Measurement Lecture

	1
Techniques for Experimental Measurement of Fatigue Crack Closure D. Nowell	3

Keynotes

	11
Advances and Challenges in Structural Integrity A.H. Sherry	13
Failure Modes of Sandwich Structures E.E. Gdoutos	23

Structural Integrity

	29
Monitoring Creep Strain in Power Station Engineering Plant A. Morris, J.P. Dear, M. Kourmpetis, C. Maharaj, A. Puri and A.D. Fergusson	31
Improved Correlation of Measured and Predicted Hysteresis Loops in a Multiaxial Fretting Fatigue Test Rig for Spline Couplings D. Houghton, P.M. Wavish, E.J. Williams and S.B. Leen	37
Fretting Fatigue Apparatus for Shrink-Fitted Shaft Assembly C. Santus, L. Bertini and M. Beghini	43
Experimental Study on the Material Response of Laser Weldment under Dynamic Loading J. Fang	49

Inverse Problems

	55
Software Implementation of the Virtual Fields Method V. Tran, S. Avril and F. Pierron	57
Using Airy Function to Thermoelastically Separate Stresses in a Central Circularly Perforated Plate S.J. Lin, D.R. Matthys and R.E. Rowlands	63
Identification of Material Properties Using FEMU: Application to the Open Hole Tensile Test G. Silva, R. Le Riche, J. Molimard, A. Vautrin and C. Galerne	73

Mechanical Modelling

	79
The Determination and Evaluation of Nitinol Constitutive Models for Finite Element Analysis E. McCumiskey, W.M. Dempster, D.H. Nash, T.R. Ashton and D.G. Stevenson	81
Plotting of Isoclinic Phasemap from Finite Element Results and its Use in Digital Photoelasticity K. Ashokan and K. Ramesh	89
Theoretical and Experimental Working Life Comparison for a Helical Gear under Linear Pitting Failure M.A. Khan and A.G. Starr	95

Mechanical Behavior of a Calcium Phosphate Ceramic Bone Graft Used in the Rehabilitation of a C4 Human Vertebra J.A. Beltrán-Fernández, L.H. Hernández-Gómez, R.G. Rodríguez-Cañizo, G. Urriolagoitia-Calderón, G. Urriolagoitia-Sosa, A. González-Rebatú and M. Dufoo-Olvera	101
Experimental Structural Analysis of Pedestal Mounted Stinger System Turret M. Çelik	107
Welded Structures	117
Tensile Properties and HAZ Definition for TIG and EB Welds Using Electronic Speckle Pattern Interferometry (ESPI) Y. Kyriakoglou, M. Preuss and P. Bowen	119
Determination of Weld Metal Mechanical Properties Utilising Novel Tensile Testing Methods M. Kartal, R.M. Molak, M. Turski, S. Gungor, M.E. Fitzpatrick and L. Edwards	127
The Application of the Hole Drilling Method to Define the Residual Stress of Dissimilar Laser Welded Components E.M. Anawa and A.G. Olabi	133
Assessment and Minimization of the Residual Stress in Dissimilar Laser Welding K.Y. Benyounis, A.G. Olabi and J.H. Abboud	139
NDE	145
Confidence of Detection of Fracture Signals Using Acoustic Emission R. Pullin, K.M. Holford and S.L. Evans	147
Evaluation of Sub-Surface Stresses Using Thermoelastic Stress Analysis N. Sathon and J.M. Dulieu-Barton	153
Monitoring the Evolution of Fatigue in Corrugated Paperboard under Random Loads M.A. Garcia-Romeu-Martinez, V. Rouillard, M.A. Sek and V.A. Cloquell-Ballester	159
Micromechanical Testing	165
Local Strain Measurement in Hot Deformed Microstructures C. Pinna and Y.J. Lan	167
Local Plastic Strain Measurement by EBSD M. Kamaya, J.Q. da Fonseca, L.M. Li and M. Preuss	173
Development of a Full-Field Displacement Measurement Technique at the Microscale and Application to the Study of Strain Fields in a Tensile Steel Specimen R. Moulart, R. Rotinat, F. Pierron and G. Léronel	181
Use of Micro Tensile Test Samples in Determining the Remnant Life of Pressure Vessel Steels R.M. Molak, M. Kartal, Z. Pakiela, W. Manaj, M. Turski, S. Hiller, S. Gungor, L. Edwards and K.J. Kurzydowski	187
An Innovative Measuring Method of Young's Modulus for Thin Flexible Multi-Layered Materials Using Cantilever A. Ohtsuki	195
Impact of Composites	201
Collapse of Glass/Carbon Fibre Circular Cylinders under Uniform External Pressure C.T.F. Ross, M. Engelhardt and A.P.F. Little	203
Reconstruction of Impact Loads within Fibre Reinforced Polymers C.R. Koenig, D.H. Mueller, O. Focke and M. Calomfirescu	209
The Effect of the Impactor Diameter and Boundary Conditions on Low Velocity Impact Composites Behaviour A.M. Amaro, P.N.B. Reis, A.G. Magalhães and M.F.S.F. de Moura	217

Effect of Laminate Configurations on Impact Properties of GFRP Composite in Seawater S.K. Srivastava and I.P. Singh	223
 Impact and High Strain Rate	 229
Strain Rate Effects in Crushable Structural Foams R.A.W. Mines	231
Identification of a Lumped-Parameter Model for Golf Balls in Normal Impact K. Nakai and T. Yokoyama	237
Interpreting Shock Data to Estimate Drop Height Levels During Handling M.A. Garcia-Romeu-Martinez, M.A. Sek, V. Rouillard and V.A. Cloquell-Ballester	243
High Strain-Rate Compressive Response of Friction Stir Welded AA7075-T651 Joints T. Yokoyama and K. Nakai	251
 Dynamic Loading	 257
Load Pulse Determination in Gas Gun Impact Tests S.A. Ritt and A.F. Johnson	259
Error Estimations in Digital Image Correlation Technique T. Siebert, T. Becker, K. Spilthof, I. Neumann and R. Krupka	265
Modelling the Uniaxial Impact Response of a Nonlinear Sandwich Structure with Interlaminar Buckling M.A. Sek	271
The Application of an Active Vibration Regulation System to Improving Driving Comfort in Convertible Vehicles: A Comparative Study of Regulator Design Methodologies M. Mahinzaeim, J.M. Hale, D.C. Swailes, R. Schmidt and B. Johanning	277
Characterisation of the Nonlinear Behaviour of Expanded Polystyrene Cushions M.A. Sek, V. Rouillard and A. Parker	283
Dynamic Mechanical Properties of Polypropylene Syntactic Foam with Polymer Microballoons H. Mae, M. Omiya and K. Kishimoto	289
Vibration Based Damage Diagnosis of an Aircraft Structure Using Piezoelectric Transducers J. Käsger and D. Mayer	295
