

Table of Contents

Preface and Conference Organizers

Chapter 1: Advanced Materials and Multiscale Modelling

Tuneable Resonance Properties of Graphene by Nitrogen-Dopant H.F. Zhan, Y. Wei and Y.T. Gu	3
Finite Element Modelling of Stress-Induced Fracture in Ti-Si-N Films E.A. Flores-Johnson, L.M. Shen, R.K. Annabattula, P.R. Onck, Y.G. Shen and Z. Chen	10
Fictitious Elastic Stiffness Parameters of Zero-Thickness Finite Elements at Bi-Material Interfaces D. Ciancio and G. Castellazzi	16
Crystal Plasticity Simulation of the Bauschinger Effect of Polycrystalline AA7075 through a Texture-Based Representative Volume Element Model L. Li, L.M. Shen and G. Proust	22
Understanding the Threshold Conditions for Dislocation Transmission from Tilt Grain Boundaries in FCC Metals under Uniaxial Loading N.J. Burberry, R. Das, G. Po and N. Ghoniem	28
Effect of Pressure on Dry and Hydrated Self Assembled Monolayers: A Molecular Dynamics Simulation Study L. Ramin and A. Jabbarzadeh	35
Atoms to Assemblies: A Physics-Based Hierarchical Modelling Approach for Polymer Composite Components G. Pearce, S.H. Lim, J.H. Sul, B.G. Prusty and D.W. Kelly	41
Finite Element Analysis of Residual Stresses in Metallic Coatings through a Compound Casting Y.N. Liu, Y.Q. Chen, B.F. Rolfe and C.H. Yang	48
Digital Material Representation and Testing of Metal Foams C.H. Yang, Y. An, M. Tort and P. Hodgson	54
Molecular Dynamics Simulation of the Deformation of Single Crystal Gallium Arsenide Y.H. Chen, H. Huang, M.Y. Lu, Y.Q. Wu, F.Z. Fang and X.T. Hu	60
Modeling of Grained Heterogeneity with Voronoi Tessellation in Microforming Process Z. Fang, Z.Y. Jiang and D.B. Wei	66
Computational Analysis of Compressive Strain Hardening Exponents of Bimetal with Pearlitic Steel and Low Carbon Steel X.J. Gao, Z.Y. Jiang, D.B. Wei, S.H. Jiao and J.T. Han	71
Implementation of a Non-Orthogonal Constitutive Model for the Finite Element Simulation of Textile Composite Draping R.S. Pierce, B. Falzon, M.C. Thompson and R. Boman	76
Finite Element Simulation of the Hot Deformation Behavior of AA7075 Using a Coupled Thermo-Mechanical Crystal Plasticity Constitutive Model L.T. Li, Y.C. Lin, L. Li and L.M. Shen	82
Morphology of Irradiated Adjacent Single-Walled Carbon Nanotubes K. McDonell, G. Proust and L.M. Shen	88
A Variable Diffusivity Model for the Drying of Spherical Food Particulates L. Walker and W. Senadeera	94
Modeling of Steel-Reinforced Concrete Panels under Blast Loads X.S. Lin, Y.X. Zhang and P.J. Hazell	100

Chapter 2: Computational Fluid Dynamics and Thermofluids

Magnetic Convection Heat Transfer in an Open Ended Enclosure Filled with Paramagnetic Fluids S.C. Saha, E. Sauret and Y.T. Gu	109
---	-----

Analysis of Dissipative Particle Dynamics Fluid in Sheared Regimes A. Moshfegh, A. Jabbarzadeh and R.I. Tanner	115
Numerical Simulation of Flow, Heat and Moisture Transfer in Heat and Moisture Exchanger (HME) Devices S.P. Payami, M. Behnia, B. Dixon, J. Santamaria and M. Behnia	121
Thermal Management of Data Centres – Effect of CRAC Location and Flow Rate on the Performance of Data Centres B. Fakhim, F.R. Baloch, S. Nagarathinam, M. Behnia and S.W. Armfield	130
A Fully Coupled Scheme for Viscous Flows in Regular and Irregular Domains Using Compact Integrated RBF Approximation C.M.T. Tien, N. Thai-Quang, N. Mai-Duy, C.D. Tran and T. Tran-Cong	138
Comparison and Development of Equation of State Laws in Smoothed Particle Hydrodynamics P. Peacock and D.W. Holmes	144
Three-Dimensional Direct Numerical Simulation of Unsteady Transitional Round Fountains in a Homogeneous Fluid W.X. Lin, T. Liu, W.F. Gao and S.W. Armfield	150
Investigation of the 3D Flow in Hemodialysis Venous Air Traps G. Keshavarzi, T.J. Barber, G.H. Yeoh and A. Simmons	156
Transient Analysis of Rising Bubble Using Image Analysis G. Keshavarzi, R.S. Pawell and T.J. Barber	162
Numerical Simulation of Tank Discharge Using Smoothed Particle Hydrodynamics M.G. Korzani, S.A. Galindo-Torres, D. Williams and A. Scheuermann	168
CFD Flow Model and its Effects on the Calculations of High Pressure Sprays L.G. Liu, X.J. Zhang and S.L. Nie	174
Development of an Effective FVLBM Code for the Study of Turbulent and Multiphase Flows A. Baglin, T.J. Barber and G. Rosengarten	180
A Numerical Solution Based on the Fokker-Planck Equation for Dilute Polymer Solutions Using High Order RBF Methods H.Q. Nguyen, C.D. Tran, N. Pham-Sy and T. Tran-Cong	187
Comparison of Semi-Implicit and Explicit Finite Difference Algorithms on Highly Parallel Processing Architectures N.J. Stewart, D.W. Holmes, W.X. Lin, S.W. Armfield and M.P. Kirkpatrick	193
Investigation into the Existence of Cavitation within Haemodialysis Needles D. Fulker, T.J. Barber, A. Simmons and G. Keshavarzi	199
The Aerodynamics of a Cornering Inverted Wing in Ground Effect J. Keogh, G. Doig, T.J. Barber and S. Diasinos	205
Fundamental Studies of Vortices Induced by a Vortex-Generator for Automotive Applications A. Islam and G. Doig	211
Application of Kriging to Motorsport Aerodynamic Analysis M. Cruickshank and G. Doig	217
Computational Simulation of an Altitude Adaptive Nozzle Concept K. Schomberg, G. Doig and J. Olsen	223
Explaining Ground Effect Aerodynamics via a Real-Life Reference Frame P. Close and T.J. Barber	229
Risk Forecast of In-Stent Restenosis by CFD Method C.Y. Lin, X.J. Liu, Y.Y. Liu, C.Y. Xu and G.H. Wu	235

Chapter 3: Aerospace and Vehicle Engineering

Novel Wing Box Design J.D. El Tom and G.A. Vio	243
Temperature Effect on the Structural Design of a Mach 8 Vehicle N.F. Giannelis, G.A. Vio, D. Verstraete and J. Steelant	249
Aerodynamic Characteristics of a Deformable Membrane Aerofoil V. Šajn, I. Petrović and F. Kosel	255

Development of a Kinematic Model of a Proto-Wing M. Bayfield, L. Kark and T.J. Barber	261
Automotive Drag Reduction through Distributed Base Roughness Elements I. Robertson, A. Becot, A. Gaylard and B. Thornber	267

Chapter 4: Biomechanics, Biomimetics and Biomedical Engineering

Using Two-Way Fluid-Structure Interaction to Study the Collapse of the Upper Airway of OSA Patients M.Y. Zhao, T.J. Barber, P.A. Cistulli, K. Sutherland and G. Rosengarten	275
Computational Simulation of Mechanical Microenvironment of Early Stage of Bone Healing under Locking Compression Plate with Dynamic Locking Screws S. Miramini, L.H. Zhang, M. Richardson and P. Mendis	281
A Finite Element Investigation into the Effects of Head Size and Trunnion Design on the Micromotion at the Head-Neck Interface in THR W. Theodore, J. Pierrepont, Q. Li and B. Miles	287
Computational Fluid Dynamics of Liquid and Foam Sclerosant Injection in a Vein Model K.C. Wong, T. Chen, D.E. Connor, M. Behnia and K. Parsi	293
Impaction Loads Resulting in Intraoperative Periprosthetic Femoral Fracture: A Finite Element Study C.C. Ioannidis, D. Dabirrahmani, Q. Li, Z.P. Zhang, J.N. Chen and R. Appleyard	299
Magnetic Resonance Imaging (MRI) Based Finite Element Modeling for Analyzing the Influence of Material Properties on Menisci Responses K.K. Zheng, J.N. Chen, C. Scholes and Q. Li	305
Mechanics of Microfilaments Networks: A Cross-Scales Study T. Li, Y.T. Gu and B.C. Zhang	310
Fluid-Structure Interaction Analysis on the Effects of Bifurcation Angle Asymmetry in a Left Main Coronary Artery Model A. Javadzadegan, B. Fakhim, R.T. Nakkas and M. Behnia	316
Validate Mandible Finite Element Model under Removable Partial Denture (RPD) with <i>In Vivo</i> Pressure Measurement H. Suenaga, J.N. Chen, W. Li, K. Yamaguchi, K. Sasaki, Q. Li and M.V. Swain	322
Numerical Simulation of Biomechanical Behaviours in Novel Dental Restorations Z.P. Zhang, K.K. Zheng, T.T. Le, W. Li, M.V. Swain and Q. Li	327
Effect of Stenosis Eccentricity in a Model of Bifurcated Coronary Artery B. Fakhim, A. Javadzadegan, R.T. Nakkas and M. Behnia	332
Solid and Fluid Simulations of Vertebral Artery Stenosis Treated with Stents with Different Shapes of Link A.K. Qiao and Z.Z. Zhang	338
Senile Coconut Palm Hierarchical Structure as Foundation for Biomimetic Applications O.M. Gonzalez, B.P. Gilbert, H. Bailleres and H. Guan	344
A Nearest Neighbor Finite Element Method (NNFEM) for Validating Left-Ventricular Regional Strain from Displacement Encoding with Stimulated Echoes (DENSE) MRI, Compared to Tagged MRI J. Kar, A.K. Knutsen, B.P. Cupps and M.K. Pasque	350
Analysis of Transient Bioheat Transfer in the Human Eye Using Hybrid Finite Element Model Z.W. Zhang, H. Wang and Q.H. Qin	356
Drying Kinetics, Quality Changes and Shrinkage of Two Grape Varieties of Italy W. Senadeera, G. Adiletta, M. di Matteo and P. Russo	362
Jet Formation in Micro Post Arrays R.S. Pawell, R.A. Taylor, D.W. Inglis and T.J. Barber	367
Optimization of CFD Meshing for Stented Vessel Geometries A. Lotfi and T.J. Barber	373
The Contrast of Two Kinds of Microwave Antenna SAR Simulation Q. Nan, X.M. Guo and F. Zhai	379

Comparing Contact Pressure Induced by a Conventional Complete Denture and an Implant-Retained Overdenture	
J.N. Chen, R. Ahmad, M.V. Swain, W. Li, H. Suenaga and Q. Li	384

Chapter 5: Geomechanics and Geotechnics

Coupled Two Component Fluid Flow in Deformable Porous Media – Towards a Numerical Model for Geological Carbon Storage	
D.L. Lincoln and T. Bennett	393
Analysis of Soil Penetration Problems by High-Order Elements	
M. Nazem, J.P. Carter and M. Kardani	401
Discretization Errors of Random Fields in Finite Element Analysis	
J. Huang, D.V. Griffiths, A.V. Lyamin, K. Krabbenhoft and S.W. Sloan	405
Particle Finite Element Simulation of Granular Media	
X. Zhang, K. Krabbenhoft and D.C. Sheng	410
Numerical Simulation of CPT Cone Penetration in Sand	
G.P. Kouretzis, D.C. Sheng and D. Wang	416
Analysis of Inclined Strip Anchors in Sand Based on the Block Set Mechanism	
S.B. Yu, J.P. Hambleton and S.W. Sloan	422
Coupled Finite Element Analysis of Partially Embedded Offshore Pipelines during Vertical Penetration	
Y. Ansari, G.P. Kouretzis and D.C. Sheng	428
Interaction between Upheaval/Lateral and Propagation Buckling in Subsea Pipelines	
H. Karampour and F. Albermani	434
A Comparison of Conic Programming Software for Finite Element Limit Analysis	
N.C. Podlich, A.V. Lyamin and S.W. Sloan	439
Distinct Element Modeling of the Effect of Joint Persistence on Dynamic Fracturing of Jointed Rock Masses	
Z. Aliabadian and M. Sharafisafa	445
Limiting Force Profile and Laterally Loaded Rigid Piles in Sand	
H.Y. Qin and W.D. Guo	452
Lateral Boundary Effect in Centrifuge Tests for Spudcan Penetration in Uniform Clay	
S.N. Ullah, Y.X. Hu, D. White and S. Stanier	458
Cavity Expansion in Soil of Finite Radial Extent	
M. Pournaghiazar, A.R. Russell and N. Khalili	464
Evaluation of Mixed Formulation for Modelling RC Columns with Bond Slip	
C.L. Lee and F.C. Filippou	470
A Further Study on the Mechanism of Pre-Splitting in Mining Engineering	
E.F. Salmi and S. Hosseinzadeh	476
A Three Dimensional Plasticity Model for Sands Based on State Concept	
S. Das, B. Bradley and M. Cubrinovski	482
A Numerical Approach for the Determination of the Primary Fabric of Granular Soils	
H.D. To, S.A. Galindo-Torres and A. Scheuermann	489
Isogeometric Boundary Element Method for the Simulation in Tunneling	
B. Marussig, G. Beer and C. Duenser	495
Material Point Method Modelling of Granular Flow in Inclined Channels	
W.T. Sołowski and S.W. Sloan	501
An Overview and Recent Developments of Distinct Lattice Spring Model on Dynamic Fracturing of Rock	
G.F. Zhao and N. Khalili	507
Micro-Mechanics of Contact Erosion	
S.A. Galindo-Torres, A. Scheuermann, D. Williams and H. Mühlhaus	513
Smoothed Particle Hydrodynamics Applied to the Modelling of Landslides	
V. Lemiale, L. Karantgis and P. Broadbrige	519
An Analysis of the Strength of Anisotropic Granular Assemblies via Discrete Methods	
S.A. Galindo-Torres, D. Pedroso, D. Williams and H. Mühlhaus	525

Parallelization of DEM-LBM Using Domain Decomposition J. Li, X.L. Cui, A.H.C. Chan and J. Bridgeman	531
---	-----

Chapter 6: Structural and Solid Mechanics

Underwater Impulsive Loading-Induced Dynamic Failures of Monolithic Composite Panel P. Tran, T.D. Ngo and P. Mendis	539
Hybrid Probabilistic and Non-Probabilistic Dynamic Analysis of Vehicle-Bridge Interaction System with Uncertainties N.G. Liu, W. Gao, C.M. Song and N. Zhang	545
A Theoretical Study on Bending Behaviour of Conducting Polymer Actuator E. Burke and C.H. Yang	551
Sustainable and Deconstructable Semi-Rigid Flush End Plate Composite Joints A. Ataei and M.A. Bradford	557
Statistical Independence and Independent Component Analysis Y. Unnisa, D. Tran and F.C. Huang	564
Characterisation of the Shear Stud-Concrete Connection Using Finite Element Analysis D.J. Lowe, R. Das, G.C. Clifton and N. Navaranjan	570
Modelling Geometric Imperfections of Spatial Latticed Structures Considering Correlations of Node Imperfections G.B. Chen, H. Zhang, K.J.R. Rasmussen and F. Fan	576
Impact of the Piston Secondary Motion on its Slap Force B.C. Zhang, T. Li, H.F. Zhan and Y.T. Gu	582
Parametric Studies of Semi-Rigid Flush End Plate Joints with Concrete-Filled Steel Tubular Columns A. Ataei and M.A. Bradford	588
A Complementarity Approach for Elastoplastic Analysis of Frames with Uncertainties C.W. Yang, F. Tin-Loi, S. Tangaramvong and W. Gao	594
Generalised Beam Theory (GBT) for Shear Deformable Stiffened Sections G. Taig and G. Ranzi	600
Finite Element Model for Analysis of Time-Dependent Behaviour of Concrete-Filled Steel Tubular Arches K. Luo, Y.L. Pi, W. Gao and M.A. Bradford	606
Seismic Behaviour of RBS and AW-RBS Moment Resistant Connections in Double I-Beams S.M.E. Sepasgozar, M. Naghipour and A. Akbarnezhad	612
Nonlinear Long-Term Analysis of Timber-Concrete Composite Structures with Finite Element-Finite Difference Scheme N. Khorsandnia, H.R. Valipour and K. Crews	618
A Comparative Study on the Time-Dependent Analysis of Composite Beams Using Available Modelling Techniques O. Vallati, F. Gara, G. Ranzi and G. Leoni	625
FE Modelling of Storage Rack Frames F. Sena Cardoso and K.J.R. Rasmussen	631
Hygro-Thermal Modelling of Concrete Exposed to High Temperatures J.M. de Burgh, H.R. Valipour and S.J. Foster	637
Springback Investigation in Roll Forming of a V-Section A. Abvabi, J. Mendiguren, B.F. Rolfe and M. Weiss	643
A Cohesive Model with Frictional Effects on Strength and Stiffness under Transverse Compression I. Guimatsia and G.D. Nguyen	649
Investigation of Bond Strength of FRP-to-Concrete Interface Y.G. Yu, Y.X. Zhang and Y.S. Huang	655
Finite Element Analysis of FRP-Reinforced Concrete Beams with Bond-Slip Effect X.S. Lin and Y.X. Zhang	661
Multi-Scale Overlapping Domain Decomposition to Consider Local Deformations in the Analysis of Thin-Walled Members R.E. Erkmén	667

An Efficient Finite Element Modeling of Composite Stiffened Shells H. Sheikh and L. Huang	673
---	-----

Chapter 7: Vibration and Dynamics

Vibration Analysis of Carbon Nanotube Reinforced Composite Plates F. Lin and Y. Xiang	681
Modelling of Guided Wave Propagation with Spectral Element: Application in Structural Engineering Y. Wang and H. Hao	687
Effect of Bearing Dynamic Properties on the Lateral Vibration of a Flexible Rotor H. Wu	693
Dynamic Analysis of Structures with Interval Parameters under Stochastic Process Excitation D.M. Do, W. Gao, C.W. Yang and C.M. Song	699
Effective Models of PZT Actuators for Numerical Simulation of Elastic Wave Propagation T.W. Wang and C.H. Yang	705

Chapter 8: Fracture and Damage

A Novel FRF-Based Damage Localisation Method Using Random Vibration M.M. Alamdari, J.C. Li and B. Samali	713
Crack Propagation Modeling with Scaled Boundary Polygons E.T. Ooi, C.M. Song and F. Tin-Loi	719
Application of PDS-FEM for Simulating 3D Wing Crack Growth M.L.L. Wijerathne, M. Hori, T. Okinaka and H. Sakaguchi	725
An Enriched Constitutive Model for Fracture Propagation Analysis Using the Material Point Method G.D. Nguyen	731
Sensitivity of Stress Intensity Factors with Respect to the Crack Geometry by the Scaled Boundary Finite Element Method M.S. Chowdhury, C.M. Song and W. Gao	737

Chapter 9: Impact and Explosive Modelling

High Velocity Impact Modelling of Sandwich Panels with Aluminium Foam Core and Aluminium Sheet Skins C.J. Liu, Y.X. Zhang, Q.H. Qin and R. Heslehurst	745
An Explicit Lagrange Constraint Method for Finite Element Analysis of Frictionless 3D Contact/Impact Problems H. Chen, Y.X. Zhang, M.Y. Zang and P.J. Hazell	751
Effect of Textile Architecture on Energy Absorption of Woven Fabrics Subjected to Ballistic Impact C. Yang, P. Tran, T. Ngo, P. Mendis and W. Humphries	757
Revolute Joint Approach to Model Joint Mechanism in Water-Filled Road Safety Barriers M.I. Thiyahuddin, Y.T. Gu and D.P. Thambiratnam	763
Finite-Element Modelling of Ballistic Impact of Plain-Woven Aramid Fabric E.A. Flores-Johnson, J.G. Carrillo, R.A. Gamboa and L.M. Shen	769
Numerical and Theoretical Study of Concrete Spall Damage under Blast Loads J. Li and H. Hao	774
Numerical Simulation of Free-Air Explosion Using LS-DYNA S.K. Hashemi and M.A. Bradford	780
FEM/DEM Modelling of Hard Body Impact on the Laminated Glass X.D. Chen, A.H.C. Chan and J. Yang	786

Chapter 10: Structural and Topology Optimization

Selection of Integral Functions for Normal Mode Analysis in Topology Optimization L.Y. Tong and Q.T. Luo	795
Topology Optimisation of 3D Structures Using the Moving Iso-Surface Threshold Method S. Vasista and L.Y. Tong	801
Optimal Retrofitting of Structures Using Braces S. Tangaramvong and F. Tin-Loi	807
Topology Optimisation of Composites Containing Base Materials of Distinct Poisson's Ratios X.R. Du, Y.M. Xie, X.Y. Yang and Z.H. Zuo	813
Automated High Quality Isosurface Modeling Technique for Iterative Two-Phase Problems C.C. Chang and Q. Li	818
Topology Optimization of Photonic Band Gap Crystals X.D. Huang, S.W. Zhou, Y.M. Xie and Q. Li	824
Application of Evolutionary Structural Optimisation; Reinventing the (Bicycle) Wheel E.A. Merten	830
An Application of Bi-Directional Evolutionary Structural Optimisation for Optimising Energy Absorbing Structures Using a Material Damage Model D. Stojanov, B. Falzon, X.H. Wu and W.Y. Yan	836
Buckling-Induced Retraction of Structured Spherical Shell under Pressure S. Lin, S.W. Zhou, Y.M. Xie, X.D. Huang and Q. Li	842
Development of a Hypersonic Aircraft Design Optimization Tool B.J. Morrell, D.J. Munk, G.A. Vio and D. Verstraete	847
