ISBN(softcover): 978-3-03835-122-1 ISBN(eBook): 978-3-03826-505-4

Table of Contents

Preface and Conference Organization

Chapter 1: Computer Aided Design and Engineering

Finite Element and Modal Analysis for Connecting Rod Used in Piston Type Air Compressor
X.X. Liu and M. Chen 3

Parameterized Drawing Design of Drum Used in a Transformer Elevated Seat
C.H. Fu 7

The Modular Design of the Valve Based on Solidworks
Y. Xu 11

Finite Element Analysis of Coronary Sent with the Presence of Plaque and Vessel by Balloon Expansion
W.Y. Yu, J.G. Wang and Z.J. Qin 16

Research on Side Detector by the Finite Element Modeling
X.H. Zhao, C.L. Meng, Y. Li and T. Liang 21

Cooperation Design of Target Area for ICF Facility Based on Top-Down Mode
Y.L. Xu, M.Z. Zhu, G. Chen, W.K. Wu, X.J. Chen, Z. Huang, M.C. Wang, X.H. Que and B.X. Wang 25

Quality Evaluation for Model Based Definition of Aerospace Products
K. Mi, Y. Hu and C. Yin 30

A Numerical Study on Pedestrian Kinematics and Injury Parameters in Bus Collisions
S.J. Zhao, L. Li, F. Wang and J.K. Yang 35

An Optimization Design of Knee Airbag for Driver Protection from Inter-City Coach Frontal Impact
H.Y. Wang, J.K. Yang, X.Q. Jiang and L. Li 40

FEM Analysis of Helicopter Gondola for Live Working
K. Liu, F. Peng, M. Jiang and D. Ni 44

Finite Element Analysis of Spontaneous Burst of PV Modules during Encapsulation
Y. Zuo, Z. Zhang and T. Wang 48

Full Vehicle Handling Prediction and Correlation
X.L. Zhang and R. Guo 53

Modal Analysis of School Bus Body Frame
Z.W. Tian, Y.G. Wei, H.J. Si, X.M. Mei and Y. Kuang 61

Modeling and Simulation of Computerized Glove Machine's Knitting Element Based on SolidWorks
Y. Fang, J.B. Liu, G.Q. Wang and F.T. Xia 66

Study on Modular Design of Trimming Die Structure for Automotive Panels
Y.L. Wang and G.Y. Wang 73

The 3D Modeling Design of Cutting Machine Based on Solidworks
J.J. Wang and X.J. Wang 77

The Development and Application of Grab Design System Based on Solidworks and CBR
Y.T. Sun, L.D. Zhang and X.R. Qin 81

The Study on Dynamic Modeling of Complex Mechanism Based on Multi Software Collaboration
C.L. Ma, F. Li, Y.B. Feng and X.G. Yao 87

Analysis and Simulation of Virtual Dense Storage System
Y.N. Xue and M.D. Shen 91

Application of Finite Element Analysis Software MSC.Marc in Material Tests
Q.L. Sun, Z.R. Liu and L. Yang 95

Design and Modeling of a New Reliable Handcuff Ring
J. Zhang, C.R. Liu and H. Liu 99

Modal Analysis of Portable Multifunctional Scooter Based on Solidworks
Z.D. Huang, S. Liu, C.L. Wang, X.B. Qi, Z.Q. Yang and Q.Y. Lang 103

Position Tolerance Process Capability Prediction under Maximum Material Condition
S. Zhang, J.G. Gao, H. Wang and X.Q. Zhang 107

Algorithm for Tool Path Offsetting Based on NURBS Surface
Y. Yue 111

Numerical Simulation on Controlling Factor of Energy Distribution in Coal Bump
H.T. Li, C. Jiang and J.X. Liu 115

Simulation Analysis and Structure Optimum Design of the High Speed Conveying Manipulator Based on ADAMS
F.W. Xue and J.P. Zhou 121

3D Machining Process Planning Based on Machining Feature Recognition Technique
C. Liang, X. Zhang and Q. Zhang 127

Finite Element Analysis of Contact Stress for Herringbone Gear
K. Li 137

Kinematic Simulation of Serial Mechanism Based on ADAMS
X.Y. Qi, C.X. Pan, G.Q. Chen and X. Li 142

Optimization of the Rotor Chuck Structure Based on Finite Element Analysis
X.H. Guo and X.L. Chen 147

Customized Saddle Design Method Based on Cubic B-Spline Surface
Q.J. Yang, S.X. Zheng and J. Li 151

Effects of Cont Rail Joint Type on Bus Rollover Crashworthiness
H.C. Hong and H.W. Huang 156

Finite Element Analysis of Worm Auger in Meat Grinder
S.L. Li and J. Lu 162

Finite Element Analysis and Optimization for the Structure of NC Forming Machine
L.M. Liu, Z.D. Shan and F. Liu 166

Mechanical Characteristics Analysis and Design Optimization of the Derrick
L.Y. Song, J.W. Wang, P.C. Dong and T.L. Zhuang 174

3D Magnetic Field and Temperature Rise Analysis of Dry-Type Transformer Based on Finite Element Method
H. Xu and Z.D. Yin 181

The 3D Finite Element Analysis of Magnetic Controlled Reactor
H. Xu, Z.D. Yin and B. Wang 185

Finite Element Analysis of Hydraulic Clipping Machine Shear Platform Dased on ANSYS
H.L. Wang, Y.H. Sun, M.B. Li, G. Lin, Y.Q. Feng, S.L. Wu, C.H. Huang and J. Chen 190

The Simulation and Design of a Kind of Fitness Ball Testing Machine
B. Tong, Y.C. Yin and L. Wu 194

The Numerical Simulation of the Lateral Inhomogeneous Deformation of the Permafrost Subgrade
Y.S. Fan, X.S. Mao, Q.M. Meng and B.B. Luo 198

The Virtual Assembly Simulation and Optimization Design on Single Screw Pump of Offshore Petroleum Well Cementing LADS Device
Z.X. Wang 203

Research of Armored Anti-Riot Vehicles Repair Based on Virtual Maintenance Technology
R.J. Zhan, C. Ma and S. Wang 209

Research on Measuring Key Errors of Plane-Generated Enveloping Hourglass Worm
H. Lu and Z. Liu 214

Study on the Reconstruction and Microscopic Contact of Engineering Surfaces
Q.L. Wang, P.L. Li, W. Wang and X.W. Liu 219

Decoding Algorithm of Circular-Pipes Packing in Multi-Pipe Intersecting Structures
S.Y. Huang, L. Xu and Z.Z. Ye 223

Optimization Design of Oil-Water Separator Based on Fuzzy Synthetic Evaluation
Y.D. Zhang and Y. Liu 231

Simulation Analysis of Adjustable Movable Blade Axial Flow Fan
A.H. Zhu 236

Spectrum Analysis of Noise in Low Head Francis Turbine
L. Lu, L.D. Zhang and X.B. Liu 242

Implementation about Virtual Experiment for Development of Local Shockwave
X.W. Liu, K. Luo, Y.M. Yang, L.M. Song and J. Jin 246

Chapter 2: Mechanical Design

Research on a New Faucet with the Function of Depressurization and Throttling
M.J. Tian, Y.H. Guo, Y.Q. Li and H.H. Guo 253

The Main Cleaning System Design of Garbage Sweeper
C. Xue and Y. Hu 257

The RDC Clamped Circuit Research on the High-Speed Flat Sewing Machine
Y.S. Hu, A. Gao and D.J. Mu 261

Design of Household Multi-Function Vacuum Cleaner
H.Y. Jin and Z.W. Zhu 266

Experimental Investigation into a New Melt-Blowing Die for Dual Rectangular Jets
Y.D. Wang and X.H. Wang 270

A Study on the Supporting Plate of the Steaming Bucket
L. Chen, Z.G. Sun, Y.C. Liu, C.N. Yang and W.Q. Huang 274

Design of a Leveling Device
Q.Y. Lv, Y.S. Mei, Y. Sun and K. Liu 278

Design of Low-Rise Escape System
Y.Q. Feng, C.W. Sun, C. Yang, X.X. Cai, Y.L. Chen and L.Z. Zhang 282

Research on Cotton Stalk Harvester Based on Double Roller Type
Z.G. Pan 286

The Design and Optimization of Boom of Tunnel Multi-Purpose Installing Truck
Y. Cheng and Y.Q. Tan 290

Design of Maize Picker Device
X.R. Lü and X.L. Lü 294

Research of Multifunctional Automatic Ground Cutting Machine
H. Yang 298

Graphic Establishment of Crank-Rocker Mechanism Design Based on Optimum Transmission Angle of Optimization Method
D.Y. Huang and X.L. Wang 301

Mechanics Analysis and Optimized Design of Aircraft Skin Pass Damage Repair
T.J. Dong, J. Chen and H.P. Ding 306

New Low-Speed Motor with Interior Pushrod Harmonic Transmission Device - Theoretical Profile Deduction and Kinematics Analysis
X.L. Yang, J.F. Liu, H.S. Liu, L. Lin and M.N. Si 310

Dynamic Matching Analysis of Engine and Torque Converter in Tracked Coach Car
W. Sun, B. Ma, J. Ma and J.Y. Wu 314

Modeling of Sewing Machine with Independent Rotation Axe
Z.W. Shi and W.H. Sun 319

A New Process for the Tubular Shipload
Y. Lv, Z.R. Song, F.Y. Yang, C. Gong, R.P. Wang and Z.B. Wang 325

Design and Research of the Air-Suction Peanut Precision Dibbler
X.L. Lü, Z.C. Hu, H.J. Zhang and W. Wang 330

Technical Study on Four-Crane Joint Lifting of Large-Sized Structures
Y. Lv, F.Y. Yang, M.W. Yang, C. Gong, J.H. Liu and F.J. Li 335

Heat Transfer Characteristics Analysis of Intermediate Rotating Ring in Mechanical Seal Based on COMSOL
Z.W. Liu, L. Dong and K. Li 339

Analysis on Circumferential Seal Ring in Engine under Different Conditions
Y.T. Yan, X.L. Qian, G.Y. Hu and L.S. Zheng 343

Design Research of Linear Motion Unit Based on Magnetic Suspension Principle
Y.X. Zhao, M.D. Shen and X.H. Shen 347

Development of the Energy Recovery in Construction Machinery
J. Gong, Q.H. He, D.Q. Zhang, Y.M. Zhao, C.S. Liu and Z.Y. Tang 351

Research and Design on Reciprocating Oilless Air Compressors
Y.F. Zhu 358

Chapter 3: Innovative Design Methodology and Product Design

Gannan Native Products Bamboo Packaging Design Research
Y. Zhang, J.F. Huang and J.X. Cheng 365

Innovative Design for Autogenous Medium Cyclone Based on TRIZ
Y.J. Chen 370

Innovative Methods of Wine Packing Based on TRIZ
K. Qiu 374

The Research on the Effectiveness of Brand Triangle Model for Product Life Cycle Design
X.B. Liu and W. Li 378

A Study on Full Life Cycle Based Product Package Design
S.Y. Zhang, Y. Mei and X. Han 384

An Analysis on the Ergonomics in the Design of Automobile Instrument Panels
J.H. Zhang 388

Researches on the Flood Protection and Anti-Seismic Self-Help Bed
J.B. Lu, H.S. Zhao and X.L. Guo 393

Standing Office Furniture Design Based on Human-Machine Interaction Research
L.L. Liu and L. Zhang 397

Application of Integrated Product Development Model Oriented to R&D Projects of the Brazilian Electricity Sector
J.A. Pereira, O. Canciglieri, A.E. Lazzaretti and P. Moreira de Souza 401

Innovation Development Process for Dog with Two Disabled Hind Legs Wheelchair
N. Chansangsri and N. Thawesaengskulthai 410

A Semantic Annotation Framework to Assist the Knowledge Interoperability along a Product Life Cycle
Y.X. Liao, M. Lezoche, E. Rocha Loures, H. Panetto and N. Boudjlida 424

A Tentative Exploration on the Design of Articles for Daily Use and the Life Wisdom of "Putting Down"
L.S. Guo 430

Integration Definition Methods to Support Product Design for Assistive Technology
M.L.M. Okumura, O. Canciglieri, T.M. de Souza and R.I.M. Young 434

The Research of Bamboo Design Based on Sustainable Design Concept
L.Y. Huang and Z. Wang 438

Study on Prototype of Upper Apparel for Young Man Based on Human Anthropometrics
L.N. Cui 442

Ontology Enabling Information and Knowledge Modeling for Product Design
A.M. Li, F.R. Kou, Q.Y. Niu and H.B. Tian 446

Mapping the Open Innovation Ecosystem: An Analysis of the Technical and Strategic Level
M.A. Nerone, O. Canciglieri, M.T. Arns Steiner and R.I.M. Young 450

Research on Design of Multi-Bar Raschel Lace
J.Z. Yao, G.M. Jiang, Y. Zhang and Y. Zhang 461

The Application of Paper Materials in Children Furniture
W.D. Bai, J. Xu and J.Z. Zhang 465

Chapter 4: Optimization in Design Processes

Multi-Objective Optimization of Internal Combustion Engine Valve Springs Based on NSGA-II
Y.J. Wang and G. Zhang 473

A Multi-Objective Quality Optimization System for Injection Molding Process Parameters
W.C. Chen, Y.F. Lin and P.H. Liou 478

Brake Parameter Optimization Design Based on MOEA/D
Y.J. Zhang, Y. Zhang, X.Y. Wan and X.D. Zheng 484

Development of Naval Ship Synthesis Model in Concept Design
Y.H. Hou, J.N. Zhang and C.B. Zhen 490

An Improved Real Time AR Method for Double Vessel Motion Prediction
Q. Yang, C. Wu, J. Zou and H.S. Chen 494

Structure Analysis and Optimization of Hydraulic Tool Turret Cabinet of CNC Lathe
L.P. Liu, Y.J. Yan, Y.A. Peng, H.D. Li and Q.Z. Dong 498

The Research and Application on Optimization Design of Lifting Mechanism - The Hydraulic Cylinder Structure Design
L. Xie and Q. Sun 503

Research on Remaining Driving Range Estimation of Electric Vehicle Based on Dynamic Working Condition
C.Q. Du, G. Du, K.C. Tan and Y.S. Liu 509

Chapter 5: Green Design and Green Manufacturing Technology

Multiple Views Description and Operation Mechanism to Operation Mode of Green Manufacturing System
X.K. Tian and Y.Q. Wang 519

Application of Green Manufacturing in Automobile Enterprises
L.L. Wang, Y. Guo and T. Zhang 523

Multi-Functional Product Design Based on Green Design Concept
J.X. Cheng 527

Research and Exploration on Green Design of Household Electrical Appliances
A.H. Guo 531

Research on Suitability Ecological Updating Technology System of Traditional Wooden Residence
Z. Li and S. Lei 535

Chapter 6: Kinematic and Dynamic Analysis of Machines and Mechanisms

Engineering Kinematic Theory of Ground Contact Pressure in the Annex to the Hydraulic Port Facilities
D. Tyu and V. Korovkin 541

Fewer Degrees of Freedom Dynamic Analysis of Mechanical Excavator Working Device
G.Y. Lin, X.K. Zhou, Y. Zhou and Y.M. Zhang 549

Stress Attenuation Mechanism of Foam Core Sandwich Panels Subjected to Close-Range Blast Loading
Z.Q. Fan, H.H. Ma, Z.W. Shen and M.J. Lin 561

Research on the Cornering Characteristics of Three-Axle Vehicle
B. Xu, S.M. Cui and X.Y. Wu 567

Study of the Relationship between the Vibration Response and Milling Instability
S.L. Nong and S.H. Gao 571

Analysis of Vehicle Tire Impact Force Based on Collision Model
W.J. Ma, X. Guan and P.P. Lu 576

Optimization Analysis on Gyroscope's Three Dimensions Complicated Motion and Lash-Force
W.L. Yang and X.H. Lu 581

Expansion of Baker Transformation and its Dynamics Characteristics
L.H. Ma, J.K. Li, W.M. Shen and J. Qu 587

Dynamic Characteristic Analysis of Irregularity under Turnout by Vehicle-Turnout Rigid-Flexible Coupling Model
M. Chen, Y.Y. Luo and B. Zhang 591

Optimization Design of Vibratory Jaw Crusher with Double Cavities Based on MATLAB
J.C. Zhang and L.C. Wang 596

Dynamic Response Analysis of Wind Turbine with Tuned Mass Damper under Typhoon Conditions
Q.Y. Zhang and H. Zhou 600

Solving Nonlinear Optimization Problems of Steering Trapezoid Mechanism Based on an IPSO
L. Liu, P. Zhou, J. Luo and Z. Pi 607

Synthesis of Timing Diagram of Mechanisms of Machine
A. Jomartov 614

Motion Simulation Analysis and Load Analysis of the Moving Beam System in the Walking Beam
F.H. Wang and Y.C. Zhu 619

Analysis and Control the Influence Factors on the Dynamic Load Coefficient of the Crawler Crane Working Mechanism
G.Y. Lin, S.Q. Cao and C.J. Guo 626

Research on Optimal Excavating Trajectory of Large Mining Shovel
G.Y. Lin, H.Z. Han, J. Zhao and A.F. Li 633

Research of Flow-Induced Vibration of Flexible Plate Based on Fluid-Solid Interaction Method
R.Q. Xi, X.D. Jiang and Y.S. He 642

Folding-Boom Lorry Crane Dynamic Modeling and Motion Control
W.Z. Du, F. Lu and T. Liu 646

Analysis and Optimization of Dismantling Machine Shear Head Based on ANSYS Workbench
W.P. Du, Y.J. Zhang, C.Q. Zhou, A.H. Zhang, J. Yu and P. Liao 653

Simulation of Motion Trajectory of Parachute Inflation Process
J.L. Tian, Y. He, L. Chen and B. Wang 658

Research on Parameter Optimization Method of an Air Vehicle Gliding Trajectory
F.P. Wang, Y. Xu and C.Y. Li 662

Kinematics Simulation Based on ADAMS Belt Conveyor Rollers
J. Yang and X.J. Wang 666

Design and Motion Simulation of the Clamping Mechanism of Micro-Structure Injection Molding Machine
B.G. Chou, H.Z. Cai, G. Zhou, Y.J. Zhang and J. Zhuang 670

Modal and Strength Analysis of Crankshaft in Piston Compressor
Z.J. Sun and J.T. Dai 676

Strength Analysis of Crankshaft Interfaces Considering Contact Problem
L.H. Ouyang, X.T. Deng and Z.F. Yue 680

Kinematic Analysis of Swiss Lever Escapement
J. Pan, Y. Fu and R. Du 684

Analysis of Kinematics and Dynamics of Crank-Rocker Mechanism
H. Wang, R.R. Zhang, S.L. Xiao and P. Leisner 690

Structure Strength Analysis for Fork Joint of the Universal Coupling Based on FEM
Y. Xing and P.F. Yao 696

Chapter 7: Analysis and Control of Vibration and Noise

Experiment for Vibration Suppression Based on Particle Damping for Gear Transmission
W.Q. Xiao and W. Li 703

On the Bifurcation of Periodic Motion of Rotor Ball Bearing System Considering Five Degrees of Freedom
L. Cui and Q.S. Wang 707

Residential Building Sound Pollution and Control Measures
N. Xu, C. Zhang and L. Ma 711

Sound Source Identification and Acoustic Contribution Analysis Using Nearfield Acoustic Holography
J.H. Deng, J.H. Dong and G.D. Meng 717

Modal Test for Response Amplitude Operator of a Deepwater Semi-Submersible Platform
L.P. Sun, S.L. Cai and Z. Kang 725

A Study on Effects of Gear Backlash on Differential Vibration
J.L. Xu, P. Wei, F.Y. Huang and H.J. Wang 730

Analysis of Noise of Gear Transmission System and Control
Z.G. Zhang, B. Fang and X.Q. Li 735

Chapter 7: Analysis and Control of Vibration and Noise

Dynamics Simulation Analysis of an Airborne Electronic Equipment Based on Ansys and Modal Test
K.S. Wang, C.R. Li, Y.C. Pang and H.H. Guo 741

Offshore Marine Ambient Noise Measurement Study Based on Laser Interferometer Hydrophone
Z.L. Hua, L. Li and Z.H. Zhou 746

Study on the Combustion Noise Characteristic of Low Speed Diesel Engine
L.Q. Yan and H.J. Ge 750

Study on the Influence Factors of Vibro-Acoustic Characteristics of Plate Structure Based on Series Approximation
Y.Y. Zhu, R.W. Dai and S.Y. Gao 754

The Analysis of Self-Excited Vibration in Processing System of Single Blade Rigid Boring Reamer
Z. Dong and X.Q. Shen 761

The Harmonic Response Analysis of Workover Rig Platorm Base on ANSYS Workbench
X.R. Wang, J.Q. Jin and Y.Z. Li 766

Research on Tail Pipe for Engine Performance and Exhaust Noise
S.L. Yuan and C. Zhang 770

Research on Dynamic Balance Method of Precision Centrifuge
T. Liu, Y. Xu and B.Y. Mao 777

Study on the Dynamic Characteristics of the Large Diamond Circular Saw Blade
M. Zhao, L. Zhang and B. Wu 781

Vibration Control of Erecting System Based on Fuzzy Adaptive PID Controller
Z. Xie, J. Xie, W.Z. Du and D.J. Huang 785

Study on Bending, Buckling and Free Vibration of Hard-Core Sandwich Plate Based on Revising the Soft-Core Reissner Theory
H.Y. Zeng, R.J. Yan and Y.Y. Hu 790

Chapter 8: Design and Research of Mechanical Transmission

Kinematics Analysis on Planar Gear Transmission Mechanism with Computer
J.F. Sun, Y.Z. Zhu, J. Wang and Q. Wang 797

Research on Modeling Method for Oil-Film Stiffness Calculation of Point Contact Based on EHL
S.S. Li, J. Shao, F. Yu, J. Ling and B. Chen 802

The Analysis of the Transmission Scheme of the 9 Speed Automatic Transmission Based on the Expend Lever Method
M.F. You, G.Q. Hou and M.Y. Wang 811

Worm and Worm Wheel Kinematics Simulation of a Rail Transport Based on ADAMS
Z.Y. Tang and X.J. Wang 818

Contact Trace of Internal Meshing Double Circular-Arc Spiral Bevel Gears
Z. Lin, L.G. Yao and Q. Lin 822

Study on the Influence of the Installation Error of Ball Screw Feed System
W.W. Zhang, H.L. Chen, S.H. Jia and Y.Q. Wang 826

Research on Nonlinear Dynamic Characteristics of the Double-Worm Gears Anti-Backlash Drive Mechanism
D.H. Zhao, S.J. Zhou, Y.H. Wu, Q.Y. Wang and F. Lu 831

Normal Method for Tooth Surface Generation of Helical Gear
J. Lin, R.Q. Li and H. Shen 836

Effect of Face Width on Bending Stress of Spur Gear Using AGMA and FEA
A.A. Umar, A.S. Ahmad, A.G. Yusuf and Z.I. Bibi Farouk 840

Parametric Modeling of Involute Spur Gear Based on AutoCAD
X.L. Guo, H.S. Zhao and J.B. Lu 845

High Speed Gear Parametric Modeling and Dynamic Analysis
Y.Y. Liu, M.C. Xiong and Q. Li 849

Dynamic Analysis of a Spur Geared Rotor-Bearing System with Nonlinear Gear Mesh Stiffness
Y.C. Chen, C.H. Kang and S.T. Choi 853

Vibration Response Analysis of Crack Gear with Internal Excitation
Y. Sun, H. Hu, F.L. Yin and X. Feng 862

Design and Analysis of Double Wishbone Suspension Module with Wheel-Track Variant Wheels
C.H. Shi, S.H. Kang, C.H. Li, J.Z. Hu, L. Huang and X.Z. Zhang 867

The Experimental and Design Method Research on Interference Fit of Fabricated Single-Arm Planetary Carrier
Y.T. Sun, X.R. Qin, L.D. Zhang, Q. Zhang and Q.Y. Zhao 874

The Deformation Characteristics of Hydro-Forming of Differential Gear Box for Automobile
W. Huang, H.B. Yu, H. Lu and S.J. Qin 880

Chapter 9: Fluid Mechanics and Fluid Engineering

Spanwise Penetration Depth with Turbine Disk Inclination
Z.W. Yuan, J. Zhang and D.S. Zhu 887

Design of a Pressurized Trapezoidal Shaped Conduit Using the Rough Model Method (Part 1)
B. Achour and M. Riabi 892

Flow Filed Simulation Analysis and Structural Optimization of Automotive Catalytic Converter
T.Z. Sui, L. Wang and Y. Wang 899

Numerical Simulation of Magnetic Gravity Compensation for Ferrofluid
Y.C. Shi, C.L. Xu, Z.S. Lei, Y.B. Zhong and J.H. Guo 904

Molecular Dynamics of the Flow Properties of Liquids in Wedge Nanochannel
Y. Jia and Y. Shen 908

A CFD Study on Cavitating Flow in High-Speed Centrifugal Pumps under Low Flow Rates
J.P. Yuan, Y.W. Zhu and A.X. Ge 914

Accumulator Absorb Shocks Simulation Analysis on Pavement Hydraulic Power System
G.H. Fang, J. Hu and X.C. Wang 924

Effect of Different Airfoils on Performance of Axial Fan
B.L. Zhou, J.P. Yuan, Z.X. He and F. Hong 928

Experimental Study of Cavitating Flow inside Enlarged Transparent Injector Nozzles and its Effect on Spray
Y.H. Chen, Z.X. He, X.B. Chen and D. Jiang 935

Experimental Study of Hydraulic Flip Phenomenon inside Diesel Nozzles Using Diesel and Biodiesel
Z. Shao, Z.X. He, Z.W. Zhou and X.C. Tao 940

Numerical Simulation of the Centrifugal Separator for Oil-Water Emulsion
N. Kharkov, O. Ermak and O. Aver'yanova 944

Numerical Simulation of the Hydrodynamic Cavitation of the Impinging Streams Mixer
F. Wang, Z.X. He, Y. Ma and C.S. Li 951

Research on Unsteady Pressure Fluctuation within the whole Flow Passage of a Fire Turbopump
L.J. Wang, Y. Yuan and L. Xue 956

Study on Internal Parameters of Cage-Type Trim of Multi-Stage Depressurization Steam Trap
S.X. Li, Q.W. Ding, X.G. Xu and Y.L. Fan 964

The Development of Hydraulic Control System for Large Highland Hydraulic Intelligent Pesticide Spraying Machine
Z.W. Wang, L. Sun and J.H. Li 968

The Selection of the Optimal Load Matching Parameter Based on MATLAB
J.X. Gao 972

Distribution of Indoor Air Quality under Air Conditioning Running
B.W. Liu 976

Numerical Simulation on Internal Flows of Reducing Cross
J.P. Yuan, W.T. Sun, Y. Luo and B.L. Zhou 980

Study on Nonlinear Damping Properties of Hydro-Pneumatic Suspension System for XP302-Pneumatic Tyred Roller
B.S. Xing, N.N. Wang and L. Xu 987

Aerodynamic Analysis of the Static Port's Step Height
H. Yang and S.P. Yang 992

Effect of T-Shaped Micro-Channel Structure Dimension on Formation of Micro-Liquid-Columns Formed by Vertical-Shear-Flow
Z.X. Wang, Z. Li, H.Z. Cai, Y.J. Zhang and J. Zhuang 998

Flow Field Numerical Simulation on the Membrane Aeration Biofilm Reactor
C. Yu, G. Wang, J. Zhang and S.P. Zhan 1003

Global Multiscale Finite Element Method for Flow in Fractured Media
X.L. Li, G.W. Meng, L.M. Zhou and F. Li 1007

Numerical Simulation of IHF Fluorine Plastic Centrifugal Pump Inner Flow
F.L. Qi, Y.X. Yan, W. Zhao and S.Q. Cao 1011

Diffused Structure of Drained and Back-Ventilated Rainscreen Claddings
M.V. Petrochenko and E.B. Yavtushenko 1015

Chapter 10: Reliability and Fault Diagnosis in Mechanical Engineering and Manufacturing

Based on Reliable Probability Design of Automobile Parts
Z. Xu 1025

Development of the Equipment Combat Resilience Evaluation System Based on SPA
D.X. Zhang, J. Qiu, S.H. Zhou and J.Y. Zhang 1029

Research and Application of Expert Safety Testing (EST) Based on Entropy Theory
G.G. Dai, T.T. Miao and J.R. Zhao 1033

A Maintainability Prediction Method of NC Machine Tools Based on Comparing with the Benchmark Failure Mode
Q.B. Hao, Z.J. Yang, G.W. Meng, F. Chen and B.B. Xu 1037

Constructing Reliability Analysis Model of Complex Systems Based on FMEA-FTA-BN
D.Z. Ma, W.F. Ding, Y.Q. Jiang and Z. Zhou 1042

Estimation of Failure Rate and its Applications in the Case of Zero-Failure Data
M. Han 1046

Research on Thermal Protection of One Gas Generator
Z.Z. Liu, B. Zhao, Z.H. Chen and C.G. Yu 1050

Application of the Blind Source Separation Based on Time-Frequency Analysis in Mechanical Fault Diagnosis
Z.N. Li, F. Zhang, X.P. He and Y.X. Xiao 1054

Reliability Modeling for Systems Subject to Interactional Competing Failure Processes
W.P. Huang, J.L. Zhou and J.H. Ning 1063

A Method Used for Mechanism's Motion Accuracy Reliability Analysis
C. Li, B.C. Wang, X. Han and S.Y. Zhang 1069

Power Plant Boiler Failure Analysis of Main Components
H.L. Xia 1073

Study of Engine Fault Diagnosis Based on Wavelet Packet Decomposition and Neural Network
F.F. Yu, C.Y. Du and X.K. Zeng 1077

Research on Temperature Stress for Contacts Reliability of Electric Connector
Y.Y. Du and Z.L. Sun 1082

Fatigue Life Assessment of a Ship Unloader Crane
B. Xu, T. Zhang, F.Q. Wu and Z.R. Yan 1086

Signal Acquisition and Analysis of Shaft Unbalance Vibration Test
H.P. Zhang, H.W. Chen, B. Hu and C. Tian 1090

Failure Risk Evaluation of Security System Based on Fuzzy FTA
N. Qu, Z.H. Li, N.W. Cheng and J.W. Li 1094

Research on Intelligent Fault Diagnosis Technique of Complex Equipment
R. Zhu, M.J. Huang, G.B. Ding and S. Jia 1098

An On-Line Condition Monitoring System for Oil Film Bearings of Cold Rolling Mill
B. Sun and H. Cao 1102

Design and Implementation of Knowledge System of Wireless Communication Equipment Fault Diagnosis
Y. Yang 1108

Variable Speed Estimation for Wheel-Bearings with STFT and BP Neural Network
Y. Zhou, B. Chen, B.C. Gao and S.J. Zhang 1112

Reliability Analysis of Cold Standby Compound System
J.J. Xu and Z.J. Xiao 1116

Chapter 11: Mechanical Structural Strength and Reliability

Design and Trial of MW-Scale Wind Turbine Blade Fatigue Loading Control System
Y.C. Wang, J.Z. Wu and G.H. Liao 1123

Reliability Analysis of the Suspension Device in the Refit of a Tracked Vehicle
W. Sun, B. Ma, J. Ma and Y. Zhao 1129

The Rod Force Law Analysis of 600MW Air Cooling Tower
T. Liang, C.L. Meng, Y. Li and X.H. Zhao 1135

Finite Element Analysis and Improvement of Traverse Table Platform Based on Workbench and Pro/E
J. Li and G.S. Ren 1139

Finite Element Analysis of Structural Strength of Concrete Mixing Truck's Frame
H.X. Sun, H.K. Wei, X.F. Zhao and J.R. Qi 1143

Modified Stress Severity Factor Method Based on 3D-FEM
X.H. Yang, X.J. Liu and Z. Hu 1150

Reliability Analysis of Composite Structure Using ANSYS Software
W.T. Zhao, F. Guo and X. Li 1155

Reliability and Sensitivity Analysis of Laminate Using Different Methods
W.T. Zhao, X. Li and F. Guo 1159

Study of Anchor Bolt Support in Deep Hard Roof of Roadway of Tangshan Mine
R.X. Zhang, Y.K. Lv and C. Jiang 1163

Numerical Simulation Research of Optimization Design of Supporting Half-Coal Roadway in Deep Stope Working Face
X.T. Zeng, N. Wang, C. Jiang, Y.Y. Zhang and C.H. He 1169

Research of Unloading Technology of Defect Method in Dynamic Pressure Roadway
R.X. Zhang and C. Jiang 1175

Shock-Resistance Research of Ship Structural Subjected to Underwater Explosion
Y.G. Xie 1180

Study of the Precursory Rules of a Deformation Localization of Coal Specimens
R.X. Zhang, C. Jiang and Y.K. Lv 1185

The Three-Dimensional Similar Simulation of Stress Regular Pattern of Roof of Large Mining Height
X.T. Zeng, N. Wang, C. Jiang, Y.Y. Zhang and G. Chen 1190

A Stress-Strength Interference Model with Strength Degradation Following a Gamma Process
J.C. Shen, L.M. Liu, A.S. Jiao and X.B. Yi 1196

Rigid Joints Transferring Forces outside Box Columns with Deviation of Column's Verticality - Finite Element Method Simulation
G.X. Liang, Z.G. Xu, W.M. Chen and C.G. Deng 1201

The Modal Analysis with Finite Element Method for Body Section of EBZ160 Roadheader
Z.F. Dong, L.Y. Fang, G. Dan and C.F. Deng 1207

Thin-Walled Cross-Sections and their Joints: Tests and FEM-Modelling
N. Vatin, J. Havula, L. Martikainen, A.S. Sinelnikov, A.V. Orlova and S.V. Salamakhin 1211

Topology Optimization Design of Pre-Stressed Plane Entity Steel Structure with the Constrains of Stress and Displacement
L. Yao, Y.X. Gao and H.J. Yang 1216

Evolutionary Structural Optimization Using the Minor Value of Material Efficiency
X.G. Hu and H.M. Cheng 1223

Structure Design and Antiknock Performance Analysis of New Mine Refuge Chamber
X.Y. Gong, X. Gao, J. Guo, J. Xu and C.M. Chen 1227

Local Weak Support Effect on the Stability of Surrounding Rocks in Deep Roadway
W.J. Hu and H. Cheng 1232

Optimization and the Dimensional Analysis in Structural Engineering Problems
E.V. Seko 1236

Intensity Design and Analysis of the Underwater Instrument Cabin Shell
Y.S. Wang, G.Y. Lu, C.X. Zhou and J. Yu 1242

Research on Structure Damage Identification Method Based on Multi-Modal Parameters
J. Sun 1250

Analysis and Preventive Measures of Offshore Steel Structure Welding Crack
S.Q. Zhang, H.C. Zhang, M.L. Li and W. Xu 1254

Design of High-Speed Moving Point Target Measurement System
Q.Y. Lv, Y. Sun, D.D. Zhang, Y.S. Mei and X.J. Tao 1258

Structural Damage Detection and Classification Algorithm Based on Artificial Immune Pattern Recognition
D.W. Zhang, Y.M. Mao, F.L. Kan and N. Chen 1265

Research on Lifetime Remaining of Bridge Based on Gray Theory
Y. Zhang, H.X. Huang and S.S. Cheng 1270

Study on Elasto-Plastic Response of the Unsupported Random Launching Site for the Missile
J. Ren, X.H. Zhou, D.W. Ma and J.L. Zhong 1274

Chapter 12: Inspection and Control the Quality of Manufacturing Process

Algorithm of Multi-Causes Process Quality Diagnosis Using Binary Tree and Intermediate Quality
Q. Niu, R. Mo and N. Wan 1283

Hydraulic Cylinder Boring Quality Range Analysis Based on Orthogonal Test
X.Z. Wang and J.H. Yang 1289

Quality Diagnosis in Dynamic Process Based on Multi-Feature
S. Zhang 1293

Research on the Aerospace Six Sigma Improvement Mode
C.F. Jia and B. Duan 1297

Chapter 13: Mechatronics and Robotics

A sliding Mode Control of Active Suspension Using H_2/GH_2 Approach to Surface Design
S.B. Liu, X.X. Luo and Z.H. Wan 1305

The Design and Development of Fully Automatic Ultrasonic Hot Rig
J.R. Zhou, W.G. Cui and H. Huang 1309

Improvement of Folded Line Assistance Characteristics Curve for EHPS System
G.H. Fang and L.B. Zhang 1314

Study and Design on the Automatic Drying Machine of Spinneret
D. Wang, Y. Zhou and C.C. Yang 1318

The Development of the Automatic Cleaning Machine for Spinneret Orifice
X.D. Fu, P. Feng and C.C. Yang 1322

Design and Analysis of a Linear Ultrasonic Motor with Composite Bending and Torsional Vibration Modes
H.L. Wang, W.S. Chen and J.K. Liu 1327

Powertrain Simulation Research of Coaxial Series-Parallel Hybrid Electric Bus
D.J. Pei, D.C. Qin and S.C. Pan 1333

Development of 6-DOF Transportation Vibration Platform
Y. Zhu, S.S. Zhu, G.J. Wang and Y. Gao 1339

Design of Robot Obstacle Surmounting or Avoidance with Two Arms in Unknown Environment
L. Li and L.Y. Guo 1344

Mechanism Design Method for Obtaining a Cylinder-Like Objects Pose and Position
L. Luo, K. Chen and J.H. Chen 1348

Analysis of Typical Phenomenon in Quadruped Robot Engine PID Control
J.Y. Wu 1353

Kinematics Analysis of Virtual Prototype System on Multiple Redundant Bionic Arm
K. Zhao, X.J. Liu, L.M. Song, C.G. Wang and L. Yuan 1360

Control and Design of Intelligent Robot Arm
H.L. Jia, M. Yu, P.J. Chen and D.F. Dong 1364

Iterative Learning Impedance Control for the Robot
J.B. He, Z.W. Yao, Z.F. Luo, G.J. Li and S.G. Zhou 1368

Research on Real-Time Performance of the Distributed Control System Based on RTLinux
P. Zhang, Q. Guo and B. Wang 1372

Dynamics and Structural Analysis for Arm Equipped on Intelligent Wheelchair
L.D. Zhu, Z. Gu, C.C. Zeng and G.B. Luo 1376

Development on Experimental System of Kinematic Performance of 3-TPS Hybrid Robot
J.S. Shi, K. Wang, L.D. Zhu, W.S. Wang and J.Y. Yang 1380

Dynamic Parameter Identification of the Base of a Space Robot when Considering the Gravity Gradient
H.X. Sun, Z.L. Chen, G. Chen and Q.X. Jia 1384

Optimal Camera Placement of Large Scale Volume Localization System for Mobile Robot
Y.F. Wu, G.Y. Li and H. Yan 1390

Finite Element Simulations of an Inchworm Type Piezo-Driven Rotary Actuator
H. Huang, L. Fu, H.W. Zhao and C.L. Shi 1396

The Kinematics and Dynamics Analysis of Rescue Robot Based on Adams and Matlab Simulation
Z. Xu and J.Y. Gao 1400

Abiot: A Low Cost Agile Sonic Pest Control Tricopter
L. Quan, F. Wang and R. Li 1408

Research of Design Synthesis for MEMS Device of Serpentine Spring
H.Q. Wang, Y. Lu and H.Z. He 1412

Size Optimization of a Weight-Balanced Haptic Device
X.Y. Niu, C. Zhao and H. Wang 1417

Inverse Kinematic Solution and Dynamic Model to 3PTT Parallel Mechanism
X.Q. Hao 1421

Forward Kinematics Analysis and Experiment of Small-Caliber Well Rescue System
X.J. Sun, C.J. Wang and J. Wu 1426

Improving Navigational Accuracy for AUVs Based on an Adaptive Modified Square-Root Cubature Kalman Filter
C. Sun and J.L. Li 1430

Optimal Locomotive Parameters of Four-Legged Bio-Robot by Minimizing Energy Consumption
S.H. Park and D.P. Hong 1435

The Mechanism and Transmission Design of Robotic Fish in Coal Mine
Z.F. Dong, J. Deng, J.T. Tang, Q.Q. Wang and Q. Li 1442

Research on Size Synthesis Optimization Design of a Bionic Exoskeleton for Index Finger Rehabilitation
Q.Y. Meng, S.L. Tan, H.L. Yu, Q.L. Meng and J.H. Yi 1447

The Direct Kinematics Solution of the 6-RSPS Simulator Platform with BP Networks
J.J. Li, C.J. Yang and W.H. Sun 1451

Modeling of Rotating Piezoelectric Vibration Energy Harvesters with Nonlinear Magnetic Forces
B. Guo, Z.S. Chen, C.C. Cheng and Y.M. Yang 1457

Rig Test and Analysis of Dynamic Engagement Process of Wet Clutch
H.Y. Jin, X.S. Cheng and X.F. Song 1461

Design of a VCM Actuator Using Halbach Magnet Array for Active Vibration Isolation System
M.H. Kim, H.C. Kim, D.P. Hong and D.G. Gweon 1465

Chapter 13: Mechatronics and Robotics

Design and Modeling of a Biomimetic Stingray-Like Robotic Fish
Y.W. Wang, J.B. Tan, B.T. Gu, P.F. Sang and D.B. Zhao 1473

Target Location of Industrial Robot Based on Vision
G.H. Jia 1478

Method of Optimization Design of Permanent Magnet Retarder
Y.Q. Huang, X.F. Li, Y. Chen and Y. Jiang 1482

Modeling and Co-Simulation of Stop and Go Cruise Control System
D. Xiao, L. Li, P.F. Li and J. Su 1486

Design of Guidance Law with Impact Angle and Impact Time Constraints
L.P. Feng, Z.E. Fan and Y.G. Zhang 1493

Study on Battery Management System Design of Electric Vehicle and Strategy of the SOC Estimation
Z.A. Yu and J.P. Jian 1500

Study on the Teleoperation Virtual Liver Surgery Simulation System with Haptic Feedback
Y.H. Fang, F.J. Huang and B. Wu 1507

Design on Control System for Electro-Hydraulic Hitch Equipment of Tractor
Q.L. Du and X.H. Chen 1513

Research on Movement Relationship and Multi-Axis Motion Control Strategy for the Big Attack Angle Device of the Low-Speed Wind Tunnel
W.H. Chu, W. Gai and Z.H. Gu 1517

Research on Speed and Position Precise Control about Actuating Hydro-Cylinder of Model Support Mechanism in Wind Tunnel
N. Liu, F. Wang, W.H. Chu and S.C. Li 1524

A Dynamic Simulation Approach for Servo-Control System
Z.P. You 1531

Design of Drainage Pipe's Intelligent Exhaust Valve
M.J. Zhu, S.G. Ye and B.G. Jin 1535

Tractor-Semitrailer Stability Integrated Control Based on TruckSim-Simulink Co-Simulation
C.Y. Wei, Z.Y. Long, L. Xie and M.Y. Xie 1539

Intelligent Control on Valve-Controlled Motor Speed Servo System
S.Y. Jiang and Y.J. Liu 1543

Study on a Fuzzy Logic Control Strategy of Regenerative Brake for Vehicular Hybrid Power Source
T. Sun, Y.K. Sun and X. Wang 1547

Design and Implementation of the CNC Monitoring System Based on Internet of Things
Y.L. Zheng, H. Lin and X.L. Su 1552

A Survey on Infrared Weak Small Target Detection Method
Z.M. Li, L.F. Mei and M. Song 1558

Design and Application of a Kind of Micro-Gripper with Pneumatic Control System
Z.T. Zhang, H.P. Li and D. Xu 1561

Automatic Weight Classifying Machine of Objects with Load Cell
K. Prewthaisong 1565

Research on Sterotype Kettle Screw Error Compensation
X.L. Chen 1569

Research on the PID Control Strategy in BP Neural Network of Terrain Detector-Milling Cutting Depth System
X. Feng, H. Hu, F.R. Kong, S. Qiu and Y. Sun 1573

Optimization and Simulation Analysis of Electro Hydraulic Control System of Clutch Engagement Pressure
H.Y. Jin, X.S. Cheng and X.F. Song 1579

Control Method Research of Parallel Operation of Power System with Multiple Sources
J.L. Yu, L.H. Cao, H. Mu and J.N. Li 1583

Control Strategy of Hybrid Electric Vehicles Based on Driving Style Identification
X.Z. Tang, S.J. Yang and H.C. Xia 1587

Adaptive Backstepping Sliding Mode Control of Electro-Optical Tracking Servo Turntable
K.Y. Li, F.Q. Tian and J. Wang 1597

Design of Direct Drive Electro-Hydraulic Actuator Based on Internet of Things Technology
L.H. Wang and Y. Wang 1601

Research on Positioning Control of Pneumatic-Hydraulic Intensifier
X.J. Yang 1606

Analysis and Design of Automatic Transmission' Hydraulic System Based on Logic Analysis
J.H. Li and W.T. Yu 1611

Fuzzy-Neural Network Control on Secondary Hydraulic Transmission System
F.Y. Zang, Y. Wang and X.Z. Kong 1615

Study on Aerodynamic Layout of Two-Dimension Trajectory Correction Projectile
J.Y. Zhang, X.Y. Wang, Y.P. Hao and Y.Y. Guo 1619

Study on Control Strategy for Locking-Up Process of Torque Converter
Y. Jin, X.X. Liu and W.P. Liu 1623

Research on Software Development of Flow Characteristic Measuring System of Motorcycle Electronic Injector
T.Z. Yang, H.B. Xue, H.J. Zhao and L. Yuan 1627

A Control Strategy for Continuously Adjusting Attack Angle in Wind Tunnel Experiments
S.X. Zhang, W. Gai, W.H. Chu and N. Liu 1632

Study and Analysis of Electronic Throttle Control System Applied in Hybrid Electric Vehicle
M.S. Wan, Z.M. Wu, B.L. Li, L.Y. Lv, N. Sun and W.L. Ge 1637

Chapter 14: Advanced CNC Technology and Equipment

Development of the Software for Ball Nut Grinding Process Based on Siemens 840D System
J.F. Shao, J. Li, N.Y. Shen and Y.Y. He 1645

Research and Implementation of Tool Space Compensation Technology of Five Axis CNC Machine
C.J. Li, Q. Liu and H. Liu 1651

Study on Tool Path Generation and Direct Interpolation Method
L.J. Chen, H.Y. Li and H.J. Zhang 1657

Research on Contouring Control of Dual Linear Motors
L.M. Wang and H. Zheng 1661

Thermal Error Compensation and Modeling for CNC Boring and Milling Center
J. Sun, Y.P. Xu and X. Liu 1665

Thermal Error Compensation on Boring & Milling Machining Center Feed System Based on PMAC
J. Sun, X. Liu and Z.X. Li 1669

Contour Tracking Control for Direct Drive X-Y Table Based on Equivalent Errors Model
Z.T. Wu and J.Y. Xu 1673

Simulation and Analysis for Cooling System of High-Speed Motorized Spindle
C.L. Lei, Z.Y. Rui and Y.C. Zhou 1677

Design and Development of Availability Information System for Heavy CNC Equipment Based on Cooperation of Network
L.H. Wei, J. Huang and H.H. Xu 1681

Numerical Control for Multifunction Machining Based on Dual MCU
C.D. Shen and X.H. Zhang 1686

Research on Optimization of Rotation Angle and Singular Area Handling in Five-Axis Post-Processing
Q.X. Fan, G.R. Yan and B.G. Liu 1690

The Design of Reconfigurable Machine Tools about Lathe and Milling Machine Based on Modularization
X.Z. Li, C.M. Wang and J.K. Xu 1696

Establishment and Analysis of Mathematical Model of the Accuracy Identification of Five-Axis CNC Machine Tools
R.B. Shi, Z.P. Guo and Z.Y. Song 1700

Graphical Fault Diagnosis Expert System of CNC Machine Tool Based on B/S
B. Shen, S.Y. Zhao, J.H. Wang and J. Fleischer 1707

Design on the New Composite Rail of Beam in CNC Gantry Machine Tool
H. Lu 1713

The Data Acquisition and Processing of Cutting Parameter Database
L.P. Wang 1717

Chapter 15: Embedded Systems

A New Method Implementation of Kalman Filter Based on FPGA
X. Li, C. Wang, Q.Z. Zhang and X.F. Zou 1725

Design and Implementation of Federal Kalman Filter Based on FPGA
L. Jia, J. Gao, C. Wang, X.F. Zou and Q.Z. Zhang 1729

User Interface Design of 1090ES Mode Embedded Ground-Based Transceiver System
D.Y. Zhang, X. Yu and Z.Y. Liu 1733

Design of Real-Time Large Field Video Display System Based on FPGA
J.B. Chen, Y.M. Qiao and Z.W. Hou 1739

Design of the Wireless Data Acquisition System for Experimental Rabbit Rectal Temperature Based on Bluetooth and ARM Technologies
M.W. Wang, Q.J. Li, Q.H. Li and W.Q. Guo 1744

Design of Ultrasonic Anemometer Based on ARM
K. Zhao 1748

Design and Implementation of Audio Process System Based on DSP
C.X. Chen and Y.H. Mao 1752

Design of Wireless Communication System Based on nRF24L01
X.R. Jiang, Y.M. Lv and X.H. Cheng 1756

Integrated Power Semiconductor Embedded in the Automobile Skylight System Application and Research
S.Q. Ma and C.J. Wang 1760

The Systematic Study of Music Spectrum Display Based on FFT
L. Jin and Q.L. Du 1764

Design of Embedded Software Reliability Testing Scheme and Protocol for Intellectual Ammeter
X. Gao, P. Wang, B. Zhao, Y. Liu and N. Huang 1768

Chapter 16: Technologies of Machine Vision and Image Processing

Automated Judgment for Chin-Up Exercises Based on Microsoft Kinect Image System
S.F. Zhao and B. Luo 1775

Human Behavior Recognition Based on Motion Decomposition
S.P. Zhu and Y.H. Chen 1780

Key Point Location and Segmentation Method of Automatic Diagnosis System Based on the Palm Images
H.W. Du, K. Xiong, J. Liu and Z.Z. Han 1784
The Image Process Based on Intelligent Transportation System
W.Q. An, X.F. Bo and C. Jia 1789
Confidence Based Hierarchical Online Ensemble Visual Tracking
W.H. He, Z.J. Liu and J.M. Qu 1794
A Robust Face Representation Method for Face Recognition
Z.K. Li 1801
A Content-Oriented Image Metadata Model
C. Zhang, P.Z. Zhang and J.P. Gong 1805
A New Measurement System of Yarn Appearance Based on Machine Vision
J.J. Li, C. Wang, W.X. Tu and B.Q. Zuo 1810
A Study of Self-Adaptive Front Vehicle Recognition Algorithm Based on Multi-Features
M.H. Xu, C.J. Xia and H.M. Zheng 1815
Adaptive Background Image Calculation for Video Sequences Based on Optical Flow
H. Zhu and X.P. Ji 1820
Face Detection Based on the Theory of Fractal Compression
Q.S. An, Y.B. Chen, J. Fan and J.L. Wang 1825
Image Capturing and Segmentation Method for Characters Marked on Hot Billets
Q.J. Zhao, P. Cao and Q.X. Meng 1830
Research and Implementation of Real-Time Pedestrian Detection Algorithm
M.H. Xu, H.M. Zheng and C.J. Xia 1837
The Application of Image Processing in Medical Detection Technology
L.P. Wan, T.C. Li, G.Q. Li and B. Ruan 1842
Improved Algorithm for Wavelet Threshold Denoising and Application in Crack Image Recognition
H.B. Li and X. Xia 1846
The Fusion Algorithm of Infrared and Visible Images Based on Computer Vision
M.H. Deng, J.X. Kang and Y.J. Li 1851
A Novel Vehicle Type Recognition Based on Template Matching
T. Li, D.M. Li and Y.M. Dou 1856
An Improved Rapid SURF Algorithm Based on Region of Interest
Y.J. Liu, R.Q. Wan, Z.R. Wang and C.C. Jiang 1861
Multiple Objects Tracking Based on Mixture Features
D.M. Li and T. Li 1869
People Counting Based on the Analysis of the Mass
T. Li, D.M. Li, R.J. Huang and X.Z. Zhao 1875
View-Invariant Face Detection for Colorful Image
H. Zhang, L.J. Wang, Z.J. Wang and W.Y. Yuan 1880
Technology and Simulation of Image Enhancement Based on Wavelet Threshold
B.L. Lin 1885
The Key Technology Research of Kinect Application in Sport Training
Y.L. Che and Z.J. Lu 1890
Rock Intelligent Recognition and Measurement of Particle Size
L.H. Luan and L.J. Guo 1894
A Survey on Solar Image Segmentation Techniques
Y.Y. Fan, W.J. Li and F. Wang 1899
Design and Realization of Efficient Verification Platform Based on System Verilog
M.H. Xu, Q. Yu and A.Y. Guo 1903

Chapter 17: Sensors and Technologies of Measurements

A New Method to Explore the Marine Topography by Gravity Gradiometry
B. Ji, S.F. Bian and Z. Wang 1911
Design and Study of Sensor Layout of Magnetic Navigation Smart Car
C. Jia, X.F. Bo, W.Q. An and X.F. Chen 1916

Finite Element Analysis of Different Outlet Diameter on Fluidic Gyroscope Performance
J.B. Chen, L.H. Piao, J.J. Zhao and X. Ding 1920

Research and Analysis of a Portable Precision Temperature Sensor
H.Q. Yao, H. Cao, F. Jiang and B. Sun 1924

Research of Characteristic Extraction Algorithm of Ballistic Missile Hyperspectral Databased on Horizontal Traversing Time
S.H. Liu, W. Sheng and X.Z. Zhang 1932

Research of Characteristic Extraction and Matching Algorithm of Ballistic Missile Hyperspectral Data Based on Quantization Coding Method
S.H. Liu, Z.J. Bi and L. Lu 1936

A Manhole Covers Intelligent Monitoring Terminal Based on Dual Frequency RFID and Acceleration Sensor
Z.B. Wang, J.C. Wang and H.B. Zhang 1942

Design of the Monitoring System for Valuable Chinese Herbal Medicine Growth Based on CC2430
B.H. Zhu, D.Q. Zhu and Y.L. Zhu 1948

Information Fusion and Application of Fiber-Capacitive Sensor
Q. Song, G.J. Meng, L. Yang, D.Q. Du and X.F. Mao 1952

Inverse Hysteresis Compensation of One-Dimensional Piezoelectric Scanner with Generalized Prandtl-Ishlinskii Model
D. Luo, S.H. Chen, W. Chen, G.H. Jiao and Y.F. Lu 1956

Research on Signal Detection Method of High Precision Based on Bayesian Fusion of Multisensory System
C. Chen and H.H. Wang 1962

A New Compressed Sensing Image Transmission Scheme in Wireless Sensor Networks
M. Yang, Z.G. Wang and L. Zhang 1968

Analysis of Force Transducer Calibration Accuracy Based on Different Influence Factors
Y.Z. Zhao, G.T. Li, Z. Niu and D.C. Weng 1973

Classification Moving Vehicle Based on Multisensor Data Using Fusion of Multi-Class SVMs Methods
X.Y. Chen, X.F. Chen, S.Q. Zhang and W.B. Zhang 1978

Design of the Chemical Reaction Tank Temperature Acquisition System Based on Wireless Sensor Networks
M.W. Wang, Z. Yao, W.Q. Guo, Q.H. Li and Q.J. Li 1982

Eddy Current Testing Probe to Improve the Defect Detection Sensitivity of Metal Tube
S.Q. Zhang, Y. Liu, H.J. Xu and C. Yin 1987

Evaluation of Optoelectronic Performance of Four Organic Photo Detectors Structures
L. Wang, Q.F. Niu, J.S. Camacho and T. Dong 1991

Frequency Characteristics Analysis of High Frequency Current Transformers
Y. Dong, X.X. Chen, Y.R. Li, Y.M. Zhang and C. Wei 1996

The Research on Measurement Accuracy of RIM-FOS
Y.Q. Jin and L. You 2005

An Electrochemical Mercuric Ion Sensor Based on CdS Nanparticle Label
H. Fan, F.S. Liao, G.B. Wei and N. Hong 2009

An New Electrochemical Sensor for DNA Ligase Detection
H. Fan, G.B. Wei, F.S. Liao and N. Hong 2013

Development of Piezoelectric Three-Dimensional Dynamometer for Φ300mm Wafer Grinder
J. Zhang, W. Wang, M. Qian, R.K. Kang and Z.J. Ren 2017

Moving Defect Localization of Wheel-Bearings with Particle Filter and MUSIC
S.J. Zhang, B. Chen, B.C. Gao and Y. Zhou 2021

Principle Experimental Study about Collapsible Fuel Tank Based on Quality Measurement Method
N. Liu, J.C. Wang, J.X. Yang and T.M. Liu 2026

Research on Coplanar Capacitive Sensor Design for Film Thickness Measurement
Y. Gong, H.Y. Zhu and N. Li 2030

The Application of Oxygen Indicator in Food Packaging
S.Y. Xie, X.H. Liu, H.B. Li and C. Huang 2037

Transient Signal Detection in Non-Gaussian Noise Using Stochastic Resonance and Wavelet Domain Power-Law Detector
H.Y. Dong and Z. Yang 2043

Hydraulic Excavator Bucket Teeth Load-Time Courses Measurement
X.L. Hu, W. Yan, Q. Xiang and Y.T. Xie 2048

The Measuring Machine Designing for Detection Iron Tower Component
W. Li, J.G. Liu, C.X. Pan and L.J. Qin 2053

A Novel Harmonic Detection Method Based on Wavelet Analysis
L. Wu and Y.Z. Gao 2057

Application of the OPC Technology in the No-Load Test Platform of the Metro Bogie
G.S. Ren, L. Gai and X.Q. Yin 2062

Accuracy Analysis of Point Cloud Registration Based on Mark Point
X.H. Liang and J.W. Liu 2067

The Proof of Equivalence between "Moment of Inertia Based Method" and "PCA Based Method" in LOS Detection
L. Hong 2071

Research on Ranging Method Based on Binocular Stereo Vision
X.Z. Lv, M.T. Wang, Y.F. Qi, X.M. Zhao and H. Dong 2075

Compare with the Identifying Tape Image of Longitudinal Tear in Average Filtering and Median Filtering
M.M. Zhang and P.H. Li 2082

Calibration Methods of Proximate Analyzer
L. Wang, Y. Xu and X.H. Li 2089

Improvement of Waveform Analysis Method Based on Polynomial Fitting for Liquid Drop Fingerprint
Q. Song, D.Q. Du, L. Yang, G.J. Meng and X.F. Mao 2093

Mathematical Model and Simulation for Testing Aspheric Surface Using the Digital Moiré Patterns by Circular Sub-Region Stitching Method
Y.C. Man and C.Y. Zhou 2097

Design and Implementation of a Kind of Ship Underwater Electric Field Signal Collection Equipment Hardware
X.B. Wang, L. Xia, X.J. Wang and Y. Liu 2102

Study on Resolution Capability of Beam Space MUSIC Estimation Algorithm
H. Zhou and Z.J. Huo 2106

Design of Intelligent Dynamic Weighing Instrument Based on AT89S52
Z.Y. Sun 2111

An Comprehensive Automatic Monitor under the Conditions of Deepwater Environment
Y. Shi, X.L. Zhao, K. Li and G.H. Wei 2115

Research of pH Value Temperature Compensation Module Based on the Least Squares Method
X.L. Zhao, Y. Shi, K. Li and G.H. Wei 2121

Research on Power and Brake Detection Integration of Wheeled Construction Machinery
C.C. Gong, M. Lu, H.F. Ling and B. Li 2126

The Research on Dynamic Torque Test of Overrunning Clutch Based on Load Identification Technology
C.M. Zhu, Y.B. Zuo and G.X. Wu 2132

Design of Surface Contour Detection System Based on SCM
M.M. Tan and Z.Y. Zhang 2137

Fast Calculation Method for the Magnetic Field of Coil above Conductive Plate
S.Q. Zhang, C. Qi and G. Chen 2141

Onsite Detection Technology and its Application for Electric Cable Partial Discharge
Y.Y. Man, C. Zhang, X.G. Xi, M.L. Wu, Y.W. Dong, Z. Sun and X.X. Chen 2145

Application of Beidou Satellite Communication Technology in the Landslide Remote Monitoring and Early Warning System
G.L. Sun, Z.G. Tao, B. Zhang, D.G. Hou and H.P. Li 2150

Compared of Polarity Correlation Algorithm and LMS Algorithm for Flow Velocity Measurement
P.C. Yan, M.R. Zhou and Y.C. Ma 2155

Development of New Smart Meter with Optimized Power Line Communication Module
M.F. Gong, B.Q. Liu, W.S. Wang, Y.Q. Lin, H.T. Ge, N.X. Yang and F. Qiu 2160

Extremum Median Filter Method Used in Data Analysis of Spray Heat Exchange Temperature Test
Z.F. Dong, X.W. Cheng, Y.D. Han, J.T. Tang and G. Dan 2165

Redundant Method for Measuring Downhole Posture of the Steering Drilling Tool
Z.L. Liu, W.S. Yan and W.W. Xiao 2170

Research on the Metrological Verification System for an Equipment
Y.L. Huang, H. Bai, J.W. Feng, H.Z. Fan and J.F. Ma 2175

Chapter 17: Sensors and Technologies of Measurements

Signal Measurement Error Analysis of the Bayesian Network of Mechanical Fault Detection
Y.X. Zhang, L. Lan and X.H. Wang 2183

The Research of Judging the Phenomenon of Roof Separation Based on Principle of Dynamic Time Warping Algorithm
D.D. Liu, G.C. Qiu and H.L. Che 2187

Design and Calibration of a Cutting Force Dynamometer
Z.J. Ren, J. Zhang, Z.Y. Jia and Y.Y. Shang 2191

Influence of Temperature and Pressure on Nozzle Array Fluidic Gyroscope
J.B. Chen, L.H. Piao, J.J. Zhao and X. Ding 2195

An On-Line Water Quality Monitoring System for the Reservoirs Based on Android
Z.W. Dai and H.Y. Liao 2199

Chapter 18: Electronics Technology and Communication

Applications of Optical Fiber Access Network
B.M. Liu and L. Zhou 2205

Effect of Spontaneous Radiation of Vertical-Cavity Semiconductor Optical Amplifier Bistability
L. Zhou 2209

Optical System in Laser Inter-Satellites Communication
L. Zhou 2213

PC Transceiver Programming in GPRS Wireless Transmission Module
X.H. Kuang, Z.Y. Yao, Z.Y. Wang, J.M. Zhou, J. Li, J. Hu and S.M. Wang 2217

Research on the AFEC Algorithm of Active Network in Wireless Environment
Q.X. Shang 2221

An Implementation of Wide-Range Digital Delay Locked Loop
D. Zhou, J.Y. Zhang and B. Ye 2226

Frequency-Hopping Communication Technology Based on Self-Adaptive MIMO-OFDM System
J.X. Ruan, Y. Xu and M. Cui 2230

LabVIEW-Based Intelligent Digital Voltmeter Design
F. Gao, L.F. Liu and H.W. Zhao 2237

Optimization of Vehicle-Borne Radar Antenna Pedestal Based on Modified NSGA-II
D.G. Zhao and Q. Li 2241

Research on Blackout Measurement and Communication of Reentry Vehicle
Y.L. Zhang, Y.X. Qu, X.C. Liu and B. Cong 2248

Electromagnetic Shielding Technology Applications in the Electronics Shelter
T. He, H.X. Tang, K. Lv and J.L. Wan 2254

Performance Analysis and Simulation of BCH Code in Communication
Q.X. Shang and C. Zhang 2258

Performance Analysis of AF Relaying Systems with Partial Relay Selection
H. Zhang, D.L. Hao and H.Y. Ding 2262

Research on Neural Network Control Technology for Satellite-Based Laser Communication Tracking Turntable
L.H. Wang and X.Q. Wu 2266

Research on S-Band DDS-Driven PLL Low Spurious Frequence Synthesizer
Y. Zhao and Y.Q. Liu 2272

Attacking a Measurement Device Independent Practical Quantum-Key-Distribution System with Wavelength-Dependent Beam-Splitter and Multi-Wavelength Sources
T. Yu, H.Y. An and D.W. Liu 2277

Design and Realization of Infrared Simulation of SPI Communication
D.X. Zhou, C.X. Zhang, L.L. Liu and S. Han 2284

Network Control of Disaster Recovery Plan
Q. Liu, M. Yu, H.L. Jia and P.J. Chen 2289

Pilots Precoding Scheme for Massive MIMO System
H. Zhang, D.L. Hao and X.Y. Liu 2293

A Spectrum Sensing Based on Support Vector Machine Algorithm in the Building Indoors Environment
X.H. Xia, F.J. Luan and M.X. Li 2297

The New Research of Spectrum Sensing Technology for Cognitive Radio
Y. Peng and Y.J. Wang 2301

Simulation of a Characteristics Identification Algorithm
W.C. Yang, R. Li and Z.D. Shang 2306

Fast Demodulation Algorithm for Rate Compatible Modulation by Log-Map Principle
Q. Zou and M. Wang 2310

A Precoding Algorithm Based on Truncated Polynomial Expansion for Massive MIMO System
H. Zhang, D.L. Hao and X.Y. Liu 2315

The Application of an Improved Genetic Algorithm to Signal Acquisition
M. Shi, C.C. Tian, Q.M. Yi and S. Li 2319

Study on Triple-Antenna KINRTK Problem Using BDS Signal
C.B. Xiang, S.F. Bian and Z.M. Wu 2323

Simulation Research of a Soft Power Bi-Directional DC-DC Converter
Y. Zhang and J.D. Li 2327

The Application of Sliding Mode Control in Current Source Converter
J. Bai, S.Q. Lu and J. Liu 2331

Narrowband Bandpass Microstrip Filter Design
Y. Li 2338

A New-Type Data Transmission Scheme and Key Technology of Electric Energy Data Acquisition System
L.J. Dong, E.G. Zhu, Q. Zhang, X. Liu and Y. Liu 2342

Simulation Research on MAC Layer Protocol Base on OPNET Modeler
Y.M. Mao, D.W. Zhang and F.L. Kan 2349

ZigBee Network Routing Algorithm Based on the Research
N. Chen, C.T. Wang, F.L. Kan and L.G. Zhao 2353

The Development and Applications of SAW RFID Technology
F. Chen and J. Mao 2358

RFID Middleware Research for Enterprise Production Information Integration
N.F. Ren, W. Xu and Y. Li 2363

Research on MAC Protocol for Wireless Sensor Network
Y.M. Mao, F.L. Kan and D.W. Zhang 2368

Node Capture Attack Detection in Dynamic WSNs Based on New Node Tracking
P. Lu, G.W. Zhang and F.C. Yang 2372

Study on WSN Localization Algorithm and Simulation Model Based on Kalman Filtering Algorithm
L.Z. Gao 2380

WSN Coverage Enhancement Algorithm Based on Particle Swarm Optimization
J.X. Wang and X. Li 2386

Cluster-Based Multipath Routing Algorithm of Ant Colony System for Wireless Sensor Networks
J.Y. Zhang and D.Y. Chen 2394

Chapter 19: Computational Mathematics and Algorithms of Data Processing and Data Mining

Research of an Improved Double-Array Trie Tree Algorithm
W.C. Yang, B. Jia and Q.Y. Qu 2401

System Fault Sequence Prediction on CRH2 EMU Based on Improved GSP Algorithm
X.Y. Liu 2405

Reactive Power Optimization Using Multi-Objective Particle Swarm Optimization Algorithm Based on Pareto
Y. Ai, Y.X. Su, D.H. Zhang and Y. Peng 2409

Bp Neural Network Optimized by PSO and its Application in Function Approximation
J.Y. Li 2413

Structural Expert Modeling of Buildings on the Basis of Mamdani's Algorithm
T. Soldatenko 2417

A Class of Nonlinear Difference Inequality with Weakly Singularity in Engineering
Z.Y. Hou and W.S. Wang 2426

Application of the Improved Mapping Approach to Exact Solutions and Chaotic Patterns for a Nonlinear Equation
Y. Lei, S.H. Ma and J.P. Fang 2430

Based on SVM Classification of Connection Pools Algorithm
J. Zhao and H.Y. Xiong 2435

A Buffer Pool Optimization Algorithm Based on Max-Heap
X.M. Xiong 2439

Matrix Analysis and Design Based on Algorithm of Paper Analysis
C.L. Fang and Y. Du 2443

Speech Signal for the Recognition of Emotion by Cultural Genetic Algorithm
C.C. Chen, W. Gong and W.L. Fu 2447

Intrinsically Knotted and 3-Linked Graph
Q.P. Ren and G.H. Wang 2451

Research and Implementation of Multidimensional Customer Behavior Segmentation Model Based on Bayes and Fisher
G.H. Wang, Z.Y. Liu and S.B. Zhang 2455

The Random Walk Model for Tibetan Network Public Opinion Dissemination Behavior
K.Y. Deng, J.W. Deng, Y.X. Li and S.D. Li 2459

Two Differential-Integral Inequalities in Engineering
W.S. Wang and C.M. Huang 2463

Estimation of Unknown Function in a Class of Singular Difference Inequality in Engineering
C.M. Huang and W.S. Wang 2467

$H_{p,p}$ ($1 \le p \le \infty$) in the Unit Circle
M.P. Ovchintsev 2471

Segmentation and Iterative Algorithm for Repair of Turbine Blade
H.D. Wu, J. Gao and D.T. Zheng 2474

Riccari Equation Expansion Approach to Construct Complex Wave Solutions for the Related Schrodinger Equation
Z.H. Pan and S.H. Ma 2480

Application of ADE-FDTD Method in Lossy Lorentz Media
Q.C. Nie and B.K. Chen 2486

The Differential Measurement Model that under the Equal Principle and its Application
S.Y. Wang and S.Z. Chai 2490

Chaotic Time Series Adaptive Prediction Based on Volterra Series
F. Dai and G.H. Liao 2495

Correlation Coefficient Matrix Based PD Feature Dimensional Reduction
Y. Wang, J.S. Yuan, H.K. Shang and S. Jin 2499

Ensemble Learning in Data Mining of Fetal Cardiotocograms
X.Y. Chen, B. Liu and X. Xia 2505

Analysis of LED Light Source Energy Consumption for Lighting System Optimized by BP Neural Network Based on Genetic Algorithm
D.Q. Wei, H.C. Chen and J.W. Lu 2509

Combination Forecasting Method Based on IOWA Operator and Application
D. Liang, L.F. Ma, Y.F. Hu and S. Wu 2515

Research and Implement of an Improved Frame-Slotted ALOHA Anti-Collision Algorithm
L. He, G.P. Liu and C.Y. Han 2519

An Advanced AOI-Cast Algorithm Based on PCA
Y. Wang 2523

Chapter 20: Monitoring, Control Systems and Intelligent Systems

Fuzzy Adaptive Direct Generalized Predictive Control Algorithm in the Application of AWC Control
F.C. Yin, G.S. Ma, Y.F. Ji, J.X. Yu, D.H. Gu and D.H. Zhang 2529

Main Clutch Teaching System Designed on PLC
J.Y. Wu, Y. Jin and W.P. Liu 2533

Observer-Based Control of a Class of Switched Fuzzy Systems
H. Yang, H.H. Lü and L. Zhang 2539

Switching Control for a Class of Discrete-Time Switched Fuzzy Systems Based on LMI
H. Yang, H.H. Lü and L. Zhang 2543

Switching Control for a Class of Switched Fuzzy Systems
H. Yang, H.H. Lü and L. Zhang 2547

The Design of Automated Parking Brake Performance Test Equipment
J. Yan, F. Lin, Z.Z. Ye and J.W. Shao 2551

The Design of LED Streetlights Controller with Light Control Long Time-Lapse
Y. Li and C. Kui 2555

The Research on the System of Double-Holding Water Tank Liquid Level Control with the PID Control
M. Yu, H.L. Jia and P.J. Chen 2559

Converter Control Strategy Analysis on EESG
Z.X. Lin and H.H. Xu 2563

Simulation Analysis of Electro-Pneumatic Proportional Fuzzy-PID Control System Based on AMESim/Simulink
S.Y. Wang, G.S. Ren and P. Nie 2568

An Automatic Controlling System of Flushing in Washroom
C.Y. Zhong 2573

Siemens PLC Software Redundancy in the Design and Implementation of Biomass Pellet Fuel Gasification Test of Strength
X.L. Li, J. Liu, Y. Xie and T.Y. Yun 2578

The Study on an Automatic Safety Warning System of Mistakenly Entering Charged Interval
L. Chen 2585

Design and Implementation of Wireless Lighting Nodes Based on JN5168
F. Pan and Q.H. Yang 2589

PC Interface Design for Wave Energy Power Generation Remote Monitoring System
X.H. Kuang, Z.Y. Wang and Z.Y. Yao 2596

Research on the Path Optimization Algorithm of Drilling Rig Discharging Pipe System
Z.Q. Jiang, B.B. Wang, H.R. Dong and Q.B. An 2601

Design of Household Carbon Dioxide Heat Pump Controller Man-Machine Interface Based on C8051F500
Y.R. Li and T.F. Zheng 2606

Hardware Implementation Tasks to Configure Regulators
V. Goncharov, I.O. Ilyin and A. Kudryavtsev 2611

Study on Fault Diagnosis Expert System of Aircraft Power-Supply System
X.Y. Zhuang, Y.Y. Xu and Y. Bao 2617

The Research and Prospect for Hardware System of Intelligent Control of Greenhouse Environment
Z. Zhu, S.H. Zheng, D.P. Ye, X.Y. Tong and W. Xu 2623

The Study of Simulation on Variable-Frequency Air Conditioning Systems Adopted by Control Strategy of Hybrid Automata
Z.Q. Liu and Z.J. Wu 2629

Design of Solar Energy Based Intelligent LED Street Lighting Controller
B.G. Jin, Y.D. Yu and M.J. Zhu 2633

Facilities Vegetables Monitoring and Control System Design Based on WCF and Internet of Things
L. Yan, G.W. Wang and S.F. Wu 2637

Research of the On-Line Capacitor Measurement and Protection Device Based on STM32
M.F. Gong, F. Qiu and K.L. Song 2641

Robust Estimation for Discrete-Time Uncertain Systems with Markov Jump Delays
L.P. Feng, S. Pan and F. Xiao 2646

Software Design of Automotive Parking Heater Remoter and Receiver
Y.T. Ge, X.M. Liu and X.T. Yin 2651

The Multi-Attributes Assessment Method of Control Performance Based on Data Driven
L.C. Qi, H.Z. Kong, J.W. Qiu, Y.Q. Liu and X.G. Du 2655

The Research of Free Pendulum Flat Control System Based on MCU
D.L. Qu and Q.L. Du 2661

Anti-Collision Control Research on Ocean Drilling Platform Drill String Automated Processing
Z.Q. Jiang 2665

Output Stable Control Design for a Class of Nonlinear Systems Based on Adaptive Fuzzy Logic Systems
Z.L. Gao, Y. Pan, J. Xiong and J.P. Chen 2670

The Stabilization of Switched Systems with Input Saturation
L. Jing and L. Liu 2676

Optimization of the Dynamic Performance of the Direct Drive Volume Control System Based on Orthogonal Experiment
A.Q. Huang and Y. Wang 2680

Student Attendance Check System Based on Fingerprint Identification Technology
C. Lv, Z.D. Liu, H.B. Zhang and Y. Xiu 2685

Design of Laboratory Management System Based on RFID
S.Q. Ma and C.J. Wang 2689

The Design of Smart Home Monitoring System Based on ZigBee and Voice Recognition Technology
J. Huang, Y.C. Yang, X.D. Zhai and C. Yang 2693

Research and Design of Distributed Self-Adaptive Highway Monitoring System Based on WSN
M.S. Gu, Y.S. Yan, J. Wei and H.Y. Wang 2698

Design and Development of Transformer Data Monitoring System Based on J2EE
B. Qu, J.B. Nie, M.X. Shen and K. Wang 2703

Design of the Wireless Monitoring System Based on CC1100 in Greenhouse
J. Bao, H.B. Chen, R.X. Ou and J. Wu 2709

Control System of Sand Milling Collection Machine Based on PLC
Z.K. Chen, S. Qiu, H. Hu and Y. Sun 2713

Design for Intersections Safety Pre-Warning System Based on Cooperative Vehicle Infrastructure System
W.J. Wu 2721

The Research and Application of the PID Controller Based on the Improved BP Network
Y. Yao 2726

Consensus Control for Battery Management System
C.H. Yang, F. Zhang, D.Y. Yang and J. Lin 2732

H∞Control of Fractional Nonlinear Differential Systems
L. Li 2737

Guided Route Creating Algorithm in Advanced-Surface Movement Guide and Control System
R. Wu, W.A. Jiang, J. Long and Z.Y. Shang 2741

The Application of LabVIEW in Network Complementary Monitoring System
X.F. Bo, C. Jia, W.Q. An and X.F. Chen 2748

Study on Fault Classification Method for Control System
L. Jia and Z.H. Liu 2754

Design of Inverter Communication Network Query Engine
F.M. Cheng 2758

Trenchless Rig Remote Monitoring System Software Development Based on VB
L. Han, C. Wu, P. Zhang and J.H. Bai 2762

Antiwindup Controller Design for Phase-Lead-Lag Controller
X.Y. Fu, G.B. Zhang and M.R. Zhang 2767

Carrier Aircraft Urgent Takeoff In-Flight Alignment Extended Set-Membership Estimation
Y. Yao, S. Pan and Y.Q. Wu 2772

Prediction of Network Utilization Based on ARMA Model and RELS
H. Zhang, F. He and C.Y. Han 2780

An Improved DMOC Method with Gradient Penalty Term
L. Gao and J.Y. Ding 2784

Hydraulic Control System Design for XYZM Plate-and-Frame Filter Press
L.X. Hou, F.G. Li, C.X. Ju and W. Xu 2788

The Design of Bending Force Shape Control System Based on Fuzzy Adaptive Control
J.S. Ma 2794

Chapter 21: Energy and Power Engineering

Uncertainty Estimation Method for Windspeed Random Fluctuation Based on it's Amplitude Modulation Effect
J. Wan, Z.G. Zhao, G.R. Ren, C.C. Qiao, C.R. Lei, J.F. Liu, S.L. Wei and D.R. Yu 2801

Numerical Study of Effect of Injection Parameters on Combustion and Emission Performance of a Direct Injection Diesel-Natural Gas Engine
G.M. Guo, Z.X. He, X.X. Sun, Z.R. Zhang and X.C. Tao 2806

Simulation and Test for Turbine Air Powered Engine
J. Liu, J.T. Han and J.C. Deng 2810

Research on the Influence of Temperature and Illumination Strength to Photovoltaic Generation System
K. Li and D.A. Zhao 2815

Simulation on Ground Temperature Change of GSHP System in Severe Cold Regions
L. Bai and P.X. Wang 2820

Study on Drilling Technology of Excavated Foundation for Transmission Lines
G.R. Tang, M. Jiang, K. Liu and F. Peng 2825

Study on the Choice of Logistics Supplier in Wind Power Manufactures Based on Fuzzy Comprehensive Evaluation
N. Li and J.G. Li 2830

A Hybrid Sequence Modulation Technique for Common-Mode Voltage Reduction in Current Source Converters
J. Bai, J. Liu and S.Q. Lu 2834

Micro-Grid System Based on Compressed Air Energy Storage
Y.J. Liu, W.H. Li, X.H. Luo, C. Su, S.X. Ding, G.Z. Wu and D.P. Zhang 2841

A New Method of Short-Current Limiting
H. Xu and Z.D. Yin 2846

Study on Main Electrical Connection of 500kV Smart Terminal Substation
Y.Q. Huang, N. Liu and J.H. Zhang 2850

Design and Simulation of Permanent Synchronous Drive Motor for Electric Vehicle
C.Y. Qu and X.P. Wang 2854

On the Possibility of Fractional-Slot Concentrated-Winding Permanent Magnet Machine for Wind Power Generation
X.P. Wang and C.Y. Qu 2858

Full-Bridge ZVZCS Converter Design Based on Power System
B.W. Sun 2863

Design for Boost DC-DC Converter Controller Based on State-Space Average Method
S. Su, J.Q. Yang, J.X. Zou and W.B. Zhang 2867

Chapter 21: Energy and Power Engineering

Ground Distance Algorithm for Single-Phase Grounding Fault of Four-Parallel Transmission Lines Based on Twelve-Sequence Component
Z.A. Yu, M.Z. Cheng, P.Y. Guo and N.L. Tai 2873

Modeling and Simulation of MPPT Algorithm for PV Grid-Connected System
Y.T. Yan, Y. Yang, J.Q. Yang and W.B. Zhang 2880

Capacitor Voltage Balance Control for Diode Clamped Multi-Level Inverter Based on Charge Refreshing
L.P. Zhong, Q.M. Gu and S.P. Zhang 2885

Rotor Current Analysis on Transient Performance of Low Voltage Ride-Through of Doubly Fed Induction Generator
W.J. Zhang and Z.X. Han 2891

Application of Combined Intelligent Algorithm in Load Forecasting
S.F. Wang and H.C. Yang 2895

Chapter 22: Manufacturing Management and Engineering Management

Measuring the Successful Factors of Dynamic Capabilities by Decision Making Trial and Evaluation Laboratory (DEMATEL)-Based Model
P.Y. Huang, Y.J. Wang, S.B. Tsai and J.J. Guo 2903

System Analysis and Simulation Modeling as the Basis for Unique Design of Port Terminals for Bulk Handling
K. Nikolay 2907

The Re-Cognition and Direction of Chinese Labor-Intensive Industry
B. Sun and Z.H. Chen 2911

A Methodology for Replenishment of Products on Supermarket Sector
C.T. Scarpin and M.T.A. Steiner 2915

Experiencing Integrated Management in a Virtual Learning Environment
D. Wollmann, M.T. Arns Steiner, P.J. Steiner Neto and O. Canciglieri 2924

Forecasting for Machine Tool Sales Based on Grey Linear Regression Model
D. Liang, Y.F. Hu, L.F. Ma and G.Z. Sun 2935

Risk Age of Passenger Ships Based on Port State Control Data
M.L. Sun and Z.Y. Zheng 2939

The Study and Realization of Grading Modeling Risk Assessment for Buried Gas Pipeline
L.J. Li, J.Y. An and L. Zhou 2944

Applying Quality Function Deployment Techniques in Lead Production Project Selection and Assignment
C.C. Chen and Q. Zhang 2954

The Index System Based Risk Evaluation for Electricity Power Market Self-Regulation Building
J.C. Liu, Y.X. Wu, X. Yu, J.B. Liao, T. Liu, S.X. Wang and C. Deng 2960

The Impact of Knowledge Management Strategy on Performance in Taiwan's Manufacturing Companies
H.L. Huang, Y.Y. Chen and W.H. Fang 2967

Analysis and Short-Term Prediction of Information Service Industry's Prosperity Index
N. Wang, F. Sun and X.H. Shan 2971

Research on Enterprises Knowledge Transfer under NPI Model Based on the System Dynamics
X.G. Xu and D.B. Shen 2977

The Effect of Authentic Leadership on Leader Creativity: The Mediating Role of Creative Process Engagement
C. Zhao and Z.H. Gao 2982

An Empirical Research on Fuzzy Alliance Network of Chinese Automobile Industry
G.M. Yu 2987

Study on Competitive Advantages of Automobile Industry in Wuhan from the Perspective of Industry Cluster
X.H. Zhang 2991

Study on Development Strategies of Chinese Equipment Manufacturing Industry
L.P. Chen 2996

Analysis of the Contribution Rate of Technological Progress to the Development of Coal Industry
J. Guo and F. Ding 3000

The Research on the Characteristics and the Construction of Collaboration Design Platform in Industry Cluster
Y. Cui, Q. Wang, H. Guo, Y. Wang and H. Jiao 3004

Intelligent and Green Buildings Project Management Scope Definition Using Project Definition Rating Index (PDRI)
T.J. Chu, A.P. Chang, C.L. Hwang and J.D. Lin 3008

Complex Models of Active Control Systems at the Modern Developing Enterprises
V.G. Borkovskaya 3012

Explore the Underpinning of Applying "System Dynamics" Research in Construction Project Management -A Literature Review from 1998 to 2012
T.R. Gan 3016

System Building of Supervision for Construction Engineering Quality under the Perspective of Life-Cycle
G.B. Han 3022

Construction Work Tasks Duration: Pessimistic Scenarios Based on PERT Method
S. Bolotin, A. Dadar and I. Ptuhina 3026

Research on Competitive Strategy - Case of a Taiwan Technology Material Manufacture Enterprise
R. Saito, Y.J. Wang and S.B. Tsai 3032

A Research in Knowledge Management System for the Development of DSS
Y.F. Liu, D. Xie and Y.J. Yuan 3037

Maintenance Management Issues and Solutions for Bridges in the Small Town
C.C. Su 3041

Research on Remanufacturing of Gear Reducer
Z.F. Li, C.K. Du and S.Q. Huang 3045

High-Tech Manufacturing Enterprises' Competitive Strategies – The Case of Printed Circuit Board Manufacturing in Taiwan
Y.C. Lin, B. Yu and S.B. Tsai 3050

Establishment and Application of Risk Forecast Model of Construction Project Based upon BP Neural Network
X.X. Li 3056

Power Quality Management in Distribution Systems
A.R.T. Góes, M.T. Arns Steiner, P.J. Steiner Neto and O. Canciglieri 3060

Model of Optimum Planning of Civil Engineering in the Settlement Territory
V.S. Soldatenko 3069

Production Line System Research Based on LINGO
D. Liang, D.D. Xu, F. Kong and S. Wu 3078

Research on the Equipment Support Decision Making Agent
X. Zhang, X.M. Du, N. Zhu and X.B. Li 3082

Method of Selection Manufacturing Projects Based on FANP Model
Z. Li, D.Y. Sun and C. Xiao 3087

Merging Algorithm for Multi-Varieties and Small-Batch Orders in Iron and Steel Enterprise
G.J. Dong, L. Li, X.T. Wu and J. Su 3092

An Algorithm for Economic Lot Scheduling Problem
R.W. Luo, R.H. Xie, L.W. Xiao and Y.F. Zou 3097

Modeling and Analysis of Machining Center Reliability Based on MATLAB
X. Li, C.G. Yang, X.C. Zhu and X.F. Yuan 3102

A Hybrid Genetic Algorithm for Production Capacity Allocation Problem with Multiple Regional Demands in Supply Chain
Z. Wang and L. Huang 3107

Analysis of Engineering Supervision Process Base on Asymmetric Information
F. Zha and T.Z. Wei 3112

Lean Manufacturing in Operations Management in Improving the Efficiency of Manufacturing Processes
J. Jambor 3117

Logistics Network Optimization of Import Crude Oil in China Based on Genetic Algorithm
J. Chen 3126

Solving the Problem of General Job Shop Problem by Using Improved Cellular Genetic Algorithm
Z.M. Li, Y. Zhang, X.D. Zheng and X.Y. Wan 3130

An Effective Method for Capacity Analysis of Aircraft Digital Assembly System
L.M. Zhao 3136

Improved Data Structure for the Orthogonal Packing Problem
V.A. Chekanin and A.V. Chekanin 3143

Research on Lean Information System of Coal Enterprises
C.F. Liu, J.H. Liu and G.X. Yang 3147

Analysis of Machining Workshop Manufacturing Based on Unit K Means Clustering
D. Liang, F. Kong, D.D. Xu and G.Z. Sun 3152

Modeling in Mixed-Model Assembly Lines Based on Object-Oriented Petri Net
H. Dong, H.B. Xin and J.H. Yan 3156

Chapter 23: Logistics and Supply Chain

Study on Green Supply Chain Management Model of Chinese Home Appliances Enterprises
W. Liu and J.X. Chen 3163

The Problem of Selecting Supplier for Retailer in Supply Chain
N. Liang 3167

The Supplier Selection in the Category Management Based on Trust
N. Liang, B.H. Zhu and Y. Dong 3171

Negotiation Model for Assuring Quality in Supply Chain Using Stackelberg Game
K.S. Shin and B.C. Kwon 3175

Under the Environment of Agile Supply Chain Inventory Control Research
L.L. Wang, T. Zhang and Y. Guo 3179

Design of Simulator for Reverse Supply Chain Network
S.J. Lim 3183

Optimization Control of the Bullwhip Effect in Supply Chain Inventory
H. Dong, J.H. Liu and L.Y. Liu 3187

Research on Urban and Rural Areas of Yunnan Cold Chain Logistics Knowledge Alliances Building
L.X. Han and F.C. Li 3191

The Research of Supply Chain Based on the Order Agriculture
H. Dong and Q.S. Lv 3195

Research on Chinese Chine Supermarkets' Logistics Distribution Model
P. Zhang, X.S. Jiang and W.L. Gai 3199

Study on the Public Logistics Nodes of Industry Cluster District and Location
T.T. Li, L. Qin and X.J. Ge 3204

The Research on Port Logistics Mode and the Selection
D.Q. Sun and Y. Yang 3209

New Formulation for an Economic Order Quantity Distribution Policy in Vendor-Managed Inventory Routing Problems
T. Guimaraes, C.T. Scarpin and M.T. Arns Steiner 3219

The IOT and Smart Logistics Model as the Center of Agricultural Products IOT Port
Y. Chen 3237

Automobile Industry Supply Chain Inventory Modeling and Optimization Based on MPC
D.X. Wang, J.J. Dou and Y.H. Chen 3241

Research on Mixed Intelligent Arithmetic of Reuse Reverse Logistics Centers' Location Model
L.F. Dai and X.F. Wang 3246

Chapter 24: Traffic and Transportation Systems

A Cooperative Positioning Scheme Based on Beam-Forming for Intelligent Transportation Systems
L. Du, N. Liu, R. Fang, N. Li and X.H. Song 3255

Traffic Flow Forecasting Based on Land-Use Planning
Q. Liu and J.J. Zhang 3260

Acoustic Internet of Vehicles: Localization and Sound Synthesis to Increase Traffic Awareness
W. Zhang, L.H. Zhang and J.J. He 3266

Analysis of Air Traffic Flow Management Effect
Q.F. Zhang 3271

New Approach for Modeling of Air Traffic Flow
Q.F. Zhang 3275

The China Air Traffic Flow Management Problem
Q.F. Zhang 3279

Improvement Research of Path Selection Algorithm in Traffic Guidance System
L.L. Li and J.P. Tang 3283

Research on Integrated Transportation of the Vehicle Logistics
W.L. Tian and C.X. Cao 3287

Research and Design of Road Traffic Flow Detection System
Z. Song and Q. Ye 3291

The Research on Area Classification in Intercity Rail Traffic Forecast Based on Cluster Analysis
D.M. Yao and D.Y. Jiang 3296

Optimal Control of Air Traffic Networks
Q.F. Zhang 3300

Research on Traffic Sign Detection Algorithm
M.H. Xu, Y.D. Liu and C.J. Xia 3304

Chapter 25: Applied Information Technologies and Knowledge Processing

Design and Implementation of Intelligent Management System of Amusement Park Based on Two-Dimensional Code
R. Shan, L.L. Qi, J. Yang, Y.P. Zhang, J.F. Ding and K. Zhou 3311

The Design of Campus Online Supermarket Management System
C.Y. Zhang 3316

The Development of Android Mobile Game Based on App Inventor2
L. Wu and J.W. Shen 3319

Research about Automatic Text Summarization Based on Discourse Structure of Chinese
M.N. Zhang and W. Fu 3323

Study on the Impact of Web-Quests as Communication Technology on Electronic Reading
G. Zhang 3327

Software Quality Evaluation for Control System Based on Extension Theory
X.Y. Liu and J. Zhang 3331

The Design and Realization of Remote Data Synchronization Based on Configuration Software
L. Guo 3336

The Research Status and Prospect of Virtual Community in China
Y.F. Liu, T. Yu and Y.J. Yuan 3340

Mixed Integer Programming Models for Two Identical Parallel Machines with a Single Server
Y. Zhan, H.T. Zhu and Y.G. Zhong 3344

The Design of the Online Collaborative Music Production System
B.H. Liu, Y. Li and W.L. Fu 3348

Design and Implementation of System Framework Based on Web
Z.D. Gao 3353

A Design of Data Fusion Management System Based on LabVIEW
J.F. Gao and J.L. Shao 3356

The Research of Data Mining Technology in Customer Relationship Management
T. Song, G.J. Chen and Y.M. Luo 3360

Study on the Application of Computer in the Taxi Intelligent Management System
M. Fan 3364

Extraction of Classification Rules in Databases through Metaheuristic Procedures Based on GRASP
G. Pavanelli, M.T. Arns Steiner, A.R.T. Góes, A.M. Pavanelli and D.M.B. Costa 3369

The Research of Data Privatization Based on Cloud Wisdom Remote Monitoring System
D.D. Yi, H.Q. Ying, X.P. Liu, S. Shen and W. Lv 3376

The Algorithms of Dynamic Servers for Scheduling Aperiodic Real-Time Tasks – A Review
F.X. Zhang 3380

Dental Surgery by Using Object Oriented Designing
L. Sun 3384

Mining Association Rules Algorithm and its Application Based on Key Transactions
Z.X. Wang, G.F. Ma, S.L. Ma, S.Y. Li and Y.S. Cheng 3387

Research on the Content-Based Video Indexing for Smart Grid
M.L. Yan 3391

Multi-User Interactions Using Active Rule
B. Dong 3396

Analysis of Development and Research Trends of Aerospace Engineering Based on CiteSpaceII
J. Lin, G. Bi, P.G. Zhang and L. Mai 3400

Research of Personalized Intelligent Information Retrieval System Based on Agent
Y. Hong 3406

Semantic Retrieval for Ontology-Based Aircraft Fault Knowledge
Y. Zhou, B. Tian, Z.Y. Zeng, Z.Y. Jia and Y. Zhou 3410

Sentiment Information to Vector, a more Automatic Approach for Sentiment Analysis
L. Du, W.R. Xu and P.Y. Liu 3418

A Conceptual Knowledge-Link Model for Supporting Dental Implant Process
A.L. Szejka, O. Canciglieri, M. Rudek and H. Panetto 3424

Agents Software with Ontologies in Expert Systems to Support Dental Prosthesis Design Decisions
D.J. Czelusniak, A.L. Szejka and O. Canciglieri 3430

VRP Problem Research with Workshop Road Constraints Based on Tabu Search
Y.J. Feng, H.P. Zhu and F. He 3438

An Improved RSSI Location Algorithm Suitable for Digital Workshop
Y.F. Leng, H.P. Zhu and F. He 3444

A Brief Review of Trust Evaluation in Networked Manufacturing System
Z.H. Liu and K. Yan 3450

A Method for Multimedia Resources Management and Sharing in Cloud Manufacturing System
Z.H. Liu 3454

Review of Document Structure for Flight Data Analysis Program
L.L. Zheng and D.L. Yao 3458

Research on Collaborative Development System of Electric Network for Small and Medium Enterprise
Y.H. Zhang, W. Wang, D.D. Jin, X.W. Liu and W.T. Lu 3462

Chapter 26: Environmental Protection and Environmental Engineering

The Latest Developments and Applications of Anion Water
H.G. Wei, Q.S. Li, Z.Z. Li, F. Wang and Y. Xiao 3471

Experiment Study of Demulsifier on the Oily Wastewater Treatment
B.J. Liu, J.C. Shi, L.P. Guo and Y.P. Li 3475

***Pantoea agglomerans* an Agent to Remove Residual Copper from Aquaculture Activity**
P. Paulina, G. Corsini, T. Mario and A. González 3479

Biosorption of Cu^{2+} by Anaerobic Granular Sludge
B.R. Yang, D.X. Liu, X. Niu and C. Ding 3483

Environmental Protection Technology of Modern Lead-Acid Battery Production
Y.H. Shu, Z. Cheng and X. Liu 3489

Research on the Mercury Distribution Regularities in Mercury Halo Zone Soil
L.N. Cao 3498

Dynamic Changes of Relative Carrying Capacity of Resources in Dongting Lake
Y.J. Yu and L. Wu 3502

Research on Carrying Capacity of Resources and Problems of Sustainable Development in Hunan Province
Y.J. Yu and L. Wu 3506

Application of PFSC in Seawater Desalination Pretreatment
J. Cheng, S. Cheng and X.F. Cao 3510

Path Design of Municipal Life Waste Recycling System
M. Liu, L. Lei and Y. You 3514

Effects of Sand Dune Stabilization on Plant Diversity of Interdune Lowlands in the Semi-Arid Sand Dune Fieds
S.G. Yan and Q.T. Xu 3518

Study on CO_2 Intensity Reduction Allocation of Construction Industry in East China
Y.H. Mao, J. Shao and Y. Li 3522

The Research of the Influence Condition on the Nitrification Stage of the "SH-A" Craft Processing the Coal Based Needle Coke Wastewater
X.H. Zhu, D.Y. Li, Y.W. Jin, S.C. Wang and M.J. Shan 3527

The Research of the Intelligent Given and Control for the Dissolved Oxygen in the Aeration Process of Sewage Treatment
C. Li, H. Zhang, H.Z. Dai and M.J. Huang 3530

Chapter 27: Advanced Technologies in Area of Education

Independent College Electronic Information Specialty Applied Creative Talents Training Method Research
B. Lin 3537

Coach Evaluation Model Based on the Comprehensive Weights
Y. Tang 3541

Research on Approach to English Writing Instruction Based on CAE
J. Lu, C.X. Zhao and R.H. Xu 3546

The New Engineering Training Method Based on the "Excellence Engineer Education Program"
Y.Z. Chen, S.Y. Zhong, W.F. He and J. Ye 3550

Monitoring System Construction of Autonomous Learning for College English Based on IT
K. Wang and Y. Yang 3554

Research on the College Students' Physique Test Based on Artificial Neural Network and Support Vector Machines Approach
H.S. Liu 3558

A Study of Bilingual Education in Electrical Information Courses Based on Information Technology
K. Wang and Y. Yang 3562

The Cultivation of Multiliteracies in the Context of Multimedia Instruction
Z. Guo 3566

The Analysis of Database Management Curriculum Reform Based on Working Process
M.M. Hua 3570

The Integration of Information Technology in College English Courses
K. Wang and Y. Yang 3573

Strategies of Cultivating Information Literacy for College English Teachers Based upon Information Technology
K. Wang and Y. Yang 3577

Prospect Analysis of IOT Application in Fixed Assets Management of Colleges and Universities
Y. Peng 3581

An Applicable Solution for Setting Up Intelligent Schools by Using Internet of Things Technology
J.C. Chang, Y.J. Li and S.B. Tsai 3585
