

Table of Contents

Preface

Sponsors

I. Advanced Manufacturing Technology and Equipment

Reclamation of Polymer PET Substrate Using T-Form Tool

P.S. Pa 1

Tool Wear Monitoring: An Automated System Based on Multiple Cutting Force Parameters and Machine Vision Technique

Y.T. Liang and Y.C. Chiou 5

The Predictive Model of Surface Roughness and Searching System in Database for Cutting Tool Grinding

Y.C. Wang, C.H. Chen and B.Y. Lee 11

Experimental Study of Tangential-Feed Centerless Grinding Process Performed on Surface Grinder

W.X. Xu, Y.B. Wu, T. Sato, Z. Liang and W.M. Lin 17

Simulation Investigation of Tangential-Feed Centerless Grinding Process Performed on Surface Grinder

W.X. Xu, Y.B. Wu, T. Sato and W.M. Lin 23

Damaged Layer Analysis for AFM-Based Mechanical Modifications on (100) Si Surface

J.W. Park and N.H. Kim 29

A Two-Dimensional Ultrasonically Assisted Grinding Technique for High Efficiency Machining of Sapphire Substrate

Z. Liang, Y.B. Wu, X.B. Wang, Y. Peng, W.X. Xu and W.X. Zhao 35

Analysis of Factors Effecting Profile Accuracy of Metal-Bonded Ball-Headed Diamond Wheel in Electrical Discharge Dressing Process

M.J. Chen, Z. Li, Y.C. Liang and Z. Fang 41

Study on the Machinability of Glass Soda-Lime in Diamond Cutting Process

M. Zhou, P. Jia and M. Li 47

Research on Deliquescent Polishing Fluid for KDP Crystals

S.L. Guo, F.H. Zhang, Y. Zhang and D.R. Luan 53

Axiomatic Design of High Speed Milling Cutter and Fuzzy Object Element Evaluation for Dynamic Cutting Performance

B. Jiang, L. Jiang, M.L. Zheng and J. Zhou 59

Effect of Cutting Speed on Chip Fracture Strain in High Speed Cutting

H.P. Zhang, X.P. Ji, J. Wang and E.L. Liu 65

Influence of Chip Curl on Tool-Chip Contact Length in High Speed Machining

X.F. Bi, G. Sutter, G. List and Y.X. Liu 71

Theoretical Model of Grinding Force in Quick-Point Grinding

J. Qiu, Y.D. Gong, Y.M. Liu and J. Cheng 75

Modeling and Simulation of Control System for Power Magnetic Bearings

Y.J. Ge, W.Y. Zhang and J.Y. Yang 81

High Precision Timing of the Copying Control System Based on Windows 2000

X.H. Lu, Z.Y. Jia, Y.Z. Lv and J.Y. Yang 87

Investigation on Unitary Piezoelectric Four-Component Cutting Dynamometer

G.J. Qu, M. Qian, J. Zhang and Q. Xing 93

Effect of Cutting Parameters on Diamond Tool Life during Cutting Stainless Steel

Z.M. Zhou, Y.L. Zhang, J. Dong and X.Y. Li 99

Calculating of the Temperature Distribution of Primary Shear Zone in Orthogonal High Speed Cutting Based on the Non-Uniform Volume Moving Heat Source

G.H. Li and M.J. Wang 105

A Novel Design of Calibration Equipment for 6-Component Huge Force Sensor and Coupling Modification

J. Zhang, Z.L. Peng, Y.J. Li and M. Qian 111

Tool-Life Optimization in High-Speed Milling of Aeronautical Aluminum Alloy 7050-T7451 Y.Z. Pan, X. Ai, J. Zhao and X.L. Fu	117
Experimental Research on Surface Roughness in High Speed Milling of Complex Surface Mold Steel C.Q. Yan, J. Zhao, Y.E. Li and S.G. Han	123
Design Optimization of Cutting Parameters Using Taguchi Method and ANOVA during High-Speed Machining Hardened H13 Steel S. Zhang and Y.B. Guo	129
Research on Thermal Error Modeling of NC Machine Tool Based on BP Neural Networks Q.J. Guo and X.N. Qi	135
Folding Method and Controlling Tactics of the Tire Building Hub Based on the Parallel Mechanism Z.H. Guo, K.J. Wang and Z.Y. Zou	141
The Study on the Surface Abrasion about Wafer Final Polishing J.K. Won, J.T. Lee and E.S. Lee	147
Study on the AE Signal Based Grinding Contact Detection Method for Thin-Walled Ceramic Materials G.J. Liu, Q.L. Zhang, S.F. Zhu and K.S. Zhang	153
Analysis and Measurement of Effective Flow-Rate in Flood Grinding C.H. Li, Y.L. Hou, Y.C. Ding and B.H. Lu	159
CBN Slipstone Super-Accurate Grinding Theoretical Analysis and Application J.F. Chen, J.H. Cui and F. Li	165
Simulation and Experimental Analysis of the Effect of Channel Width on Flow Field in Laser Cutting X.J. Sheng and J. Hu	171
Effect Mechanism of Nitrogen Gas on Chip Formation in High Speed Cutting of Ti6Al4V Alloy Based on FEM Simulation W. Zhao, N. He and L. Li	177
Surface Residual Stress Gradient Distribution in High Speed Milling of H13 Die Steel Y.E. Li, J. Zhao, C.Q. Yan, W. Wang and S.G. Han	183
Tool Wear and Surface Integrity in High Speed Milling of Forging and Cast TA15 Alloys with Coated Carbide Tools P. Liu, J.H. Xu and Y.C. Fu	189
Finite Element Analysis of Residual Stress in Diamond/Steel Brazed Joint Y. Chen, J.H. Xu, Y.C. Fu, H.H. Su and W.F. Ding	195
The Optimal Model of Tool Paths Generation for Pocket Milling X. Huang and Z.X. Lin	201
Fuzzy Diagnosis of Tapping Process Fault H.L. Xue, L. Wang, X.Y. Chen and G.C. Wang	207
The Effects of Machining Parameters on Measured Temperatures and Energy Partition in Circular Sawing of Granite C.F. Fang and X.P. Xu	213
Effect of SiC Particles on the Machining of Aluminum/SiC Composite G.F. Zhang, Y.Q. Tan, B. Zhang and Z.H. Deng	219
Analysis on Finish Hard Turning of Ti-6.5Al-3.5Mo-1.5Zr-0.3Si Alloy W.W. Ming, M. Chen and B. Rong	225
The Mechanism of Polymer Particles in Silicon Wafer CMP X.F. Xu, H.F. Chen, H.T. Ma, B.X. Ma and W. Peng	231
Motion Model and Numerical Simulation of Fluid and Abrasive Particle in Near Wall Region S.M. Ji, J.L. Xu, L. Zhang, M.S. Jin, Y.H. Yang and Y. Wang	237
Research on Vector Blending Algorithm of Velocity for Acceleration and Deceleration of High Speed Machining K. Ren, H.G. Chen, W.H. Chen and J. Pan	243
Calculation of Heat Distribution in High Speed Cutting Based on Finite Element Method W.Y. Liu, X.K. Liu, J. Li and Y. Zhang	249
High-Speed and High-Accuracy EDM of Micro Holes by Using a 5-DOF Controlled Maglev Local Actuator X. Zhang, Y. Ueyama, T. Shinshi, A. Shimokohbe, T. Sato, H. Miyake and T. Nakagawa	255

Experimental Study of Kerf Machined by Micro-WEDM S.C. Di, X.Y. Chu, D.B. Wei and H. Zhang	261
Simulation of Debris Movement in Micro Electrical Discharge Machining of Deep Holes J. Wang, Y.G. Wang and F.L. Zhao	267
Principle and Simulation Study on Multi Point-Single Point Incremental Combined Forming for Sheet Metal X.J. Li, M.Z. Li, C.G. Liu and Z.Y. Cai	273
Study on Micro Reversible Electrical Discharge Machining Method for the Fabrication of Micro Structures Z.L. Peng, Z.L. Wang, Y.K. Wang, Y.H. Dong and H. Chen	279
A Novel Power Supply for High Speed Drilling Electrical Discharge Machining Base on Pulsed Width Modulated H. Huang, J.C. Bai, Z.S. Lu and Y.F. Guo	285
A Half-Bridge Isopulse Power Supply For WEDM C.J. Li, Y.F. Guo, J.C. Bai and Z.S. Lu	291
Numerical and Experimental Research on Water-Jet Guided Laser Micromachining L.J. Yang, M.L. Wang, Y. Wang, J. Tang and Y.B. Chen	297
Research on Experimentation of Diamond Wire Saw Cutting Compound Pipes Underwater Z. Wang, B. Zhang, L.Q. Wang and D. Xu	303
Surface Topography Characteristic and Statistical Characteristic of 1Cr18Ni9Ti Polished by Electrochemical Polishing G.B. Pang, D. Chen, F. Teng, Z.F. Wei and W.J. Xu	309
Investigation of the Transient Deformation in the Flexible Forming of Laminated Composite Metal Sheets Using Plasma Arc W.Q. Song, W.J. Xu, X.Y. Wang, J.B. Meng and J.S. Jiang	315
Machining Deep Micro Holes by EDM with USM in Inversion Installing B.X. Jia, D.S. Wang and J.Z. Guo	321
Experimental Studies on Dry WEDM in Improving Surface Quality T. Wang, Y.M. Lu, Q. Chen and S.H. Zhou	327
Electrochemical Micro Drilling of Stainless Steel with Tool Electrode Jump Motion Z. Liu, Z.J. Qiu, C. Heng and N.S. Qu	333
A New Variable Feedrate CNC Interpolator for Abrasive Waterjet System W.X. Tang, X.D. Zhang and L. Wang	339
Prediction of the Residual Stress in Grind-Hardening with Thermal-Mechanical-Phase Transformation Stress Coupled Analysis P.Q. Ge, Q. Zhang, L. Zhang and J.H. Zhang	345
Study on Numerical Controlled Electrochemical Turning M. Kang, Y. Yang and X.Q. Fu	351
Experimental Investigation on Metal Coating by Means of ESD Y.Y. Li, Z.N. Guo and G.Y. Liu	357
Influence of Beam Polarizations on Evaporative Laser Cutting Nonmetallic Materials within High Absorptance X.Z. Xie, J.G. Lu, X. Wei and W. Hu	363
Development of Ultra-Short Pulse Power Supply Applicable to Micro-ECM Y.J. Zhang, Y.J. Tang, X.K. Liu, Z.N. Guo and F. Li	369
Fabrication of Customized Bio-Electrode for Neural Stimulation Using Rapid Prototyping Technique G. Qin, Y.C. Ding, Y.X. Liu, R.K. Du and X.P. Qi	375
Automated Fabrication of Complex Shape Metallic Parts Using Mold Decomposed Injection Sculpturing F. Wang, K.Y. Jiang and X.P. Xu	381
Effect of Cutting Parameters on Minimum Quantity Lubrication Machining of High Strength Steel L.T. Yan, S.M. Yuan and Q. Liu	387
Prediction on Residual Stress and Fatigue Life of Magnesium Alloy Treated by Laser Shot Peening S.Q. Jiang, J.Z. Zhou, Y.J. Fan, S. Huang and J.F. Zhao	393
Applied Research of Full Digital Electric Control Systems on Rebuild Machine Tool Y.C. Wu, Z.Y. Zuo and Y. Sun	399

An Algebraic Method for Direct Position Analysis of the General Stewart Platform Manipulator Robot	405
X.G. Huang, G.P. He and Q.Z. Liao	
Study on Thermal Errors of High Speed Motorized Spindle on 5-Axis CNC Machine Tools	411
Z.C. Wang, X.L. Hu and C.H. Zhang	
A New Parallel Kinematic Machine UPS-2RPS and Kinematics Analysis	417
Z.Y. Feng, Z.G. Gao, T.L. Yang and C. Zhang	
Research on Modeling Flow of Volumetric Error for Five-Axis NC Machine Tools	423
W. Sun, H. Ma, C.F. Li and B.C. Wen	
Analysis and Optimal Design for the Static Stiffness of a 2UPS-UPR Parallel Machine Tool	429
L. Zhao, Y.D. Gong and G.Q. Cai	
Research of Quick-Return Mechanisms Using for Automatic Cooking Robot	435
X.R. Lin, B. Li and W. Zhao	
Research on the Influence of Shields to Thermal Equilibrium of CNC Machine Tool	441
Y. Liu, Y. Lu, X.F. Bi and G.Q. Cai	
Dynamic Characteristic Analysis and Validation of Spindle Assembly of NC Machine Tool	447
Y.M. Zhang, S.H. Wang and Y.X. Liu	
Dynamical Sliding Mode Control of Mobile Manipulators	453
H. Mei and Y. Wang	
On the Modeling and Analysis of an Improved CNC Interpolation Algorithm	459
L. Luo, L. Wang and J. Hu	
Sliding Mode Variable Structure Control of a Redundantly Actuated Parallel Robot	465
Y. Li and Y. Wang	
A Study of Topology Optimization Design for the Wafer Handling Robot Arm	471
M. Cong, T.J. Wang and C.S. Zhang	
Tangent Following Control Method of Arc with CNC Cutting Machine Tool	477
Y.W. Zhao, X.B. Tian, X.W. Xu and X.M. Chu	
A Study on the Monitoring Technology of Extra-Large Deep Hole Drilling Using the Tilt Sensor	483
N.H. Kim, I.S. Shin and J.W. Park	
Adaptive Parameter Estimation and Position Control of Induction Motors Based on Passivity Theorem	489
J.Y. Chen and B.Y. Lee	
Analysis of Dynamic for the Main Shaft Systems in XK7132 NC Drill and Milling Machine	495
W.N. Liu, D.W. Gu, L.F. Yang, S.R. Zhang and Y. Li	
Research of Gasoline Engine Ignition Control Based on Neural Network	501
Y.Y. Wang, J.G. Yang and B.Y. Song	
Experiment Research on the Drill Fracture Criterion in Inclined Hole Drilling	505
P. Zhang, X.Y. Guo and D.Y. Zhang	
Application of Wavelet Packet Transform for Detection of Ball Bearing Race Fault	511
D.Y. Wang, W.Z. Zhang, W.P. Lu and J.W. Du	
On the Bifurcation and Stability of Periodic Motion of the Rotor-Bearing System with Rub-Impact and Oil Whirl	517
C.L. Liu, X.L. Zhang, L. Cui, J. Jiang and J.R. Zheng	
Fault Diagnosis Model for Hydraulic Punching Machine	523
J.P. Chen	
Fault Diagnosis of Rolling Bearings Based on LLE_KFDA	529
G.B. Wang, Y.I. Liu and X.Q. Zhao	
Using ASTFT Spectrum to Suppress Cross Terms in WVD and its Application in Fault Diagnosis	535
B.P. Tang, F. Li and W.Y. Liu	
Design and Test of Express Elevator Control System	541
T.D. Liu, Y. Han, H. Su and Y. Wang	
The 3D Reconstruction Technology for the Bone SCT Image	547
W.J. Wang, Z.H. Ge, M. Jiang and C.L. Li	
Fabrication of a RP-Based Biomimetic Grafting Material for Bone Tissue Engineering	553
X. Ma, Y.Y. Hu, X.M. Wu, J. Liu, Z. Xiong, Y.N. Yan, R. Lv and J. Wang	

Study on Realization of Minimally Invasive Dental Implant Based on Techniques of Digital Design and Manufacturing Y.F. Liu, X.H. Shao, X.T. Dong and W. Peng	559
The New Technology of Engineering Ceramic Machining by Electrode Micro-Detonation X.L. Tian, J.F. Yang, C. Liu and A.B. Yu	565
Development of CNC System for Machining of Grooves in Automobile Synchronization Regulators Sleeve D.X. Chen, J. Li and C. Zhao	571
Experimental Study on Modeling of Milling Force of 1Cr18Ni9Ti Stainless Steel Y.C. Li, Y.S. Xu and L.H. Zhang	577
Finite Element Analysis on the Cutting Deformation in Drilling R.D. Han and J. Wu	583
Research on NC Manufacturing of Slender Helical Curved Surface X.W. Sun, H. Cui, K. Wang and B. Wang	589
Application ANSYS CFX in Modeling Turbine Blade L.F. Yang, S.R. Zhang, W.N. Liu, Y. Yang and Y.J. Zhang	593
FEM Analysis of EDM in Gas Based on Birth and Death of Element B.L. Hu, Q.H. Zhang, F. Wang and J.H. Zhang	599
Study on Intelligent Tool Optimal Selection System in Milling X.F. Fang, T.X. Lan, S.W. Zhang, W. Jia and T.Y. Wang	605
A New One-Side Finish Machining Method for Profile of Globoidal Indexing Cam in High Speed X.F. Tang, W. He and Y.S. Liu	611
Experimental Research on the Electrochemical Abrasive Belt Grinding 0Cr17Ni4Cu4Nb Stainless Steel L. Yi, Y. Huang, G.H. Liu and Z. Huang	617
An Adaptive Posture Following and Keeping Fixture Based on Aerostatic Bearing and Universal Ball Joint for Aircraft Digital Assembly R.B. Xiong, Y.L. Ke and P.J. Huang	623
Study on Distributing Principle of Force Density Function for Complex Three-Dimension Groove Milling Insert Y.N. Cheng, Z.J. Li, M.L. Zheng and Y.G. Zhao	629
Research on the Integrated System of Digital Design/Manufacturing/Management in Aeroplane Process Equipments W. Li, C.F. Guo and X.Q. Tang	635
Ontology-Based Knowledge Management for Vehicle Design M. Zhang, Y. Yan, R.H. Wang and J. Hao	639

II. Manufacturing Systems and Automation

A Kind of Information System Planning Model: The Application in an Automobile Manufacturing Enterprise Y.C. Song, Y.J. Wang, J.X. Yin, F. Liu and L.H. Jiang	645
Application of HSS Roll in Hot Strip Mill H.B. Xu, J. Zhang, J.G. Cao, W.M. Huang, Q.S. Liao and P.W. Zhang	651
Study of CNC Machining Auto-Programming Technology Based on Design/Manufacturing Feature W.J. Cao and D.J. Hu	657
A FEM and Experimental Study of Chip Formation in Orthogonal Cutting of Superalloy GH80A J.L. Li, M. Chen and B. Rong	663
An Algorithm for Distance Computing Based on Tri-Mesh X. Wang, Y.S. Lin, D. Wu, D.W. Yang, X.K. Wang and S.D. Gao	669
Automatic Programming and Simulation for NC Machining of Mold Core of Luminaire Reflector with Axisymmetric Uniform-Distributed Reflecting Cells W.Q. Gao, Q.S. Yan, B. Xie, J.B. Lu and H. Jin	675
Checking on the Simulation of the Plane Enveloping Toroidal Worm Q.M. Wen, L.Y. Zhou and Z.W. Liu	681

Research on Logistics & Purchase System in Order-Driven Mode H.M. Wang, T.Y. Wang and X.J. Guo	687
Optimization Research on Dynamic Balance of Spatial Engine under Limiting Shaking Moment Y.Y. Zhu and S.Y. Gao	693
Application of Logistical Balancing Method in Manufacturing and Assembly Line Y. Zhang	699
Solution Space Analysis and Feasible Genetic Algorithm for Assembly Job-Shop Scheduling Problems G.K. Zhao, F.J. Wang, W. Liu and X.H. Lu	705
Design of an Integrated Architecture for Process Enterprise e-Manufacturing D.J. Xue and W.X. Zhang	711
Particle Swarm Optimization Combined with Ant Colony Optimization for the Multiple Traveling Salesman Problem H.K. Feng, J.S. Bao and J. Ye	717
Application of Control Algorithms and Statistical Methods for Work-in-Progress Management in Discrete Production Systems C.F. Guo and C.X. Gu	723
Study on Product Data Management System Oriented to Computer Aided Industrial Design J.Y. Li, J. Zheng and X.F. Jiang	729
A Policy Based Access Control Model of PDM System C.X. Ye and Y.Q. Fu	735
The Application of Process Quality Control Tools in the Production Process L.X. Ma, S.C. Dong and J. Wang	741
Study on Product Service Oriented Enterprise Servitization Methods H.B. Sun, R. Mo and Z.Y. Chang	747
An Input Control Job Release Mechanism for Mould Industry in Environment of Stochastic Production J.J. Liu, Q.X. Chen and N. Mao	753
An Approach for the Design of Cellular Manufacturing Systems Based on Machine Utilization L. Cao, Q.B. Wang and S.G. Li	759
Application of DSP/BIOS to the Design of Virtual Terminal of Tractor Q.M. Cao and Z.L. Zhou	765
A New Adaptive Genetic Algorithm for Job-Shop Scheduling L. Wang, D.B. Tang, W.D. Yuan, M.J. Xu and M. Wan	771
Research on Networked Integrated Manufacturing Based on Heterogeneous Numerical Control Systems J.B. Li, X.Z. Deng, A.J. Xu and H. Zhang	777
Bi-Level Quantum Evolutionary Algorithm for Scheduling of Dynamic Alliance W.L. Wang, S.X. Chen, Y.W. Zhao, J.L. Zhang and H.Y. Wang	783
The Research on Proactive-Reactive Scheduling Framework Based on Real-Time Manufacturing Information L.H. Wu, X. Chen, X.D. Chen and Q.X. Chen	789
Material Damage Ultrasonic Assessment by Time-of-Flight Estimation with an Adaptive Wavelet Filter H.X. Chen and M.J. Zuo	795
Manufacturing Service Integration Architecture for Networked Manufacturing Q. Lei, Q.F. Wang and Y.C. Song	801
The Static Rigidity Analysis of the Position Adjustable Computer Table W.S. Lin and C.F. Hsieh	807
