ISBN(softcover): 978-3-03835-078-1 ISBN(eBook): 978-3-03826-459-0

Table of Contents

Preface and Conference Organization

Chapter 1: Signal Processing System Design and Implementation

A Method of Multi-Antenna Signal Time-Delay Alignment Algorithm for Cyclostationary Signals
X.W. Yao, Y.P. Hu, Z.X. Shen and C.Y. Shen 3

Analysis of Ground-Based Navigation Signal Coverage on Performance-Based Navigation
J.H. Zhou and Y. Ni 9

Detection and Analysis of Rats' Bioelectromagnetic Signal
H.L. Cao, F.J. Qin, X.G. Liu and H.M. Zhao 13

Fault Diagnosis of Gearbox in Wind Turbine Based on Wavelet Transform and Support Vector Machine
P.F. Li and J.W. Xiang 18

Research of Multi-Channel Audio Data Acquisition System Based on FPGA and ARM
H. Ren, H.B. Zhang, C.L. Zheng and J. Nan 22

Rolling Bearing Fault Diagnosis Approach Based on PPCA Denoising and Cyclic Bispectrum Method
B.Z. Jiang and J.W. Xiang 26

Study on Some New Properties of *k*-Circulant Matrices
Y. Mei 30

The Signal Separation for MIMO Radar Based on Particle Filter Algorithm
Y.P. Zhu, K. Tang, J.Q. Li and J.L. Chen 34

Simulation of Underwater Target Echo Based on Highlight Model
W. Lin, L.J. Liu and Y. Xu 39

Symbol Rate Estimation Method for Digital Signal Based on Square Timing
W. Wang, X.Y. Zhang, X.Y. Teng and Y.P. Hu 43

Machinery Fault Diagnosis Based on Supervised Locally Linear Embedding
X. Wang and Y. Zheng 49

Chapter 2: Voice, Image and Video Processing

A Fractional-Order Laplacian Operator for Image Edge Detection
D. Tian, J.F. Wu and Y.J. Yang 55

A New Color Fidelity Fast Denoising Algorithm for High-ISO Images
H.C. Kai and X.L. Tian 59

A New Video Denoising Algorithm Based on Adaptive Polyview Fusion
X.F. Geng and Y. Wan 63

A Parallel Stereo Matching Algorithm Core for FPGA Modeled by DSP Builder
X. Zhang and Z.W. Chen 67

A Robust Algorithm for the Inspection of Fastener Head
J.E. Ha 77

A Video Compression Coding Algorithm for Network Content Transmission
X.Y. Wang and J. Zhang 81

An Efficient Shape Recognition Method Using Multiple Description Fusion
Z.X. Xu, Y. Wan and N. Lv 89

Clonal Selection Algorithm Based on Manifold Distance for Image Compression
M.L. Zhao and X.Y. Yin 95

Dot Area Coverage Percentage Measurement Method for Plate Microscopic Image Based on Color Segmentation
J.H. Liu, Y.H. Yi and C. Li 100

Emotional Analysis and Synthesis of Human Voice Based on STRAIGHT
R.R. Chang, X.Q. Yu, Y.Y. Yuan and W.G. Wan 105

Fusion of Polarization Image Based on Curvelet Transform
D.X. Zhang, H.H. Wang and F. Xue 111

Human Face Expression Recognition Based on Feature Fusion
T. Gong and Y.B. Liu 115

Image Defogging Based on Improved Guided Image Filtering
P.F. Shen, J. Yang and Y.Y. Xiong 121

Image Recognition Based on Shape and Texture Features
K. Geng 127

Point Cloud Registration Method Based on Face-Mating after Denosing
T.F. Chen, C.H. Gao and B.W. He 131

Research on False Points Removing of Speech Segmentation
C. Wang, J.F. Zhao and R. Huang 136

Research on Image Saliency Detection Model Based on Calculating the Probability of Objectness Likelihood
C. Ji, H.Y. Liu, J.F. Sun and S. He 141

Research on the Detection and Tracking Method of Ship Intrusion and Remaining
T. An, Z. Yang and Y.Q. Li 148

Study on Image Processing Algorithm for Condom Sorting
Y. Zhu, J.C. Zhao, S. Song and Z.S. Liu 153

Study on Video Transmission System of Central Heating Based on 3G Wireless Network
T.Q. Sun and Y.L. An 157

The Fingerprint Identification Technology is Applied to the Application Research of Web Cloud Storage Safety Certification
G.B. Xie and B.Y. Yao 161

Transformation Equipment Voice Reconstruction Based on Fourier Spectrum of Power-Frequency Multiple
G.Q. Yang, S.S. Lin, H.Y. Li, S.R. Yang and S.H. Cai 168

Two-Phase Image Segmentation with Nonlocal Mean Filter and Kernel Evolutionary Clustering in Local Learning
B. Chen, D.D. Yang, G. Lu and H.X. Feng 172

Vehicle Association and Tracking in Image Sequences Using Feature-Based Similarity Comparison
D.H. Cho, M.N. Ali, S.J. Chun and S.L. Lee 176

Corner and Edge Detection of Image Based on an Annealed Chaotic Competitive Network
X.B. Qin, M. Wang, P. Wang and H.Z. Liang 180

Image Haze Removal Based Dark Channel Prior
B.L. Lin 186

Real-Time Information Processing Method and its Application in Optical Target Tracking System
F.Z. Xie 192

Target Recognition Application of Real-Time Optical Information Processing System
L. Zhao and T. Zeng 197

The Initial Retrieval Based on Image Segmentation
Q.H. Zhan 201

Online Pedestrian Tracking with Kalman Filter and Random Ferns
Z.Q. Qu, D. Tu and J. Lei 205

Acquisition of Point Cloud Data in 3D Reconstruction
M.Q. Zhu and J. Yang 213

3-Dimensional Brain MRI Segmentation Based on Multi-Layer Background Subtraction and Seed Region Growing Algorithm
X.H. Wang, B. Liu and Z.Q. Song 218

Application of an Improved Algorithm for Denoising of Wavelet Threshold in Palmprint Recognition
J.W. Li and S.H. Yang 222

Association Degree Optimization Model and Algorithm for the Reconstruction of Cross-Cut Shredded Paper
H. Wang and D. Luo 226

Extraction Algorithm of Lip Characteristic Parameters Based on Interpolation
Y.J. Meng, L.X. Bai, W.J. Liu and M.W. Liu 235

Multi-Fractal Spectrum and their Applications in Metal Fracture Surface Images Feature Extraction
J. Chen and L. Mao 241

Based on the Hamilton Improved Circle of Scraps Joining Together
C.W. Zhang 245

Study on Network Video Monitoring System for Industrial Field
Z. Wang and M.M. Liu 249

Chapter 3: Sensors, Measurement Techniques and Instruments

A Novel Technique of Error Analysis Based on Test Case Combination
X. Guo 255

Apply Two Methods to Measure Engine Noise Source Identification
C.S. Gu, J.H. Dong and H. Gao 259

Design and Implementation of Energy Efficiency Testing Platform
M. Su, L.H. Su and H.J. Hu 264

Design of On-Line Detection System for Paper Defects Based on Line-Scan Camera
P. He, C. Liu, M. Wang and S.M. Cao 268

Detection Resolution Analysis of Scanning Acoustic Microscopy Used in Electronic Packaging
X.H. Guo, C.G. Xu, L. Yang and K. Peng 272

Development of Automobile Gear Motion Error Detection System
L. Yu, H. Wang and L.Q. Han 276

Integrated Virtual Instrument of Performance Test and Analysis for Fixed Equipments in Coal Mine
M. Li, Q. Niu and Z.P. Li 280

Spring Geometric Parameters of Non-Contact Measurement Based on Binocular Stereo Vision Sensor
Y.L. Zhao 287

The Research of Indoor Positioning Based on Double Wireless Access Points
K.F. Cheng and H. Cai 291

Engine Fault Diagnosis Based on Improved BP Neural Network with Conjugate Gradient
Z.T. Yao and H.X. Pan 296

High Speed Small Target Frequency Multiplication Detection System
Q.Y. Lv, Y.Z. Quan and D.D. Zhang 300

One Point Detection Method of a Rotary Kiln Axis and its Wireless Sensor Receiving System
Z.G. Li and J. Wang 304

Weld Pool and Keyhole Detection Based on Visual Sensors in Plasma Arc Welding
W.J. Ren, X.F. Liu and J.Q. Gao 309

Analytical Model of Wireless Sensor Networks Based on Data Aggregation for Debris Flow Monitoring System
N. Chen, J. Fan, M.M. Xiang and J.S. Qu 314

Design of Signal Processing Circuit under the Principle of EMC of the Piezoelectric Acceleration Sensor
D.H. Li and C. Hao 320

A Practical Method of Observer Velocity Optimization with Airborne ESM Sensor
H.W. Quan, W.B. Li and D.L. Peng 325

Formation Track Association Algorithm in the Presence of Sensor Bias Based on Double Fuzzy Topology
K. Dong, H.P. Wang and Y. Liu 329

Tire Pressure Monitoring System and Wireless Passive Surface Acoustic Wave Sensor
W.N. Wang and Q. Fan 333

Extrinsic Calibration of Camera and Rotating LIDAR Using Two Planes
D.W. Kim and J.E. Ha 338

Effects of Grating Slant Angle on Surface Plasmon Resonance and its Applications for Sensors
X.H. Xiong, L.M. Zhan and X. Ke 342

A Temperature Transmitter with Autonomous Reconfiguring Function
Z. Yang, Y.X. Zhao, J. Liu and X.J. Wu 346

Research on Radial Basis Function Network Application in Steel Truss Girder Bridge Damage Identification
Z.H. Wang 352

Design of Frequency and Amplitude of Sine Wave Measurement Circuit Based on MSP430
S.G. Sui, J.Y. Xu and J.X. Zhang 356

Adjustable Frequency and Amplitude Wave Generator
S.G. Sui, T. Wang and S.Y. Lu 360

Low-Latency MAC (LL-MAC) Protocol for a Multi-Hop Wireless Sensor Networks
S.C. Kim 364

Chapter 4: Data Mining and Data Processing

Computer Forensics Based on Data Mining
G.Z. Zhang 371

Data Mining Research Based on Analysis of the Chinese-Foreign Cooperation in Running Schools
J.Z. Zhu, C.S. Yuan, P. Guo and U. Placide 376

Optimization of Lymphoma Classification Using Dimensional Reduction
G.R. Weng and F. Yin 382

The Driving Mechanism of Virtual Human's Action and Facial Expression Based on OSG
K.K. Xie, Y.C. Shen and L.N. Ma 386

A Method for Large Scale Ontology Partitioning and Block Matching Based on ROCK Clustering
R. Li and L. Liu 390

An Improved Binary Relevance Algorithm for Multi-Label Classification
T. Guo and G.Y. Li 394

Application of Cluster Analysis to Classify the Ports of Bohai Ring Area
F.R. Zhang, L.L. Qu, X. Xu and Q.S. Xiao 399

Improved Backtracking-Forward Algorithm for Maximum Matching Chinese Word Segmentation
H. Li and P.H. Chen 403

Chapter 5: Artificial Intelligence and Algorithms of Optimization

A New Conflict Resolution Method in Fuzzy Reasoning
H.R. Sun and K.X. Yin 409

Air-Combat Decision Modeling Method Based on DSM
L. He, J. Yao and Y.L. Lei 416

Fire Seat Intelligent Identification System
J.H. Zheng and B. Li 421

Intuitionistic Fuzzy Multiple Attribute Decision Making Method Based on Closeness Degree
M. Li 426

Spectrum Prediction for Cognitive Radio System Based on Optimally Pruned Extreme Learning Machine
L. Yang, N. Lv and Z.X. Xu 430

Research of Early-Warning Expert System for Security of Grain Storage Based on Uncertain Inference
Y.Q. Xiang, Q.H. Zhang, P. Han and M.Y. Chen 437

A Method of Fast Weighted Evidence Combination Exhibited by Compound Conflict
D.Y. Bai, J. Han, J. Wang and S. Li 443

Feature Extraction for Kernel Minimum Squared Error by Sparsity Shrinkage
J. Jiang, X. Chen and H.T. Gan 450

Intelligent Maintenance System Integrating Support Vector Machine, Isometric Mapping, Genetic Algorithm and RFID Technology
Z.X. Yang and C. Lei 454

Research of In-Car Navigation Based on Improved Ant Colony Algorithm
F. Ding and S.Z. Wu 461

The Application of Immune Genetic Algorithm in Parallel Sorting
B.Q. Xu 466

Forecast of Short-Term Wind Power Based on GA Optimized Elman Neural Network
Y. Chen 470

Knowledge-Base Constrained Optimization Evolutionary Algorithm and its Applications
W. Long 476

The Research of the Optimization Model of Flight Scheduling Based on Filtered Beam Search
Y.L. Lian, X.S. Jiang and T.R. Xie 481

Chapter 6: Information Technology and Computer Applications

A Flexible Authentication Scheme with Supporting Multiple Granularity of Data Integrity
L. Chen and X.Y. Yi 489

A Method of Heterogeneous Data Integration Based on SOA
W.M. Shuai and X.F. Fu 494

A Novel Change-Point Detection Approach for Monitoring High-Dimensional Traffics in Distributed Systems
L. Zhao, Q. Liu, P. Du, G. Fu and W. Cao 499

A Query Optimization Technology Based on Data Partition
J.Q. Dai 512

A Web Text De-Noising Algorithm Based on Machine Learning
X.Y. Le 516

An Approach to the Mining of User Focused Frequent Itemsets Based on Attention
J. Liu, Z.Y. Zhang, H.M. Cheng and Q.S. Fang 520

Information Management of Car Oil Consumption on Mobile with Android OS
L.J. Chen, C. Yin, J. Qian, Q. Xu, Y.Y. Yan and Q.Y. Zhu 524

Research on Key Technology and Algorithm of Open Government Data
Z.J. Wang, X.B. Dai, Y. Zhang, D.N. Jia and Z.Q. Wei 529

Software Design for High-Speed Data Capture
W.F. Zhang 536

Study on Distributed Database Query Optimization
F. Li and H.Y. Wang 540

Study on the Management System Model and Key Technology of Government Information Resources Based on Value Chain
Z.J. Wang, X.B. Dai, Y. Zhang, D.N. Jia and Z.Q. Wei 545

Design of an Intelligent Home System Based on Linux and Qt
B.Q. Xu 554

A Method of Detecting Hardware Trojans Based on Side-Channel Analysis
W.F. Feng, L. Li and Z. Li 558

A Research on Active Storage Task Allocation Strategy Based on MMC
X. Wei, Z.Y. Wang and M.H. Jiang 562

A Review of Hierarchical Fixed Priority Scheduling
F.X. Zhang 566

Approaches of Ontological Property Mapping Based on Multi-Strategy
R. Li and L. Liu 570

Application of Excel VBA in Score Analysis for Specialty Accreditation
D.L. Wang and J.H. Shen 574

Authorship Identification of Chinese E-Mail Based on Form Features for Computer Forensic
S.H. Chang, G.F. Teng and J.B. Ma 578

Big Data Based Design of Food Safety Cloud Platform
K. Chen, H. Tan, J. Gao and Y. Lu 583

Construction of Network Coverage Information System for CMMB
X.G. Wang, M. Yan and J.F. Li 588

Design and Implementation for the Web of Origami Simulator
H.H. Yang, S.K. Yin and P.Y. Chen 593

Design and Implementation of Web-Based E-Learning Platform
Y. Nan 599

Design on Experience Virtual Tour System
Y.M. Liu, Y.D. Dong and J. Wu 603

Feasibility Study on the Method of Java Combined with OSG
Y.L. Tang and H. Du 607

How to Design E-Government Information Resources Sharing Cloud Service Centers in China
B.F. Liu, H.H. Zhong, T. Tao and Y.H. Hu 611

How to Design the Cloud Computing Used in E-Government's Information Security
B.F. Liu, H.H. Zhong and M. Wang 616

How to Design the E-Government 2.0 Used in Chinese Grassroots Public Service
T. Tao, B.F. Liu and Q. Xiao 620

Multi-Strategy Web Service Discovery for Smart Government
Y.Y. Du and X. Qin 625

Networked Production Management System for Outsourcing Based on Virtual Workshop Section
S. Yin, Z.Y. Yang and M. Yang 632

On the Application of the Cloud Technology to Technical System of the Digitalized College Campus
M.L. Cheng and Z.H. Sun 637

On the Informationization Construction of College Archives Management
L.H. Huang and B. Gui 643

Relational Database Architecture Refine Based on the Storage Space Estimate
L. Yue 647

Reliability Evaluation System and its Application of Internet of Things
X.M. Li and C. Chen 653

Research and Design of Culture Compound Based on Android Platform
Y.X. Zhang, L.W. Meng and Y.C. Liu 657

Research on Adaptive Strategy of Web Services
Z.P. Lei, H.P. Qiu, Y.N. WU and Z.C. YANG 662

Research on Software System Framework Based on Software Reused Technology
J.P. Ren and C.F. Dang 668

Software Product Line Measurement Process Capability Maturity Model
J.J. Ding 673

Virtual Machine Migration Based on Trust Measurement of Computer Node
Z.H. Liang, Z.Q. Liang, Y.M. Tan and X.C. Lv 678

RETRACTED: Towards the Study of Internet Qos that would Make Exploring Smalltalk a Real Possibility
X.Q. Xu 683

A Novel Scheme for Deleting Group Members
X.S. Li, J.P. Yao and Y. Zhan 689

Research on Mechanism of PKI Trust Model
Q.H. Bai, Y. Zheng, L.N. Zhao, H. Chun and C.Y. Cheng 694

Design and Implementation the Wisdom Classroom Based on Short Board of the Teachers and Students
N.H. Cheng, X.H. Lin and Y.H. Ni 698

Temperature-Aware Scheduling Algorithm for Multi-Core System
Q. Zhang, Y.L. Ruan and F. Gao 703

Chapter 7: Communication Technology and Devices

Design of Communication Module Based on GPS/GPRS
M.J. Ge, P. Jiang, W. Shen and Y. Yuan 711

Routing Protocol Security Strategies of Non-Uniform Energy Distribution Wireless Network
T. Zeng 715

Efficient Space-Time Two Dimensional RAKE Receiver in Asynchronous Cooperative Communications Systems with Full Diversity
D.W. Li, C.X. Pei and Y.L. Meng 719

Research and Design on China Mobile Multimedia Broadcasting Network Planning
M. Yan, X.G. Wang and J.F. Li 726

Design and Application of Task Scheduling Module Based on Priority Table Query in Wireless Sensor Network Node
K.H. Duan, L.T. Zhang, L. Ma and H.X. Zhang 731

The Simulation and Analysis of the Improved Algorithm about LEACH Protocol for Wireless Sensor Network
F. Ding, N. Feng and S.Z. Wu 735

Reconfigurable Publish/Subscribe Middleware for Wireless Sensor Networks
B. Dong 740

Energy Consumption Balance LEACH Routing Protocol for Wireless Sensor Networks
Z.M. Li 744

Low Cost AHRS Aids GPS Attitude Navigation System
T.Y. Gao and H.L. Ge 748

A Topology Identification Algorithm Based on End-to-End Measurement in Wireless Sensor Networks
W.L. Ji and X.L. Wang 756

The Overlay Deployment Model under Interference Based on Marginal Fitting
Y.X. Lin 760

Error Correction of Coding of Wireless Transmission Channel of Digital Images
M.K. Yue and J.H. Deng 771

AIS Development in Recent Years and Message Decoding
C. Xu and L.L. Kong 776

A Dynamic Adjustment Algorithm of Slow-Start Threshold Based on RTT
L. Niu, F. Wang, D.D. Liu and B. Guo 782

Research on Communication Circuit Applied in Street Lamp Control System
B. Yuan, W.B. Lu and K.Y. Xu 786

Chapter 8: Transportation Infrastructure and Intelligent Traffic Control

A New Robust Adaptive Backstepping for Ship Course-Keeping Control
H.D. Wang, Q.R. Wang, L. Yan and X.Z. Wu 793

A New Solution of Highway Automotive Collision Avoidance
W. Jiang, Y.Y. Li, W. Long and G.T. Yang 798

Parking Navigation System Based on the Double Signal Double Display Intersection Vehicle Terminal and Automobile Internal Information
J.Z. Xi and C.C. Han 803

Semi-Supervised Machine Learning Algorithms for Classifying the Imbalanced Protocol Flows
L.L. Li, X.Y. Zhang, X. Zhang and Q. Li 809

Research on Evaluation of Urban Road Congestion
Y.D. Gao 815

Research on Methods for Urban Rail Transit Train Operation Regulation
C. Cai 820

A Portable Integrated Ship Monitoring Command System
M. Liu and H. Zhang 824

The Analysis and Advanced Development of Traffic Flow Information Acquisition Technology in ITS
C.C. Liu, Y.P. Liang and X.L. Zhang 828

Research on Path Planning Algorithm in Intelligent Transportation
J.P. Tang and L.L. Li 833

Railway Freight Turnover Forecast Based on the BP Neural Network
J. Sun and C. Wei 837

Research on Special Vehicle Road Navigation Algorithm
J.P. Tang and L.L. Li 841

Route Optimization of DGT Based on Improved Genetic Algorithm
T.J. Zhang, Y. Cao and X.W. Mu 845

Research on Evaluation of Urban Road Congestion
Y.D. Gao 849

Quantitative Safety Assessment Based on Risk in Level-Crossing between Railway and Highway
X.H. Liu, M. Han, X.H. Lin and N.P. Yang 854

Chapter 9: Mathematical Modeling and Computational Experiment

Analysis of a Eco-Epidemiological Model with Disease in the Predator
Y.P. Zhang, M.J. Ma, P. Zuo and X. Liang 861

Multi-Factor Model Simulation on Dynamics of Population Movements
Z.H. Du, J.F. Du and X.J. He 865

On the Approximately Denjoy Integrals of Fuzzy-Valued Functions
Y.B. Shao and X.H. Cai 869

Some New Impulsive Integral Inequalities
B.J. Sun 876

Modeling in Respiratory Movement Using LabVIEW and Simulink
L.Y. Su 880

Chapter 9: Mathematical Modeling and Computational Experiment

Reflection and Absorption of the Medium with Gradient Change of Impedance
Y. Sun and B. Hu 887

Study on Simulation Framework of Army Equipment System of Systems Based on High-Performance Parallel Computing
J.X. Hao and Z.Q. Zhao 892

Study on Virtual Liver Surgery Simulation System with Real-Time Haptic Feedback
Y.H. Fang, B. Wu and Z.Y. Yang 900

On the Mean Value of Euler Function in a Special Set
L. Qi 907

Constructing Von Karman Random Media Model with Power Spectrum Method
N. Yang and X. Qian 911

Chapter 10: Robotics and Mechatronics

A Distributed Multi-Robot Map Fusion Algorithm
L. Zhang, P.Y. Shen, J. Song, L.B. Dong, Y.Z. Zhang, X.X. Zhang and J.Q. Zhang 917

Analysis on Oscillating Tail to Rolling Stability of Water-Running Robots
H.G. Kim, D.G. Lee, K.M. Jeong and T.W. Seo 925

Cooperative Obstacle Avoidance of Multiple Robotic Fishes Based on Grids Method
Y.L. Jiang 929

Design on the Distributed Controller of Underwater Profile Monitoring Vehicle
J. Yuan, Z.H. Zhou, J. Xu, G.H. Jin, H. Zang and J.X. Li 934

Kinematics Performance Comparison of a Family of 3-RPS Parallel Mechanisms Affected by Limb Arrangement
B. Li, S.Y. Wang, L. Liu and X.H. Zhao 939

One New Kind of Worming Pipe Robot
F.P. Xu, Y. Zhou and Z.C. Zhao 944

Quantitative Analysis on Workspace Influence of Robot Structural Parameters
J.Q. Li, W. Ren and S.X. Zhu 949

Robust Adaptive Observer for Single-Linked Robotic Arm Systems
Q. Yang and Y.S. Liu 953

Space Trajectory On-Line Interpolation Technique of Six-DOF Robot
X.Y. Ou, X.Z. Hou, K. Zheng, X. Du and J. Ji 959

Statics Analysis of 6-DOF Parallel Robot Based on Screw Theory
X.H. Zeng, J. Chen and L.K. Peng 965

Study on Path Planning Method for Mobile Robot Based on Fruit Fly Optimization Algorithm
T. Jiang and J.Z. Wang 970

Study on the Coordinated Control Mechanism of Orchestic Robotic Vehicle Based on Educational Robot
G.P. Lu, Q.H. Wang and S.B. Liu 974

Target Tracking for Robot-Fishes Based on Unscented Kalman Filter
P.F. Bai, Y.L. Jiang and R.F. Lei 979

The Analysis of PPP-δ Robot Workspace Based on Boundary Search Method
J. Zhang, Z.D. Shan and Y.X. Ren 984

The Research of Application Mode of Unmanned Aircraft Patrol in UHV Transmission Lines
Y. Li, X. Ge and X.L. Hou 989

The Research on Visual Navigation of AGV in Outdoor Environment
B.X. Wang, B. Song, S.A. Wang and D.H. Yu 993

The Study and Implementation of the Anti-Doppler Technology of AUV Communication System
J.G. Dong, D.J. Sun and W.W. Fan 999

Design of Compliant Mechanism Based on the Parallel Mechanism Decoupling Criterion
H. Xu, L.B. Hang, J. Cai, Z.Y. Fu, P.J. Zhang and W.S. Cheng 1005

The Design of Industrial Robot Sorting and Pallet System
D. Du, J.Y. Zhao, J.Y. Lu, C.S. Wang and F.C. Yu 1009

Trajectory Planning and Realizing of an Exoskeleton Device for Hand Rehabilitation Based on sEMG Control
Q.Y. Meng, S.L. Tan, H.L. Yu, Q.L. Meng and Y.F. Fang 1015

Based on Eddy Current Testing of Automotive Wheel Crack Detection Platform Design
J. Lv 1021

An Improved Online SVM Algorithm for Overcoming the Influence of Muscle Fatigue in sEMG Based Human Machine Interaction
J. Cai and R. Liu 1026

Steer-by-Wire Force Feedback System Based on Magnetorheological Fluid Damper
L.Y. Hu, Z.H. Yu, D. Zheng and J.M. Zhan 1032

Equipment Servo System Signal Acquisition Module Design Based on Embedded
J.T. Chen, S.Y. Sun and X.S. Duan 1037

A Dual-Core Operating System Framework Based on AutoSAR OS for HCS12X Series Processor
J.C. Jiang, B. He, P.H. Li and K.L. Wang 1041

Optimal Design for Stator of a New Linear Ultrasonic Motor
S.P. Sun and Z. Hu 1047

A Geometry Based Algorithm for Swarm Aggregations
X. Li, M.F. Ercan and H.C. Chen 1052

A Research on Anti-Slip Regulation of In-Wheel Motor Driven Electric Vehicle
M.H. Huang and Y.C. Zhao 1059

Analyses of Relations between Pavement Adhesion Coefficient and Regenerative Braking in Hybrid Electric Vehicles
J.L. Liu, J.M. Zhang and M.Z. Xue 1065

Co-Simulation Study of Synchronous Control Technology for Independent Electric Drive Vehicle
H. Zhong, W. Zhao and Y. Sun 1069

Development of Hybrid Control Unit Hardware for Hybrid Electric Vehicle
Z.N. Tang, H.W. Zhang, Z.G. Kong and W. Wang 1078

The Affect to Output Torque of Brushless DC Motor Parameters
W.B. Xie, B. Li and Z. Li 1083

A Sliding Mode Controller of Quadrotor Based on Unit Quaternion
Y.Y. Lv, W. Huang, J. Liu and Z.F. Peng 1087

Application of Fuzzy Control in Linear Motor XY Platform
Y.G. Chen, Q.S. Yan and H.J. Gong 1093

Research on the Enhancement of Space-Tracking Ships' Orbit Determination Accuracy in Manned Space Engineering
H.F. Li, G.H. Xue, J.S. Mu, X.C. Xu and S. Hao 1097

Study on Residual Current Monitoring System for Detection
J.X. Diao and H.D. Hu 1101

A Control System Design of Underwater Robot for Detecting Underwater Structures
J. Zhou, C. Huang, B. Liu and T.T. Wang 1105

AC-DC-AC Frequency Control System Simulation Analysis
H.J. Ni 1110

Design of RIA-Based Remote Monitoring and Management System for CNC Equipments
J.Y. Wang and Q.J. Zhang 1114

Shipboard Radar Servo System PID Parameters Turning Based on Simulink
Q.Q. Ding, M. Tao and X.R. Wang 1121

A Targeting System in Lifesaving Equipment
D.J. Hu, H.M. Shi and L.S. Liu 1125

Chapter 11: Control Technology and Automation

A Demonstrated System of Earthquake Emergency Auto-Handling Applied in Water Supply
X.X. Liu, J.H. Fu and Z.T. Li 1131

Application of Multi-Mode Intelligent Control System in Grate Cooler Optimization
X.M. Li, X.H. Wang and H.L. Yu 1137

Attitude Decoupling Controller Design of Dual-Ducted SUAV Based on ADRC System
T.Y. Gao, D.D. Wang, T. Fei and H.L. Ge 1143

Automatic Control Technology of Ironing Goose Feathers
P. Jiang, J.J. Gu and G.R. Zhou 1149

Controlled Synchronization of Time-Delayed System
Z.Q. Dong, Y.C. Liu, D. Lin and Y.J. Yang 1153

Design of On-Off Control System for Electric Equipment Based on WiFi
Z.K. Wu and T. Zeng 1157

Design of Virtual Experiment Bench for Super Electronic-Controlled Engine
W.Z. Gong 1161

Design on Electrostatic Precipitator Control System
Y. Liu, S.Q. Wei, X.X. Gu, S.L. Zhao and B.Y. Wang 1166

Output Feedback Control for a Class of Switched Fuzzy Systems
H. Yang, H.H. Lü and L. Zhang 1170

Overview of Repetitive Control System
J. He, G.Y. Luo and J.Q. Chen 1174

Pulsed Driver Control System for High-Power LED
X.G. Fan, Z.B. Hu, Y.J. Xu, X.F. Wang, X. Wang and Y. Zuo 1178

Research on State Feedback Controller of the Networked Control System with Long Delay
J.Q. Deng and C. Hao 1183

Stability of a Class of Discrete-Time Switched Fuzzy Systems by Arbitrary Switching
H. Yang, H.H. Lü and L. Zhang 1187

Study on Auto Control System of No Decoupling Dynamic Compaction Machine
F. Yang and L. Zhao 1191

Study on Smart Object-Based Control Model for Cyber-Physical Systems
Y.M. Yin and C.L. Gao 1195

The Control of the Descent Submersible in the Confused Sea Environment
T.A. Ezangina and S.A. Gayvoronskiy 1200

The Control System for Metal Forming Based on Computer Aided Design
Z. Wang and M.M. Liu 1207

The Research of Field-Control Layer of Distributed Pipe Welding Control System
S. He, H. Fu, T.Y. Chen and W. Wang 1211

Application of Computer Network Technology to Control the Coal Quality
Y. Chen, L.F. Niu and G.B. Ren 1215

Control of Bidirectional AC-DC Converters for DC Microgrid Application
Y.S. Xiong and S.X. Ma 1219

Remote On-Line Automatic Monitoring System of Reservoir's Water Regimen Based on WSN and GPRS Network
W. Li, P. Pan, L.S. Tan and X.K. Luo 1223

Intelligent Dispatching Operation System of Power Network
S.F. Chen, M. Tao and D. Lin 1231

Tracking Control System Design Based on Adaptive Neural Network
L. Cheng 1236

Design of Speed Loop in Feed System Based on Fuzzy-PI Dual-Mode Control
M.D. Duan, B.L. Wei, Y.W. You and Y.P. Wang 1240

Getting the Mathematical Models of Automatic Control Systems with Non-Uniform Sampling Period
V. Goncharov, A. Liepinsh and V. Onufriev 1244

An Asynchronous Differential Measurement Method for Time-Varying Network Induced Delay
J. Liu, W. Huang, Y.Y. Lv and Z.F. Peng 1251

Active Power Control Strategy with Auxiliary Frequency Regulation Function of Wind Farms
G.Q. Liu and L.N. Wu 1257

Adaptive Control System of Coated Seed Dryer
Y.W. Yuan, Z. Sun, S.J. Li, X. Dong, J.N. Zhang and L.M. Zhou 1261

H_∞ Filtering for Networked Control Systems with Limited Communication Capacity
J.G. Dai 1267

Genetic Algorithm Based Fuzzy Logic Controller for Wire-EDM Machine
C. Pan and R.Q. Chen 1273

Design of Automatic Control Pipe Bender
Y.X. Shan 1277

Design of the Integrated and Remote Control Information System for Multi-Wind Power Plants
W.Z. Wang, Y. Xue and B. Jiao 1284

Chapter 12: Machines and Mechanisms

A Comparison of Analysis Flywheel Stress Distributions Based on Different Material
H.L. Chen, C.S. Zhu and P. Ye 1291

Analysis of a Novel Traverse Mechanism Driven by Non-Circular Gears with Fourier Pitch-Line Applied on Silk Reeling Machine
J.N. Chen, J.J. Yan, L. Sun and M. Zhou 1295

Analysis of Large Disturbance Dynamic Stability Process
X. Gao, J. Meng, Y.Q. Li, Y. Wang and W.C. Zhang 1301

Application of Axiomatic Design Theory in Multi-Planetary Gear Transmission Design
K.L. Mao 1306

Design of Vane Wheel Climbing Stairs Smoothly Based on Transformation of Circular Arc to Similar Archimedes Helix
T.Y. Zhang, H.L. Pang and J. Wei 1310

Dynamic Optimization Design of Sand Milling Collection Machinery Suspensions
H. Hu, X. Feng, S. Qiu, D. Yang, Z.K. Chen and X.L. Wang 1314

Dynamics of a Radial Active Magnetic Bearing System during Maneuvering Flight
K. Zheng 1321

Modal Testing for Heavy Machine Tool Using Active Excitation
B. Luo, B. Li, X.Y. Mao and H. Cai 1326

Optimization and Matching of Mini Passenger Car Suspension Parameters Based on DOE
J.H. Dong and C.S. Gu 1333

Optimum Design of the Catching-Mechanism Based on the Finite Element Method
M.J. Yan and Y. Zhang 1338

Research on Path of Contact Wheel for Ruled Blade Grinding
D.Q. Li, L. Zhang, W.D. Ye and H.Y. Zu 1343

Research on Topology Optimization of Mine Hoist Spindle Device
L. Qiu 1347

Study on Knee Movement Mechanical Simulation in Basketball Shooting
J.Q. Liu 1351

Rotations of 4nπ Research and no Twisted Mechanism Example Analysis Based on the Theory of Braid Group
Z.Y. Fu, L.B. Hang, H. Xu, J. Cai, H.Q. Bian and J.R. Lu 1355

Energy Consumption Model of the Force Application Hydraulic System for Friction Welding Machine
Z.Q. Yang and S.G. Du 1361

Modeling of Fixed Joints Stiffness Based on Modified Least-Square
M.D. Duan, H.L. Feng, K.H. Liu and J.Y. Lu 1365

A Review of Aeration and Cavitation Phenomena in the Hydraulic Shock Absorber
F. Luo and X.L. Zhang 1369

Design of Variable Cylinders Internal Combustion Engine with Energy Recovery Systems
S.L. Tang 1374

Experiment and Research of Bumper with Double Layer Inflating Safe Cushion
Q. Fang, F.Q. Yang, M. Meng and Z.W. Wang 1378

The Energy Saving Pumping Unit System Design and Analysis
H.J. Meng and Z.L. Wang 1384

The Design of the Automatic Packing Machine for Syringe
D. Du 1390

Thermal Analysis of a Satellite Borne Instrument
B. Chen and N. Li 1397

The View Analysis of Automotive Rearview Mirrors
Y.W. Yu and Y.M. Deng 1401

Chapter 13: Materials and Processing Technologies

A Novel Method for Silicon-Beam Fabrication in Wet Etching
X.Y. Su, Z.S. Jing, Z.Y. Cheng, Z.L. Zhou and B.J. Zhu 1407

Characterization and Activation of Pyrolytic Cooking Oil Tar from Fast Pyrolysis
Z.W. Xie 1411

Diffusion and Oxidation Wear of Superhard Cutting Tool Based on Thermodynamics Solubility
F. Shao, Y.T. Wang, L.J. Zou, Y.Y. Wu and C. He 1417

Extraction of Gasoline Residues Using a Adsorption Tube
S.J. Liu, L.L. Yu, W. Gao and B. Wang 1421

Improved Efficiency in Organic Light Emitting Device Based on 4,4-bis(2,2-diphenylvinyl)-1,1-biphenyl as Hole Blocking Layer
H.S. Yang, L.S. Wu and Z.Y. Huang 1426

Molecular Dynamics Study on the Impact of the Cutting Depth to the Titanium Nanometric Cutting
Y. Zhu, Y.C. Zhang, S.H. Qi and Z. Xiang 1431

Numerical Simulation of Crack Development in Reinforced Concrete Beam with Different Shear Span Ratios
J.X. Zhang, Z.H. Chen, X.Z. Guo, C.A. Tang and Z.Z. Liang 1435

Optimization Design of LED Display Front Shell Injection Mold on Moldflow
L.L. Dong, R.R. Xin and H.M. Zhang 1439

Polymerization and Characterization of N-[o-(4-phenyl-4,5-dihydro-1,3-oxazol-2-yl)phenyl] Methacrylamide
Z. Fu, L.H. Chen, S.J. Li and C. Yuan 1443

Research on Aviation Aluminum Alloy Technology CAPP System Based on the Part Similarity
G.W. Lan, Y. Zhuo, J.F. Chen and H.X. Zhan 1447

Research on Corner Control Strategy of the WEDM
Q.H. Huang 1452

Study on Relationship between Carbon Black and Dielectric Properties of Tire Rubber in UHF Band
T.Q. Song, Y. Zhou and L.X. Ma 1456

Study on the Slab Rolling Force Based on Thermal-Mechanical Coupling Analysis
Z.W. Dong, X.H. Wan, Z.P. Huang and S.Y. Liu 1460

The Influence of the Performance to the Blue Organic Electroluminescent Device with Excton Confining Layer TPBi
L.S. Wu, X.Y. Huang and H.S. Yang 1464

The Simulation of Slab Rolling Process Based on FEM Analysis
X.H. Wan, Z.W. Dong, S.Y. Liu and Y.H. Wang 1469

Controlled Synthesis of β-FeOOH Nanorods via a Facile Hydrothermal Route
P.H. Ning, Y.G. Wei, H. Wang and K.Z. Li 1473

Preparation and Characterization of the Al/AlN-Al_2O_3 Composite Thermal Energy Storage with Phase Change Materials
D.D. Wu, H. Wang, Y.G. Wei and K.Z. Li 1477

Search of Phononic Crystal Band-Gap about the Array of 2D Square Tube with Slits
L.G. Li and Y.G. Chen 1481

Chapter 14: Power Engineering and Power Devices

Analysis of Push-Pull DC/DC Converter by Poincare Mapping Graph
Z.L. Shao 1489

Design of a High Voltage Switching Power Supply with Soft Switching Technology
Z.L. Shao 1493

Study on Dynamical Behaviors Mechanism of Sine Voltage Compensation in Buck Converters
F.Y. Zhang, W. Hu, X.L. Long and X.B. Chen 1497

Experimental Study on Large Turbine HP-Valve's Excitation Fault Caused by Steam's Unsteady Flow and its Economic Solution
J. Wan, J.S. Gu, G.R. Ren, Q. Guo, Z.H. Li and J.F. Liu 1501

Reactive Power Compensation Method of HVDC Commutation Failure
X.M. Wang, Q. Zhang and B. Qian 1510

Research and Design of Online Measuring Temperature Device for Switch Contacts of Switch Cabinet
Q. Ye, D.G. Ji, T.W. Yan, J.N. Shan and Y.P. Wang 1514

Research on Coordination Tuning of V/Hz Limit and Over-Excitation Protection of a Generator
G.L. Liu and W. Song 1518

Research on Electrical Characteristics of a Novel Balance Transformer with Asymmetrical Winding
Y.S. Li, Y.F. Sheng, K.Y. Zhang and B. Fan 1523

Simulation and Research of Dynamic Voltage Detection and Regulator Based on MATLAB
Y.F. Li and Z.W. Zheng 1527

Simulation of Grid Low Frequency Oscillation Based on MATLAB
X.K. Gou, B. Qian and R.Q. Bai 1532

The Design of Marine 24 V DC Uninterruptible Power Supply
J. Xiao 1537

Analysis of Low Frequency Oscillation in Interconnected Power System under Hedge Operation Mode
X. Gao, J. Meng, Y.Q. Li, Y. Wang and W.C. Zhang 1542

Analysis of Electromagnetic Interference in Rectifier and Inverter System
Q.Q. Ding, M. Tao and Y.X. Jia 1547

A Hybrid Technique for Harmonics and Interharmonics Estimation in Power System
J.P. Xiao, Y.G. He, F.M. Deng and K.H. Wu 1551

Analysis and Countermeasure Study of Photovoltaic System Fault Based on Fault Tree and HAZOP
Y. Wang, F.Y. Guo and M.D. Huang 1557

Robust High-Gain Observer Approach to State of Charge for Lithium-Ion Batteries of Automated Guided Vehicles
S.H. Yu, C.H. Hyun and H.S. Kang 1562

Research and Application for Gap-Type Conductor Tension Stringing Machines
Z. Chen, K. Bai and J. Wang 1566

Reliability Evaluation of Distribution Networks Including Micro-Grid Considering Time-Varying Failure Rate
J.P. Zou, B.D. Zhang, X.Z. Ling, J. Deng, D. He, Q. Zhang and J. Long 1570

The Analysis between Two Different Methods of Power Plant Boiler Thermal Efficiency
P. Li and C.W. Zhang 1578

Research and Improvement on Calculation Method of Optimal Excess Air Ratio
J.X. Qi 1583

Chapter 15: CAD/CAM/CAE Integration and Related Technologies

2D Finite Element Analysis of a Excavation Supporting Types in Changchun City
X.X. Liu, G.L. Sun and C. Sun 1589

Computer-Aided Building Structure Design Based on Residence Status
W.Q. Zhang 1594

Discussion the Strategy of Indoor 3D Fine Modeling
G.W. Yang, J. Xu and K. Sun 1598

Effect of Structural Performance of Bridge Based on Fatigue S-N Curves
X.H. Xia 1603

Fuzzy Evaluation and Modeling of Positioning Error of NC Machine Tool Feed System
M.D. Duan, J.J. Gu, K.H. Liu, X.X. Ji and Y.P. Wang 1607

Study on Computer Aided Design of Three-Dimensional Landscape
X.Y. Chen 1612

Study on Three-Dimensional Building Performance in Landscape Design
Y. Sun and G.L. Gao 1616

Simulation and Research of New MW Wind Turbine Yaw Hydraulic System Based on AMEsim
L.W. Yan, C.J. Ai and H. Xie 1621

Research on CBR Technology in the Intelligent Design of Truck Driving Axle
F.Y. Wang, M.M. Zhang, X.D. Zou, J. Liu and G. Sun 1625

Cutter Contacting Machining Paths Generation Method for Surface Flat-End Milling
H.Y. Li and L.J. Chen 1630

Parallel Algorithms in a Physically-Based Hydrologic Soil Model
Y.L. Du, S.Y. Wang, S.H. Yin, Z.P. Mao and S.Z. Yang 1634

Research of Relation Design Based on Solid Assembly
Q. Shan and Y. Chen 1639

Chapter 16: Product Design and Manufacturing

An Analysis of Brand Triangle Model for Product Life Cycle
X.B. Liu and W. Li 1645

Research on the Key Technology to Guarantee the Quantity of Tobacco Production for Removing Dust by the Vibration Screen
Z.K. Li, Y.K. Xu, G. Li and Y.J. Fan 1650

Simulation of a Flexible Manufacturing System for Semi-Products Packaging
P.C. Patic, L. Pascale and G. Măntescu 1654

Studies of Heart Fitness in Smart Clothing
J.N. Zhang, L. Du, Y. Xie and F.Y. Zou 1658

A Literature Review of Using Eye Tracking Technology in Fashion and Product Design
J.N. Zhang, L. Du, Y. Xie and F.Y. Zou 1662

Chapter 17: Industrial Engineering and Engineering Education

A Constraint-Based Approach for Skilled Workforce Scheduling Problem
Y. Li, Z.R. Xiao, W.Q. Dou and Y. Yang 1669

Scenario-Based Risk Analysis of the UAV Flight Test
S.J. Li, F.J. Wei and J.W. Zeng 1674

Study on the EEDI Calculation and Reference Line of River-Sea-Going Ship for Certain Routes
J. He, W. Cai, G.H. Huang and Y. Chen 1679

Study on the Ports Cluster in Region Ports Group
Q.S. Xiao, L.L. Qu, F.R. Zhang, X. Xu and G.C. Zhao 1684

The Influence of Beauty Modeling Training Course in Teaching Efficiency – A Case of Creative Beauty Salon Design in Continuing Educational University
P.L. Wu, C.S. Chiang and H.S. Chen 1688

The Research of Applied Project-Oriented and Problem-Based Learning Strategy on Wheel Robotics Study for Undergraduate Students: The S-P Table Analysis
M.H. Wu and C.C. Chang 1697

Whole Life Cycle Management of Prefabricated Construction Research Based on BIM Technology
B.K. Qi and C.F. Li 1705

Analysis on Experience and Preparedness about Power Failure in the Residential Sector (in Korea)
A.N. Won and W.H. Hong 1709

Employees Training Project Design Based on ISPI Technology in Practice
H.J. Ni 1713

Research on Development and Prospect of Industrial Robots in China
D. Wu 1717

Reliability Analysis Based on Fuzzy Comprehensive Evaluation for Cooking Fire Extinguishing System
Z.W. Xie, X.Y. Liang and Y. Wang 1721

Design and Implementation of University Human Resources Management Platform Based on YII
Y.L. Jia 1726

Design of Micro-Teaching System Based on Network
Y. Luo and X.Q. Zhang 1729

Research on the Patent Licensing of the New Generation Information Technology Industry in China
Y.Z. Qiao and S.W. Liu 1733

Identification and Analysis Restriction Factors of Low-Carbon Residential Industrialization Development
B.K. Qi, H.L. Wang and K.B. Li 1737

Study on Chinese Waste Home Appliances Recycling and Reusing System
W. Liu and J.X. Chen 1741
Attendance Machine for Teaching
Y.H. Yang and F. Yuan 1746
Channel Equalization of MIMO-OFDM System Based on Extreme Learning Machine
L. Yang, M.M. Nie, Z.L. Zhong, B.B. Xue and N. Lv 1751
