

Table of Contents

Preface, Organizing Committee and Sponsors

Chapter 1: Computational Solid Mechanics

Simplified Method of Seismic Performance Analysis for Pile-Supported Wharf Structures B. Wang, Y. Li, J.Q. Xu, X.J. Sun and H.J. Li	3
Simplified Calculation of Internal Force of Steel Structure in Torsion X. Chen, J.P. Wang and X. Yan	12
A Non-Probabilistic Analysis Method on Reliability of Crack Propagation Life Y.E. Du, S.N. Wang and X.Z. Yan	18
A Numerical Study on the Large Compressive Deformations of Closed-Celled Rubber Foams Z.G. Fan	23
An Object-Oriented Framework for Interface Stress Element Method B. Feng, B. Jin, R.Q. Lan and H. Chen	27
Buffeting Internal Force Response Analysis for Stable Type Suspension Bridge M.X. Geng, B.N. Qu, J.L. Peng and X.C. Wang	32
Simulation of Particle Reinforced Composite Materials in Macro- and Meso-Scales J. Guo, R. Guo and W.H. Gai	37
Multi-Body Contact Dynamics Analysis of Angular Contact Ball Bearing K.F. Jin and T.Q. Yao	45
Numerical Computation of Complex Stress Intensity Factors of Interface Cracks in Bi-Materials Based on Photoelastic Theory P.C. Li and B.C. Yang	50
Fluid-Structure Interaction Dynamics for Laminated Plate/Shell Topology Optimization H.L. Ye, Y.M. Li, Y.M. Zhang and Y.K. Sui	55
A Bidirectional B-Spline QR Method for the Analysis of Reinforced Concrete Shear-Wall with Opening S.B. Li, Q.G. Liang and D.Y. Mo	60
Natural Vibration Analysis of Piezoelectric Smart FGM Plate by Spline Finite Point Method S.B. Li, J. Huang and R. Qin	66
Numerical Investigations on Bearing Capacity of Grid-Stiffened Cylindrical Shells Subjected to Local Laser Irradiation H.H. Liu and L.C. Long	72
Optimization Algorithm of Crack Initial Angle Using the Extended Finite Element Method Y. Su, S.N. Wang and Y.E. Du	77
A Kernel-Enriched Quadratic Convex Meshfree Approximation P.J. Chen and D.D. Wang	85
Effect of Bolt Slippage on the Static Response of Lattice Structure P. Wang, H.B. Chen, W.D. Huang, Y. Lin and H.W. Zhang	90
A Review of the Extended Finite Element for Fracture Analysis of Structures L. Wu, L.X. Zhang and Y.K. Guo	96
VCFEM Method Mixed with Finite Element Method Calculation of Numerical Simulation J.L. Xu, R. Guo and W.H. Gai	103
Nonlocal Analytical Formulas for Plane Crack Elements and Semi-Analytical Element Method for Mode I Crack C.L. Zheng and Z. Yao	110
Optimization Design for Coupling Beam Dampers of Shear Walls Z. Zhang, J.P. Ou and Z. He	115
Research on Fatigue Load Parameters of Steel-Concrete Joint of Bridge Used for Highway Traffic and Light-Rail Traffic W.S. Zheng	122

Diamond Circular Saw Blades Noise Attenuation and Finite Element Modal Analysis M.S. Zhang, P.X. Zhu, J.J. Ke and Y.K. Zhu	129
Shape Control of Smart Beams Using PZT and SMA Actuators with the Spline Finite Point Method S.B. Li, L.J. Jiang, C.M. Mo and R. Qin	134
A 3-node Shaft Element for Main Shaft Vibration FE Analysis B. Bai and L.X. Zhang	141
Stability Analysis of Double-Walled Carbon Nanotubes with Initial Stress Y. Yan, W.Q. Wang and L.X. Zhang	147
Wet Modal Analysis of Cylindrical Pier under the Incentive of Fluid Excitation J. Zhou, Y.T. Zhou, R. Li and H. Ren	152
Study of Stress Wave Propagation in SHPB with NHD MOC M.L. Xu, G.Y. Zhang and R.Q. Zhang	158
Analysis of Euler-Bernoulli Beam with Piecewise Quadratic Hermite Finite Elements C.Y. Li, H.J. Zhang and D.D. Wang	163
Generalized Gradient Based Digital Image Correlation Method for Displacement with Subpixel Accuracy R. Zhang	168
Dynamic Characteristics Simulation and Analysis for the Stable Type Suspension Bridge X.C. Wang, B.N. Qu, J.L. Peng and M.X. Geng	173
Dynamic Buckling of Single-Walled Carbon Nanotubes under Axial Impact Loading C.A. Xiong and W.G. Jiang	178
MD Simulation on Evolution of Micro Structure and Failure Mechanism around Interactional Voids in Pure Al Y.Q. Yuan, H.Y. Chen, X.G. Zeng and Y.F. Hu	183
Aerodynamic Shape Deformation of Underwing Nacelle-Pylon Configuration Based on B-Spline Surface X.Y. Ma, J.Q. Ai, J.X. Shan and Y.H. Li	191
FEM Analysis on a Tensile Loaded Copper Plate in Meso and Macro Scale F.H. Gao, Y.J. Chen, R. Guo, K. Wang and Y. Huang	196
Bending Analysis of Carbon Nanotubes Based on Analytical Nonlocal Timoshenko Beam Model Y. Yang	202
Mathematical Analysis for Wave Propagation Characteristics of Fluid-Filled Nonlocal Carbon Nanotubes Y. Yang	209
The Development and Application of Meshless Method Y. He and J.M. Zhang	214

Chapter 2: Computational Fluid Dynamics

Influencing Factors Analysis of the Shock-Induced Separation for Supercritical Airfoil X. Xu, D.W. Liu, D.H. Chen and Y.J. Wang	221
Parallelized Aeroelastic Investigation Based on Delaunay Graph Mapping R.J. Fan, H.C. Gao and Z. Zhou	227
Extreme Transient Flow in Pumping System due to a Tripping Pump Disturbance G.W. Cai and L.X. Zhang	233
Numerical Simulation on Fluid-Solid Coupling of Gate with Different Structure Types of Hemline in Deep Hole J.X. Wang, L.Q. Chen and Y.T. Chen	239
Numerical Analysis on the Rapid Starting Period in a Screw-Type Centrifugal Pump X.R. Cheng, R.N. Li, W.L. Guo, N. Zhang and Y. Gao	244
Numerical Investigation of Flow around a Triangle Cylinder Using a Multiscale Turbulence Model H. Dong, G. Gao, Z.Q. Li, Y.Y. Tang, H. Xu and J. Guo	253
Improving the Robustness of Adjoint-Based Airfoil Drag Reduction Design Y.H. Fan	259

Characteristics of Train Wind and Analysis of Personnel Safety in Double-Line Shield Tunnel	
R.Z. Fei, L.M. Peng, C.H. Shi and W.C. Yang	264
Delayed Detached-Eddy Simulation and Application of a Coflow Jet Airfoil at High Angle of Attack	
W.B. Gan, Z. Zhou, X.P. Xu and R. Wang	270
Numerical Analysis of CO Concentration Distribution on Extraction Ventilation Type Tunnel	
T. Guo, J. Zhou, X.N. Liu and B. Shang	277
Large Eddy Simulation of Francis Turbine Flow Fields under Small Opening Condition	
T. Guo, J. Zhou and X.N. Liu	281
Numerical Investigations for the Effect of Slender Body on Dynamic Rolling Characteristics of a 80°/60° Double Delta Wing	
B. Han, M. Xu, X. Pei and X.M. An	286
A Lattice Hydrodynamic Model Considering the Following Lattice and its Stability Analysis	
X.L. Han and C. Ouyang	293
Dynamic Stall Control by Undulatory Deformation	
L. Ge and W.R. Hu	299
Numerical Simulation and Experimental Validation of Three-Dimensional Unsteady Multi-Phase Flow in Flushing Process of Toilets	
J.G. Hu, Y.S. Sun and Z.R. Zhang	304
Buried High Pour-Point Oil Pipeline Shutdown Temperature Drop Research Based on FLUENT	
A.H. Long and Y.J. Huo	312
Lattice Boltzman Simulations of Cavity Flow Using CUDA	
X.P. Li, H.M. Zhang and X.X. Zhang	316
Improvement of One-Dimensional Analytical Model of Rotating Long Orifice with Chamfered or Radiused Inlet	
H. Wu, P. Li, D.D. Liu and Z. Tao	320
Research on the Optimization Design of Supersonic Swirling Separator	
K.X. Li, Q.T. Eri, C.Y. Yan, W.A. Ji and P.R. Su	332
The Study of Flowing Law of Typical well Patterns in Low Permeability Reservoirs	
S.R. Yang and B.Y. Li	338
Numerical Simulation on Circular-Arc Grid-Fin Configurations	
Y.H. Li, J.X. Shan, J.C. Su and Y. Huang	342
Comparison of the Wrap-Around Fins and the Planar Fins in Aerodynamic Parameter	
X. Liu, S.J. Tang and J. Guo	347
Lattice Boltzmann Method for the Simulation of High Reynolds Number Flows	
Q. Liu, W. Xie, L.Y. Qiu and X.S. Xie	352
Investigation on the Multi-Objective Optimization of Supercritical Airfoil Based on Nondominated Sorting Genetic Algorithm	
D.W. Liu, X. Peng, X. Xu and D.H. Chen	357
Numerical Simulation on VIV of a Spring-Mounted Rigid Cylinder through Fully Coupling with Fluid	
Z.M. Luo and L.X. Zhang	363
Computer Simulation of a Drop-Shaped Particle Settling in a Newtonian Fluid	
D.M. Nie and M.J. Zheng	369
Combination of DES and DDES with a Correlation Based Transition Model	
L. Qiao, J.Q. Bai, J. Hua and C. Wang	374
OpenCL-Based GPU Acceleration of ISPH Simulation for Incompressible Flows	
L.C. Qiu	380
Numerical Simulation Research on Aerodynamic Characteristics of the Fixed Transition Airfoil	
J.X. Shan, Y. Huang, X.Y. Ma, Y.H. Li and J. Bai	385
Numerical Simulation and Experimental Study on Hydraulic Performance of Centrifugal Pump's Impeller Based on FINE	
Y. Shang, X.B. Liu and X.J. Yu	390

Numerical Simulation of Viscous Flow in a 3D Lid-Driven Cavity Using Lattice Boltzmann Method	395
D.B. Dong, S.J. Shi, Z.X. Hou and W.S. Chen	
Aero-Acoustics Computations of Square Cylinder Using the Lattice Boltzmann Method	400
H.Q. Si, B. Wang, Y. Shi and X.J. Wu	
Numerical Simulation of Two-Dimensional Flows Using the Feedback Force Immersed Boundary Method	406
S.Q. Su and W.Q. Wang	
CFD Analysis of the Coolant Mixing within the Upper Plenum of a Pressurized Water Reactor (PWR)	411
F.C. Zhang, S.G. Tan, X.H. Zheng and J. Chen	
Numerical Investigation of the Compressible Flat-Plate Turbulent Boundary Layer with Extended GAO-YONG Turbulence Model	416
Y.Y. Tang, Z.Q. Li, Y. Wang, Y.C. Di, H. Xu and Q. Yang	
Study on Comb Labyrinth Seals of Francis Turbine at Different Reynolds Number	423
W.Q. Wang, S.Q. Su and Y. Yan	
Numerical Calculation of NACA0015 Rudder's Open Water Hydrodynamic Forces	427
X. Wang, Z.S. Gao, J.J. Hou and A.G. Shi	
Prediction of Hydrodynamic Performance of Hydrofoil with Suction and Jet Equipment	432
C. Wang, Y. Xiong, G.L. Wang and H.P. Guo	
Numerical Investigation of the Gas-Liquid Two-Phase Flow around the Square-Section Cylinder Using a Multi-Scale Turbulence Model	437
H. Xu, Z.Q. Li, H. Dong, Y.C. Di and Y.Y. Tang	
Application of MUSTA Scheme for Simulation of Dilute Particle-Gas Two-Phase Flow	446
X.L. Yang, X.Q. Zhou, L. Yang and Z.W. Huang	
Numerical Simulation on Ventilation Effect of Train-Induced Wind in Subway	450
W.C. Yang, L.M. Peng, C.H. Shi and Z.L. Hu	
Numerical Investigation of Three-Dimensional Flow over a Swept Backward-Facing Step Using a Multi-Scale Turbulence Model	455
Q. Yang, Z.Q. Li, X.C. Shao, H. Dong and Y.Y. Tang	
An Investigation on Numerical Simulation Method for Aero-Acoustics Based on Acoustics Analogy	462
D.G. Yang, Y.H. Wu, J.M. Liang and J. Liu	
The Static Analysis of Pilot Type Zero Steady-State Error of Water Hydraulic Pressure Reducing Valve	468
H. Yang, J. Luo, S. Hui, S.Y. Qiu, R.P. Xue and Y.B. Zhang	
Simulation on Balde Duct Vortex in a Francis Turbine Runner Based on S-A Model	476
Y.Z. Zeng and X.B. Liu	
Numerical Simulation of Unsteady Flow and Flow Induced Sound of Airfoil and Wing/Plate Junction by LES and FW-H Acoustic Analogy	479
N. Zhang, S.J. Lv, H. Xie and S.L. Zhang	
Numerical Simulation of Unsteady Flow in a Submersible Axial Flow Pump	486
X.X. Zhang, H.M. Zhang and X.P. Li	
Effects of Weakly Compressibility on Propagating Properties of Water Hammer in a Long Pipe	490
K.X. Zhou and L.X. Zhang	
Analytical Solution of Transient Flow in Pipe with Junction Coupling due to Hydro-Turbine Vane Motion	498
K.X. Zhou and L.X. Zhang	
Numerical Simulation of Pressure Difference about Curve Ball in Flight	505
X. Zhang, H.M. Cheng, J.Y. Li, S.Q. Zhou and T.X. Yang	
Numerical Simulation of Cavitation Flow in a Centrifugal Pump	509
W.G. Zhao, X.X. He, X.Y. Wang and Y.B. Li	
Engineering Extrapolation to Flight Reynolds Number for Supercritical Airfoil Pressure Distribution Based on CFD Results	517
D.W. Liu, X. Xu, Z. Wei and D.H. Chen	
Numerical Analysis of the Vortex Flow Field in Cyclone Dust Collector	524
P.C. Li and B.C. Yang	

Two-Phase CFD Study of Coolant through a 5×5 Rod Bundles with Grid Spacers S.G. Tan, S.W. Li, Y.J. Jiao, Q. Lu, G.B. Wang and Z.Y. Wang	529
A Robust and Practical Multi-Moment Finite Volume Model for Computational Fluid Dynamics F. Xiao and B. Xie	534
Numerical Simulation on Backwater Downstream of Aerators in Spillway Tunnel with Ultra-Low Froude Number Flow L.Q. Chen, J.X. Wang and Y.T. Chen	539
A 3D Numerical Model for Free Interfacial Flows and Applications to Offshore Waves with Submerged Obstacles B. Xie and F. Xiao	544
Simulation Method for 3-D Wind Field over Complex Terrain with Asymmetrical Mountains H.R. Hu and G.X. Hong	549
Large Eddy Simulation of Unsteady Flow in a Mixed Flow Pump Guide Vane Y.B. Li, R.N. Li and X.Y. Wang	555
Research on High Vacuum Phenomenon Produced by Aquatic Vortex X.C. Shao and G. Gao	561
Numerical Simulation and Size Optimization of the Flow Channel of Rectangular Micro-Channel Heat Sink Y. He, B.D. Shao, H.M. Cheng and Y.J. Tang	568
Application of Vortex Lattice Method and Surface Spline Function in Terrain-Induced Wind Field C. Tang and G.X. Hong	574
Theoretical and Numerical Study of Performance Prediction of Centrifugal Pumps as Turbines X.H. Wang, J.H. Yang, F.X. Shi and R.H. Zhang	579
Suppression Effect of Jet Flow on Aerodynamic Noise of 3D Cavity P.X. Yu, J.Q. Bai, B.Z. Guo, X. Han and S.S. Han	588

Chapter 3: Applied Mathematics

Studies on Evaluation Methods of Medium-Term Inspection about Master Degree Thesis with Interval Number's Sorting Way Y.E. Bao and E.D. Bai	599
LASSO-Type Variable Selection Methods for High-Dimensional Data G.H. Fu and P. Wang	604
Discussion for Strictly α-Diagonally Dominant Matrices According to Circuit and its Application G.C. Han, H.T. Yang and H.S. Gao	610
Simple but Efficient Method for Integrating $1/r$ Singularities F. Liu, H. Zheng and C.G. Li	615
On the Construction of Nonnegative 5×5 Matrices from Spectrum Data Z.B. Liu, Z. Tu and C.F. Xu	621
The Inverse Eigenvalue Problem for Symmetric Doubly Arrow Matrices K.M. Wang, Z.B. Liu and X.Y. Fei	625
Simulation of Water Droplet Merging under Shock Wave Using Real Ghost Fluid Method R.C. Shi, S.L. Xu and Y.J. Zhang	628
Symplectic Partitioned Runge-Kutta and Symplectic Runge-Kutta Methods Generated by 2-Stage RadauIA Method J.B. Tan	633
A High Accuracy Numerical Inversion Method in Solving the Sobolev Differential Equations L. Wang and L. Zhang	637
New Numerical Quadrature of Integrand with Singularity of $1/r$ and its Application D.D. Xu, H. Zheng and K.W. Xia	641

Numerical Integral Independent of Frequency in the Boundary Element Method for Acoustic Scattering Z.Y. Yan and C.Z. Li	650
One Class Series Involving Reciprocals of Binominal Coefficients L.P. Zhang and W.H. Ji	655
A Legendre-Gauss Collocation Method for the Multi-Pantograph Delay Differential Equation J.M. Zhang and L.J. Yi	661
A New Method of Multi-Attribute Decision-Making Based on Grey Relational Analysis with Time Series Y. Zhang	666
New Development of the P and H-P Version Finite Element Method with Quasi-Uniform Meshes for Elliptic Problems J.M. Zhang and Y. He	671
A Study of FCM Clustering Algorithm Based on Interval Multiple Attribute Information L. Guo, G.F. Liu and Y.E. Bao	676
Comparison of Two Sixth-Order Compact Finite Difference Schemes for Burgers' Equation X.G. He, Y. Yang, P. Zhang and X.H. Zhang	681
On-Line Monitoring the Stationarity for Time Seires Z.S. Chen	687
Efficient Rainbow Options Pricing Methods Based on Two-Dimensional Fourier Series Expansions D. Ding, Q.J. Meng and J.Y. Zheng	692
Effects of Noise on the Approximate Entropy of Fractional Brownian Motion Sequence X.Y. Hu, L. Wan and D.Y. Xie	698
Calculation of Fourth-Order Tensor Product Expansion by Power Method and Comparison of it with Higher-Order Singular Value Decomposition A. Ishida, T. Noda, J. Murakami, N. Yamamoto and C. Okuma	703
A Blind Watermarking Method Based on Space Reconstruction X.H. Tan	712
Existence of Minimizer to the Ginzburg-Landau Free Energy of Ferromagnetic System L.M. Li and H. Luo	717
An Improved ID3 Algorithm J.F. Li, J.H. Lei, X.X. Zhao, C.C. Zhang and X.X. Han	723

Chapter 4: Computational Analyze of Nonlinear Systems

Global Attractor of the Liquid Helium-4 System in H^k Space Z.B. Hou and L.M. Li	731
Stochastic Nonlinear Aeroelastic Analysis of a Swept Wing Based on Nastran Y. Li, J. Yang and N. Chang	738
Study on Aggression of Lane-Changing on Two-Lane Highway Including a Bus Y. Yi and Z.P. Li	743
Experiment Study of Chaos Motion of Cable-Stayed J.H. Li	748
Nonlinear Simulation of Aircraft Longitudinal Flight Dynamics T.O. Mohammed, X.J. Wu and D.C. Li	753
Nonlinear L_2 Design for the Generator Hamiltonian System Included Excitation and PSS J. Qian, Y. Zeng, L.X. Zhang and Q. Song	759
An Analysis Method of Static Aeroelastic Response with Nonlinear Aerodynamic Data on 3D Bodysurface Panel Element Y.K. Wang, Z.Q. Wan and S. Liu	764
Property of Conjugacy between Two Chaos Maps H.Q. Wang	771
Evolution Model Analysis for Comprehensive Transportation Structure L.P. Wu, C.P. Pang and B. Qian	775
A New Approach for the Shape Optimization of Complex Nonlinear Structures Z.H. Yao and Y.T. Wei	780

A Simple Numerical Simulation Method for Lorenz System Families C.L. Zhang and Y. Zeng	786
Subharmonic Bifurcations and Transition to Chaos in a Pipe Conveying Fluid under Harmonic Excitation Y.X. Geng and H.Z. Liu	791
Stability of Subharmonic Oscillations in a Pipe Conveying Fluid under Harmonic Excitation Y.X. Geng and H.Z. Liu	796
Model Analysis for Comprehensive Transportation Structure Evolution Based on Catastrophe Theory L.P. Wu, C.P. Pang and B. Qian	801
Levitation System Controller Design Based on the Implicit General Predictive Control Algorithm Y.Y. Wang and J. Li	806

Chapter 5: Applied Computational Methods in Engineering Research

Strength and Displacement Analysis of a Nuclear Power Giant Lifting Grid and Steel Liner J.M. Ju	815
An Efficient Surrogate Model Construction Strategy for Large-Scale Output Problems J.Q. Bai, Y.S. Qiu and L. Qiao	820
Aircraft Evacuation Simulation: A Developing Method to Improve Aviation Safety D.W. Chen, Z.G. Qian and C.J. Xue	825
Analysis on Cracking Cause and Propagation Trend of Concrete Dam Q. Chen, Y.Q. Gong and Y.F. Qi	831
The Finite Element Analysis of the Large Horizontal Axis Wind Turbine Generator Tower W. Chen, S.Y. Wang, L. Cao, H.M. Wang and J. Yao	836
Vehicle Classification Algorithm Based on Fuzzy SVM Models Y. Chen, Y.H. Li, F. Zhang and F. Zhou	841
A New Method for Improving the Stress Status of the Dam J.H. Cui, Y.F. Qi and J. Su	849
Time-Accurate Simulation of the Aircraft External Store Separation Y.C. Di, G. Gao, J.L. Xu, X.C. Shao and Q. Yang	854
An Overview of VV&A Methods for Conceptual Model X.J. Ding and F.X. Sun	860
Multi-Cup Isoflux Gas Anchor Numerical Simulation of Oil-Water Separating S.R. Yang, C.C.Y. Fu and L.L. Liu	865
Karst Rocky Desertification Remote Sensing Monitoring by Integrating Land Use Diagnoses in Southeast of Yunnan Province S. Gan, X.P. Yuan, G. Sun, X.L. Zhang and Y. Li	869
Response of Sluice-Dam Structure on a Strong Earthquake Excitation L. Ge, L.X. Zhang and Z. Li	874
Finite Element Modeling and Experimental Verification of a Suspension Electromagnetic Energy Harvester S.W. Guan, X.B. Shan, T. Xie, R.J. Song and Z.L. Xu	879
Numerical Simulation on the Form of Reinforcement of Reinforced Concrete Beam with Openings X. Han and Z. Liu	884
SPH Simulation of Free Overfall in Open Channels with Even and Uneven Bottom Q.Z. Hou, L.X. Zhang, A.S. Tijsseling and A.C.H. Kruisbrink	889
A Constraint Solving System and Approach Based on Graph Theory and Floating DOF L. Jiang, B.Y. Xie and K. Hu	894
Establishment and Validation of a 1-D Numerical Model of Unsteady Flow and Sediment Transport in the Three Gorges Reservoir (TGR) R.Y. Huang and J. Zhang	901
Macroscopic Modeling of Pedestrian Flow Considering the Herd Behavior Y.Q. Jiang	906
Static and Dynamic Analysis of Intake Tower Structure Y.X. Jiang, J.C. Yue and L.M. Ye	912

Study on Parallel Computing Method of 3-D Dynamic Analysis of Large-Scale Structure R.Q. Lan and B. Feng	916
Study on Management and Control of Radar Based on Genetic Algorithms M. Lei and J. Xu	923
Simulation of Power Plant Subsynchronous Resonance Possibility Based on ADPSS X.M. Li, H. Wang, Z.A. Zhang, M. Liu and D.C. Xu	932
Multi-Core Desktop Parallelized Water Quality Model Applied to Xiangxi River, China J. Li, Z.W. Jin and S.M. Yao	941
Safety Analysis of Static & Dynamic Method in Foundation Pit Considering Unsaturated Seepage Y.H. Zhou, X.W. Li, Y.F. Peng and T. Zhang	946
Research of Lower Bound Method for Wedge Slope Subjected to Pore Water Pressure and Earthquake Force Z. Li and Z.L. Liang	951
A Meso-Structure Analytical Model to Describe the Cracking Process due to Reinforcement Corrosion in Concrete Structure Y.T. Zhou, L.K. Li, P. Cao and Y.N. Wang	956
Analysis of Ultimate Load-Bearing Capacity for Dowel Bar System in Rigid Pavement Based on XFEM L.K. Li, Y.T. Zhou, P. Cao and Y.N. Wang	961
Study of Lower Bound Method for Plastic Limit Analysis of Wedge on Consideration of Anchor Bolt Z.L. Liang and Z. Li	966
Applied Research of BIM Technology on Prestressed Steel Structures in Xuzhou Stadium Z.S. Liu, X.F. Wu and R.L. Xu	971
Study on the Stability of Bearing Load Slope under Earthquake Based on Quasi-Static Force Method X.M. Liu, Y.C. Zhou and C.X. Chen	976
Numerical Simulation of an Unsteady Thermal Process in Vacuum Induction Furnace for Metallurgical Grade Silicon Refining M. Li, G.Q. Lv, W.H. Ma, H. Wang and X. Yang	981
Network Based Passenger Flow Modeling for Station Crowdedness Evaluation J. Ma, S.M. Lo, J. Chen and S.B. Liu	986
Fluid Dynamic Simulations on Polysilicon Production Z.F. Nie, G. Xie, Y.Q. Hou, Y. Cui, R.X. Li and Z.L. Yu	991
The Numerical Simulation of Shaped Charge Jet under the Influence of Charge Structure H.F. Qu, F. Han and F. Chen	996
Mechanical Calculation Model for L-Shape Traffic Signs Bar with Variable Cross-Section B.N. Qu, B.C. Yang and R. Guo	1001
Energy Performance Prediction and Numerical Simulation Analysis for Screw Centrifugal Pump H. Quan, R.N. Li, Q.M. Su, W. Han and X.R. Cheng	1007
Risk Assessment on Slope Stability of Beijing-Zhuhai Highway K46 Y.F. Ruan, F. Wang, Q. Li and B.J. Shi	1015
Quantify the Weld Line and its Optimization Based on the Taguchi and the Moldflow Secondary Development Z. Shan, S.H. Qin and L.Q. Wei	1021
Polymer Ratio Optimization Based on Support Vector Machine and Genetic Algorithm Z. Shan, H. Luo and S.H. Qin	1026
Effect of Rotating Speed on Hydraulic Energy Recovery Turbines Performance F.X. Shi, J.H. Yang and X.H. Wang	1033
Study on How Sieving Parameters of Vibration Screen Influence Sieving Efficiency Based on DEM W.J. Huang, Y.Y. Huang, J. Shi and S.C. Han	1038
Modified Method for Simulation of the Filling States at the End of Injection Molding Process J.J. Shi, Z.Q. Cheng, J.C. Gelin, B.S. Liu and T. Barrière	1042

Computational Investigation of Infrared Radiation Characteristic of Surface Base on MT and RMC	
P.R. Su, Q.T. Eri and X.X. Li	1050
The Critical Slip Surface Search of Non-Homogeneous Slopes Based on the Global Procedure for Slope Stability Analysis	
C. Sun, C.G. Li and H. Zheng	1056
Simulating the Stiffness of RC Beams Strengthened by CFRP with Secondary Load by ANSYS	
L.P. Sun, Z. Liu, C.X. Yang and Z.F. Zhang	1062
Analysis the Flexural Properties of RC Beams Strengthened by High Strength Steel Wire Mesh and Polymer Mortar Using the Finite Element	
L.P. Sun, Z. Liu and Y.Z. Liu	1067
An Information Fusion Algorithm Based on Kalman Filtering	
X.H. Tan	1072
The Numerical Analysis of Ultimate Efficiency for Vertically Loaded Anchors	
Y.J. Tang, B.D. Shao, H.M. Cheng and Y. He	1077
Application of Simulated Annealing Particle Swarm Optimization in Response Spectrum Fitting of Simulated Earthquake Wave	
X.N. Wang and J. Zhou	1082
Study on Modal Shape Change as a Damage Index for Spot Welds	
R.J. Wang, X.J. Yang and Z.M. Xiao	1087
Prediction Model of the Direct Solar Vacuum Tube	
G. Zhong, H.T. Wang and H. Wang	1093
Optimization Design the Configuration Sizes of Multi-Layer Rectangle Micro-Channel Heat Sink	
L.F. Wang, B.D. Shao, H.M. Cheng and Y. He	1101
A Practical Approach of Greedy Algorithm	
M.H. Xu and H.Q. Wang	1107
Numerical Simulation of Depleted EAF Jet Flow	
C. Wang, D.F. Zhu, F.H. Liu, S.B. Wang and H. Wang	1113
Stress Field Numerical Calculation for T10 Steel Quenched by Atmosphere-Pressure High-Velocity Nitrogen-Water Spray Based on DEFORM	
L.C. Wei, H.M. Cheng, J.Y. Li, X. Zhang, S.Q. Zhou and T.X. Yang	1118
Numerical Study on the Bombardment Effects of Tungsten by High-Intensity Pulsed Ion Beam	
D. Wu	1122
Simulation of Salinity in Artificial Lake in Coastal Region	
C.B. Wu, X.W. Deng, X.Z. Yuan, H. Chen, L.Y. Zhang and Y.J. Jiao	1127
Study on the Finite Element Strain Simulation Model Updating Method Based on the Real Measurement Data	
L.F. Xiao, R. Duan and H. Tian	1132
Study of Permanent Thermal Insulation for Arch Dam in Cold Region	
Z.Q. Xie, J.H. Cui, Q. Chen, Y.F. Qi and Y. Huang	1140
Numerical Simulation on the Overturn Process of Towering Reinforced Concrete Chimney during Directional Demolition Blasting	
J.B. Xie, M. Fu, C.C. Wu, D.F. Hu and Y.H. Du	1145
Study of the Design Method for The Shape of Charge Curve of the Double Focusing Warhead	
Q.C. Xie, F. Han and F. Chen	1152
Research on Test Points Selection Using Complex Field Fault Modeling in Analog Circuit	
J. Yang, C.L. Yang and Z. Liu	1158
The Two-Way Cartridge Valves in the Synchronization Hydraulic System of Simulation Research	
Y. Heng, R.B. Yuan, Y.B. Zhang and M. He	1163
Shafting Vibration Simulation for Hydro Turbine Generating Sets	
Y. Zeng, L.X. Zhang, J. Qian and C.L. Zhang	1171
The Comparison of Two Simulation Methods on the Thermal Ablation with Large Blood Vessel	
F. Zhai, Q. Nan, H.J. Zhang and X.M. Guo	1177

A Regulatory Network of G2/M Phase Transition for DNA Damage L.W. Zhang and K.M. Liew	1182
In Instability and Failure of Steep Slope Embankment Test and Numerical Simulation Analysis of MeiHe Expressway in Guangdong Province Z.Y. Zhang, W.S. Fei, C. Xiang and D.J. Zhou	1187
Parallelization Research of SapTis-Software of Multi-Field Simulation and Nonlinear Analysis of Complex Structures L. Zhang, G.X. Zhang, H.L. Pan and X.K. Du	1192
Research on Dynamic Response of Pavement under Moving Vehicle Loading Using Three Dimensional Finite Element Method Y.X. Zhao, Y.J. Qiu, P. Cao and C.F. Ai	1197
Stability Analysis of Open-Pit Slope Containing a Fault Utilizing UDEC Y. Zheng, C.X. Chen, X.X. Zhu, X.M. Liu and G.W. Cheng	1204
Numerical Simulation of the Dynamics of Heart Valves: A Literature Review Q. Zhong, W.H. Zeng, X.Y. Huang and B.L. Wang	1211
Balance Adjustment of the Gravel-Sand River Downstream Reservoir L.L. Zhu and H. Ge	1218
Numerical Simulation on the Temperature Field of Steel 1045 Quenched by Different Hardening Media J.B. Xie, C.C. Wu, J. Fan, M. Fu and D.F. Hu	1222
A Case Study of Application of Modern Design of Experiment Methods in High Speed Wind Tunnel Test Y.H. Li, Y. Huang, Z. Wei, L.M. Feng and Y. Zhang	1229
Numerical Simulation of Supersonic Aircraft Surface Aerodynamic Heating and Infrared Radiation Characteristics P.R. Su, Q.T. Eri and X.X. Li	1234
Remote Sensing Integration Survey of Typical Land Types and Analysis of its Spectral Properties in Southeast of Yunnan Province X.L. Zhang, S. Gan, Y. Li, J.L. Huang and S. Gao	1239
Study on Remote Sensing Image Auto-Identify Classification by Used of Object-Oriented Technology S.W. Xia, S. Gan, P.F. Ren and X.L. Zhang	1244
Mechanical Numerical Analysis for L-Shape Traffic Signs Bar with Variable Cross-Section B.N. Qu, R. Guo and B.C. Yang	1250
The Urban Space Expansion Analysis in Mountain Areas Based on GIS and RS H.H. Liu, X.P. Yuan, S. Gan, H.Q. Yan, X.L. Zhang and Q. He	1255
Research on Evaluation and Development Potential Analysis of Low-Slope Hilly Land Resources J. Lv, X.P. Yuan, S. Gan, M.L. Yang, Q. He and X.L. Zhang	1260
Seismic Response on the Mangjiedu Long-Span PC Continuous Rigid Frame Bridge with High Piers J.B. Xie, D.F. Hu, M. Fu and C.C. Wu	1265
Influence of Turbine Blade Cooling Efficiency on Turbofan Engine Performance L.Y. Zhu and Q. Huang	1272
Aerodynamic Shape Optimization Design of the Swept Wing Based on the Kriging Surrogate Model D. Wang, J.Q. Bai, J. Hua, Z.W. Sun and L. Qiao	1277
3D Numerical Simulation of Elastoplastic Consolidation Process of Fly Ash Dam A.J. Zhang, L.F. Xu, W.C. Yang and Y.Q. Zhang	1283
Comparison of Surface Heat-Transfer Coefficient of GCr15 Steel Quenched by Clear Water and Nitrogen-Spray Water L.J. Hou, H.M. Cheng, J.Y. Li, B.D. Shao and J. Hou	1290
Dynamic Response Analysis of Suspenders of Arch Bridges Sudden Failure on Failure-Safety Theory H. Li, R. Li, Y. Chen and D.X. Zhu	1295
In-Plane Mixed-Mode Fracture of the Thin Sheet Metal J. Lv, B.C. Yang, C. Ran and Y.P. Shao	1301
Mechanical Model for Dynamic Behavior of Concrete Subjected to Impact Loading Y.X. Sun and D.K. Wang	1305

Transverse Crack Propagation Characteristics of Rail Bottom under Wheel-Rail Force J.X. Wang, J.R. Gui and S.Y. Chen	1318
Study of Constitutive Model of the Schist under Natural and Saturated Condition X.X. Zhu, C.X. Chen, Y. Zheng, G.W. Cheng and Y.C. Zhou	1326
Numerical Investigation of Bumps and Oscillation in the Cylindrical Membrane Inflation C.L. Wang, J.H. Sun and C.Y. Xu	1335
The Basic Dynamics Study of Flip-Flow Screen and Particles Based on MATLAB J.W. Zhang, Y.Y. Huang and Z.H. Chen	1340
Numerical Study on the Plasma Generated by Different Discharge Modes at the Upstream of Fuel Jet in Scramjet Combustor S.Y. Zhou, W.S. Nie, B. He, X.K. Che and X.M. Tian	1345
Study on the Resistance Loss Model of Slurry Pipeline for Iron Ore Concentrate with High Concentration T.T. Leng, H. Meng and J.D. Wu	1350
Trajectory Control for Cartesian Pneumatic Manipulator Using the Terminal Sliding Mode Control Method S.Y. Qiu, P. Yi, R.B. Yuan, H. Yang, S. Hui and R.P. Xue	1354
Numerical Solution for Weight Function of Electromagnetic Flowmeter Using Finite Element Method K.X. Wei	1360
Molecular Dynamics Approach and its Application in the Analysis of Multi-Scale W.H. Gai, R. Guo and J. Guo	1364
The Recent Developments of Molecular Dynamics Simulation W.H. Gai, R. Guo and Y.Y. Liu	1370
Research on Kinematics Simulation of Turning Conveyor Based on ADAMS Y. Gao, X.J. Wang, Y.L. Chi, W. Zhong and B. Hua	1374
Finite Element Analysis and Simulation of the Sealing Performance of Y-Ring Rubber Seal K.B. Cui, J.Q. Qin, C.C. Di and Y.F. Yang	1379
Study on Kinematics Simulation of Multi-Joint Robotic Gripper Based on ADAMS B. Hua, Y.L. Chi, X.J. Wang, Q. Bai and W. Zhong	1384
The Analysis of Switch Installing Optimization Based on FMEA Algorithm J.H. Lei, X.X. Zhao, D. Cheng, J. Liu and B. Li	1389
Research on Pointer Locating for Analog Measuring Instrument Q.W. Li, B. Li, Y.H. Li and H.J. Liu	1395
Modal Analysis of Wing Considering Transient Thermal Effects H. Liu, X.S. Sun and X.D. Li	1400
An Emulation of Carrier Acquisition Algorithm Based on FFT Frequency Guide Y. Liu, J. He and H.Z. Zou	1407
Numerical Simulation on the Heat Transfer Performance of Multicrystalline Silicon in Directional Solidification Process X. Yang, M. Li, W.H. Ma, G.Q. Lv, T. Luo and Y.F. Wang	1412
Improved Algorithm of Complex Spatial Co-Location Pattern Based on Grid Clique F. Yang, B. Li, Y.H. Li, X.C. You and H.J. Liu	1417
Laser-Induced Thermal Damage to K9 Glass on Finite Element Method L.Z. Chen, C.Y. Jing and X.W. Guan	1422
Research on Heat Distribution in a Thermal Insulation Space and a Kind of Evaluation Involving Heat-Distribution and Valid Heating-Area H.Y. Jin, Z.H. Chen and L. Li	1427
Dynamic Response Analysis of Double-Column Pier Mudslides S. Liu, R. Li and Q.Q. Liu	1434
MCMC Parameters Estimation in the Inverse Problem of Spontaneous Combustion Q.B. Luo, L. Wang and D. Liang	1440
Study on the Theory and Methods of Bolt-Shotcrete Support for Weak Surrounding Rock Based on Reliability Analysis Z. Ou, C.X. Chen, G.W. Cheng and Y. Zheng	1446
Effect of Relative Height of Planting Denture on Interdental Food Impaction: A Numerical Study A.K. Qiao, Z.Z. Zhang, Y.L. Fu and D.S. Yang	1454

Numerical Simulation of Multi-Layer Rectangle Micro-Channel Heat Sink for Single-Phase Flow and Heat Transfer	
L.F. Wang, B.D. Shao, H.M. Cheng and Y. He	1460
Virtual Crack Closure Technique in the Analysis of Concrete Arch Dam Cracks	
D.X. Wang and L. Wu	1466
Solving Mid-Frequency Acoustic Problem by the Meshless Method	
S. Wang, Q.B. Huang and S.D. Li	1471
A Review on Application of Discrete Element Method in Soil Cutting Process	
J. Yang, C.W. Wang, F.H. Wang and X.J. Yang	1477
The Basic Theories of Molecular Dynamics Simulation	
W.H. Gai and R. Guo	1483
Analysis of Hydromechanics in a High-Consistency Conical Refiner	
Q.H. Liang	1489
A Review of the Research Progress of Structural Damage Identification Method Based on Computational Intelligence Techniques	
L.F. Xiao and H. Tian	1494
Modeling and Numerical Simulation of a Gas/Drop Flow	
S.S. Xue	1503
Probabilistic Method to Determine Widespread Fatigue Damage Average Behavior of Fleet	
F.Y. Zhan, W. Yang and Z.X. Zhang	1508
An Improved Element Free Galerkin Method and Precise Time-Step Integration Method for Solving Transient Heat Conduction Problems	
X.H. Zhang and H. Xiang	1517
Thermodynamic of Moving Mould in Anode Plate Vertical Casting Device	
S. Hui, J. Luo, R.P. Xue, S.Y. Qiu, H. Yang and Z.F. Peng	1522
Studies of the Optimal Hardening Parameters in Sandy Soil Shear Hardening Constitutive Model	
L. He, Y.T. Zhou, X. Zhong and J. Zhou	1527
Elastic Parameters Measurement of Rubber by Digital Image Correlation	
R. Zhang	1532

Chapter 6: Computational Methods in Fire Safety

Finite Element Thermal Analysis of the Packing Container in Fire Environment	
P. Huang, Z.M. Hao, W.F. Li and S.Q. Hu	1539
Design and Research of Electronics Factory Evacuation Based on Computer Simulation Technology	
L. Bai	1545
Simulation of Pedestrian Flow on Floor-Stair Interface Using an Extended Lattice Gas Model	
F.Z. Huo, W.G. Song, W. Lv and K.M. Liew	1550
A Numerical Study of the Fire-Extinguishing Performance of Ultrafine Water Mist in Small Scale Tunnel Space	
T.S. Liang, J.J. Yu, G.P. Lu, X. Li, W. Zhong and S.M. Lo	1555
A Study of Forest Trees Fire Modeling	
C. Shang, K.Y. Wang, H.Y. Huang and Y.K. Chen	1559
Investigation and Simulation on Human Emergency Evacuation Behavior in an Academic Building	
R.X. Shang, P.H. Zhang, S.J. Tong and Y.L. Guo	1564
Study on Exit Flow Rate of an One-Exit Room	
X.G. Wei, W.G. Song and W. Lv	1569
Numerical Simulation of Premixed Propane/Air Flame Propagation Using a Dynamically Thickened Flame Approach	
H.H. Xiao, Z.L. Mao, W.G. An, Q.S. Wang and J.H. Sun	1574
Development of Wall-Adapting Local Eddy Viscosity Model for Study of Fire Dynamics in a Large Compartment	
A.C.Y. Yuen, G.H. Yeoh, R.K.K. Yuen, S.M. Lo and T. Chen	1579

Study on the External Insulation System with Curtain Wall for Fire Prevention Based on Numerical Simulation	
M. Zhang, W.H. Song, Z.P. Ni and X. Huang	1592
Application of Numerical Reconstruction on a Coach Fire Investigation	
Z. Zhao, D. Liang and H.W. Yao	1600

Chapter 7: Other Related Topics

The Empirical Research between China's Scientific and Technological Investment and Economic Growth	
Y. Lei	1607
Analysis of Factors Influencing the Development of Medical E-Commerce Based on ISM	
G.G. Li, J. Kong and Z. Yin	1612
Image Fusion for Video Surveillance in Curvelet Domain	
X. Cai, G. Han and J.K. Wang	1620
New Method to Calculate Exit Flow Based on RFID Technology	
L. Chen and W.G. Song	1625
Based on Stackelberg Differential Game of Affordable Housing Pricing Mechanism Research	
G.H. Chen, H.B. Li and Z.Y. Zhang	1630
Modeling, Fabrication and Characterization of Piezoelectric ZnO-Based Micro-Sensors and Micro-Actuators	
Y.H. Yuan, H.J. Du, X. Xia and Y.R. Wong	1636
The Automatic Checkout Method of Balloon-Tracking Data at Unequal Intervals of Time	
J. He, B. Liu and Y. Liu	1644
Cluster Analysis of Chinese Pictophonetic Characters Based on Pronunciation Indication of Sound-Elements	
R.F. Hu, B. Cao and J.Y. Du	1649
Study on Outward Foreign Direct Investment from China Enterprises from the Financial Development Perspective	
Y.P. Jiang, Y.G. Fu and F. Wang	1655
The Reliability Research of the Good Receipting and being Put in Storage Process of X City's Tobacco Logistics Distribution Center	
J. Jin and W.P. Yang	1665
Applications of GIS-Enhanced Networks of Engineering Information	
D.M. Sergi and J. Li	1672
Modeling and Simulation of CAS for Safety of Agricultural Products under Government Regulation	
X.L. Liu and W.Y. Zhang	1680
Modeling of Pedestrian Counter Flow in Corridors with Different Barriers	
X.D. Liu, W.G. Song, W. Lv and F.Z. Huo	1685
Simulation of Crossing Traffic Flow without Traffic Light Using Modified Full Velocity Difference Model	
W. Lv, W.G. Song and F.Z. Huo	1690
Probability Distribution of Flexural Fatigue Life for Glass Fiber Reinforced Concrete	
Y. Lv and H.M. Cheng	1695
ETL Application in Telecom Industry Based on Teradata	
J.D. Shi, M. Li, Q.H. Zhang and X. Wei	1702
Simulation for Affect Factor of Curriculum Teaching System	
J. Tian and Y. Zeng	1708
The Study of Generative Modeling of Text	
J.J. Jiang, X.Y. Wang, X.W. Mu, J.X. Hu and Y.Q. Zhu	1713
Situation & Prospect of Research on Talus Slope	
X.D. Wang, Y.F. Ruan, Q. Li and F. Wang	1718
Establishing DFT-Based Linear Free Energy Relationships for the Study of Organo-Mineral Complexes in Soil Carbon Pool - The Sorption Mechanisms of Organic Acids with Iron Oxides	
J. Xu	1726

The Decision-Making Method of Model Municipal Wastewater Treatment Plant Based on Cost Model and Hierarchical Structure Model	
B.F. Xu, D.H. Liang, Y. Lv and Y. Xu	1732
Based on Model Reference Design of Lead Sheets Servo Winder Tension Control System of Electro-Hydraulic Design Simulation and Analysis	
R.P. Xue, Z.S. He, S. Hui, S.Y. Qiu, H. Yang and R. Li	1740
Study on the Extraction Method of Wave Spectrum Based on WaMoSII Wave Measuring Information	
X.D. Yang, A.G. Shi, Z.C. Wang, B.Z. Yang and B.H. Zhang	1745
Analysis of Geological Disasters Economic Evaluation	
Q.H. Zhan and S.M. Wang	1751
Sub-Pharmacophore Generation of JNK3 Inhibitors	
Y.L. Zhang, Y.M. Wang and Y.J. Qiao	1756
Analysis of Airworthiness Requirements on Fatigue Management Program in FAA	
K. Zhao and S.N. Wang	1761
Developed New Type of Pneumatic Spray Nozzle and Research of Spray Characteristic	
S.Q. Zhou, H.M. Cheng, J.Y. Li, L.C. Wei, X. Zhang and T.X. Yang	1766
Research on Quality Operation Management of MES Based on the ISA-95 Standard	
J.D. Shi, M. Li and Q.H. Zhang	1770
Application of Data Mining in CRM	
X.X. Han, J.H. Lei, X.X. Zhao, P. Luo and J.F. Li	1776
Case Analysis of GM(1,N) Model in Predicting Kunming Real Estate Prices	
Y.M. Sun and L.G. Wu	1781
The Homotopy Analytic Solutions for a Class of Jamming Transition Problem in Traffic Flow	
X.L. Han and C. Ouyang	1787
A Validation Method of Interpretive Simulator Based on Automatic Contrast Model	
L. Lei and G.D. Zhang	1793
Research on Fault Diagnosis Simulation Training Method Based on Fault Tree with Following Scenes	
J. Li, X.W. Guan, S.B. Guo, J.H. Hou and M. Bai	1799
Research of Closed-Loop Control for Underwater Heat-Engine Propulsion System	
W. Li, Y.C. Wang, K. Luo, B.Y. Song and C. Huang	1804
A Distributed Scene Simulation System for Earth Observation Satellite Mission Design and Analysis	
S.G. Liu, S.K. Wang and C. Han	1810
Study of Constructed Wetland Plant Growth by Computer Image Processing (CIP)	
X. Liu and T.F.Z. Tang	1815
Visualization System for Tidal and Sediment Simulation in Coastal and Estuarine Areas	
W.J. Xin, X.F. Luo, C.T. Lu and J. He	1820
Simulation and Analysis of Water Table and Drainage Discharge under Controlled Drainage in a Field Experiment Using DRAINMOD Model	
L. Yang, J.S. Huang, X.G. Wang and J.J. Liu	1824
Study on One Dimensional Mathematical Model for Unsteady Flow Sediment and Water Quality in Channel with a Sluice	
J.Q. Zhao	1830
