Preface, Committees and Sponsors

A Procedure Based on Magnetic Induction to Evaluate the Effect of Plastic Deformation by Multiaxial Stresses on TRIP Steels

V. Miguel-Eguía, F.J. Avellaneda, J. Coello, A. Martínez and A. Calatayud 1

Analysis of the Laser Weldability under Conduction Regime of 2024, 5083, 6082 and 7075 Aluminium Alloys

J.M. Sánchez-Amaya, Z. Boukha, M.R. Amaya-Vázquez, L. González-Rovira and F.J. Botana 7

Analytical Approach to the Indentation Process. Application of the Upper Bound Element Technique

F. Martín, L. Sevilla and C. Bermudo 13

Application of Different Simulation Strategies for the Analysis of Multi-Stroke Localised-Incremental Forging Operations

A.M. Camacho, M.M. Marín, E.M. Rubio and M.A. Sebastián 19

Application of Laser Remelting Treatments to Improve the Properties of Ti6Al4V Alloy

M.R. Amaya-Vázquez, J.M. Sánchez-Amaya, Z. Boukha, K. El Amrani and F.J. Botana 25

Comparison between FEM and Experimental Results in the Upsetting of Nano-Structured Materials

C.J. Luis-Pérez, I. Puertas, D. Salcedo, J. León and I. Pérez 31

Current Research Trends in Abrasive Waterjet Machining of Fiber Reinforced Composites

D.K. Kalla, B. Zhang, R. Asmatulu and P.S. Dhanasekaran 37

Customizing Food with an Additive Manufacturing Technology

L. Serenó, J. Delgado and J. de Ciurana 43

Development of a Laser Hardening Simulation Method Including Material Characterization for Rapid Heating Rates

S. Martínez, E. Ukar, I. Tabernero and A. Lamikiz 49

Effect of Electrolyte on the Surface Smoothness Obtained by Electropolishing of Stainless Steel

M. Hernando, P.J. Núñez López, E. García Plaza and R. Trujillo 55

Effective Utilization of Rapid Prototyping Technology

L. Novakova-Marcincinova, V. Fecova, J. Novak-Marcincin, M. Janak and J. Barna 61

Experimental Analysis of Laser Micro-Machining Process Parameters

D. Teixidor, I. Ferrer and J. de Ciurana 67

FEA of the Influence of Assembly Parameters on the Fatigue Life of Metal-Composite Bolted Joints

I. Álvarez, F.J. Doblas, C. Vallengano, A. Portal and P.J. Arroyo 73

FEM Modeling and Experimental Analysis of AA6082 Processed by ECAE

I. Puertas, C.J. Luis-Pérez, R. Luri, J. León and J.P. Fuertes 79

Geometry Modelling of Clads Generated by Laser Cladding

I. Tabernero, A. Lamikiz, E. Ukar and S. Martínez 85

Kerf Profile Modelling in Abrasive Waterjet Milling

A. Alberdi, A. Rivero, A. Carrascal and A. Lamikiz 91

New Technologies for Increasing the Capacities of WEDM Machines

J.A. Sánchez, S. Plaza, J.M. Ramos, B. Izquierdo, N. Ortega and I. Pombo 97

Numerical Analysis of the Stress/Strain Evolution in Incremental Sheet Forming and Stretch-Bending Processes

G. Centeno, C. Vallengano, J. Vázquez, F.J. Doblas, A.J. Martínez-Donaire and F.J. García-Lomas 103

Parameter Study on Laser Surface Finishing with 2D Scan Head

E. Ukar, I. Tabernero, F. Liebana, I. Saitua, R. Villaseca and J. Sobrado 109

Shiphull Welding: Trajectory Generation Strategies Using a Retrofit Welding Robot

J.Y. Hascoet, K. Hamilton, G. Carabin, M. Rauch, M. Alonso and E. Ares 115

Study of the Proper Sintering Conditions of Anionically-Polymerized Polyamide 6 Matrices for the Fabrication of Greencomposites

A. Alfonso, J. Andrés and J.A. García 121

Surface Topography Prediction on Laser Processed Tool Steel

E. Ukar, A. Lamikiz, S. Martínez and L.N. López de Lacalle 127

Tensile Ductility of Electron Beam Welded Titanium Alloys	
T. Pasang, J.C. Šabol, W.Z. Misiolek, R. Mitchell, A.B. Short and G. Littlefair	133
Theoretical Model of a Multi-Layered Polymer Coated Steel-Strip Ironing Process Using a Neural Network	
M.A. Sellés, S.R. Schmid, S. Sánchez-Caballero, E. Pérez-Bernabeu, M.J. Reig and V.J. Segui	139
Two FEM Thermal Models for Shallow and Deep Grinding	
N. Ortega, I. Pombo, U. Alonso, J.A. Sánchez, B. Izquierdo and S. Plaza	145
