in CFST Columns Connected to Beams through the Concrete	513
G. Somma, A. Pieretto and A. Dassie'	
Mechanical Performance of Connections for GluBam-Concrete Composite Beams	521
B. Shan, Y. Xiao, W.L. Zhang and B. Liu	
Lightweight Woodframe Shear Walls with Ply-Bamboo Sheathings	529
Z. Li, Y. Xiao, G. Monti and R. Wang	
Use of Electric Arc Furnace Slag for High Strength Concrete Production	537
F. Faleschini, M.A. Zanini, K. Brunelli and C. Pellegrino	
A Review on Microscopic Property of Concrete's Aggregate-Mortar Interface Transition Zone	544
Y. Xiong and J. Yin	
Structural Concrete with Recycled Aggregate: Advances in Mechanical Properties, Durability and Sustainability	553
M.A. Liotta, M. Viviani and C. Rodriguez
