

Table of Contents

Sports Engineering Past and Present S. Haake	3
High Strain-Rate Compressive Characteristics of Carbon/Epoxy Laminated Composites in Through-Thickness Direction T. Yokoyama	11
40 Years of "Strain": A Retrospective Review P. Stanley	17
High Temperature Behaviour of Materials and Components under Creep Conditions T.H. Hyde and W. Sun	25
Mechanical Design Analysis and Test in Support of the Market Introduction of a New Vehicle R.H. Cornish, M. Srail, P. Cowen, M. Welch and M. Daniels	37
Ultrasonic Cutting with High-Gain Blades A. MacBeath, A. Cardoni, L. Smith and M. Lucas	45
On Non-Ideal Simple Portal Frame Structural Model: Experimental Results under a Non-Ideal Excitation J.M. Balthazar, R.M.L.R.d.F. Brasil and F.J. Garzeri	51
Diagnosis of Noise Radiation Mechanisms from a Wind Turbine Generator M.F. Harper and M. Thompson	59
Novel Health Monitoring Procedure for Reinforced Concrete Slabs I. Trendafilova and M. Imbabi	65
The Design and Analysis of a New Type of Vibration Structure D.G. Li, J.G. Cao, J.W. Wang and C.Y. Chen	71
Fatigue Life and Residual Strength Analysis of Steel-Composite Joints S.W. Boyd, J.I.R. Blake, R.A. Shenoi and J. Mawella	81
Local Buckling of Axially Compressed, Pultruded GRP, WF-Section, Short Columns - Comparison of Experimental and FE Analysis Buckling Loads G.J. Turvey and Y. Zhang	87
Texture Analysis in Composites Formed from Waste Materials S. Clarkson, A. James and N. Walker	93
Visualisation Technique for Trabecular Architecture of Bone Using Ultrasound Signals F. Nogata	99
Mixed Mode ($K_I + K_{II}$) Stress Intensity Factor Measurement by Electronic Speckle Pattern Interferometry and Image Correlation A. Shterenlikht, F.A. Díaz Garrido, P. Lopez-Crespo, P.J. Withers and E.A. Patterson	107
Prediction of Brittle Failure of Notched Graphite and Silicon Nitride Bars S. Gerguri, L.J. Fellows, J.F. Durodola, N.A. Fellows, A.R. Hutchinson and T. Dickerson	113
The Effect of Crack-Tip Interactions on the Curve-Fitting of Isopachics K. Worden, A. Spencer and J.M. Dulieu-Barton	121
Measurement of Shrinkage Stresses in PMMA Bone Cement J.F. Orr and N.J. Dunne	127
Determination of Tensile and Compressive Stress Strain Curves from Bend Tests G. Urriolagoitia-Sosa, J.F. Durodola and N.A. Fellows	133
Determination of Stress Intensity Factors for an Interfacial Crack in a Bi-Material by Digital Photoelasticity M. Ravichandran and K. Ramesh	139
Mechanical Property Mapping Using Image Correlation and Electronic Speckle Interferometry J.Q. da Fonseca, M. Preuss, P. Ryan and P.J. Withers	147
Stress Analysis of Holes in Thick Plates S. Quinn and J.M. Dulieu-Barton	153
Local Strain Imaging during Mechanical Loading of Lamellar Microstructures in Titanium Based Alloys L. Babout, J. Quinta Da Fonseca and M. Preuss	159

Industrial Applications of Thermoelastic Stress Analysis R.A. Tomlinson and G.C. Calvert	165
Photoelastic Investigation of Friction and Residual Stress in Shrink-Fitted Shafts and Hubs I.A. Jones, C.E. Truman and J.D. Booker	171
Development of Metallic Digital Strain Gauges T. Yan, B.E. Jones, R.T. Rakowski, M.J. Tudor, S.P. Beeby and N.M. White	179
Detecting Damage in Graphite/Epoxy Composites Using Impedance-Based Structural Health Monitoring B.L. Grisso, D.M. Peairs and D.J. Inman	185
The Use of Fibre Optic Sensors for Damage Detection and Location in Structural Materials G. Thursby, B. Sorazu, D. Betz, M. Staszewski and B. Culshaw	191
Development of a Temperature Calibration Device for Thermoelastic Stress Analysis J.M. Dulieu-Barton, S. Quinn, C. Eyre and P.R. Cunningham	197
Load Cell Ringing in High Rate Compression Tests B. Roebuck, M. Brooks and M.G. Gee	205
Measurement of Material Properties for Metal Foam Cored Polymer Composite Sandwich Construction S. McKown and R.A.W. Mines	211
High Strain Rate Tensile and Compressive Testing of Braided Composite Materials N. Warrior and R. Fernie	217
Bearing Load Measurements on a 3-Shaft Gas Turbine L.P.J. Tipton	225
Long Term Underwater Strain Measurement on an Offshore Structure T. Kleckers and N. Gittins	233
Procedures for Long Term Testing of Reinforced Concrete Tension Specimens R.H. Scott and A.W. Beeby	239
Stress Characteristics of Non-Axisymmetric Synthetic Abdominal Aortic Aneurysm Models: How Real are They? A. Chaudhuri, L.E. Ansdell, M. Adiseshiah and A.J. Grass	245
Predicting Hoop Tendon Behaviour in Pre-Stressed Concrete Containment Vessel N.K. Prinja, M.F. Hessheimer and R. Dameron	251
Local Strain Distribution Produced by Warping: The Case of a Tail Rotor Blade of a Helicopter M. Chiarelli	261
