

Table of Contents

Introduction

Preface

Background to the Topics Concerned in the Present Papers

P.O. Kettunen 1

Significance, Analysis and Potential of Utilization of Extractives from Wood: Different Aspects and Examples

E. Windeisen and G. Wegener 79

Synchrotron Radiation X-Ray Scattering Techniques for Studying the Micro- and Nanostructure of Wood and their Relation to the Mechanical Properties

M. Müller 107

Changes in Nanostructure of Wood Cell Wall during Deformation

M. Peura, S. Andersson, A. Salmi, T. Karppinen, M. Torkkeli, E. Hæggström and R. Serimaa 126

Monotonic Strength Properties of Siberian Yellow Pine

P.O. Kettunen, T. Vuoristo and T. Kaasalainen 137

Chemical Characterization and Comparison of Thermally Treated Beech and Ash Wood

E. Windeisen and G. Wegener 143

Softwood Degradation after Being Several Thousand Years in Shore Front Mud

P.O. Kettunen, H. Kettunen, M. Sarkkinen, P. Henttu and K. Rissa 159

Closing Words 172
