

# Table of Contents

## Preface and Organizing Committee

### Surface and Subsurface Damages of CdZnTe Substrates Ground by Diamond Grinding Wheel

S. Gao, R.K. Kang, Y. Li and H. Gao 1

### Research on Micro-Grinding Method and Surface Quality

Y.D. Gong, Y.M. Liu, J. Cheng and J.F. Zhang 6

### The Study of Wear Flat Effect on the Single Grain Micro-Cutting Performance in Superabrasive Grinding from a Simulation Perspective

X.K. Li, L. Yan, M.J. Yi and Y.M. Rong 11

### Temperatures in Grinding Cemented Carbide (YT30) with a Vacuum Brazed Diamond Wheel

Y.J. Zhan, Y. Li, H. Huang and X.P. Xu 16

### Investigation on the Workpiece Surface Residual Stress in High Efficiency Deep Grinding with Ultra High Wheel Speeds

T. Jin, D.J. Stephenson and X.M. Sheng 24

### Ultra-Precision Fabrication of Small-Size Aspherical Glass Lens Mold

F.J. Chen, S.H. Yin, J.W. Yu, K.J. Zhu and Y. Wang 29

### Study on Grinding Machinability of Titanium Alloy Using SiC Abrasive

G.G. Guo, X.H. Zheng, Z.Q. Liu, Q.L. An and M. Chen 34

### Removal Mechanism of Titanium Alloy Ti6Al4V Based on Single-Grain High Speed Grinding Test

L. Tian, Y.C. Fu, W.F. Ding, J.H. Xu and H.H. Su 39

### Single Grit Scratching and Diamond Grinding on Optical Glasses

Q.L. Zhao, L.L. Zhao and B. Guo 44

### Study on Residual Stress Distribution in Surface Grinding

G.C. Wang, C.L. Hua, J.D. Liu, H.J. Pei and G. Liu 49

### Influences of Grinding Parameters on Flexural Strength in the Grinding of Li-Spinel Ferrites with Electroplated Diamond Wheel

L.P. Sun, Y.G. Wang, Y. Yang, X.R. Yu and B. Lin 54

### Research on the Ductile Chip Formation in Grinding of Brittle Materials

Y.F. Peng, Z.Q. Liang, Y.B. Wu, Y.B. Guo, T. Jiang and X. Chen 58

### Experimental Investigation of White Layer in Grinding of AISI 52100 Annealed Steel

X.M. Huang, Z.X. Zhou and W. Li 63

### Finite Element Simulation of Temperature Field during Grinding of SiCp/Al Composites

C.Y. Zhang, L. Zhou and S.T. Huang 70

### The Grinding Temperature of Alumina Ceramic in High Speed Deep Grinding (HSDG)

G.Z. Xie, X.M. Sheng, T. Jin, Z.T. Shang and Y. Wu 75

### Force and Energy in Grinding Zirconia Ceramics by Brazed Monolayered Diamond Wheels

S.S. Li, J.H. Xu, S.N. Galyshev and H.J. Xu 80

### Investigation of Grinding Ti-6Al-4V under Minimum Quantity Lubrication (MQL) Condition

Z.Q. Liu, G.G. Guo, X.H. Zheng, Q.L. An and M. Chen 84

### Experimental Research on Surface Integrity with Less or Non Fluid Grinding Process

S.C. Xiu, C.X. Chao and S.Y. Pei 89

### Study on Depth and its Uniformity of 65Mn Steel Grind-Hardened Layer

J.Z. Zhuang, L.F. Liu and Y.Z. Zhang 94

### The Inner Hole Grinding Surface Roughness Analysis of Zirconia Ceramics Electric Spindle

F. Lu, S.C. Chen, S.H. Li, K. Zhang and Y.H. Wu 99

### High-Speed Grinding for Superalloy

B.F. Feng, Q.F. Gai, Z. Lei and Z.L. Su 104

### A Study of Machining Characteristics of YG8 in High Speed Grinding

J.W. Yu, M. Cheng, S.H. Yin, G.Z. Xie and X.L. Zhou 108

<b>The Experimental Study on Characteristics of Low-Temperature Grinding of Ceramic Hollow Ball Super-Hard Composite Abrasive</b> Z.M. Cui, J.P. Kong, X.P. Yang and L. Du	113
<b>Effect of Arraying Patterns of Diamond Grits on the Grinding Forces of Mono-Layer Brazed Diamond Tool</b> F.L. Zhang, M.J. He, Y.M. Zhou, H.P. Huang and J.M. Fan	116
<b>Experimental Research of Grinding TC4 Titanium Alloy Using Green Silicon Carbide Wheel</b> X.H. Zheng, Z.Q. Liu, G.Q. Guo, Q.L. An and M. Chen	121
<b>Experimental Study on Microstructure Evolution in AISI D2 Steel Surface Grinding</b> L. Yan, F. Jiang and Y.M. Rong	126
<b>Surface Strain and Roughness Change of Aluminum Block Ground by Fixed Abrasives</b> Q.L. Han and H.J. Zhao	131
<b>Experimental Study of Grinding Characteristics on SiCp/Al Composites</b> L. Zhou, S.T. Huang and X.L. Yu	135
<b>Experiment Investigation of the Influence Factors on Surface Grinding Temperature</b> C. Mao, H.F. Zou and Z.X. Zhou	140
<b>Performance of Laser Brazing Diamond Grinding Wheel in Face Grinding</b> Z.B. Yang, L.M. Zhang, J.H. Xu and G.L. Zhao	145
<b>Three-Dimensional Simulation of Wheel Topography</b> Q. Feng, Q. Wang and C.Z. Ren	149
<b>Comparative Study on the Tribological Performance of HFCVD Diamond and DLC Films under Water Lubricating Condition</b> B. Shen, F.H. Sun and Z.M. Zhang	155
<b>Development of a Multiple Micro Diamond Wheel-Tools</b> S.T. Chen and Y.C. Lai	160
<b>First Principle Calculations on Structures and Properties of Diamond-Like B<sub>2</sub>(CN)<sub>3</sub> Compounds</b> D.X. Li, D.L. Yu and J. Lu	164
<b>Influence of Pore-Forming Agent on the Performance of Resin Bond Diamond Grinding Wheel in Back-Grinding Silicon Wafers</b> K.H. Li, Q. Guo, M.Y. Liu, Y.J. Zhao and D.L. Shi	169
<b>Particle Flow Simulation on Semi-Fixed Abrasive Tool Processing</b> P. Zhao, W.F. Yao, Q.F. Deng, D. Liu and J.L. Yuan	175
<b>Effect of Ultrasonic on Coating Performances of Electroplated Diamond Tools</b> Y.G. Wang, B. Lin, Y.H. Liu and A.B. Yu	180
<b>Finite Element Analysis of Stress Distributions on the Diamond Pick</b> S.T. Huang, L. Zhou and J. Li	184
<b>Experiment Study on Abrasives Performance on Vitrified CBN Wheel</b> X.L. Liu, Z.R. Pang and W.S. Wang	189
<b>Manufacturing and Experimental Research of Fine Grain Diamond Grinding Wheel Based on Magnetic Field Controlling</b> S.H. Yin, M. Wang, J.W. Yu, F.J. Chen and Y. Wang	195
<b>Investigation of Interface Microstructure of Diamond and Ti Coated Diamond Brazed with Cu-Sn-Ti Alloy</b> Y. Chen, H.H. Su, Y.C. Fu and Z.C. Guo	199
<b>Research on the CAD Technology of Resin-Bonded Diamond Abrasive Tool Based on Quality Control</b> N.B. Liu, Z.Y. Wu, G.Y. Li and N. Weng	204
<b>Simulation of Grinding Wheel with Random Three-Dimensional Abrasive and Microporous Bond</b> J.Q. Zhang, P. Guan, C. Su, T.B. Yu and W.S. Wang	209
<b>Recovery of Electroplated Diamond Tool with Thermal Shock Method</b> A.B. Yu, L. Wu and B.Y. Gao	215
<b>Self-Sharpening Abrasive Composite Bulks with PCBN Grains</b> B. Zhang, W.F. Ding, J.H. Xu, Q. Pan and Y.J. Shi	220
<b>Research on the Milling Toughness of Black Silicon Carbide and the Repeatability of the Testing Results</b> M. Liu and S.J. Jiang	225

<b>Performance of Monolayer Brazed CBN Wheels Manufactured with Rare Earth Lanthanum Modified Ag-Cu-Ti Filler</b>	
C.Y. Yang, J.H. Xu, W.F. Ding, S.N. Galyshev and H.H. Su	229
<b>Surface Characterization of Silicon Wafers Polished by Three Different Methods</b>	
G.Q. Hu, J. Lu, J.Y. Shen and X.P. Xu	233
<b>Study on Compound Machining of Polyurethane Polishing Pad and Cluster Abrasive Brush Based on MR Effect</b>	
M. Li, Q.S. Yan, J.B. Lu and J.F. Chai	238
<b>Study on Lubricating Behavior in Chemical Mechanical Polishing</b>	
J.X. Su, J.X. Du, X.L. Liu, H.N. Liu and R.K. Kang	243
<b>Processing of Lapping Track in Dual Rotated Plates Eccentric Lapping Mode</b>	
W. Yu, D. Liu, J.L. Yuan, Q.F. Deng, W.F. Yao and C.Y. Jin	248
<b>Research on Subsurface Damage After Abrasives and Fixed-Abrasive Lapping of K9 Glass</b>	
J. Li, P. Gao, Y.W. Zhu, B. Li, Y.L. Sun and D.W. Zuo	253
<b>Study on Machining Process of Lapping for BK7 Glass</b>	
C.Y. Wang, W.S. Luo, C.H. He and Y.X. Song	257
<b>Finishing of Display Glass for Mobile Electronics Using 4S-4<math>\mu</math>m 3M<sup>TM</sup> Trizact<sup>TM</sup> Diamond Tile Abrasive Pads</b>	
T.K. Na and L.B. Zheng	263
<b>Theoretic and Experimental Study on the Accuracy of Gears by Generative Electrochemical Mechanical Finishing</b>	
G.B. Pang, D.M. Li, W.J. Xu, X. Adayi, L. Yang and J.J. Zhou	268
<b>Research on Tests of Magnetic Abrasive Finishing by Sintering Method</b>	
G.B. Liao, M.M. Zhang, Y.J. Li, Z.Q. Liu and Y. Chen	273
<b>Investigation of Elastic Deformation Machining Method for Aspheric Surface Generation</b>	
D.N. Nguyen, J.L. Yuan, B.H. Lv and Z. Wu	278
<b>Ultra Smooth Polishing Research Based on the Cluster Magnetorheological Effect</b>	
Z.C. Wu, Q.S. Yan, Z.W. Bai, L.Y. Kong and J.F. Chai	283
<b>Investigation of a New Kind of Magnetic Abrasive Grains Used for Finishing Inner-Hole Surface</b>	
Y.H. Ding, X.G. Yao, G. Ya and P. Lu	289
<b>Research on Material Removal Characteristics in Plane Lapping Method for Aspherical Surface Using Elastic Deformation</b>	
Z. Wu, J.L. Yuan, B.H. Lv and D.N. Nguyen	293
<b>Development of a New Magnetic-Electrochemical Compound Polishing Tool</b>	
L.M. Shi, J.N. Yong, J. Liu and E.L. Liu	298
<b>Research on Precision Mirror Machining Technology for W-Mo Alloy</b>	
J.L. Guan, H.W. Lu, X.H. Xiao, Y.C. Wu and Z.D. Chen	303
<b>Comparative Research of Several Grinding Media Based on Electro-Magnetic Barrel Finishing Method</b>	
K.Q. Yu, F. Yan, G.B. Liao and Y. Chen	308
<b>Flow State Analysis on Abrasive Motion of Centrifugal Grinding under Different Working Conditions</b>	
H.C. Wang, D.L. Zhang and X. Fang	312
<b>Research on Surface Grinding and Polishing Process of Precise Hydraulic Couples</b>	
W.H. Wang, L. Teng, B.L. Zhao, Q.Q. Yang, J.J. Wang and B. Tong	317
<b>The Mechanical Polishing Research on the Surface of WC-Co Cemented Carbide Based on ELID Grinding</b>	
J.L. Guan, Y.C. Wu, H.W. Lu, X.H. Xiao and W.C. Wang	322
<b>Study of Abrasive Water Jet Polishing Technology</b>	
C.L. Che, C.Z. Huang, J. Wang and H.T. Zhu	327
<b>Surface Quality Investigation of Nanoparticle Colloid Hydrodynamic Cavitation Jet Polishing Technology</b>	
Y. Zhang, X. Wang, F.H. Zhang and M. Zhou	332
<b>Study on the Efficient Processing Technology of Countertop Board with Disc Circular Saw Blades</b>	
S. Gao, J.S. Zhang, Z. Wang, Z.M. Zhang and T. Li	337
<b>Material Fracture Character of Marble Processing by Single Diamond Tools</b>	
S.S. Hu, C.Y. Wang, Y.N. Hu, C.B. Pan and X.Q. Lu	342

<b>Investigation of High Performance Diamond Brazed Saw for Cutting AZ31 Magnesium Alloy</b>	
B.J. Ma, X. Cai and L.A. Li	347
<b>Machining Mechanism of Diamond Fibers Cutter</b>	
G.F. Zhang, Y.Q. Tan, B. Zhang and Z.H. Deng	352
<b>The Effects of Machining Parameters on the Position of Resultant Force in Sawing of Granite</b>	
C.F. Fang and X.P. Xu	357
<b>Study on the Wear Topography of Diamond Endless Wire Saw when Cutting Granite</b>	
W. Gao, J.T. Zhang and J.Y. Duan	361
<b>Research on Finite Element Simulation and Experiment of Temperature Field in Surface Cutting Used a New PDC Cutter</b>	
Z.H. Deng, Z. Pan, Q.P. Wu, G.F. Zhang and B. Zhang	366
<b>Drilling C/E Composites with Electroplated Diamond Abrasive Tool and its Damage Evaluation Method</b>	
Q. Wen, H. Gao, D. Zhao and D.M. Guo	371
<b>Mechanism Analysis of High Efficiency Axial Turn-Grinding of Engineering Ceramics</b>	
X.L. Tian, F. Guo, Y.T. Mao, B.G. Zhang, J.Q. Wang and S. Zhang	376
<b>Study on Bit Body Materials Made of Tungsten Carbide and Steel Shot</b>	
J.L. Peng, L.C. Duan, H. Shi and S.L. Xu	381
<b>3D Noise Generation and Removal of Measured Grinding Wheel Topography Using a White Light Interferometer</b>	
J. Xie, F. Zhang and H.F. Xie	386
<b>The Identification of Amplitude and Phase in Imbalance Mass of Grinding Wheel</b>	
S.X. Yuan and Z.L. Guan	391
<b>Spherical Head Surface Roughness Analysis and Experimental Research Based on the Abrasive Belt Grinding</b>	
Y. Zhang, Y. Huang and Z. Huang	396
<b>Design of Temperature Gathering System Based on Spray Cooling Grinding Experiment</b>	
J.L. Ren, C.Y. Zhang, Y.W. Li and J.H. Yu	402
<b>Study of the on-Line Testing Method for the Abrasive Belt Follow-up Grinding of the Crankshaft Crankpin</b>	
L. Zhang, Y. Huang, Y.J. Wang and M. Zhang	407
<b>Influence of Ultrasonic Assistance on Material Removal Mechanism of Hard and Brittle Materials Based on Single-Point Scratch</b>	
F. Jiao and B. Zhao	413
<b>Development of a Two-Dimensional Ultrasonic Vibration Assisted Machining Technology with Tool Vibration</b>	
Z.Z. Wang, Y.B. Guo and Y.B. Wu	419
<b>Finite Element Analysis of Ti-6Al-4V Alloy Crater Geometry for EDM Based on a Single Discharge</b>	
Y. Wang, J.H. Xu and F. Gao	423
<b>Experimental Study of the Relationship between Tool Rod Parameters and Vibration Parameterson Ultrasonic Grinding (Wheel Vibration)</b>	
Z.D. Li and B. Zhao	429
<b>Research on Dynamic Grinding Force in Ultrasonic Honing Chatter</b>	
X.J. Zhu, J.Q. Wang, Q. Chen and Z.M. Lu	433
<b>Precision Honing of Stainless Steel Valve Core</b>	
Z.G. Dong, C.W. Kang and L. Xu	438
<b>Research on Surface Roughness of Nano-Composite Ceramics under Multi-Frequency Ultrasonic Grinding and Dressing</b>	
J.X. Xue and B. Zhao	443
<b>Research on Surface Residual Stress of Nano-Composite Ceramics under Multi-Frequency Ultrasonic Grinding and Dressing</b>	
B. Zhao, J.X. Xue and M.L. Zhao	447
<b>Experimental Research on the Abrasive Belt Grinding Turbine Blades Material 1Cr13 Stainless Steel</b>	
H.L. Wu, Y. Huang, Z. Huang and G.J. Cheng	452

<b>Research on the Mechanism of Coordinate Polishing Crankshaft Crankpin with Abrasive Belt</b>	
M. Zhang, Y. Huang and L. Zhang	457
<b>The Experimental Investigation of Stone Wear in Honing</b>	
Q. Wang, Q. Feng, Q.F. Li and C.Z. Ren	462
<b>Study on Jet Formation and Modeling for High Pressure Abrasive Water-Jet</b>	
Z.W. Liu, C.Z. Huang, H.T. Zhu, H.L. Liu and B. Zou	468
<b>The Vibration Detection System of CNC Machine Tools and the Application of Spindle Test</b>	
Y.H. Wu, L.W. Rao, D.H. Zhao and K. Zhang	473
<b>Study of the Floor Typed Abrasive Water Jet Spatial Machining Robot</b>	
R.G. Hou, C.Z. Huang, H.T. Zhu, H.L. Liu and B. Zou	478
<b>Research on Dynamic Balance of Grinding Wheel Spindle</b>	
Q.Y. Zhou, Z.X. Zhou and Y. Li	482
<b>Analysis of Ultrasonic System in Acoustic Levitation Polishing</b>	
W.F. Wang, P.F. Gao and D.H. Wen	486
<b>Numerical Investigation into Spindle System Stiffness of High-Speed Grinder</b>	
C.H. Li, W.P. Mao and Y.C. Ding	490
<b>Research on Function Simulation of Web-Based Virtual Grinding Machine Tool</b>	
T.B. Yu, J.Q. Zhang and W.S. Wang	495
<b>A Study on the Manufacturing System of the Axes Linked Ultra-Precision Grinding of Aspheric Surface</b>	
L.J. Li, Y. Jiang and F.H. Zhang	500
<b>Finite Element Analysis on Dynamic Characteristics of Hybrid Bearing Spindle System</b>	
P. Guan, M. Li, B.C. Li, T.B. Yu and W.S. Wang	505
<b>The Structure Analysis of High Efficiency Grinding Automation Equipment for Nuclear High-Pressure Vessel</b>	
D.W. Zhu, Y. Huang and Z. Huang	510
<b>Research on Application of NC Polish-Grinding of Valve Stem and Instantaneous Compensation of Grinding Wheel</b>	
Y.L. Yu, W.M. Li, Z.Y. Miao and D.Q. Yang	515
<b>The Assembly Precision Debugging of Pillar of the Alien Stone Turning-Milling Compound Machining Center (HTM50200)</b>	
K. Zhang, Z.X. Cui, D.H. Zhao, L.W. Rao and Y.H. Wu	521
<b>China's Diamond in the World Market</b>	
Z.H. Li, B. Zhao, L. Li and J. Wong	526
