

Table of Contents

Preface and Committees

Lamb-Wave Based Damage Detection in Anisotropic Composite Plates	1
Z. Sharif-Khodaei and F. M.H.Aliabadi	
Analysis of 3D Planar Crack Problems by Body Force Method	5
A. Hasib and A. Saimoto	
Long Life Fatigue Behavior of Shot Peened Steels	9
A. Plumtree	
A Finite Fracture Mechanics Model for the Prediction of the Notched Response and Large Damage Capability of Composite Laminates	13
A. Arteiro, G. Catalanotti, J. Xavier and P.P. Camanho	
Low-Cost System to Evaluate Impact Localization in Composite Plates	17
A.L.A. Ribeiro, N. Mastelari and C.A. Cimini	
Modeling Delamination Growth in Composite Panels Subjected to Fatigue Load	21
A. Riccio, F. Ronza, A. Sellitto and F. Scaramuzzino	
Definition of a Constitutive Material Model for Progressive Failure Analysis of Composite Laminates	25
A. Riccio, C. di Costanzo, P. di Gennaro and F. Scaramuzzino	
Round Timber Bolted Joints with Steel Plates under Static and Cyclic Loading	29
A. Lokaj	
A Multiscale Approach to Polycrystalline Materials Damage and Failure	33
I. Benedetti and F. M.H.Aliabadi	
A Multi-Scale Scheme for Modelling Fracture under Dynamic Loading Conditions	37
A. Karamnejad and L.J. Sluys	
Estimation of the Crack Behaviour in the Compressive Layer of the Alumina-Zirconia Ceramic Laminate	41
L. Náhlík, B. Máša and P. Hutař	
Fatigue Life Assessment of Self-Expandable NiTi Stent	45
C.S. Nes, A. Enkelhardt, L. Bogdan and N. Faur	
Modelling Mixed-Mode Fracture Using an Energy-Based Damage Model	49
J. Alfaiate, D. Dias-da-Costa and L.J. Sluys	
Multi-Scale Mechanical Property Characterisation of Quasi-Brittle Filter Graphite	53
D. Liu, P.J. Heard, P.E.J. Flewitt and D.J. Smith	
FE Analysis of Functionally Graded Material Plate during Debonding Case with Different Boundary Conditions	57
W.M.K. Helal and D.Y. Shi	
Optimized Design of Strengthening Structure with Hat-Shaped Cross-Section by Carrying out Buckling Test	61
K. Natori, K. Katanoda, Y. Hashimoto, Y. Arao and T. Tanaka	
High Magnification Studies of Fatigue Crack Propagation	65
B. Moreno, A. Garcia-Gonzalez, P. Cobos-Rodriguez, M. Martinez, M. Lopez-Prieto and P. Lopez-Crespo	
Fracture Behavior of Notched Round Bars Made of Gray Cast Iron Subjected to Torsion	69
M. Marcon, D.A. Cendón, F. Berto, P. Lazzarin and M. Elices	
Polymethylmethacrylate Data from U-Notched Specimens and V-Notches with End Holes: A Synthesis by Means of Local Energy	73
A. Campagnolo, F. Berto, P. Lazzarin and M. Elices	
High Temperature Fatigue Tests of a Cu-Be Alloy and Synthesis in Terms of Linear Elastic Strain Energy Density	77
F. Berto, P. Gallo and P. Lazzarin	
Fatigue Behaviour of DLC Coated Al 7075-T6 Alloy in an Aggressive Mixture	81
S. Baragetti, R. Gerosa and F. Villa	
Gaussian Specimens for Gigacycle Fatigue Tests: Evaluation of Temperature Increment	85
A. Tridello, D.S. Paolino, G. Chiandussi and M. Rossetto	

Vibrational and Inertial Effects of Methane Hydrates in the Failure of a Pipeline	89
F. Caputo, F. Cascetta, G. Lamanna, G. Rotondo and A. Soprano	
Evaluation by FEM of the Influence of the Preheating and Post-Heating Treatments on Residual Stresses in Welding	93
R. Sepe, E. Armentani, G. Lamanna and F. Caputo	
Fatigue Behaviour of Full Scale Flat Stiffened Aeronautic Panels	97
R. Sepe, E. Armentani, G. Lamanna and F. Caputo	
Numerical Study of a Plate with a Pre-Cracked Circular Notch	101
F. Caputo, A. de Luca, G. Lamanna and A. Soprano	
Numerical Simulation and Experimental Investigation of Damage Behaviour on Al6061 Laser Welded Joints	105
H.Y. Tu, S. Schmauder and U. Weber	
Flexural Property and Mode I Interlaminar Fracture Toughness of Plain Woven Carbon Fiber Reinforced Plastics after Water Absorption and Freezing	109
H. Katogi and K. Takemura	
Effect of Acid Treatment on Mechanical Performance of Polyvinyl Alcohol/Halloysite Nanocomposites	113
K. Fujii, A.N. Nakagaito and H. Takagi	
A Theory for Mathematical Framework of Fatigue Damage on S-N Plane	117
H. Eskandari and H.S. Kim	
Topology Optimization of Geometrically Non-Linear Structures Using Iso-XFEM Method	121
M. Abdi, I. Ashcroft and R.D. Wildman	
Fracture Mechanisms in High-Cycle Fatigue of Selective Laser Melted Ti-6Al-4V	125
M. Simonelli, Y.Y. Tse and C.J. Tuck	
Investigation of Residual Stresses in Selective Laser Melting	129
L. Parry, I. Ashcroft, D. Bracket and R.D. Wildman	
Experimental Evaluation of Fatigue Resistance of ETG®88 and C45+C Steels Considering Stress Concentrators and Scale Factor	133
I. Černý and D. Mikulová	
Fatigue and Fracture Resistance of an Aircraft Landing Gear Steels V-ROL N and VIP P-ROL N Heat Treated to Lower Strength Limit	137
I. Černý and J. Sís	
The Effect of Specimen Size on the Determination of Residual Stress in Polymer Pipe Wall	141
J. Poduška, J. Kučera, P. Hutař, M. Ševčík, J. Křivánek, J. Sadilek and L. Náhlík	
Description of Fatigue Crack Propagation under Mixed-Mode II+III in Terms of J-Integral	145
J. Horníková, P. Šandera, T. Vojtek and J. Pokluda	
Fatigue Crack Propagation in Hydrogen Gas in Low Alloyed Steel	149
C. Sarrazin-Baudoux, C. Gardin, V.X. Tran, T.H. Pham and J. Petit	
Fatigue Crack Propagation in Thin Wires of Ultra-High Strength Steel	153
J. Petit and C. Sarrazin-Baudoux	
Hydrogen-Assisted Rolling-Contact Fatigue of Wind Turbines Bearings	157
J. Toribio, M. Lorenzo, D. Vergara and V. Kharin	
Inelastic Dynamic and Non-Linear Static Seismic Performance of a Building with RC Walls that Collapsed in the Chile's Earthquake of February 2010 and a Building with RC Concrete Frame Designed in the Mexico City	161
J.A. Avila, D.A. Lopez and J.A. Avila-Haro	
Influence of the V-Notch Opening Angle on Critical Applied Force Values for the Crack Initiation from the Sharp V-Notch	165
K. Štegnerová, L. Náhlík and P. Hutař	
Influence of Annealing Process on Crystallinity of Glass Fiber Reinforced Easily Degradable PLA Composites	169
K. Tanaka, M. Miyamura, Y. Okamoto, T. Katayama, T. Katayama and S. Yoshikawa	
Effect of High Temperature on Fiber/Matrix Interfacial Properties for Carbon Fiber/Polyphenylenesulfide Model Composites	173
K. Tanaka, J. Nishio, T. Katayama and S. Enoki	
Effect of Hot Water Environment on Tensile Fracture Properties of Carbon Fiber Reinforced Polyoxamide Composites	177
K. Tanaka, S. Maehata, T. Katayama and M. Shinohara	

Stability Evaluation of Gearbox for Independent Wheel Drive under Various Driving Mode	181
Y.S. Kim and S.C. Yoon	
Time to Failure Size Effect for Tensile Creep Specimens	185
K. Nowak	
Corrosion Resistance Testing of the Galvanized Sheet Metal Braze Welding Joints	189
A.V. Magda and C. Codrean	
Fatigue Behaviour of Al 6082-T6 Friction Stir Welded Tubular Joints under Torsional Loading	193
D.G. Hattingh, M.N. James, L. Susmel and R. Tovo	
The Effect of Soil Load on Fracture Behaviour of Three-Layer Polymer Pipe for Non-Pressurised Applications	197
M. Ševčík, F. Arbeiter, P. Hutař, G. Pinter and L. Náhlík	
High-Cycle Fatigue Damage of Oxygen-Free and Deoxidized-Phosphorous Copper Processed by Equal Channel Angular Pressing	201
M. Goto, N. Teshima, S.Z. Han, J.H. Ahn and T. Yakushiji	
Long Term High-Temperature Environmental Effect on Impact Toughness in Austenitic Alloys	205
M. Calmunger, G.C. Chai, S. Johansson and J. Moverare	
The Importance of Micro-Crack Evolution under Oxidation/Creep Conditions in Component Failure Life Predictions	209
A. Mehmanparast and K. Nikbin	
Automation Using Matrix Switch for Piezoelectric Actuator/Sensor Based Structural Health Monitoring	213
S.Y. Meng and M.H. Aliabadi	
Localization of Barely Visible Impact Damage (BVID) in Composite Plates	217
S.Y. Meng, Z. Sharif Khodaei and F. M.H. Aliabadi	
Fracture in the Single Cantilever Beam Test with Large Scale Bridging	221
M.K. Budzik, H.M. Jensen and J. Jumel	
Intersection of Interface Crack Front with Free Edge	225
A. Møberg, M.K. Budzik and H.M. Jensen	
Fatigue Strength Simulation and Prediction of a Turbine Blade	229
M. Růžička, J. Jurenka, M. Nesládek and J. Džugan	
Study of Nanostructured Composites Using the Sclerometry Method	233
N. Lvova, S. Perfilov and A. Useinov	
Validity of the Finite Fracture Mechanics Based Asymptotic Analysis for Predictions of Crack Deflection in Thin Layers of Ceramic Laminates	237
O. Ševeček, D. Leguillon, T. Profant and M. Kotoul	
Characterization of Local Deformation in Welded Joints Using a Combined Experimental and Numerical Approach	241
P. Kucharczyk and S. Münstermann	
The Effect of Anchorage Strength with Anchorage Capacity in Flat Plate	245
H.K. Choi	
Experimental Study on Pounding between Structures during Damaging Earthquakes	249
R. Jankowski, A. Seleemah, S. El-Khoriby and H. Elwardany	
High Speed Fracture Phenomena by Underwater Shockwave of Explosive Energy and Large Current Pulse in Glass Container	253
S. Honda, H. Sakamoto, Y. Ohbuchi, S. Kawabe, S. Itoh and Y. Nakamura	
Gun Bullet Collision and Penetration Problem in Polycarbonate Board	257
K. Gotoh, H. Sakamoto, Y. Ohbuchi, T. Katayama, Y. Nakamachi and H. Ando	
Design/Manufacturing System for Composite Ankle Foot Orthosis	261
S. Enoki, C.J. Huang, T. Katayama, Y. Nakamura, T. Matsuoka and K. Tanaka	
Fatigue Characteristics of Nonferrous Bolts at Elevated Temperature	265
S. Hashimura, T. Torii and T. Otsu	
Crack Analysis in Piezoelectric Semiconductors	269
J. Sladek and V. Sladek	
Evaluation of Crack Tip Stress Field Using Combination of Advanced Implementation of Over-Deterministic Method and FE Analysis	273
J. Sobek, T. Pail and V. Veselý	

Numerical Simulation of Modified Compact Tension Test Depicting of Experimental Measurement by ARAMIS	277
T. Holušová, S. Šeitl and A.F. Canteli	
Wedge Splitting Test of Foam Concrete Specimens: Calibration Curves	281
S. Šeitl, I. Merta and V. Veselý	
Numerical Simulation for Mechanical Behavior of Carbon Black Filled Rubber Composites Based on Cubic Representative Volume Element	285
Q. Li and X.X. Yang	
Numerical Analysis of Three-Dimensional Semi-Elliptical Interfacial Cracks Subjected to Indentation Load	289
N. Kurihara and M. Arai	
Thermal Cycling Life of Porous Ceramic Coatings Subjected to Thermal Gradient and Coolant Pressure	293
M. Arai, T. Hayashi and T. Suidzu	
Deviations of Microcrack during Propagation in Thin Films of Austenitic Steel and Accompanying Accommodative Processes	297
T. Eterashvili, T. Dzigrashvili and M. Vardosanidze	
Comparison of Artificial Neural Networks and the Transfer Function Method for Force Reconstruction in Curved Composite Plates	301
M. Thiene, Z. Sharif-Khodaei and M.H. Aliabadi	
Fatigue Crack Growth Rates and Tensile Strength of Titanium Produced by Means of Selective Laser Melting	305
T. Brynk, B. Romelczyk-Baishya, Z. Pakiela, T. Kurzynowski and E. Chlebus	
Comparison of Full Field and Single Inclusion Approaches to Homogenization of Composites with Non-Ellipsoidal Pores	309
I. Tsukrov, B. Drach and A. Trofimov	
Application of Acoustic Emission for Identification of Differences in Fatigue Damage of Selected Materials for Power Plants	313
V. Mentl, F. Vlasic, D. Bartkova and P. Mazal	
Work of Fracture due to Compressive Component of Loading in Wedge Splitting Test on Quasi-Brittle Cementitious Specimens	317
V. Veselý, J. Bedáň, J. Sobek and S. Seitl	
Prediction of Corrosion Processes on Weathering Steel Bridges	321
V. Krivy, V. Urban and K. Kreislova	
Analytical 1D Model of Delamination Development and Strength of Layered Composite Beam in Post-Buckling	325
V. Pavelko	
Microindentation Test Modelling in the Silicon Nitride Ceramics by Application of the Cohesive Zone Approach	329
V. Kozák and Z. Chlup	
Comparative Study on the Fatigue Behaviour of SCC and VC	333
S. Korte, V. Boel, W. de Corte and G. de Schutter	
Review of FE-Based Fatigue Evaluation Methods for the Rib to Floorbeam Welds in Orthotropic Bridge Decks	337
W. de Corte and A. Jansseune	
An Integrated Creep-Fatigue Theory for Material Damage Modeling	341
X.J. Wu	
Stress Analysis of Cracked MMCs with Lamellar Microstructure	345
M. Kashtalyan, Y. Sinchuk and R. Piat	
Continuum Approach to Computational Multi-Scale Modeling of Fracture	349
J. Oliver, M. Caicedo, E. Roubin and A.E. Huespe	
Correlation of Dent Depth to Maximum Contact Force and Damage of Composite Laminates	353
Z. Shen, Y.G. Xu and A. Chrysanthou	
Meshless Approaches for Fracture with Nonlocal Elasticity	357
P.H. Wen, X.J. Huang and M.H. Aliabadi	
Investigation of the Cracking Behaviors by Indentation Based on an <i>In Situ</i> Observation	361
Y. Yamazaki	

Deformation-Induced Dynamic Precipitation during Creep in Magnesium-Tin Alloys	365
Y.D. Huang, H. Dieringa, K.U. Kainer and N. Hort	
Mechanical Properties of Concrete Produced with Wastepaper for Application of Construction Materials	369
H.K. Choi	
Point Load Effect Determination for Different Pressure Pipe SDR Series	373
Z. Majer, M. Ševčík, L. Náhlík and P. Hutař	
A Technique for Detection and Sizing of Cracks on Plate Structures Using Piezoelectric Transducer Networks	377
F. Zou and M.H. Aliabadi	
Second-Order Computational Homogenization Scheme Preserving Microlevel C^1 Continuity	381
T. Lesičar, Z. Tonković and J. Sorić	
The Relationship of Compressive Strength and Tensile Strength of High Performance Concrete	385
J.E. Kim, W.S. Park, S.H. Yun, Y.I. Jang, H.D. Yun, S.W. Kim and D.G. Kim	
Optimized Ultra High Performance Fiber Reinforced Concrete Mixture with Intensified Volumetric Stability	389
J.J. Park, D.Y. Yoo, J.H. Park and S.W. Kim	
Effect of Area Ratio of Coarse Aggregate on Erosion Resistance of Offshore Concrete Structure	393
J.H. Park, J.J. Park, J.H. Moon and S.W. Kim	
Investigation on Compressive Strength after Impact Damage of Carbon/Epoxy Laminate	397
H.B. Park	
Effect of Mineral Admixture on Modulus of Elasticity in High Performance Concrete under Hot Weather Condition	401
N.Y. Eom, W.S. Park, S.H. Yun, Y.I. Jang, H.D. Yun, B.S. Khil and D.G. Kim	
A Study on the Fatigue Test of Truck Materials for Railway Vehicles	405
S.C. Yoon	
A Study on the Safety of Carbody for Railway Vehicles	409
S.C. Yoon and Y.S. Kim	
A Development of Innovative Slip-Form System for Concrete Pylons	413
H.J. Yoon, W.J. Chin, H.S. Kim and Y.J. Kim	
Fatigue Behavior of Extruded Mg-Al-Ca-Mn Alloy with T6 Treatment at Elevated Temperature	417
Y. Miyashita, H. Inzunza, A. Elizondo, Y. Murayama, Y. Otsuka and S. Kamado	
Contact State Investigation of a Three-Point Bend Specimen Using Numerical Methods	421
R.A. Javed, S.F. Zhu, C.H. Guo and F.C. Jiang	
An Experimental Evaluation for Four Multiaxial Fatigue Approaches	425
D. Jin, D.J. Tian, Q.Z. Wu and W. Lin	
Very High Plastic Strain Zones in 304 Stainless Steel Small Punch Specimen Loaded at RT by Martensite Formation and Recrystallization Technique	429
Y. Iino, H.S. Yu, J.H. Kong and M. Okumiya	
Comparison between Subjective and Objective Measurement of Slipperiness	433
C.H. Bang and J.S. Kim	
Micro-Computed Tomography Image Based Numerical Elastic Homogenization of MMCs	437
Y. Sinchuk, S. Dietrich, M. Merzkirch, K.A. Weidenmann and R. Piat	
Fibre Concrete Foundation Slab Experiment and FEM Analysis	441
R. Čajka and J. Vaskova	
Influence of Cold Weather on Compressive Strength in High Performance with Silica Fume	445
Y.I. Jang, W.S. Park, S.W. Kim, S.H. Yun, H.D. Yun, B.S. Khil and D.G. Kim	
The Behavior of Pseudo Strain-Hardening Cementitious Composite (PSH2C) Using Synthetic Fibers under Uniaxial Tensile Loading	449
W.S. Park, Y.I. Jang, H.D. Yun, I.S. Yang and B.S. Khil	
A Boundary Element Method for Structural Reliability	453
X.Y. Huang and M.H. Aliabadi	
Simulations of Bending Experiments of Concrete Beams by Stochastic Discrete Model	457
J. Kaděrová and J. Eliáš	

Evaluation of Slip Resistance of Safety Footwear Using Novel Equipment C.H. Bang, T.G. Kim and J.S. Kim	461
Application of the Radial Integration Method into Dynamic Formulation of Anisotropic Shallow Shells Using Boundary Element Method L.J.M. Jesus, C.A. Cimini and E.L. Albuquerque	465
Influence of Different Crack Propagation Rate Descriptions on the Residual Fatigue Lifetime of Railway Axles P. Pokorný, L. Náhlík and P. Hutař	469
Numerical Analysis about the Strength of Jointed Rock under Hydrodynamic Pressure R.Q. Hao and P. Cao	473
Investigations on Direct Shear Tests and PFC^{2D} Numerical Simulations of Rock-Like Materials with a Hole and Prefabricated Cracks P. Cao, Y.F. Zhong, Y.J. Li and J. Liu	477
