

Table of Contents

Chapter 1: Experimental Testing Techniques

Experimental Study on the Size Effect on Flexural Behavior of Larch Glulam Beams X.Y. Zhou, L. Cao and D. Zeng	3
Experimental Research and Application of Super-Retarding Mortar X. Feng and X.Y. Zhou	10
The Comparison and Analysis of Void Fraction of OGFC-13 Asphalt Concrete through Vacuum Method and Volume Method C.Y. Tang, W. Yi, X.F. He and L. Tan	17
Fatigue Behavior of Cement Asphalt Emulsion Mortar D.M. Tian and J. Yin	25
Structural Condition Evaluation of an In-Service Glued-Laminated Timber Bridge Based on the Dynamic and Static Testing Z.F. Wang, X.Y. Zhou and D.H. Zhang	31
Experimental Study on Mechanical Properties of Larch Glulam Columns under Axial Compression X.Y. Zhou, D. Zeng and Z.F. Wang	38
Experimental Investigation on the Compressive Behaviour of Clay Brick Masonry Columns Confined by BFRP or Steel Wires M. Fossetti, G. Minafò and C. Giacchino	46
Test on the Mechanical Performance of Glue-Laminated Timber Reinforced with GFRP for Structural Materials Z.X. Chen, R.L. He, Q.Q. Zhao, X.Y. Zhou and Z.F. Zhang	53
Experimental Investigation of Glass and Carbon FRCM Composite Materials Applied onto Concrete Supports T. D'Antino, J. Gonzalez, C. Pellegrino, C. Carloni and L.H. Sneed	60
Experimental Tests on Composite Steel-Concrete Truss Beams M.A. Kareemi, F. Petrone and G. Monti	68

Chapter 2: Advanced Modeling

A Theoretical Model to Evaluate the Compressive Behaviour of RC Jacketed Columns G. Minafò, M. Fossetti, M. Papia and G. Patti	79
Disproportionate Collapse Simulations A. Fascetti, S.K. Kunnath and N. Nisticò	87
Microplane Model for Concrete: Part I - State of the Art S. Gambarelli, N. Nisticò and J. Özbolt	95
Microplane Model for Concrete: Part II - Applications on CFRP Confined Concrete Elements S. Gambarelli, N. Nisticò and J. Özbolt	106
Random Lattice Modeling of Quasi-Brittle Fracture in Cementitious Materials: A State of the Art A. Fascetti, J.E. Bolander and N. Nisticò	121
Cyclic Behaviors of Steel Braces in Centrally Braced Frames Z.H. Zhou, C. Nuti, D. Lavorato and A.V. Bergami	128
Study on Mechanics Performance of Suspension Bridge with 1960 MPa Cable Wire H.L. Wang and C. Zhu	135
Finite Element Calculation for the Tensile Elastic Modulus of Honeycomb Materials with Different Pore Shape S.L. Su	141
Analysis of the Effects of Mortar Thickness and Wall Building Technique in Masonry Structures Using an Anisotropic Model B. Kimence, S. Demirkan and H. Ergun	146

A Novel Conceptual Approach for Predicting the Mechanical Properties of Recycled Aggregate Concrete	
M. Pepe, E. Koenders, R. Dias Toledo Filho and E. Martinelli	156
Modified Monti-Nuti Model for Different Types of Reinforcing Bars Including Inelastic Buckling	
Z.H. Zhou, C. Nuti and D. Lavorato	166
Soil-Structure Interaction on the Dynamic Response of Bridge Piers	
A. de Angelis, M. Mucciacciaro, S. Sica and M.R. Pecce	173

Chapter 3: Earthquake Resistance, Disaster Prevention and Hazard Mitigation

Pounding Response Spectra of Bridge Decks	
B. Mandal, V. Bianco and G. Monti	183
Seismic Assessment of Masonry Building Clusters with a Dedicated NLA Software	
M. Vailati, G. Monti and G. di Gangi	191
Rapid Repair Technique to Improve Plastic Dissipation of Existing Chinese RC Bridges	
D. Lavorato, C. Nuti, B. Briseghella, S. Santini and J.Q. Xue	204
Seismic Energy Demands in Steel Moment Frames	
S. Doğru, B. Aksar, B. Akbas, J. Shen, O. Seker and R. Wen	210
Amplified Seismic Loads in Steel Moment Frames	
B. Aksar, S. Doğru, B. Akbas, J. Shen, O. Seker and R. Wen	222
A Direct Five-Step Procedure for the Dimensioning of Viscous Dampers to Be Inserted in Frame Structures	
M. Palermo, S. Silvestri, G. Gasparini and T. Trombetti	233
Numerical Analysis of Rigid Body Behaviour	
A. Gesualdo, A. Iannuzzo, M.T. Guadagnuolo, A. Guerriero, M. Monaco and M.T. Savino	240
M-N Interaction Effect on the Frames Failure Mechanisms	
G. Buonocore, A. Gesualdo, A. Iannuzzo, M. Modano, M. Monaco and M.T. Savino	248
An Innovative Dual System for New Structures or for the Retrofit of Precast Concrete Industrial Buildings	
M. Latour, M. Paolillo, G. Rizzano and M. Vergato	257
Estimation of Floor Response Spectra Using the Uncoupled Modal Response History Analysis	
A. Lucchini, P. Franchin and F. Mollaioli	266
An Overview of the Current Code Provisions on the Seismic Response of Acceleration-Sensitive Non-Structural Components in Buildings	
E. Martinelli and C. Faella	273
Ductility Enhancement in Reinforced Concrete Structure with Buckling Restrained Braced Frames	
E. Senol, I. Kose, B. Doran, P.E. Mezrea and B. Akbas	281
An Innovative Approach to Assess Seismic Safety of Historical Centres	
I. Vanzì, S. Biondi, N. Cataldo and C. Sulpizio	290
Optimization Analysis of Seismic Damage Evaluation Model Based on Fuzzy Analytical Hierarchy Process	
Y. Sun, T.H. Chen, W.D. Zhuo, Y. Gu and S.G. Ping	299
A Probabilistic Seismic Demand Model for Regular Highway Bridges	
H.B. Ma, W.D. Zhuo, G. Yin, Y. Sun and L.B. Chen	307
Interaction between Building Collapse and Road Serviceability during Seismic Emergency Operations in Urban Centers	
M.A. Zanini, F. Faleschini, R. Morbin, M. Gastaldi, R. Rossi, C. Pellegrino and C. Modena	319
Collapse Behavior of RC Column-Beam Sub-Structure with External Prestressing Tendons	
Y.L. Fan	325

Chapter 4: Rehabilitation and Retrofitting, Reliability and Durability

Proposal of a Modal Pushover Based Incremental Analysis A.V. Bergami, L. Xu and C. Nuti	333
Seismic Performance of Masonry Infilled RC Structures via N2 Pushover Assessment Procedures: Outcomes under Different Modeling Hypotheses of a Case Study L. Cavaleri, F. di Trapani and M. Papia	339
Seismic Performance of Full-Scale FRP Retrofitted Substandard RC Columns Loaded in the Weak Direction H.F. Ghatte, M. Comert, C. Demir and A. Ilki	347
Structural Strengthening of the Portico of the Santa Maria Dei Servi Church in Bologna S. Baraccani, M. Palermo, G. Gasparini, S. Silvestri, T. Trombetti and G. Dallavalle	354
Influence of Masonry Infills on the Shear Forces of RC Framed Structures D. Perrone, V. Saponaro, M. Leone and M.A. Aiello	361
Overview of the Experimental Works on Steel Reinforced Polymer Systems G. de Felice, S. de Santis, A. Napoli and R. Realfonzo	369
Flexural Strengthening of RC Slabs with SRP/SRG: An Experimental-Numerical Comparison A. Napoli, R. Realfonzo, M. Petracca, F. Candeloro, G. Camata and P. Casadei	381
Reliability Analysis of Seismic Isolation in Retrofitting of Simply Supported Bridges L. Petti, A. Lodato and A. Mammone	391
Influence of Traffic Load on the Crack Widths of Full Jointless Bridges X.F. Zhan and Y.H. Zhang	401
Time-Variant Reliability of RC Structures B. Palazzo, P. Castaldo and A. Mariniello	407
Axial-Bending Interaction Diagrams of Reinforced Concrete Columns Exposed to Chloride Attack G.C. Marano and R. Greco	415

Chapter 5: Construction Monitoring, Identification and Damage Detection

Study on Deformation Monitoring of Subway Station Deep Foundation Construction L. Huang, S.W. Duan, K.M. Zhu and W.G. Chen	425
A Calculation Method of Coupled Nonlinearities in Slender Bridge Piers M. Munoz, M. Iuliano and B. Briseghella	431
Application of BP Neural Network in Structural Damage Diagnosis of Bridge behind Abutment Y.H. Zhang	440
Behavior of the Leaning Tower of Pisa: Analysis of Experimental Data from Structural Dynamic Monitoring R. Bartelletti, G. Fiorentino, G. Lanzo, D. Lavorato, G.C. Marano, G. Monti, C. Nuti, G. Quaranta and N. Squeglia	445
Behavior of the Leaning Tower of Pisa: Insights on Seismic Input and Soil-Structure Interaction R. Bartelletti, G. Fiorentino, G. Lanzo, D. Lavorato, G.C. Marano, G. Monti, C. Nuti, G. Quaranta, F. Sabetta and N. Squeglia	454
Study on Vibration-Based Detection Methods for Determining the Elastic Modulus of Glulam Beams J.J. Wang, Y.G. Liu and D.Y. Xia	463
Research on Fresh Concrete Water-Cement Ratio Based on Resistivity Method H. Ren, J. Yin, Z.H. Sang and T. Gao	469

Chapter 6: Novel Hybrid Structural Systems and Materials

A Long Span Hybrid Truss for a Sport Building M. Mancini, S. Caruso, Z. Li, R. Marnetto and G. Monti	479
Highly Standardized Long-Span Hybrid Trusses S. Caruso, R. Wang, Z. Li, R. Marnetto and G. Monti	485

Multi-Performance Innovative Infill Panels M. Vailati, G. Monti and G. di Gangi	492
Validation of a Shear Model for RC and Hybrid Beams with Two Different Inclinations of Transversal Reinforcement P. Colajanni, L. La Mendola, A. Monaco and A. Recupero	505
Steel to Concrete Bond Transferring in CFST Columns Connected to Beams through the Concrete G. Somma, A. Pieretto and A. Dassiè	513
Mechanical Performance of Connections for GluBam-Concrete Composite Beams B. Shan, Y. Xiao, W.L. Zhang and B. Liu	521
Lightweight Woodframe Shear Walls with Ply-Bamboo Sheathings Z. Li, Y. Xiao, G. Monti and R. Wang	529
Use of Electric Arc Furnace Slag for High Strength Concrete Production F. Faleschini, M.A. Zanini, K. Brunelli and C. Pellegrino	537
A Review on Microscopic Property of Concrete's Aggregate-Mortar Interface Transition Zone Y. Xiong and J. Yin	544
Structural Concrete with Recycled Aggregate: Advances in Mechanical Properties, Durability and Sustainability M.A. Liotta, M. Viviani and C. Rodriguez	553
