

Table of Contents

Preface and Committees

I. Keynote

Metallurgical and Engineering Challenges in Magnesium Extrusion W.Z. Misiolek	3
---	---

II. Extrusion Benchmark

Extrusion Benchmark 2013 - Experimental Analysis of Mandrel Deflection, Local Temperature and Pressure in Extrusion Dies A. Selvaggio, T. Kloppenborg, M. Schwane, R. Hölker, A. Jäger, L. Donati, L. Tomesani and A.E. Tekkaya	13
---	----

III. Friction Evaluation

Experimental Investigations of Friction Carried out with the Tribo-Torsion-Test and Frictional Modelling C. Becker, P. Hora, J. Maier and S. Müller	25
A New High Speed Friction Test for Extrusion Processes V. Sanabria, S. Müller and W. Reimers	33
Advanced Frictional Models for Extrusion Application P. Hora, C. Becker, L.C. Tong, J. Maier and S. Müller	41

IV. Material Flow

Numerical Analysis on Surface Ductile Fractures for Some Extrusion Conditions F. Gagliardi, T. Citrea, G. Ambrogio and L. Filice	51
A New Constitutive Model Describing the Plastic Flow of Metals: Application to the AA6082 Aluminum Alloy M. El Mehtedi, S. El Mohtadi and S. Spigarelli	59
A Novel Method for 3D-Die Design in the Extrusion Process Using Equi-Potential Lines S.A. Tabatabaei, M.K.B. Givi, K. Abrinia, P. Karami, V. Zal and S. Mirjavadi	67
On the Balance of the Metal Flow in Porthole Dies with Differently Sized Porthole Channels H.S. Valberg, D. Nolte and Y.A. Khan	77
Simulation of Material Flow Coupled with Die Analysis in Complex Shape Extrusion N. Biba, S. Stebunov and A. Lishny	85

V. Seam Welding Phenomena

Finite Element Based Determination and Optimization of Seam Weld Positions in Porthole Die Extrusion of Double Hollow Profile with Asymmetric Cross Section M. Schwane, T. Kloppenborg, N.B. Khalifa, A. Jäger and A.E. Tekkaya	95
Non-Destructive Detection of Weld Seams in Extruded Aluminum Profiles M. Engelhardt, N. Grittner, W. Reimche and F.W. Bach	103
Comparison of Bulge Test vs. Conical Expansion Test for Hollow Extruded Profile Characterization B. Reggiani, A. Segatori, L. Donati, L. Tomesani, A. Terenzi and A. Salice	111

VI. Microstructure

Prediction of Fibrous and Recrystallized Structures in 6xxx Alloy Extruded Profiles A. Segatori, B. Reggiani, L. Donati, L. Tomesani and M. El Mehtedi	123
Tool Design Induced Anisotropic Flow Behavior of Hot Extruded Aluminum Profiles S. Ossenkemper, M. Haase, C. Soyarslan, A. Jäger and A.E. Tekkaya	131

VII. Processes and Process Optimization

Research on the Influence of Die Shape in Complex Extrusion of Multi Billets M. Hoshino and D. Narahashi	141
Manufacturing of Steel-Reinforced Aluminum Parts by Co-Extrusion and Subsequent Forging B.A. Behrens, A.E. Tekkaya, K.G. Kosch, A. Foydl, M. Kammler and A. Jäger	149
Optimal Design and Experimental Investigations of Aluminium Extrusion Profiles for Lightweight of Car Bumper J. Zhou, X.M. Wan, Y. Li and Q.J. Zhao	157
Improved Extrudability of High Strength Alloys Using an Optimization Method Based on a Combination of Experiments and FEM Software S. Tomovic-Petrovic, R. Østhus and O. Jensrud	165
