

Table of Contents

Preface, Committees

Chapter 1: Plenary Keynote

Advances in Constitutive Modeling of Plasticity for Forming Applications F. Barlat, Y. Jeong, J.J. Ha, C. Tomé, M.G. Lee and W. Wen	3
Modelling of Instability and Fracture Effects in the Sheet Metal Forming Based on an Extended X-FLC Concept P. Hora, B. Berisha, M. Gorji and H. Hippke	15
Towards a Better Understanding of the Ratcheting Phenomenon L. Taleb and C. Keller	33
Strain Gradient Plasticity: An Application to Plastic Flow Localization Analysis M. Kuroda	41
Plastic Limit Analysis of Piping with Local Wall-Thinning under Elevated Temperature X.H. Du and Y.H. Liu	47

Chapter 2: Recent Progress in Impact and Dynamic Plasticity

Investigation on Micro-Tensile Test System Platform Used for Test of the Weld T. Ye, B.S. Zhang, J.J. Liu and T. Suo	55
An Experimental Evaluation of Energy Absorption of TRIP Steel by Small Punch Test A. Hayashi and T. Iwamoto	60
A Computational Investigation on Small Punch Test for Evaluating Fracture Toughness of TRIP Steel at Higher Deformation Rate H.T. Pham and T. Iwamoto	66
A Measurement of Volume Resistivity in Fe-Based Shape Memory Alloy under Tensile Deformation and its Evaluation of Strain Rate Sensitivity B. Cao, Y. Moriyama, K. Fujita and T. Iwamoto	72
A Study on Tensile Deformation Behavior in Fe-Based Shape Memory Alloy by Rate Sensitive Transformation Kinetics Model A. Budiaman, K. Fujita and T. Iwamoto	77
Comparative Research on the Crushing Behaviour of Aluminium Sheet Wrapped Square Carbon Fibre Reinforced Plastic (CFRP) Tubes R.D. Hussein, D. Ruan and G.X. Lu	82
Frangibility Study of Natural Fiber Reinforced Composite Laminates Pushparaja, G. Balaganesan and R. Velmurugan	88
Crashworthiness Study of Composite Fuselage Section Z.L. Yu and P. Xue	94
An Experimental Study on Axial Joint Strength Made of Fe-28Mn-6Si-5Cr Shape Memory Alloy at Various Deformation Speeds Y. Yamamoto, K. Fujita and T. Iwamoto	99
The Saturated Impulse for Fully Clamped Square Plates Subjected to Linear-Decay Pressure Pulse L. Zhu, X.Y. Bai and T.X. Yu	105
Seismic Performance of a Concrete Highway Tunnel under Earthquake Sequence Using a Concrete Damage Plasticity Model J.M. Dulinska and I.J. Murzyn	110
Probing Temperature-Dependent Viscoelastic Properties of Glassy Materials Using Impact Induced Vibration - Theory and Experiments J.B. Wang and H.H. Ruan	116
Low Velocity Impact Behavior of SiC/PU/GFRP Laminates K.V. Akshaj, C.K. Vishwas, G. Balaganesan and M.S. Sivakumar	122

Low Velocity Impact Response of Composite/Sandwich Structures K.V. Akshaj, P. Surya and M.K. Pandit	127
Rate-Dependent Material Parameters of the Combined Isotropic/Kinematic Hardening Model for the TRIP980 Steel Sheet G.S. Joo and H. Huh	132
Characterization of Hardening Behavior at Ultra-High Strain Rate, Large Strain, and High Temperature M.J. Piao, H. Huh and I.J. Lee	138
Large Deformation Modeling of a Re-Entrant Honeycomb under Tensile Load J.J. Zhang, G.X. Lu, D. Ruan and Z.H. Wang	143
Large Deflection Response of Rectangular Metal Sandwich Plates with Functionally Graded Foam Core Subjected to Blast Loading C.P. Xiang, Q.H. Qin, F.F. Wang, M.S. Wang, X.H. Yu and T.J. Wang	149
Numerical Study of the Effects of Strain Rate and Cell Geometry on Dynamic Behavior of Axial Crushing Honeycomb T. Umeda, K. Kataoka and K. Mimura	156
A New Design of Energy Absorbing Bolt S.C. Liu, G.X. Lu, D.W. Shu, Y.X. Zhou and Z.Y. Zhao	162
Impact Combined Shear-Compression Testing of Honeycombs Using a Rotatable Hopkinson Bar B. Hou, S.B. Tan, R. Xiao and H. Zhao	168

Chapter 3: Modeling and Simulation of Multiscale Plasticity for Various Materials

The Evolution of the {110}<001> and {236}<385> Recrystallization Textures in Cu Alloys and High Mn Austenitic Steels with the Brass Rolling Texture D.N. Lee	177
Crystal Plasticity Analysis of Change in Active Slip Systems of α-Phase of Ti-6Al-4V Alloy under Cyclic Loading Y. Kawano, T. Mayama, R. Kondou and T. Ohashi	183
Dislocation Dynamics Simulation of Interaction between Prismatic Dislocation Loops and Voids in Irradiated Thin Films Y.Y. Cai, J.P. Guo and Y.P. Chen	189
Anisotropic Elastic Field of 3D Prismatic Dislocation Loops in Bounded and Voided Single Crystal Films J.P. Guo, Y.Y. Cai and Y.P. Chen	195
Measurement of Bauschinger Effect in Ultrafine-Grained A1070 Aluminum Rods T. Koizumi and M. Kuroda	202
A Simulation of Ferroelastic Phase Formation by Using Phase Field Model M. Muramatsu, T. Kawada and K. Terada	208
Quantitative Evaluation of Deformation Twinning Behavior in Polycrystalline Pure Magnesium T. Soeda, Y. Tadano and S. Hagihara	214
Subsequent Yield Behavior of Hexagonal Metal with Rolling Texture Y. Tadano	220
On the Role of Grains in Plastic Deformation and Low Cycle Fatigue of Polycrystalline Metal T. Abe	226
High Temperature Deformation of Cast ZW11 Magnesium Alloy with Very Large Grain Size K.P. Rao, M. Bagheripoor, H. Dieringa and N. Hort	232
MD Analysis of Effect of Relative Humidity on Molecular Chain's Network Structure of PEM I. Riku, K. Kawanishi and K. Mimura	238
Multiscale Simulation of Dynamic Recrystallization for α-Mg Phase in Mg/LPSO Alloys Based on Multi-Phase-Field and Dislocation-Based Crystal Plasticity Model Y. Kimura, S. Kujirai, R. Ueta and K. Shizawa	243

Macroscopic Yield Function Predicted by Crystal Plasticity Simulation on Ultrafine-Grained Aluminum	
Y. Aoyagi	249
Numerical Biaxial Tensile Test of Aluminum Alloy Sheets Using Crystal Plasticity Model Implemented in Commercial FEM Software	
S. Ochiai, A. Yamanaka and T. Kuwabara	255
Development of Simulation Technology for Production of Porous Polymeric Membranes	
H. Nada, M. Kudo, J. Takahashi, T. Yamamoto, H. Hara and K. Shizawa	261
Crystal Plasticity Analysis of Mechanical Response in Two Phase Alloys with Dispersion of Fine Particles	
T. Ohashi and Y. Okuyama	267

Chapter 4: Cyclic Plasticity

Thermo-Mechanical Cyclic Plastic Behavior of 304 Stainless Steel at Large Temperature Ranges	
N. Ohno, R. Yamamoto and D. Okumura	275
Estimation of Residual Stress Change due to Cyclic Loading by Classical Elastoplasticity Model and Subloading Surface Model	
R. Higuchi and K. Okamura	281
Application of Subloading Surface Model to Heat Treatment Simulation Based on Explicit Finite Element Method	
Y. Kawaragi and K. Okamura	287
Evaluation of the Stress Distribution by the Stepped Load Indentation Test with Constant Depth	
A. Takita, K. Sasaki, K. Ohguchi and H. Fujiki	293
Biaxial Ratchetting Deformation of Solders Considering Halt Conditions	
Y. Tomizawa, T. Suzuki, K. Sasaki, K. Ohguchi and D. Echizenya	299
Estimation of Plastic and Creep Strain Development of SAC Solder under Cyclic Loading by Using Stepped Ramp Waves	
K. Ohguchi and K. Sasaki	305
An Improved Thermo-Ratcheting Boundary of Pressure Pipeline	
Q.H. Kan, J. Li, H. Jiang and G.Z. Kang	311
Study of Micro Deformation of Austenitic-Ferrite Duplex Stainless Steel by Nanoindentation Method	
S.J. Guo, Y.Y. Cui, F.Z. Xuan and X. Wang	316
Effect of the Non-Associativity of Plasticity Model on the Cyclic Behavior of Geomaterials	
F. Oka and S. Kimoto	322
Thermo-Elasto-Plastic Analysis of Pearlitic Transformation Plasticity under Combined Bending-Tensile Loading	
M.A. Hamdam, K. Takahashi, H. Tateoka, K. Oshita and S. Nagaki	328
Fatigue of Extruded 2017A Aluminum Alloy Subjected to Non-Proportional Loading Paths	
O. Allaoui, L. Taleb, M. Brik, C. Keller and G. Marnier	334
Elastic and Plastic Analysis of O-Ring Seal for Reactor Pressure Vessel	
X.J. Shao, L.G. Zheng, L.P. Zhang and X.L. Fu	339
Calculation Strategy for the Determination of Plasticity Correction Factors	
J. Du, X.J. Shao, Q.H. Kan, Y. Zhang and X.L. Fu	345
Description of Closure of Cyclic Stress-Strain Loop and Ratcheting Based on Y-U Model	
F. Yoshida, H. Hamasaki and T. Uemori	351

Chapter 5: Strength of Advanced Materials

On the Choice of the Power Law Flow Rule and its Consequences in Crystal Plasticity	
H. Chowdhury, H. Altenbach and K. Naumenko	359
Evaluation of Very High Cycle Fatigue Properties of β-Titanium Alloy by Using an Ultrasonic Tensile-Compressive Fatigue Testing Machine	
R. Kasahara, M. Nishikawa, Y. Shimamura, K. Tohgo and T. Fujii	366

Relaxation Oscillation in the Viscous Flow of Borosilicate Glass W.D. Liu and L.C. Zhang	372
Deformation Properties of 3D Printed Shape Memory Polymer K. Takeda, S. Hayashi and K. Ueki	378
Failure Criteria of Adhesive Joints between Aluminum Circular Pipes under Multiaxial Stress State H. Tanaka, M. Kimura, M. Iimori, Y. Shibutani and Y. Liu	383
Improvement of Corrosion Fatigue Strength for TiNi Shape Memory Alloy K. Yamada and R. Matsui	389
Experimental Study and Finite Element Simulation of Bending Fretting Fatigue for Tempered 42CrMo Steel J. Ding and Y.L. Zhu	394
First Principles Calculations of Stress-Induced Structural Changes of Supercooled Borosilicate Glass K. Mylvaganam, W.D. Liu and L.C. Zhang	399
Super-Elastic Behavior Analysis of Shape Memory Alloy Vascular Stent L. Tao, C. Luo, W.X. Li and Y.J. Zhang	405
Elasto-Viscoplastic Analysis of Slanting-Weft Woven Fabric Composites Based on Homogenization Theory K. Goto, T. Tomioka, M. Arai and T. Matsuda	410
Effects of Blowing Ar on Inclusion and Properties of AZ61 Magnesium Alloy Y.Q. Lu, X.J. Zhu, X.D. Hu, Y. Yao and H. Cai	416
Temperature Dependent Plastic Deformation Behavior of AZ31 Magnesium Alloy in Uniaxial and Biaxial Compressions I. Shimizu	421
Effects of Two Scaling Exponents on Swelling-Induced Softening of Elastomers under Equibiaxial and Planar Extensions D. Okumura and M. Mizutani	427
Two-Scale Analysis of Thermal Behavior of CFRP Laminates Based on a Thermoelastoviscoplastic Homogenization Theory T. Matsuda, J. Toyomura, T. Ogaki and M. Arai	433
Evaluation of Micro/Meso/Macro Thermal Properties of Plain-Woven Laminates Y. Sato and T. Matsuda	439
Atomistic-Level Simulation of Deformation in Polycarbonate A. Kubo and Y. Umeno	445
Atomistic Model Analysis of Deformation of Carbon Nanotubes under Axial Compression M. Sato and Y. Umeno	451
Computational Simulation of Scale-Dependent Non-Uniform Deformation Behavior of Polymer Foam M. Uchida, K. Suzuki and Y. Kaneko	456

Chapter 6: Damage, Localization and Fracture of Engineering Materials

Effects of Non-Associated Flow Rule on AHSS Shear Fracture H.W. Lee and K.S. Oh	465
Influence of Geometrical Imperfection on Failure Mode of DP780 Steel Utilizing Damage Models Embedded RVE Technique K. Zhao, X.C. Zhuang, X.H. Pei and Z. Zhao	471
Characterizing Fracture Development in Ti-Alloy with I-Type Cracks Using Acoustic Emission and Thermal Infrared Imaging H. Ouyang, J. Shi, H. Sakamoto and G.H. Zhao	477
Application of Uncoupled Damage Models to Predict Ductile Fracture in Sheet Metal Blanking C. Canales, R. Boman and J.P. Ponthot	483
Anisotropic Damage Evolution for Perforated Sheet under Tensile Deformation S. Nagaki, D. Saboi, K. Muroi, M. Iizuka and K. Oshita	489

Bending Behavior to Fracture of an Aluminium Alloy Involving Pre-Strain A. Pradeau, S. Thuillier and J.W. Yoon	495
Effect of Lattice Rotation on Hardening Behavior of HCP Metals T. Kurisu, Y. Tadano and S. Hagihara	502

Chapter 7: Optimization and Inverse Problems in Nonlinear Mechanics

A New Algorithm of the Boundary Restraining Force for One-Step Inverse Analysis Y.D. Bao, X.J. Qin, J. Cui and H.T. Wang	511
The Refinement Algorithm of Blank Outline Based on One-Step Inverse Analysis J.K. Zhou, Y.D. Bao, W.L. Zhou, J. Cui and H.T. Wang	517
An Adaptive Triangle Mesh Generation for One Step Inverse Analysis Y.C. Liu, Y.D. Bao and W.L. Chen	523
Effect of Optimisation Parameters in Topology Optimisation L.N.S. Chiu, D. Stojanov, B.F. Rolfe and W.Y. Yan	529

Chapter 8: Progress in Processing and Forming of Metal Materials

Warping Behavior of Thin Strip with Single-Drive Rolling W. Baba, M. Miyake and J. Yanagimoto	537
Influence of Dog-Bone Width on End Profile in Plan View Pattern Control Method for Plate Rolling M. Horie and K. Hirata	542
Transient Thermal Analysis of Cold Strip Rolling Considering Rough Surface Contacts C.H. Wu, P.L. Qu, L.C. Zhang, S.Q. Li and Z.L. Jiang	548
The Numerical Simulation of Multi-Stage Sheet Metal Forming Based on Modified Yoshida-Uemori Hardening Model J. Chen and W.L. Chen	554
Numerical Investigation on Mini Internal Gear Forging Process C.C. Chen and B.H. Wu	560
Springback Analysis of Aluminum Alloy Sheet Metals by Yoshida-Uemori Model T. Uemori, K. Fujii, T. Nakata, S. Narita, N. Tada, T. Naka and F. Yoshida	566
Wear Mechanism and Ability for Recovery of Tool Steel on Blanking Die Process K. Lawanwong and W. Pumchan	572
Investigation on Wrinkling Deformation in Multi-Pass Incremental Sheet Forming Process Z.B. Liu and P.A. Meehan	578
An Experimental and Numerical Study on Forming Force, Fracture Behavior, and Strain States in Two Point Incremental Forming Process C.H. Wang, W.J.T. Daniel, H.B. Lu, S. Liu and P.A. Meehan	586
Effect of Material Anisotropies of Hot-Rolled High-Strength Steel Sheet on Localized Deformation Behavior in Hole Expansion - Part-I Experimental Consideration to Circular and Oval Hole T. Suzuki, K. Okamura, Y. Ishimaru, H. Hamasaki and F. Yoshida	592
Effect of Material Anisotropies of Hot-Rolled High-Strength Steel Sheet on Localized Deformation Behavior in Hole Expansion - Part-II Simulation and Evaluation of Anisotropic Yield Function K. Okamura, T. Suzuki, Y. Ishimaru, H. Hamasaki and F. Yoshida	598
Development of a Rubber Diaphragm Forming Simulation System Based on ABAQUS X. Jin, L.W. Zhuang, Y.D. Bao and Y.K. Han	604
Improvement of Shape Accuracy in Press-Formed Parts of High-Strength Steel by Springback-Root-Cause Analysis J. Hiramoto, M. Urabe, A. Ishiwatari and F. Yoshida	610
Study of Large-Expansion-Ratio Tube Hydroforming with Movable Dies Y.M. Hwang, S.Y. Hsieh and N.J. Kuo	616
Research on Stability of Panel Ultrasonic Peening Forming S.H. Lu, W. Zhang, T.R. Wu, Y.L. Zhou and Z. Zhou	623

Asymmetric-Shaped Bending of Adhesively Bonded Sheet Metals T. Tokuda, T. Uemori, T. Yoshida, M. Takiguchi and F. Yoshida	630
Study on Magnesium Alloy Thin Sheet by Symmetric Rolling and Asymmetric Rolling Process Z.M. Wang, H.Y. Zhao, X.D. Hu, Y.Q. Lu and D.Y. Ju	636
Pulsed Laser Surface Treatment for Improvement of Machinability T. Inoue, K. Yamada, K. Sekiya, R. Tanaka and Y. Yamane	641
Residual Stress Analysis Considering Phase Transformation and Transformation Plasticity for Heat-Treated Large Size Shaft Y. YANAGISAWA, Y. Kishi and K. Sasaki	647
A Yield Function for Anisotropic Sheet Material Described by 3rd-Degree Spline Curve and its Applications T. Amaishi, H. Tsutamori, E. Iizuka, K. Sato, Y. Ogihara and Y. Matsui	653
Elastic Modulus Model Based on Dislocation Density and its Application on Aluminum Alloy 5052 H.Y. Yu and C.X. Zhou	659
Friction Stir Forming of Aluminum Alloy Gear-Racks T. Ohashi, J.Z. Chen, T. Nishihara and H.M. Tabatabaei	665
Effect of Stress Relaxation on Springback of Steel Sheet in Warm Forming N. Saito, M. Fukahori, D. Hisano, H. Hamasaki and F. Yoshida	671
Determination of the Anisotropic Hardening of Sheet Metals at Large Strain from Stretch Bending Test G. Capilla, H. Hamasaki, F. Yoshida, T. Suzuki and K. Okamura	677
Simple Springback Cause Analysis Using Measured Shapes of Dies and Pressed Part J. Hiramoto, M. Urabe, A. Ishiwatari and F. Yoshida	683
On the Scale Dependence of Micro Hydromechanical Deep Drawing H. Sato, K. Manabe, T. Furushima, D.B. Wei, Z.Y. Jiang and S. Alexandrov	689
Equi-Plastic Work Locus of 5000 Series Aluminum Alloy Sheet at Warm Temperature F. Tamashiro, H. Hamasaki and F. Yoshida	695
Optimum Design of Si-Cr Alloy Springs for Seismic Vibration Isolator D.C. Chen, S.H. Kao, L.R. Chen, S.J. Wang, C.Y. Chen and C.K. Huang	700
Effects of Aging Process in Hot Forming with Synchronous Cooling on Properties of AA2024 M.H. Chen, G.L. Chen and N. Wang	706
