

Table of Contents

Preface

Recent Developments of Severe Plastic Deformation Techniques for Processing Bulk Nanostructured Materials R. Valiev	1
Mechanical Properties of Nanocrystalline Materials Produced by <i>In Situ</i> Consolidation Ball Milling C.C. Koch, K.M. Youssef and R.O. Scattergood	15
Superplastic Behavior in Ultrafine-Grained Materials Produced by Equal-Channel Angular Pressing C. Xu, M. Kawasaki, R.B. Figueiredo, Z.C. Duan and T.G. Langdon	29
Plastic Behavior of Metals in Reverse Straining after Large Pre-Strains I.J. Beyerlein	41
Bulk Ultrafine and Nanostructured Materials from Consolidation of Particles by Severe Plastic Deformation K. Xia	61
Ultrafine and Nanostructured Refractory Metals Processed by SPD: Microstructure and Mechanical Properties Q. Wei, K.T. Ramesh, L.J. Kecskes, S.N. Mathaudhu and K.T. Hartwig	75
Surface Nanocrystallization by Surface Mechanical Attrition Treatment N.R. Tao, J. Lu and K. Lu	91
Synthesis of Bulk Nanocrystalline Materials and Bulk Metallic Glasses by Repeated Cold Rolling and Folding (RCR) G. Wilde	109
Microstructure and Mechanical Properties of Nanostructured Metals Produced by High Strain Deformation N. Kamikawa, H.W. Zhang, X. Huang and N. Hansen	135
Deformation Twins and Stacking Faults in an AA5182 Al-Mg Alloy Processed by High Pressure Torsion M. Liu, H.J. Roven, M.Y. Murashkin and R. Valiev	147
