

# Table of Contents

## Preface and Organizing Committee

<b>Solving the Flexible Job Shop Scheduling Problem Based on Memetic Algorithm</b> G.H. Zhang	1
<b>The Optimal Combination Research of System Configuration and T&amp;M Policy of Standby Safety System</b> Z.Y. Hu, L.Y. Xie and X.J. Zhang	6
<b>Black Box System Multi-Objective Optimization Based on Design of Experiment</b> T.Z. Sui, L. Wang, D.M. Cheng and H.W. Cui	12
<b>Strength and Reliability Analysis of Hydraulic Support</b> Y.Y. Ma, L.Y. Xie and X.F. Qin	18
<b>Equipment Performance Degradation Modeling for Reliability Prediction Based on n-ARIMA Model</b> J. Wu, C. Deng, H. Xiong and Y. Xiong	24
<b>Research on Fault Diagnosis Based on BP-SOM Hybrid Algorithms for NC Machine</b> C. Deng, W.L. Dong, Y.H. Wang and Y. Xiong	32
<b>An Optimization Method of the Heavy Machine Cutting Parameters</b> C. Deng, C. Ma, Y. Xiong and Y.H. Wang	38
<b>Optimization of Condition-Based Maintenance Policy for Deteriorating System Based on Monte-Carlo Simulation</b> E.S. Ge, Q.M. Li and A.L. Huang	44
<b>Variable-Fidelity Multidisciplinary Design Optimization Based on Analytical Target Cascading Framework</b> J. Zheng, H.B. Qiu and X.L. Zhang	49
<b>Distribution of Time Between Failures of Numerical Control System Based on Censored Data</b> Y. Dai, X.Z. Yang and N. Ji	55
<b>Research on Two Ends Energy-Absorbing Structure of High-Speed Railway Passenger Car Body</b> Z.X. Zhang, S.N. Xiao, G.W. Yang and X.M. Shang	61
<b>A Study on the 6-6 Stewart Parallel Mechanism Dynamics in ADAMS</b> X. Han, C. Li, X.G. Yu and G.B. Zhao	67
<b>Small Sample Reliability Analysis of Automatic Ultrasonic Testing of Austenitic Steel Defect</b> J. Zhang, H. Ding, M. Li and G.B. Ma	72
<b>Design of Current Selective Protection in Intelligent Molded Case Circuit Breaker</b> Y.J. Zhou, W.B. Chen and Z. Chen	77
<b>Research on Profit Model of Diesel Engine Products-Services System</b> Z.H. Liu, D.D. Song and J. Su	82
<b>Wear Life Prediction for a Large Diameter Spool Valve</b> K. Xia, S.D. Yang, T. Lei and L. Wu	88
<b>Testability Design of the PHM System for Aero-Engines</b> Z.H. Wen, Y.P. Liu and X. Yin	94
<b>Design and Research of Large-Inclination Screw Conveyor Angle Changing Test Equipment</b> S.Z. Zhou, C.X. Liu, H.Y. Jia, Z.P. Lv and Z.X. Sun	99
<b>R&amp;D Investment on Alternative Fuel Vehicles: Insights from a Two-Stage Game Theoretic Model</b> C.J. Chi and T.J. Ma	105
<b>Reliability Analysis for Rotor System with Oil Whip and Resonance Based on Frequency</b> C.Q. Su and Y.M. Zhang	110
<b>A New Reliability Analysis Method Based on Stability Reliability for Closed-Loop Control System</b> X.H. Guo, Z.X. Jiao and S.P. Wang	115
<b>A Fuzzy Linguistic Go/No-Go Decision Model in New Product Development</b> H.B. Yan and T.J. Ma	121

<b>On Uncertainties of Kansei in Kansei Engineering: A Fuzzy Linguistic Approach</b> H.B. Yan and T.J. Ma	130
<b>Strength Optimization Design of a Helical Hydraulic Rotary Actuator</b> Y. Yang, X. Guo, S.D. Yang and T. Xu	139
<b>Modeling of Fatigue Crack Closure by Finite Element Method</b> Z.Y. Ding, X.G. Wang and Z.L. Gao	145
<b>Study on Influencing Factors on Reliability of Permanent Magnet Synchronous Motor System in Electric Vehicle</b> K.L. Yang and Q. Song	151
<b>Projection Model of Intuitionistic Fuzzy Multiple Attribution Decision Making about Preventive Maintenance Modes in RCMA</b> J.W. Cheng, G.B. Zhang, X.G. Liu and C. Wang	159
<b>Analytical Target Cascading Based on the Quadratic Exterior Penalty Method for Complex System Design</b> X.L. Zhang, P. Jiang, J. Zheng and Y. Li	164
<b>The Simulation of the Ship Production Design Process Based on Hierarchical Timed Petri Net</b> R. Yan, P. Jiang, W.J. Li, J. Yan and L. Wen	170
<b>Intelligent Irrigation System Reliability Simulation</b> S. Yu, C.L. Ao and H.G. Chen	176
<b>Determination of the Critical Plane under the Multiaxial Complex Loading</b> L. Wang, T.Z. Sui, Y. Ma and Y. Sun	182
<b>Research of the Thought and Method in Function Reserving Design Based on Individuation Degree Evaluation</b> C.F. Li, Z.Q. Ye, Y.H. Wang and X.M. Feng	188
<b>Optimal Design of the Large-Diameter Spinning Torispherical Head</b> D. Zhang, S.P. Sheng and Z.L. Gao	194
<b>A Design Space Exploration Method Using Artificial Neural Networks and Metamodeling</b> L. Chi, H.B. Qiu, Z.Z. Chen and L. Ke	200
<b>Engineering Design Based on Hammersley Sequences Sampling Method and SVR</b> L. Ke, H.B. Qiu, Z.Z. Chen and L. Chi	206
<b>Reliability Analysis Method Based on Support Vector Machines Classification and Adaptive Sampling Strategy</b> H.Y. Hao, H.B. Qiu, Z.Z. Chen and H.D. Xiong	212
<b>The System of Signal Detection Based on Sensing Needle</b> J.M. Lei, X. Zeng and X.C. Zou	218
<b>A Reliability Index Based Decoupling Method for Reliability-Based Design Optimization</b> Z.Z. Chen, H.B. Qiu, H.Y. Hao and H.D. Xiong	223
<b>The Multi-Objective Oriented Product Design Method in the Machine Tool</b> W.Z. Li and X.Y. Yang	229
<b>The Action Mechanism of the Layering User Demands in the Product R&amp;D Process</b> W.Z. Li and X.Y. Yang	235
<b>Research on the Logistics Distribution under the Electronic Commerce Environment in Henan Province</b> Y. Shi	240
<b>Using the Memetic Algorithm for Multi Objective Job Shop Scheduling Problems</b> G.H. Zhang	245
<b>Method for Determining the Reliable Life Parameter of Turbine Wheel of Turbocharger with Over-Speed Failure Mode</b> Z. Wang, A.N. Wang, K. Guo, L. Zhuang and L. Hua	251
<b>Research of High Speed Train Carbody Structure Vibration Behaviors and Structure Fatigue Strength Characteristic Technology</b> B.R. Miao, W.H. Zhang, G.H. Huang, S.C. Wu and Y.X. Zhao	256
<b>Aging Properties of the Remaining Components of <math>n-k+1</math> out of <math>n</math> Systems</b> Z.C. Zhang and H.Z. Liu	262
<b>Prediction of Deformations of Steel Plate by GEP in Forming Process</b> L. Yang and L. Gao	268

<b>Short Fatigue Crack Propagation Threshold of Railway LZ50 Axle Steel</b> Y.X. Zhao, Z. He and B. Yang	274
<b>Fatigue Crack Growth Law Covering Threshold and Fracture Toughness for Railway LZ50 Axle Steel</b> Y.X. Zhao	280
<b>Failure Analysis on Bearings of Railway Freight Cars with Radial Bogie</b> Y.X. Zhao and B. Zhang	286
<b>Design and Research of Large-Inclination Screw Conveyor Angle Changing Test Equipment</b>	292
<b>Failure Analysis on Bearings of Railway Freight Cars with Tilting Bogie</b> Y.X. Zhao and B. Zhang	298
