ISBN(softcover): 978-0-87849-222-0 ISBN(eBook): 978-3-03813-384-1

Table of Contents

Committees, Preface

A Cloth Simulation Method for Cloth/ Machinery Coupled System Unified Modeling
H.Y. Yu, Y.X. Wang, S.Z. Wang and Z.F. Geng 1

A Drive-Transmission Integrated Linear Electromechanical Actuator
W.J. Chen, J. Zhang and Y.Z. He 5

A Mathematical Principle and Application on Design of Planar Six-Bar Mechanism with unto Three-Ordered Intermission at Limit Position(s)
H.X. Wang and N. Dai 9

A Method of Online Color-Difference Detecting Based on Image Processing and its Application
L.J. Zhong and W.W. Li 14

A New Method for Accurately Evaluating Planar Straightness Error
J. Yuan, Z.X. Qiu and J.W. Cao 18

A Novel CAM System with X/Y/Z 3-Axis Machines for Large Scale Aspheric Lens Grinding
X.Y. Lei, H. Huang, S.H. Zhang, J. Wang, Q. Xu and Y.B. Guo 23

A Novel Feature Extraction Method Using Ant Colony Clustering Analysis
D.B. Zhao and J.H. Yan 32

A Research on Transition of Urban Communities and Sustainable Lifestyle in China
X.J. Zhou and X. Liu 36

A Review of Surface Texture of Tribological Interfaces
Z.W. Wang, M.W. Chen, J.W. Wu, H.H. Zheng and X.F. Zheng 41

A Scheduling Algorithms of DNC Systems Based on CAN and Program Expending Rate
H.L. Cai, Z.G. Li and E.E. Ren 46

A Squeeze Casting Die Temperature Control System Based on Fuzzy Control
F.Q. Ying and T.M. Guo 50

A Study on Holonic Control in Intelligent Car
Y. Chao, Q.H. Lei, D.D. Fu and L.Q. Wu 55

A Study on Methodology to Collect Customer Requirements through the Internet
S.L. Liu and F. Shen 59

A Study on Nanocrystalline Nickel Parts Prepared by Jet Electrodeposition
J.S. Chen, Y.H. Huang, B. Qiao, J.M. Yang and Y.Q. He 64

A Web-Based Collaborative Evaluation Platform for Mechanical Conceptual Design
M.Y. Wang, L.G. Shen and Y.M. Deng 68

Accuracy Analysis and Simulation of Three Degrees of Freedom Parallel Machine Tool
X.S. Li, J. Wang and G.Q. Cai 73

Adaptable Redesign of Existing Equipment Responding to Unanticipated Environment Changes
Z.J. Liu, H.F. Teng and Q.H. Hu 77

Air-Lubricated Pneumatic Workbench
C.H. Wu, S.M. Wan and B. Lin 82

An Analysis of Thermal-Structural Characteristics for Precision Linear Rolling Guide CNC Grinding Machine Tool's Bed
X.L. Deng, J.Z. Fu, Y. He, Z.C. Chen and H.F. Jiao 86

An Anti-Collision Device with Circumferentially Energy Absorption under a Local Impact
Q.H. Zhang, L.L. Song, C.W. Liang and D.J. Chen 90

An Attempt of Using the National Color Culture on Product Design
Y.X. Zhou and L.L. Yang 94

An Evaluation Method of the Visual Elements of the NC Machine Operation Panel Based on RBFN
X.R. Hou and J.M. Che 98

An Expert System for Negative Developing
Y.L. Wang and H. Wang 104

An Improved Adaptive Interpolation Scheme for NURBS Curve
J.X. Chen and S.W. Lin 108

An Ontology-Enabled Production in Product Lifecycle Management
J. Cui and X.B. Xu 112

An Unequal-Sized Unidirectional Loop Layout Design Problem Considering Empty Vehicle Trip
Y.L. Li, B. Li and S.J. Luo 116

Analysis of Dynamic Characteristics of Rotary Mechanism for Boom Type Roadheader
M. Zhang, J.J. Ren, L. Dong and X.S. Wang 122

Analysis of Dynamic Characteristics of Space Deployable Antenna Based on ANSYS
D.K. Tian, R.Q. Liu, Z.Q. Deng and H.W. Guo 127

Analysis of Grinding Parameters on Hardness Layer Depth
L. Zhang, X.H. Xu and C.F. Yang 131

Analysis of Heating Performances for Ultra-High Speed Electric Spindle Bearings Based on the Energy Theory of TEHL in Point Contact State
S.S. Li, Z.H. Hu, P. Zhou, P. Chen, X.Y. Chen, J.M. Gu and L.X. Fu 135

Analysis of Influence Parameters on Axial Movement Displacement about Cross Wedge Rolling Asymmetric Shaft Part
W.F. Peng, K.S. Zhang and Z.H. Hu 141

Analysis of the Corner Error in WEDM
L.J. Yang and X.N. Dang 146

Analysis on Green Design Methods in Modern Furniture
J.F. Xu and H.N. Zhang 150

Analysis on the Workspace of a Tomato Harvesting Manipulator with 7 DOF
X.F. Liang and Y.W. Wang 155

Analytical Robust Design of a Gear Milling Machine Headstock
Y.L. Chen, S. Liu, H.T. Wang and P.H. Gu 162

Analyzing of the Thermal Stress and Fatigue Life of the Liquid Core Heavy Reduction Rolling Mill's Roller
D.Y. Sun, Y.F. Zhang, X.W. Zha, W.W. Liu, H.W. Ma and Y.Q. Fan 166

Application and Analysis of RBF Neural Network for Burr Prediction in Micro-Machining
Y.M. Zhu and G.C. Wang 171

Application of Analog Compound Orthogonal Neural Network to Temperature Control of Electric Heating Dryers
H.L. Wei and L.G. Gu 176

Application of FEM Analysis to Fault Diagnosis of Cracked Rotor
K. Yang and Y. Yang 181

Application of Maslow's Hierarchy of Needs to Modern Chinese Furniture
H.N. Zhang and J.F. Xu 185

Application of the Structural Topological Optimization in the Column Stability Design
B.C. Bian, G.M. Peng and Y.K. Sui 190

Application Research on Collaborative Design of Engineering Machinery Design
K.X. Guo, Y. Huang and H. Zong 194

Application Study on Resonance Demodulation Technique in Fault Diagnosis of Gear Box
Q. Hao, L.X. Gao, X. Wang and H. Ye 198

Artificial Intelligence Application in Modern Management
R. Jiang 203

Automatic Visual Inspection System of Gas Valve's External Taper Thread Based on Image Domain
X.C. Zhang, X. Zhang, Y.H. Lou and J.H. Chen 207

Axis to Plane Perpendicularity Error Evaluation Based on New Generation GPS
Y.H. Sun, J. Zhang, M.F. Huang, J.T. Huang and X. Cheng 213

Behavioral Characteristics Analysis and Structural Design of Conceptual Interface of Mechanical Products
K. Wang and H.B. He 217

Behavioral Characteristics of Electromechanical Products and Their Representation Based on a Modified Petri Net
H.B. He and K. Wang 222

Behavioral Process Characteristics of Assembly Devices and Their Conceptual Design
L. Shi and Y.M. Deng 226

Biomimetic Micropore of Bearing Human Bone in the Design and Optimization Based on Finite Element Analysis and Simulation
L.J. Yang, X.N. Dang, L.L. Wang and L. Zhou 230

Buffer Groove Design of Continuous Rotary Electro-Hydraulic Servo Motor Used in Simulator
X.J. Wang, J.P. Shao and G.B. Yu 234

CAD System of the Cold Extrusion Die Based on VB
S.Z. Zhou, X.M. Yuan and J. Fan 238

Calculation Method for the Theoretical Displacement of Cycloidal Pump
Y.F. Wu, C.L. Xia and Y.G. Shi 242

Color Image Denoising Using Gaussian Multiscale Multivariate Image Analysis
D.T. Liang 248

Computer Aided Price Quoting Package for Injection Mould Based on Standard Man-Hour Method
Z.X. Jia, H.B. Wu, J.Q. Li and M.C. Fang 253

Computer Numerical Controlled Coil Winding of the Electric Welding Machine
Y.Q. Wang, X.J. Wang and S.M. Hua 259

Computer Vision-Based Augmented Reality System for Assembly Interaction
H.W. He, Y.M. Wu, D.T. Zheng and Y. Rao 263

Concept Design of Spraying System Based on Function Analysis of Spraying Robots
W.M. Zhao and B. Hu 270

Cost Estimation Model of Modular Product Family
H.L. Wang, L. Hou, C.R. Liu and Q.L. Wang 276

Cutting Process Analysis for Uniform and Variable Edge Tools
Z. Li, A.B. Yu, H. Wang and L. Dong 280

Debond Propagation in Honeycomb Structure under Pure Bending Load
W.R. Gong, J.L. Chen and J. Wang 284

Deflection and Stress Analysis of Glass Plate in Elastic Deformation Processing
D.N. Nguyen, J.L. Yuan, B.H. Lv and Z. Wu 288

Design and Optimization of the Suspension System on the Wheel-Tracked Exploration Robot
W.Y. Shang and F.J. Qiu 294

Design and Simulation of Electric Pallet Truck Hydraulic Anti-Skid System
G.P. Li, L.W. Wang and L.S. Shu 299

Design Calculation about Oxynitride Concentration for Tunnels on Inghai-Tibetan Railway
S.X. Sun and N.Y. Yu 304

Design Intervention for Social Innovation: Two Service Design Workshops in Italy and China
M.S. Gong, L.H. Zhang and X. Zhang 308

Design Management and the Development of Chinese Industrial Design
X. Song 313

Design of 2-DOF Micro-Positional Stage Based on Parallel Structure Using Flexible Plate
H. Chun, Y.G. Cui, Y. Li and L. Qiu 317

Design of a Knowledge-Based Self-Assessment System for Enterprise Knowledge Management Evaluation
Y. Xu, H.F. Zhan, J.H. Yu and L. Sun 322

Design of Forming Shape Measurement System for Laser Molten Pool in Laser Fabricating
J.B. Lei, Z. Wang and L.F. Liu 327

Design of Rank Accuracy Detection System for Screw
Z.X. Meng, Z.W. Li and J. Cao 331

Design of Surface Roughness Measurement Bench Based on Stewart Platform
X.B. Pan, Y.M. Tang and X.J. Zhou 335

Design Research on Working Mechanism of Beam Pumping Unit
J. Liu and J. Zhu 340

Design Study for Parallel Robot Based on Virtual Prototyping
H.L. Chen, L.R. Hong, T.L. Wang, K.B. Lu and Y.F. Luo 344

Development of CNC Lower Pressure Water Jet Cutter
D.S. Zhang, Z.W. Dong, B. Chen and L.Z. Yang 349

Development of Electromagnetic Composite Ring Expansion as a Fragile Material Test Technique
G.Y. Zhou, J. Liu, X.L. Dong and F.H. Zhou 354

Deviation Control of Weld Seam Tracking Based on Laser Image Sensing
L.J. Liu and Y.H. Lou 358

Dimension Classification Method of Multi-Loop Planar Mechanism
D.F. Zhao and G.Y. Zeng 362

Dynamic Analysis of a Calibration Mechanism
D.W. Sun, Z.G. Chen and G.Y. Zhang 366

Dynamic Characteristics Analysis for the Bed of CNC Machine Tool
S.R. Zhang, X.G. Li, L.F. Yang and B. Yu 370

Dynamic Characteristics Analysis of Precision Linear Rolling Guide CNC Grinding Machine Tool's Bed
X.L. Deng, J.Z. Fu, Y. He, Z.C. Chen and Z.Y. He 374

Dynamic Performance Analysis of a Machine Tool Considering Linear Rolling Guideway
Y.M. Zhang, Z.K. Xie and Q.W. Liu 378

Dynamic Simulation Analysis on Flexible Assembling Fixture for Aircraft Panel Component
L.G. Qu, K.Q. Pan and X. Chen 382

Effect of Specimen Ball Diameter on Contact Stress
J.L. Zhou, G.Q. Wu, X.Y. Chen and W.N. Zhu 386

Effect of Ultrasonic on Properties of Electroplated Diamond Tools
X.Z. Wang, A.B. Yu, B. Lin and N. Bao 390

Effect of Wheel Elasticity on Grinding Stability
A.B. Yu, L. Dong and Y.L. Wang 394

Electrodeposition of Fe-Diamond Composite Material for Manufacture of Diamond Tools
B.S. Pan, X.H. Fang and Y.C. Tian 398

Enterprise Cluster Entity Modeling Based on Product
L. Sun, J.H. Yu, H.F. Zhan and Y. Xu 402

Evaluation of Innovation Effect of Residential Design Based on Fuzzy Comprehensive Evaluation Method
A.P. Pan 407

Experiment Research on Dynamic Cutting Force and its Power Spectrum
H.J. Liu and M. Min 412

Experimental Investigation and Research on Forming Process of Micro Flat-Wire
C.C. Fok, Z.N. Guo, Z.Q. Yu and J.W. He 417

Experimental Investigation on Grinding-Induced Surface Damage of Fiber Reinforced Ceramic Matrix Composites
Y.S. Shi, Y.G. Wang, B. Lin and A.B. Yu 424

Experimental Study of the Small Lubrication Holes on the Die Shoulder on the Formability in Cylindrical Cup Deep-Drawing
Y.Q. Shi 428

Experimental Study on High Alloy Antifriction Cast Iron in High-Speed Cutting
L.J. Ma and Z.T. Zhou 432

Experimental Study on Optimizing Process Parameters in Two-Dimensional Ultrasonic Rolled Extrusion
J.X. Zheng, J.J. Jiang and C.S. Liu 435

Experimental Study on Performance Characteristics of Magnetorheological Damper
Z.N. Hou, Z.M. Feng, H.G. Hu and G.B. Wu 439

Experimental Study on Piezoresistivity and Magnetoresistivity of Magnetorheological Elastomers
W.Q. Ye, Y.M. Deng and W. Wang 444

Experimental Study on the Fabrication of the Light Guide Plate with Hot Embossing Method
Y. He, T. Zhang, J.Z. Fu and Z.C. Chen 448

Experimental System Design of Tension Measure and Control Based on MRF Damper
B. Huang, D. Zheng, L.Y. Hu and F. Lu 453

Exploration of a New Leaned Blade Flat Hydrodynamic Torque Converter
X.L. Zhu, C.B. Liu, W.X. Ma and X.Q. Wu 457

Failure Analysis of Hydrogen Corrosion of the Lens Gasket
X.C. Ma and G.F. Xu 462

Fatigue Life Analysis of Large-Scale Liner Vibration Screener Based on ANSYS
Y.Y. Wang, X.H. Fu, T.T. Guo, L. Chen and H.Q. Mao 466

Feasibility Study of Using the Chinese Traditional Five Elements Chromatology on the Industrial Design
Y.X. Zhou, F. Shen and L.L. Yang 471

Feature-Based Collaborative Design in VPDM
K.S. Liang, J.Z. Shang, L. Tang, Y.J. Cao and C. Cheng 475

Finite Element Analysis and Structure Optimization on Light-Duty Truck Driving Axle Housing
J.S. Fu, J. Wang and J.F. Wang 482

Finite Element Analysis of Radial Bearing Magnetic Field
G.Q. Wu, W.N. Zhu and J.L. Zhou 486

Finite Element Static Analysis on Heavy-Duty Truck Gearbox Housing
J.S. Fu, J.F. Wang and J. Wang 491

Focus on Connotation Construction Building Engineering Training Practice Base under Local Characteristics
X.W. Miao and G.F. Yuan 496

Fuzzy Reliability Optimization Design Method of Flange Based on the Tightness of Bolted Flanged Connections
Z.G. Sun, B.Q. Gu and X.L. Huang 501

Geometric Error Detection and Identification of a Heavy NC Boring and Milling Machine Tool by Using Laser Tracker
X.Q. Zhu, D. Gao and G.W. Cui 505

Geometric Information Measurement Based on Structured Light
Z.J. Ma, N. Dai and H.H. Cui 509

Image Measurement of Roller Chain Board Based on CCD
Q.M. Liu, Z.K. Liu, Q.H. Lei and K. Zhang 513

Improved Sensing Block Method and its Application in Measurement of Dynamic Load
H.L. Yuan, X.L. Dong and J. Yang 517

Improving the Quality in Deep Drawing of Rectangle Parts Using Variable Blank Holder Force
Y.Q. Shi 521

Inclination Errors Evaluation of Planar Lines with a Chaos Optimization
K. Zhang and X.M. Cao 525

Influence Factor Analysis for Tension Control Based on MRF Damper
L.Y. Hu, D. Zheng, J.M. Zhan and Y.M. Deng 529

Influence of Bolted Joint on Dynamic Characteristics of Combined Three-Section Crossbeam
T.N. Guo, D.L. Guo, L.G. Cai, B. Song and J.N. Zhao 534

Influence of Direct Current Magnetron Sputtering Parameters on Electrical Properties of Copper Films
Y.Q. Hua, R.F. Chen, Z.X. Niu and J. Yu 540

Influence of Micro Trapezoidal-Groove on Behavior of Sliding Tribopairs
P.Y. Zhang, Y.H. Zhang, X.L. Wang, X.J. Hua and Y.H. Fu 544

Influence of Reground Tool Sharpness on Micro-Cutting Process
X.L. Tian, Z. Li, X.J. Tang, F. Guo and A.B. Yu 550

Influence of the Position Deviation of Rotated Dual-Plates Lapping on Sphere
P. Zhao, H.W. Fan, J.J. Chen, J.L. Yuan, B.H. Lv and Q.F. Deng 554

Injection Molding Flow Simulation of Thin-Walled Slender Tube and Optimization of Combined Cavity
J. Liu, G.M. Wang and B.S. Sun 559

Injection Molding Process Optimization of Multi-Objective Based on MUD-RBFNN-GA
B.S. Sun, Z. Chen, B.Q. Gu and X.D. Huang 564

Injection Molding Process Parameter Optimization for Warpage Minimization Based on Uniform Design of Experiment
B.S. Sun, Z. Chen, B.Q. Gu and X.D. Huang 570

"Inside & Outside"-Design Method for Small and Medium-Sized Enterprises
X.C. Wang and K.J. Shi 576

Intelligent Control System for Ceramics Ball Test Rig
J.L. Zhou, J.C. Chen, G.Q. Wu and X.Y. Chen 580

Intelligent Prediction for Surface Roughness of CNC Surface Grinding Machine Tool Based on Bayesian Network
H.F. Jiao, J.Z. Fu, Y. He and X.L. Deng 584

Inter-Enterprise Quality Information Dynamic Tracking Based on Process Quality BOM
L.P. Zhao, Y.Y. Yao and D.M. Xu 589

Investigation into Fluid Velocity Field of Wedge-Shaped Gap in Grinding
C.H. Li, Z.L. Han and J.Y. Li 593

Investigation of SPR Mechanical Performance with Aluminum Alloy Sheet
J.H. Zhao, S.M. Wan and S.Y. Li 599

Joint Detail Simulation by Beam Element in Vehicle Body
W.B. Hou, H.Z. Zhang, P. Hu and X.C. Pan 603

Kinetics Analysis and Simulations on Load Fork Mechanism in Forward-Type Stacker
J.Y. Bai, S. Tong, Z.H. Yu and D. Zheng 608

Loading Behaviors of Superposed Aqueduct Affected by Segregating Layer Between PPCBs and Cast-*In Situ* RCF
S.B. Zhao, S.W. Pei, Y.W. Wang and X.J. Liang 614

Manufacturing and Green Estimation of Composite Concrete Machine Tool Bed
J.M. Ding and C. Su 619

Manufacturing Process for Circular-Arc Curvilinear Cylindrical Gears with Predesigned Fourth Order Transmission Error
J.Z. Su and Z.D. Fang 623

Mechanical Analysis and Optimum Design of Universal Panel Construction Formwork System
K. Wang, X.T. Wang, M. Qu and X.D. Chen 628

Mechanism of Zn Vapour Suppressed by Al In Laser Lap Welding of High Strength Zinc Coated Sheet Steel
S.Q. Zhou and Z.G. Peng 634

Mesh Analysis and Realization of Gear Honing with Globoid Honing Worms on Gear Hobbing Machine
T. Yu, K. Dong, S.Y. Wang and Y.X. Qian 643

Microscopy Photoelasticity for Studying Crazes in Polycarbonate
Z.T. Wang, J.L. Chen and R.C. Wang 648

Microstructure and Interface Strength of MMCs Prepared by Pressureless Ni-Induced Infiltration Using Fe Alloy
S.F. Yang, W.P. Chen, M.Y. Han and D.Z. Zhu 652

Microstructure and Wear Resistance of Laser Remelted Boronizing Layer of Petrochemical Key Parts
S.F. Chen, J.B. Lei and X.B. Liu 658

Microstructure Design with Generalized Shape Optimization Based on Level Set Geometrical Description and X-FEM
K.P. Qiu and W.H. Zhang 662

Mixed Natural Neighbor Galerkin Method for 3D Couple-Stress Elasticity
K. Wang, S.J. Zhou and Z.F. Nie 667

Model Analysis of Gilling Machine
X.G. Liu, B. Lin and K. Chen 671

Model and Algorithm of JIT Purchase Based on Actual Freight Rate
W.M. He, Y.H. Hu and L.L. Guo 675

Modeling and Simulation of Rotated Dual-Plates Ball-Lapping
J.L. Yuan, Y.L. Hu, B.H. Lv, Q.F. Deng and X. Ma 679

Modeling and Simulation of Rural Two-Direction Logistics System Based on Stochastic Petri Nets
K. Nie, M.Y. Lai, W. Li and E.B. Cao 684

Modern Logistics Service Quality Evaluation Index Selection and Empirical Research
Z. Yang 688

Modular-Based Platform Planning for Product Family
L. Fan, L.P. Zhao and Y.Y. Yao 693

Multi-Attribute Decision Making Method Based-On Information Axiom with Incomplete Information for Functional Requirements
X.F. Cheng 697

NC-Electrochemical Contour Evolution Machining for Globoidal Indexing Cam
X.F. Tang and W. He 702

Network Failure Model Approach Based on FMEA
Z.H. Sun, C. Chen, H.B. Shan and S.H. Zhou 706

Ni-Doping Alumina Foams for Fabricating MMCs by Pressureless Infiltration Using Fe Alloy
S.F. Yang, W.P. Chen, M.Y. Han and D.Z. Zhu 712

Noise Radiation Analysis of Structural-Acoustic Coupling System of a Gear Box
J.X. Zhou, G. Liu and S.J. Ma 718

Numerical Analysis of Pressure Straightening Process to High Pressure Boiler Tube
Y.Q. Tian, Q.X. Huang and J.B. Li 723

Numerical Fitting of Processing Load and Downward Movement of Semi-Fixed Abrasive Plate
X. Lv, J.L. Yuan and C.D. Lu 727

Numerical Simulation of Cutting Force and Temperature Field in High Speed Machining of Titanium Alloys
C.M. Yan and Y.X. Lin 731

Numerical Simulation of Gas-Particle Two Phase Flow in the Process of Cold Spraying Aluminum Zinc-Base Alloy Powder
C.S. Liu, J.W. Cheng and J.X. Zheng 735

Numerical Simulation of Oil Mist Process in Cold Heading Machine
G.C. Xu, Q.X. Hu, L.M. Li and C.X. Dai 739

Numerical Simulation on Oil-Flow-State of Gap Oil Film in Sector Cavity Multi-Pad Hydrostatic Thrust Bearing
X.D. Yu, X.L. Meng, H. Jiang, X.Z. Lou, B. Wu, H.J. Xiang, X.Z. Sun, C.Q. Yang and J.F. Wang 743

Numerical Study of Volute Casing for PIV Measurement by Using FLUENT and ABAQUS Software
C.L. Shao, B.Q. Gu and X.L. Huang 748

Numerical Study on Solidification Process and Shrinkage Porosity for Engine Block Casting
J.X. Liu, R.D. Liao and Z.X. Zuo 753

On Matrix Unit Test Plan for Testing of Product Properties
Z.B. Xie and L. Shi 757

On Product Refinement Design and Prototype Test
Z.B. Xie and L. Shi 761

On the Methods for Evaluating Product Concept Design
Z.B. Xie and L. Shi 765

One-Step Alcohothermal Synthesis and Growth Mechanism of $NiSe_2$ Porous Octahedron
Y.H. Zhu, J.J. Ma and Q. Yang 769

On-Machine Profile Measurement of Arc Grinding Wheel in 3-Axis Machine Using Non-Contact Displacement Sensor
H. Huang, X.Y. Lei, Q. Xu, Y.B. Guo and W. Luo 773

Optimal Dispatch of Power System with Stochastic Wind Generation
S. Wang, H.M. Yang, S. Zuo and W.J. Xu 783

Optimization and Improvement of the Characteristic of Material Flow of Mixer Truck Assembly Line
G.G. Zhang, Z.B. Chang and H.R. Zhang 787

Optimization Design of Powder Molding Pressing Frame Based on Precision Effect
J. Liu, X.L. Dong and G.Y. Zhou 791

Optimization Design of the Secondary Calibration of Line Structured Light Vision System
K. Zhang, X.S. Cheng, N. Dai and H.H. Cui 797

Optimization for Spindle of Jade Carving Machine Based on Fuzzy Reliability Theory
H.R. Shi and Y.N. Rui 801

Optimization for the Connection Parameters of HSK Tool Shanks
F. Liu, B. Lin and Y.M. Gong 806

Optimization of Collaborative Scheduling in Supply Chain
Z.Z. Zheng and Y.H. Hu 810

Optimization of Maximum Entropy Model Oriented to Bayes Prior Distribution Based on PSO
Y. Dai, Z.M. Wang and G. Ling 814

Optimum Design of Flat End Face Mechanical Seal Based on Coupling Analysis
J.F. Zhou, B.Q. Gu and C.L. Shao 819

Output Tracking Control and Synchronization of Continuous Chaotic Systems Using Differential Evolution Algorithm
S.B. Liu, S.M. Zhou and L.Y. Hu 823

Parameter Optimization and Design of Radial Telescopic-Type Tire Building Drum
W.D. Sun, Y.B. Ni and Y.H. Yang 829

Parameter Optimization for a Polymer Electrolyte Membrane Fuel Cell Model
X. Li, Q. Yan and D.T. Yu 834

Parameter Optimization for Oil/Air Lubrication of High Speed Ceramic Motorized Spindle without Bearing Inner Rings
S.H. Li, Y.H. Wu and K. Zhang 839

Parameter Optimization of Laser Scribing Technics of 30Q130 Grain-Oriented Silicon Steel Based on Genetic Neural Network
Y. Huang, Y. Liu and G.L. Zhu 844

Parameters Design and Motion Analysis of Rolling-Cut Shears
D.Y. Sun, Y. Zhao, J.D. Peng, C.S. Xu, C.G. Dong, J. Wang and R.M. Mei 849

Parametric Design for Hydraulic Mounting Engine
C. Chen, Y.J. Jiang and L. Huang 853

Performance Analysis and Parameter Optimization of a Planetary Mixer
M.J. Yang, X.W. Li, T.L. Shi and S.Z. Yang 858

Performance Comparison between an MRF Damper and an MRE Isolator Incorporated with a Building Structure
Y. Zhou, W.H. Li and M.N.S. Hadi 862

Performance Simulation and Design of New Series Hydraulic Hybrid Bus
P.Y. Xi and S.Q. Chang 866

Precise Impact Drive Mechanism Based on Asymmetrically Clamped Piezoelectric Actuator
S.M. Hua, G.M. Cheng, Z.Y. Zhang and P. Zeng 870

Precision Forming of Pipe Joint Based on Cold Extrusion Technology
S.M. Xu, H.G. Huang and D.Y. Sun 875

Prediction for Shoe Factor of Drum Brakes Based on Nonlinear 3D Simulation Models
X.B. Ning, J.S. Shen and B. Meng 880

Prediction of Building Deformation Caused by Subway Construction
N. Liu and C.S. Zhang 886

Prediction of Properties of MgO-C Refractory Based on Micromechanics Model
Z.G. Wang, C.M. Liu, N. Li and Y. Wang 890

Preliminary Exploration on Control Theory of Ultraprecision Stage with Large Travel
L. Shi and B. Lin 895

Printed Circuit Board Assemble Process Decision-Making System Based on Knowledge
X.G. Kong, Y.X. Wang and B.Q. Ma 899

Processing Quality Dynamic Control Based on Quality State
Y.Y. Yao, L.P. Zhao and Y.T. Qin 905

Product Bionics Form Design Based on Users' Kansei Image
L. Ding, J.M. Che and X.F. Dong 910

Product Design Strategies and Methods for Automatic Conveying
Y.H. Lou, L.J. Liu and X.C. Zhang 915

Pump-Control-Motor Combined Speed Governing Control Platform Based on Virtual Instrument
T.H. Peng, J.D. Liu, X.S. Hao and M.S. Yang 919

QNX and Simulink-Based Control Platform for HIT/DLR II Robot Hand
M.H. Jin, D.J. Wang, S.W. Fan and Z.P. Chen 923

Realization of Expected Direction Angle of SGM Spiral Bevel Gears Based on Local Synthesis
G.L. Liu, Y.J. Tian and P. Jiang 927

Relationships between Tensile Mechanical Properties and Roughness of Tensile Fracture About 16MnR Steel after High Temperature
S. Zhang, A.Z. Liu and J.H. Cui 934

Reliability Analysis and Improvement of ATCs of CNC Lathes
Y.Q. Wang, X.J. Wang and S.M. Hua 939

Research and Application of Macro-Based Tool Library Integration in CATIA Enviroment
X.G. Kong, J.T. Chang and C. Lei 944

Research in Model Testing Pier-Foundation Hysteretic Property in Passenger Dedicated Line
M.B. Ding and X.C. Chen 949

Research of Automatic Positioning Technology for Dental Crowns Design
Y.H. Duan, X.S. Cheng, N. Dai and T.R. Yuan 953

Research of Core Competitiveness of Zhejiang SMEs Based on Industrial Design
Z.W. Jiang and M. Yang 957

Research of Inventory Routing Problem Based on Combination Auction
B.F. Sun 960

Research of Multi-Scale Mechanics Behavior in Hierarchical Porous Bio-Ceramics
N. Zhan, J.L. Chen and Q. Liu 964

Research of Parasite Design Model in Industrial Design
P. Zi 968

Research of the CAD/CAM Technology Applications in Product Model-Making
Q. Ge, Y. Wang and J.J. Ding 972

Research on Application of ERP System in Airlines
H.R. Han, L.Y. Hu and F. Liu 976

Research on Binderless Tungsten Carbide Prepared by Spark Plasma Sintering
X. Li, Z.Y. Xiao, C. Yang and S.G. Qu 980

Research on Building Method of Knowledge Resource Cooperation Complex Network for Regional Manufacturing
H.F. Zhan 985

Research on Case-Based Reasoning Parametric CAD Design System for Small Hydraulic Press
Y.S. Zeng and J. Qian 990

Research on Correlation of Positioning Accuracy, Static Stiffness and Degree of Perfection of Control System for Crane
G.N. Xu and H. Tian 994

Research on Cutting Remanufacture Hardness Deposited Materials in the Impactive Condition
Z.Y. Wu, X.B. Liang, X.L. Tian, S. Zhang and S.H. Wang 998

Research on Detection of Micro Plastic Gear Tooth Based on Dummy Circle Scan Method
Z.X. Zhang, K. Wang, X. Yang and L.Q. Chen 1002

Research on Dynamic Characteristics of Steel Bridge Deck Thin Paving
X.Q. Xu, Y.Y. Ma, G.Q. Wu and X.M. Gao 1006

Research on Electromagnetic Field Analysis of Magnetic Levitation Rail Machine
S.Y. Ma, P. Liao, G.Q. Wu, J.F. Mao and A.D. Jiang 1010

Research on Energy Saving Scheme of CVT in Automobile
P.Y. Xi and L. Chen 1017

Research on Hydraulic Synchronous System Based on High Speed On/Off Valve
Z. Liu, C.J. Liang and J.Y. Peng 1022

Research on Improving TII Performances of IEEE 1451 Smart Sensors
G.J. Huang, G.X. Liu, G.X. Chen and T.Q. Chen 1027

Research on Information Integration of Production Management and Decision Information Visualization in Manufacturing Enterprises
J.T. Chang, Y.Y. Qiu, X.G. Kong and S. Li 1031

Research on Inner Circle of Micro Plastic Gear Based on Sub-Pixel Location
L.Q. Chen, K. Wang and L.G. Gao 1036

Research on Jet Electrodeposited Cu-Al_2O_3 Nanocomposition Coatings
J.S. Chen, Y.H. Huang, B. Qiao, J.M. Yang and Y.Q. He 1041

Research on Mechanism of Improving Electrical Properties of ZnO Varistor Ceramics by Laser Shock Processing
R.F. Chen, Y.Q. Hua, G. Ji and Z.Z. Sun 1045

Research on Modeling of Ball-End Cutter for Virtual NC Machining
J.H. Ge, P. Zhang, X.L. Sui and P. Zhao 1050

Research on Multi-Organization Collaborative Design Based on QFD
J.F. Tu 1056

Research on Optimization and Debugging Simulation Model of Logistics Center Based on Neural Network
C.F. Jin, H.M. Yang and L.L. Wang 1060

Research on Ordering of Organization Structure for Cooperative Product Development Based on Comentropy
M. Wang, R.Y. Feng, X.M. Feng and S.J. Luo 1064

Research on Power Generation of Electroactive Acrylic Elastomer
J.B. Cao, S.J. E, L.H. Zhu, A.F. Hui, X.L. Zhu and C.F. Gao 1068

Research on Risk Probability and Economic Safety Assessment Method and Application of Mechanical System
G.N. Xu and X.L. Feng 1072

Research on Rocker-Style Elevator with Strong Lunar Surface Adaptability
K. Li, R.Q. Liu, S.Y. Jiang and Z.Q. Deng 1076

Research on Swirl-Core Nozzle with Adjustable Spray Angle Based on Vortex Theory
A.H. Bao, M.J. Yang, X. Dai, Z.Y. Qiu and S.Y. Xie 1082

Research on the Construction of Three Levels of Customization Model Based on Human Engineering
W.J. An and W.M. Yang 1088

Research on the Flow Characteristics of Polymer Injection Molding under Ultrasonic Vibration and Plastics' Mechanical Strength
J.B. Li, K.K. Xu, X.B. Lin, X.Y. Wu and G.L. Gao 1092

Research on the Measurement System of Large Dimension Workpieces Based on the Technology of CCD and Laser
X.M. Yang, Y. Wang, W.L. Zhao and L. Zhang 1101

Research on the Product Platform Life Cycle and its Management Strategies
H.L. Wang, L. Hou, M. Li and S.F. Wang 1105

Research on the Regionally Clustered Manufacturing Mode Based on Flexible Configuration of Manufacturing Resources
J.Q. Rong and L. Chen 1110

Research on Thermomechanical Stress of Casting Refractory and Improvement Measures
C.M. Liu, Z.G. Wang and Y.R. Li 1114

Research on Torsional Vibration of the Propulsion Shafting Gear System Based on an Extended Lumped Parameter Model
X. Xu and R.P. Zhou 1120

Research on V-Groove Angle of Rotated Dual-Plates Lapping Machine
J.L. Yuan, W.F. Yao, Q.F. Deng and B.H. Lv 1125

Review of Nonlinear Rotor-Bearing Dynamics System
X.C. Wu, B. Lin, F. Liu and X.S. Han 1130

Semi-Closed Loop Control of NC Machine Tools Based on the Displacement Error
J. Gao, Q. Zhao and T. Xia 1138

Simulation about Sports Bicycle Frame Based on the Experiments
J.H. Wang, J.N. Zhao, Y.S. Zhao, Z. Wang and D.L. Guo 1142

Simulation and Analysis for Spin Angle Track of the Ball Machined by Dual Rotation Plates Lapping Method
D. Liu, Q.F. Deng, B.H. Lv, W.F. Yao and J.L. Yuan 1148

Simulation and Analysis of Dynamic Evolution of Electricity Market Based on Bidding Decisions with Heterogeneous Expectations
M. Zhang, H.M. Yang and D.L. Yang 1153

Simulation and Analysis on the Direct Shearing of Semi-Fixed Abrasive Tool
X. Ma, Q.F. Deng, B.H. Lv, Y.L. Hu and J.L. Yuan 1157

Simulation Modeling of the Operating Room Based on SIMIO
Q. Zheng, S.F. Chen, J. Shen, Z.Q. Liu, K. Fang and W. Xiang 1162

Simulation of Load-Displacement Relationship for Specially Shaped RC Columns
F.L. Qu, S.B. Zhao and S.M. Zhang 1167

Simulation of Supercritical CO_2 Extraction for Peanut Oil Based on Artificial Neural Networks
J.S. Dong and B.Q. Gu 1172

Simulation of Temperature Field of Molten Steel in Mold for 700mm×700mm Billet Caster
M.H. Bai, J.L. Ge and R.S. Tong 1176

Simulation of Test Loads on Aqueduct with Multi-Longitudinal Reinforced Concrete Beams
S.B. Zhao, J.F. Guan and X.K. Li 1182

Simulation Research on Neural Network Sliding Mode Control of Energy-Regenerative Braking of Electric Vehicle
J.B. Cao, S.J. E, X.L. Zhu, H.K. Jiang and B.G. Cao 1187

Simulation Research on Special-Section Ring Radial Rolling Technology
B.S. Sun, L.T. Qi and X.D. Shu 1191

Simulation Study on Load-Sensing Hydraulic Drawing System of Coal Mining Machine
T.H. Peng, M.S. Yang, X.S. Hao and J.D. Liu 1195

Situations and Development Trends of Ultrasonic Machining Tool and Ultrasonic Machining Technology
Y. Yang and B. Lin 1199

Sixth Drawing Process Analysis for Electrodeposited Nickel Coating Battery Shells
L.Q. Zhou, X.C. Huang and C.M. Fu 1206

Solar Cell Surface Texturing Combined Wet Etching and Ultrasonic Vibration
Y. Chao, Y.T. Wu, J. Yu and L.Q. Wu 1210

Some Properties of Mathematical Model for Cylindricity Errors
P. Liu and H.Y. Miao 1214

Stochastic Optimal Dispatch of Power System under Extreme Weather Disaster
Y.X. Zhang, H.M. Yang, Z.Y. Dong and M.Y. Lai 1219

Strategy and Applied Research of Multi-Constrained Model of Automatic Test Paper Based on Genetic Algorithm
Z.F. Liu, J. Shi, J. Liu and Y. Li 1223

Strategy for Developing Enterprise Cluster by Means of Establishing Regional Commercial Alliance
L. Liu 1231

Structural Analysis of Agricultural Truck Frame Based on the Finite Element Method
Y. Wang and B. Lin 1236

Structural Design of Hoist Boom of Bracing-Hoisting-Separated Barrier-Clearing Vehicle Based on ANSYS
Z.G. Zhang, X.Y. Liu and X.D. Jiang 1240

Structural Intensity Analysis of Shells Structure under Harmonic Excitation
G.Y. Zeng and D.F. Zhao 1245

Study and Simulation for Optimization Plan of the Fluidization Quality of the Bulk Cement Tanker Device
W.C. Pei, Y.G. Li and J. Han 1249

Study of the Influence Rules between Structural Parameters and Jet Characteristics of a Liquamatic Fire Water Monitor with Self-Swinging Device
G.L. Hu, A.M. Hu and J.X. Liang 1254

Study on 3D Reconstruction and Static/Dynamic Characteristics of Human Femur
L.H. Wang and G.W. Liu 1259

Study on Assessment Method and Statistical Distribution of Roundness Error
A.C. Wang, L. Ji, Y.N. Teng and L. Zhang 1265

Study on CNC System of Parallel Mechanism
X.Y. Zhong, Y.B. Ni, P.F. Wang and Z.Y. Yang 1273

Study on Effects of Input Rotational Speed on Output Torque of Magnetorheological Torque Servo
F. Lu, D. Zheng, Y.J. Shi and B. Huang 1278

Study on Experiment of Drilling for Titanium Alloy Ti6Al4V
H.B. Wu, Z.X. Jia, X.C. Zhang and C.G. Xu 1283

Study on Force Control in Abrasive Polishing of Aspheric Parts
D. Zheng, B.D. Lv, J.M. Zhan and L.Y. Hu 1287

Study on Geometric Tolerances Information in Integrated Manufacturing Processes
Y. Chao, H.F. Zhang and L.Q. Wu 1292

Study on Identification of Stable Spindle Speeds Range by Time-Varying Cutting Width in Turning
X.J. Wang, J.Y. Yu and H.W. Zhao 1296

Study on Integrated Design Method Based on AD, QFD, TRIZ and Taguchi Method
G.Q. Sun, G.W. Zhang, Y.L. Chen and K. Zhang 1301

Study on Mechanism of Tap Breakage in Low Frequency Torsional Vibration Tapping
F.Q. Han, Z.Z. Li and D.Y. Zhang 1306

Study on Mould Heat Penetration Depth for Semi-Solid Net Shape Forming
W. Liu, M.L. Zhang, Z.X. Jia and X. Ding 1311

Study on Numerical Modeling of Three Dimensional Oblique Cutting for Aluminum Alloy Cutting Process
X.H. Zhang and G.H. Dai 1316

Study on Optimum Meshing Efficiency for Spiral Bevel Gears in Mixed Elasto-Hydrodynamic Lubrication
J.G. Gu, Z.D. Fang and S.S. Shen 1321

Study on Profile-Adaptive Tool System for Small Robots in Large Freeform Surface Polishing
Q.T. Liu, J.M. Zhan and J.H. Mao 1327

Study on the Automatic Wiring of Small Mechanical and Electrical Equipment
P.J. Cao, J.Z. Quan, X.F. Li and L. Zhou 1332

Study on the Modification of Gear with Arcuate Tooth Traces
Z. Min, H.L. Zhu and C. Cheng 1336

Study on the Polishing Force of Face Polishing
X.C. Xu, Y.G. He and Y.M. Wang 1340

Study on the System of Impact Test in Hydraulic Impact Machine
Q. Xu and Y.Y. Huang 1345

Study on the Transmissible Torque of HSK-E50 Toolholder-Spindle Interface
Y. Lu, C.Q. Huang and J. Wang 1351

Study on the Wear Properties of Hydrodynamic Oil Film Bearing by Finite Element Method
Y.G. Li, L. Zhu, J.M. Wang, H.L. Gui, D. Yan and Q.X. Huang 1356

Study on the Working Performance of 45# Mechanical Element with Ni-P-Co Alloy Coating
X.Z. Li 1360

Study on YAG Laser Welding Process of Fe-Mn-Si Shape Memory Alloy
C.Y. Zhou, C.X. Lin and L.L. Liu 1364

Study the Effect of Background Music on Cognitive Memory
Q. Su and F. Wang 1368

Surface-Curve Contact in 4-Axis NC Machining of Sculptured Surfaces Using Anural Cutter
H.R. Liu 1372

Surface-Surface Contact in 5-Axis NC Machining of Sculptured Surfaces Using Anural Cutter
Q.H. Liu and H.R. Liu 1376

Systematic Inventive Thinking Method Based on Theory of Constraints
J. Jiang and Y. Li 1380

Technological Research on Preparing the Ni—Cr Cladding Layer on the Surface of Copper
N.W. Liu and Y.S. Wang 1384

Ternary Regression Modeling Analysis of NC Ultrasonic Machining Efficiency
G.Y. Zhong 1388

The Application and Research of Solenoid Pump in the Steam Appliances
X.W. Huang, Z.B. Xie and H.J. Shen 1393

The Application of Slice Method in Cutting Simulation
Q. Li, L. Li, J.C. Li and Y. Guo 1397

The Applied Study on Hot Runner Technology and Design of Injection Molds
Y.J. Huang and G.X. Yang 1401

The Approaches of Cultivating and Improving Design Students' DQ
G. Liu 1407

The Build of Digitized Design and Manufacture System for NC Machine Tool
P. Hu and G.F. Yin 1411

The Calculation Method of Accurate Shaping Curve of Inside Right-Angle Step in Cross Wedge Rolling
R. Zhao, K.S. Zhang and Z.H. Hu 1416

The Causes and Solutions of Boiler Scale in Steam Appliances
H.J. Shen and Z.B. Xie 1421

The Cleaning Mechanisms on Organic Grinding Fluid Applied for Si_3N_4 Ceramic Grinding
Z.Y. Wu, S.H. Wang, X.L. Tian and S. Zhang 1425

The Current Density and Energy Input in Electrothermal Explosion of Metallic Powders
G.Y. Zhou, X.L. Dong and J. Liu 1429

The Current Situation and Progress of 4-DOF Parallel Robot
Y.Q. Wang, G.Y. Zhong, Y.B. Chang and G.X. Liu 1433

The Design of Double-Helix Single-Screw Pump Based on PRO/E
X.B. Huang and G. Wen 1437

The Development of Physical Signal Measurement and Control in the Processing of Ultrasonic Machining
X. Zhang, B. Lin and X.S. Han 1442

The Development of Test System for Crankshaft Balancing Machine
A.H. Ren, H. Zhou and C.Q. Sun 1448

The Dynamic Performance Research of Fixture for Automobile Hydraulic Vibration Reliability Test
Y.S. Zeng 1452

The Effect of Cut Tool Geometric Parameters on Tool Tear of Machining Nickel-Base GH4169 Super Alloys
Z.P. Hao, D. Gao and R.D. Han 1457

The Effects of the Cooling Gallery Position on the Piston Temperature Field and Thermal Stress
J.X. Liu, Y. Wang and W.Z. Zhang 1462

The Evaluation of Resources and Environment Attributes of Manufacturing Process Based on Scatter Degree Combination Evaluation Method
H. Zhang, X.G. Zhang and Y.H. Wang 1466

The Finite Element Simulation of Electromagnetic Powder Compaction Drive Force
X. Zhou and J. Liu 1473

The Fracture Analyse of Titanium Bone Implant
B.Y. Lou, C.L. Liu and B. Xu 1478

The Influence Rules of Stress about Technical Parameters on Synchronous Rolling Railway Axis with Multi-Wedge Cross-Wedge Rolling
X.D. Shu, X.H. Wei, C.M. Li and Z.H. Hu 1482

The Kinematic Analysis of Heart-Shaped Gear Continuously Variable Transmission
C.Q. Sun, G.X. Sun, A.H. Ren and Y.D. Liu 1489

The Lapping Experimental Research Based on Multi-Unit-Lapping Plate
W. Hang, F. Jiang, Z.Z. Zhou and Y. Dai 1493

The Matching Pursuit Method for Extracting Feature Based on DT-CWT and its Application
Z.X. Chen, X.D. Shu, C.L. Wang and S. Xie 1497

The Mechanical Analysis of an Injection Machine Clamping Unit
G.Q. Yu, G. Zhang, S.F. Weng and H.B. Huang 1503

The Mode and Structural Design of Venting System for Injection Mold
H.L. Li and T.X. Tang 1507

The Monitoring of Machine Tool Working State Based on Load Current Signal
G.L. Yu and G.F. Li 1512

The NC Side Milling of the Ruled Surface of Impeller Leaf with Cylindrical Cutter
H.R. Liu, Y. Lou, C. Wang and Q.H. Liu 1516

The Novel Design of Full-Balancing Mechanism for Single-Cylinder Diesel Engine
B.F. Yin, J.G. He, Y. Xu and Y.Q. Li 1520

The Probabilistic Method of Failure Analysis to Transmission Facilities under Ice Storms
W.J. Xu, H.M. Yang, M.Y. Lai and S. Wang 1525

The Purification Experiments of Cold Rolling Emulsion by Hydrocyclone
L. Ma, H.L. Pan, H.L. Wang, Q. Yang, J.G. Wang, S.M. Wu, D.J. Xu and X.M. Xu 1529

The Quantitative Evaluation on the Lapping Uniformity of Rotated Dual-Plates Lapping Mode
P. Zhao, W. Yu, K.F. Tang, B.H. Lv and J.L. Yuan 1534

The Research of Agile Manufacturing Based on Load Current of the Equipment
G.F. Li, T.F. Fang and L. Luo 1540

The Research of Air Fuel Ratio Self-Learning Control Strategy Based on UEGO Sensor
L. Tang, W.Q. Meng and H.Y. Gan 1544

The Research on Control of the Electronic-Mechanical CVT
L. Zhang, G.N. Li, Y. Liu and N.S. Cheng 1549

The Research on Generation of Arc Face-Gears
Y.M. Cui, Z.D. Fang, J.Z. Su, X.W. Cai and L.P. Wang 1553

The Research on the Microstructure and Property of Gear with Sinter Powder Material
B.Y. Lou, F.L. Dong and B. Xu 1558

The Stress and Strain Analysis in the Broadening Stage of Multi-Wedge Synchrostep Rolling Railway Axle by Cross-Wedge Rolling
X.D. Shu, M. Xiao, C.M. Li and Z.H. Hu 1561

The Structure Characteristics and its Product Experimental Analysis of the Cold-Rolled Production Line of Double-Line Continuous Electrolytic Pickling
B.S. Xing, C. Du and X.F. Wang 1567

The Structure Design and Finite Element Analysis of the Self-Moving Silent Piler Based on the Pile Reaction Force
W.B. Zhou, X.B. Ouyang and K.T. Li 1571

The Tolerance Modeling of LED Die Bonder Based on Multi-Body Systems
M.F. Huang, J.T. Huang, X. Cheng, J. Zhang and H. Jing 1577

The Ultrasonic Signal Identification of the Nickel-Based Superalloy Based on the Wavelet Neural Network
X. Yin and Y.P. Liu 1581

Theoretical Analysis of Granularity of Grinding Particles on Mixing
Y.C. Deng 1585

Topology Optimization Design of Integral Structure of Woodworking Machine Tool
Z.X. Meng, J. Cao, Z.W. Li and J.X. Zhao 1591

Topology Optimization on the Movable Platen of Plastic Injection Machine
H.B. Huang and D.H. Xue 1595

Total Quality Innovation of Manufacturing Enterprises Based on Innovation Unions
J.F. Tu 1600

Total-Probability Method in Reliability Design of Gear Strength
Y. Li, W. Xiao, H.Y. Huang and Y.C. Yuan 1604

Unified Framework and Performance Analysis of Transaction Adjustment Models in Congestion Management of Power System
Y. Wang, S. Wang and W.J. Xu 1615

Using PSO to Optimize the Performance of Timeslot Scheduling in Mesh Wireless Network
J.D. Zhao, Y. Lin and J. Qin 1619

Virtual Assembly of Lathe Spindle System
X.M. Li, H.J. Sun and L.H. Zhu 1625

Virtual Design for New Type Radial Telescopic Tire Building Drum
Y.B. Ni, C.C. Li and Y.H. Yang 1629

Virtual Instrument for Measuring Elastic Modulus of Wood Floor
D. Zhao, J.Z. Zhang and J. Zhao 1634

Walking System Design on Land Auto-Mobile Agriculture Spraying Robots
C.Z. Yang and S.Q. Zhang 1638

Wind Load Analysis and the Structure Optimization Design of the Steel Structures with ANSYS
Z.X. Meng, J.X. Zhao, S.Y. Wang and N. Zhou 1643
X-Ray Measurement for Residual Stress in Cold Ring Rolling
Z.J. Zuo, W.X. Yu and J.J. Yang 1647
