## Chapter 1: Introduction

<b>Abstract</b>	3
<b>Introduction</b>	3
<b>1.1. Heat Transfer</b>	5
1.1.1 Conduction	5
1.1.2 Convection	6
1.1.3 Radiation	7
<b>1.2. Methods of Increasing Heat Transfer</b>	8
1.2.1 Passive method	8
1.2.2 Active method	8
<b>1.3. Nanofluid</b>	9
1.3.1 Preparation of nanofluids	9
1.3.1.1 One-step method	9
1.3.1.2 Two-step method	10
<b>1.4. Hybrid Nanofluid</b>	11
<b>1.5. Hybrid Nanofluid</b>	11
<b>1.6. Properties of Nanofluids</b>	12
<b>1.7. Non-Newtonian Fluids</b>	15
1.7.1 Review of Newtonian and Non-Newtonian Fluids	15
1.7.2 Time-Independent Non-Newtonian Fluids	16
1.7.2.1 Fluids with Yield Stress	16
1.7.2.2 Yield-stress-free fluids	16
1.7.3 Time-Dependent Non-Newtonian Fluids	16
Conclusion	16

## Chapter 2: Nanofluid

<b>Abstract</b>	21
<b>Introduction</b>	21
<b>2.1. Example 1</b>	24
2.1.1 Mathematical formulation of the problem	24
2.1.1.1 Entropy generation formulations	27
2.1.2 Numerical method	28
2.1.3 Results and discussion	29
2.1.3.1 Axial, radial and tangential velocity profile	29
2.1.3.2 Temperature profile	32
2.1.3.3 Entropy generation and Bejan number	33

---

2.1.3.4 Skin friction and Nusselt number	35
<b>2.2. Example 2</b>	37
2.2.1 Mathematical formulation of the problem	37
2.2.2 Numerical method	41
2.2.3 Results and discussion	43
<b>2.3. Example 3</b>	49
2.3.1 Mathematical formulation of the problem	49
2.3.1.1 Entropy generation formulations	49
2.3.2 Numerical method	54
2.3.3 Results and discussion	54
2.3.3.1 Effect of $A_1$ on axial and radial velocity profiles	54
2.3.3.2 Effect of $W_s$ on axial and radial velocity profiles	55
2.3.3.3 Effect of $A_2$ on axial, radial and tangential velocity profiles	56
2.3.3.4 Effect of $M$ on $N_G$ , $Be$ and temperature profile	57
2.3.3.5 Effect of $R$ on $N_G$ , $Be$ and temperature profile	58
2.3.3.6 Effect of $Br$ and $\phi$ on $N_G$ and $Be$	58
2.3.3.7 Skin friction and Nusselt number	59
<b>2.4. Example 4</b>	62
2.4.1 Mathematical formulation of the problem	62
2.4.2 Results and discussion	64
Conclusion	71
<b>Chapter 3: Hybrid Nanofluid</b>	
<b>Abstract</b>	77
<b>Introduction</b>	77
<b>3.1. Example 1</b>	80
3.1.1 Mathematical formulation of the problem	80
3.1.2 Numerical method	83
3.1.3 Results and discussion	85
<b>3.2. Example 2</b>	97
3.2.1 Mathematical formulation of the problem	97
3.2.2 Numerical method	100
3.2.3 Results and discussion	102
<b>3.3. Example 3</b>	111
3.3.1 Mathematical formulation of the problem	111
3.3.2 Numerical method	113
3.3.3 Results and discussion	114
<b>3.4. Example 4</b>	123
3.4.1 Mathematical formulation of the problem	123
3.4.2 Numerical method	126
3.4.3 Results and discussion	127

---

Conclusion	132
<b>Chapter 4: Ternary Hybrid Nanofluid</b>	
<b>Abstract</b>	139
<b>Introduction</b>	139
<b>4.1. Example 1</b>	141
4.1.1 Mathematical formulation of the problem	141
4.1.2 Numerical method	144
4.1.3 Results and discussion	146
<b>4.2. Example 2</b>	157
4.2.1 Mathematical formulation of the problem	157
4.2.2 Numerical method	160
4.2.3 Results and discussion	161
4.2.4 Optimization	169
<b>4.3. Example 3</b>	175
4.3.1 Mathematical formulation of the problem	175
4.3.2 Numerical method	178
4.3.3 Results and discussion	179
Conclusion	191
<b>Chapter 5: Non-Newtonian Nanofluid</b>	
<b>Abstract</b>	195
<b>Introduction</b>	195
<b>5.1. Example 1</b>	201
5.1.1 Problem Description and Governing Equations	201
5.1.2 Application of Akbari-Ganji's Method (AGM)	203
5.1.3 Applying Akbari-Ganji's Method	203
5.1.4 Results and discussion	204
<b>5.2. Example 2</b>	214
5.2.1 Model of fluid	214
5.2.2 Mathematical formulation of the problem	214
5.2.2.1 Skin friction coefficient	217
5.2.2.2 Parameters of local fluxes	217
5.2.3 Numerical method	217
5.2.4 Results and discussion	219
<b>5.3. Example 3</b>	226
5.3.1 The formulation	226
5.3.1.1 (Second-grade fluid) SGF Stress Tensor	226
5.3.1.2 Model Equations	226
5.3.1.3 The Solution of the Problem	227
5.3.1.4 Expression of Parameters	229
5.3.1.5 Physical Quantities of Interest	229

---

5.3.2 Numerical method for solution	229
5.3.3 Results and discussion	230
<b>5.4. Example 4</b>	240
5.4.1 Mathematical formulation of the problem	240
5.4.2 Numerical method	242
5.4.3 Results and discussion	244
Conclusion	254
