

# Table of Contents

## Preface

## Chapter 1: Transportation & Service Science

|                                                                                                                                                   |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>3D Novel Face Model Based on Surface Stitching</b><br>Y. Ge, Y.F. Sun, B.C. Yin and H.L. Tang                                                  | 3   |
| <b>A Class of Optimizations and Energy-Saving Application</b><br>F.L. Yao and H.X. Sun                                                            | 10  |
| <b>A Discussion of the Design Method of Full Adder Circuit</b><br>S. Lin, T. Lin and Z.W. Liu                                                     | 15  |
| <b>A False Negative Maximal Frequent Itemsets Mining Algorithm over Stream</b><br>H.F. Li and N. Zhang                                            | 21  |
| <b>A Fault Diagnosis Approach of Steer-by-Wire System</b><br>F.Y. Wu, F. Kong and J.Y. Yao                                                        | 26  |
| <b>A Fit Degree Based Two-Step Lookahead Algorithm for Solving the Container Loading Problem</b><br>K. He and W.Q. Huang                          | 30  |
| <b>A High-Efficient Data Model of Road Network in Vehicle Navigation System</b><br>Y. Li and Y. Gao                                               | 37  |
| <b>A High-Speed Railway Data Placement Strategy Based on Cloud Computing</b><br>H.N. Wang, W.X. Xu and C.L. Jia                                   | 43  |
| <b>A Image Segmentation Method of Improved Ant Colony Algorithm for the Manipulator Self-Recognition Target</b><br>Y.B. Hou, Y. Meng and J.B. Mao | 50  |
| <b>A Method of Designing CMS Guide Plan under Accident Impact in Province Expressway Net</b><br>Y.L. Jin, M.M. Zhang and C. Wang                  | 56  |
| <b>A Modified Incremental Support Vector Machine for Regression</b><br>J.G. Wang, L.W. Cheng, W.X. Zhang and B. Qin                               | 63  |
| <b>A Multi-Object Tracking Algorithm Based on Multi-Camera</b><br>M.X. Jiang, H.Y. Wang and C. Lin                                                | 70  |
| <b>A New Approximate Joint Diagonalization Algorithm Based on the Fused Complex-Valued Cost Function</b><br>X.F. Xu and C.D. Duan                 | 76  |
| <b>A New Hybrid Collaborative Filtering Algorithm</b><br>C.X. Yin and Q.K. Peng                                                                   | 80  |
| <b>A New Mechanism of Database Encryption</b><br>L.N. Fan and J. Liu                                                                              | 87  |
| <b>A New Method for Residual Liquid Inspection</b><br>B. Huang, J.F. Li, W. Fu and D.Y. Yang                                                      | 92  |
| <b>A New Nonlinear Filter Method for Ballistic Target Tracking</b><br>C.L. Wu and Y.F. Ju                                                         | 99  |
| <b>A Novel Efficient Classification Algorithm Based on Class Association Rules</b><br>S.J. Zhang and Q. Zhou                                      | 106 |
| <b>A Personalized Collaborative Learning Model Base on ACO Clustering</b><br>R. Zeng and Y.Y. Wang                                                | 111 |

## Chapter 2: Network & Control

|                                                                                                                         |     |
|-------------------------------------------------------------------------------------------------------------------------|-----|
| <b>A Probabilistic Cache Sharing Mechanism for Chip Multiprocessors</b><br>P.X. Yan, J. Jiang, X.J. Yang and M.X. Zhang | 119 |
|-------------------------------------------------------------------------------------------------------------------------|-----|

|                                                                                                                              |     |
|------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>A Rapid Method for Image Compression Based on Wavelet Transform and SOFM Neural Network</b>                               |     |
| H.K. Xu, W.S. Yang, J.W. Fang, C.B. Wen and W. Sun                                                                           | 126 |
| <b>A Regularization Method for Downward Continuation of Potential Fields</b>                                                 |     |
| T. Ma, M.P. Wu, X.P. Hu and G.N. Li                                                                                          | 132 |
| <b>A Reverse Driving Control Method for Hydrostatic Mobile Machinery</b>                                                     |     |
| X. Wang and R.Y. Zhao                                                                                                        | 140 |
| <b>A Study of Regional Comparison on Productive Efficiency of Logistics Service Industry in China</b>                        |     |
| Y.J. Song and C.C. Lv                                                                                                        | 146 |
| <b>A Time-Programmable Soft-Start Circuit with Hiccup Control</b>                                                            |     |
| Y.M. Li, C.B. Wen and L.M. Wen                                                                                               | 151 |
| <b>A Traffic Control Mechanism Based on Fuzzy Logic</b>                                                                      |     |
| B.J. Liang and Y.F. Ju                                                                                                       | 155 |
| <b>A Word Sense Disambiguation Method Based on Reconstruction of Context by Correlation</b>                                  |     |
| X.H. Fan, B.J. Zhang and D. Zhou                                                                                             | 160 |
| <b>Accumulate-Repeat-Delay-Partial-Delay Codes</b>                                                                           |     |
| Z.L. Li and G.J. Xia                                                                                                         | 167 |
| <b>Adaptive Decoding for Turbo Codes over CDMA2000 Mobile System</b>                                                         |     |
| S. Yuan, M.D. Bai and H.Q. Zhang                                                                                             | 171 |
| <b>Adaptive Objective Coordinate Optimization Method with Unknown Parameter</b>                                              |     |
| B. Wang, C.Q. Wang, F. Ru and X.L. Ma                                                                                        | 179 |
| <b>An Algorithm Research of Terminal Key Generation for Mobile Payment</b>                                                   |     |
| P.S. Gu, J.M. He and L.H. Fan                                                                                                | 187 |
| <b>An All CMOS Current Reference</b>                                                                                         |     |
| L.A. Li, M. Tang, W. Ou and Y. Hong                                                                                          | 192 |
| <b>An Approach to Reliability Evaluation of Web Services Composition Based on BPEL</b>                                       |     |
| Y.N. Liang and Z. Chen                                                                                                       | 198 |
| <b>An Energy-Efficient Data Gathering Method for Sensor Networks with Mixed Communication Modes</b>                          |     |
| H.Y. Yuan, Z.P. Liu and S.Q. Yang                                                                                            | 205 |
| <b>An FFT-Based Approach for Carrier Frequency Domain Acquisition in Spread Spectrum TT&amp;C System</b>                     |     |
| X.C. Wu, P. Gong, H.J. Song and H.Z. Zou                                                                                     | 211 |
| <b>An ID-Based Proxy Multi-Signature Scheme</b>                                                                              |     |
| H. Meng and X. Qian                                                                                                          | 217 |
| <b>An Identification Management Framework for IT-Enabled Services and E-Government: A Consideration of the Case of Japan</b> |     |
| S. Uesugi, M. Ueda and Y. Ujikane                                                                                            | 222 |
| <b>An Image Scrambling Method Based on Chaotic Sequence and Space-Bit-Plane Operation</b>                                    |     |
| R. Liu and X.P. Tian                                                                                                         | 231 |
| <b>An Improved K-Means Based Method for Fingerprint Segmentation with Sensor Interoperability</b>                            |     |
| Z.G. Yang, Y. Li and G.P. Yang                                                                                               | 237 |
| <b>An Improved PAM Clustering Algorithm Based on Initial Clustering Centers</b>                                              |     |
| L.S. Zhang, M.J. Yang and D.J. Lei                                                                                           | 244 |

### **Chapter 3: Advanced Intelligence & Manufacturing**

|                                                                                       |     |
|---------------------------------------------------------------------------------------|-----|
| <b>An Numeric Method on the Third Order Term of KDV Equation</b>                      |     |
| Y.M. Tian                                                                             | 253 |
| <b>Analysis and Design of a Wearable Robot for Lower-Limb Rehabilitation Training</b> |     |
| Y. Chu, Y. Shao and L. Chen                                                           | 256 |
| <b>Analysis of Control Strategy for Extended-Range Electric Vehicle</b>               |     |
| H.T. Min, D.J. Ye and Y.B. Yu                                                         | 261 |
| <b>Analysis of Factors on Nan Pu Oilfield's Weak Gel Flooding</b>                     |     |
| J.W. Gu and M. Wu                                                                     | 268 |

|                                                                                                                                                       |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Analysis of Game Theory on the Price of Supply Chain Based on Bertrand Model</b><br>L. Xia and T.T. Song                                           | 274 |
| <b>Analysis of M2M Industry Value Chain</b><br>Z.J. Peng, Z.L. Peng and M.M. Wu                                                                       | 279 |
| <b>Analysis of One Proxy Re-Encryption Scheme</b><br>L.H. Liu and Z.J. Cao                                                                            | 284 |
| <b>Analysis of Two ID-Based Key Exchange Protocols</b><br>W. Wang and Q.F. Cheng                                                                      | 289 |
| <b>Application Design for Oilfield Monitoring System Based on ZigBee Wireless Network Technology</b><br>K.Y. Meng, P. Yang and Q.N. Cao               | 294 |
| <b>Application Framework of Manufacturing Enterprise Information System Based .NET Smart Client</b><br>D. Ren, Y. Ren and Y. Fan                      | 300 |
| <b>Application of Advanced Process Control in Circulating Fluidized Bed Boiler</b><br>Y.P. Jiang, S. Liu and Y.H. Yang                                | 305 |
| <b>Application of Fuzzy Neural Network in Ship Course Control</b><br>G.S. Hu, Y.B. Zhou and H.R. Xiao                                                 | 309 |
| <b>Attacks on Self-Certified Multi-Proxy Signature Schemes with Message Recovery</b><br>Q. Xie                                                        | 316 |
| <b>Automated Generation of Web Service Test Case</b><br>S.L. Liu, J.Y. Li and L.L. Sun                                                                | 321 |
| <b>Behavior Modeling Method of CGF in TBM Combat Simulation</b><br>G.J. Song, X.D. Mu, R.H. Chang, H.J. Zhang and Q.H. Zhang                          | 326 |
| <b>Blind Separation of Coherent Signals Based on Toeplitz Matrix Reconstruction</b><br>L. Tang, H. Song and L.J. Hu                                   | 331 |
| <b>Blind Source Separation Method Based on Pseudo-Random Code</b><br>J. Zhang and S.C. Li                                                             | 336 |
| <b>Camouflage Target Identification Based on Hyperspectral Imaging System</b><br>N. Ding, J.B. Gao and J. Wang                                        | 341 |
| <b>Carbon Dioxide Gas Sensor Using SAW Device Based on ZnO Film</b><br>C.B. Wen, Y.F. Ju, W.L. Li, W.Z. Sun, X. Xu, Y. Shao, Y.M. Li and L.M. Wen     | 347 |
| <b>Characteristics of Yichun Late Triassic - Early Jurassic Monzogranite</b><br>N.Q. Sun                                                              | 353 |
| <b>Current Situation Analysis and Strategy Research of Environmental Protection Equipment Industry in China</b><br>W. Guo, H. Xu, T. Yang and Y. Wang | 359 |
| <b>Depositional Patterns of Dominant Sedimentary Time Units' Reservoir in Daqing Oilfield</b><br>G.J. Fan and Y.J. Zhao                               | 365 |
| <b>Design and Implementation of Full-Text Retrieval System for People's Daily Annotated Corpus</b><br>Y.S. Zhang and G.J. Huang                       | 369 |
| <b>Design and Implementation of VSP Seismic Data Acquisition System Based on Virtual Instrument Technology</b><br>N.Q. Sun, Y.M. Yang and R.J. Dong   | 375 |
| <b>Design and Optimization of Microwave Frequency Synthesizer Based on DDS</b><br>C.L. Si, C.Q. Xu and G.Q. Chu                                       | 380 |

## **Chapter 4: Image Processing & Modeling of Materials**

|                                                                                                                                                      |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Design and Realization of Multi-Stage Traffic Signal Controller of Variable Phase</b><br>H.K. Xu, H. Yan, C. Cai, S.G. Li and M.D. Yan            | 389 |
| <b>Design of Embedded Bio-Impedance Analyzer Based on Digital Auto Balancing Bridge Method</b><br>N. Li, J. Guo, H.S. Nie, W. Yi, H.J. Liu and H. Xu | 396 |
| <b>Design of Gas Leakage Monitoring System Based on CAN Bus</b><br>Y.J. Chen, H.Y. Zan and W.G. Li                                                   | 402 |

|                                                                                                                                                          |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Design of PCR Primers for the <i>mcrA</i> Genes Detection of Methanogen Communities</b><br>N.N. Tuan and S.L. Huang                                   | 408 |
| <b>Design of Service Supervision and Subsidies Evaluation System for Urban Public Transport</b><br>X.K. Wang, B.Y. Hu, W.Q. Chen, X. Liu and D.Y. Guan   | 414 |
| <b>Design Process Control and Knowledge Service of Complex Product</b><br>W.K. Xi and X.Y. Yuan                                                          | 421 |
| <b>Development and Application of Asphalt Pavement Construction Quality Control System</b><br>T. Jing, H.F. Yan and S.P. Ji                              | 428 |
| <b>Development and Application of CHANSIGNAL Signal Timing Software System</b><br>H. Chen, J.B. Zhou and J. Sun                                          | 436 |
| <b>Direct Torque Control System for Belt Conveyor Based on Improved Genetic Algorithms</b><br>Z.S. Yang                                                  | 443 |
| <b>Directional Human Fall Recognition Using a Pair of Accelerometer and Gyroscope Sensors</b><br>M.J. Lim, J.H. Cho, Y.S. Cho and T.S. Kim               | 449 |
| <b>Distributed <math>H_\infty</math> Control for Leader-Following Coordination with Switching Topology</b><br>Y.P. Luo and L.X. Gao                      | 455 |
| <b>Distributed Coverage-Hole Repair Algorithm towards Nodes Failure in Wireless Sensor Networks</b><br>B. Xu and Y.F. Ju                                 | 464 |
| <b>Dynamic Optimization for Multi-Phase Intersection Timing Using Stratified Genetic Algorithm</b><br>H.K. Xu, J.W. Fang, W.S. Yang, S. Gao and M.D. Yan | 470 |
| <b>Dynamic, Customized Workflow Using BDI Agent and Semantic Web Service</b><br>C.H. Liu and J.J.Y. Chen                                                 | 477 |
| <b>Effect for Micro-Transformer Using Different Substrate Materials</b><br>X.W. Hou, S.B. Liu and J. Chang                                               | 484 |
| <b>Effect of Hydrogen Yield by Thermophilic Anaerobic Fermentation from Mixed Organic Wastes</b><br>J.H. Chen, K.S. Wang and D.H. Vu                     | 487 |

## Chapter 5: Information Technology

|                                                                                                                                         |     |
|-----------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Effects of the Technical Communication on the Life Cycle of the Products</b><br>X.F. Li, X.Q. Ge and C.H. Jin                        | 501 |
| <b>Degree-Based Sampling Method with Partition-Based Subgraph Finder for Larger Motif Detection</b><br>J.J. Zhou, D.S. Kong and J.Y. He | 509 |
| <b>Electric Heating Power Optimization of Natural Gas Pipeline</b><br>C.L. Zhang                                                        | 516 |
| <b>Ensemble Pruning for Data Dependant Learners</b><br>G. Zhang, S.H. Zhan, C.R. Wang and L.L. Cheng                                    | 522 |
| <b>Experimental Study of the Asphalt Concrete Entrucking Based on Machine Vision</b><br>Y.B. Hu and M.R. Tian                           | 528 |
| <b>Exploration Based on ZigBee Traffic Signals Area Control System</b><br>Z.Y. Liang, X.N. Qu and X.H. Zhao                             | 535 |
| <b>Fatigue Lifetime Design of Pantograph V500 Based on Reliability</b><br>D.L. Song, W.H. Zhang and P. He                               | 540 |
| <b>Fault Diagnosis of Conveyance Machine Based on Fuzzy Support Vector</b><br>Y.B. Hou, N. Li, F. Guo and J. Chen                       | 547 |
| <b>Fundamental Tribology Knowledge Serve Modeling and Knowledge Resource Units Construction</b><br>W.K. Xi, X.Y. Yuan and Q. Jia        | 553 |
| <b>Han Ning Highway Traffic Accident Spatio-Temporal Analysis</b><br>C. Wang, K. Du, Y.L. Jin and L.Y. He                               | 560 |
| <b>Health Care Service Designs with ICT</b><br>C.C. Chiou                                                                               | 565 |

|                                                                                                                                               |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Heuristics for Domain-Independent Planning: A Survey</b><br>R.S. Liang and M. Huang                                                        | 573 |
| <b>Imprecise Ontology Merging Framework Design</b><br>G.Y. Li, Y. Zhao and H.Y. Li                                                            | 578 |
| <b>Improved Genetic Algorithm of Vehicle Routing Problems with Time Window for Military Logistic Distribution</b><br>Z.G. Zhang and Y.C. Gong | 585 |
| <b>Improved Method of Medical Image Reconstruction Based on MC Algorithm</b><br>X.M. Huang, W.H. Liu and H.Q. Wang                            | 592 |
| <b>Low-Contrast Blurry Image Enhancement Based on Human Visual Property and Generalized Fuzzy Operator</b><br>H.F. Wang and P.Z. Liu          | 597 |
| <b>Mining Functional Modules in Uncertain Protein-Protein Interaction Network</b><br>Y. Meng, X.Q. Shang, M. Miao and M. Wang                 | 602 |
| <b>Mining Maximal Dense Subgraphs in Uncertain PPI Network</b><br>J.C. Liu, X.Q. Shang, Y. Meng and M. Wang                                   | 609 |
| <b>Mobile Sensor Registration Algorithm Based on Exact Method</b><br>X.J. Ge, R.Z. Li, L.K. Chen and X.M. Zhang                               | 616 |
| <b>Modeling and Analysis of Opportunistic Spectrum Sharing Systems with Markov Approach</b><br>C.Y. Zhang and K. Liu                          | 621 |
| <b>MRCluster: Mining Constant Row Bicluster in Gene Expression Data</b><br>M. Miao, X.Q. Shang, J.C. Liu and M. Wang                          | 628 |

## Chapter 6: Energy & Electronic

|                                                                                                                                                               |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Multiresolution Non-Local Mean Filter for Infrared Dim and Small Target Background Suppression</b><br>J. Li, J. Chang and H.L. Qin                         | 637 |
| <b>Narrow-Band Interference Suppression in Transform Domain in Tracking and Data Relay Satellite System</b><br>P. Gong, H.J. Xie, Y.P. Liu and X.C. Wu        | 643 |
| <b>Optimal Estimation for Multiple Packet Dropouts Systems with Colored Measurement Noise</b><br>L.X. Yang, L.J. Zhang, L.D. Guo and H.M. Jia                 | 649 |
| <b>Optimal Guidance Law Design for Interception of Ballistic Missiles during the Boost Phase</b><br>W.W. Zhou and X.G. Liang                                  | 655 |
| <b>Optimization of Adaptive Co-Ordination Based on Interaction Prediction Approach</b><br>B. Wang, C.Q. Wang and F. Ru                                        | 660 |
| <b>Parameter Identification and Harmonic Analysis for EV Induction Motor Drive Systems</b><br>X.W. Zhou, G.P. Wang, C.D. Duan and C.L. Wu                     | 667 |
| <b>Path Planning for Mobile Robot Based on ACA-GA</b><br>L.X. Zhang, Y.X. Wang, B.B. Wang, Q. Deng and H. Chen                                                | 673 |
| <b>Performance Comparison of Neighborhood Based Broadcasting Methods in MANETs</b><br>K. Qin and Z.Y. Li                                                      | 678 |
| <b>Pervasive Computing Architecture, Key Technologies and Issues Facing</b><br>D.Y. Jiang                                                                     | 684 |
| <b>Precision Servo Tracking System Structure Method and Accuracy</b><br>B. Wang, C.Q. Wang, F. Ru and X.L. Ma                                                 | 688 |
| <b>Product Diffusion Model Associated with Dynamic Market Environment the Case of Mini Passenger Vehicle in China</b><br>X.Y. Zhao, A.G. Cheng and Z.H. Zhong | 694 |
| <b>QoS-Based Data Aggregation Technology in Wireless Sensor Networks</b><br>Z.Y. Chen, G. Yang, G.H. Li and J. Xu                                             | 702 |
| <b>Reduction Rules of Graphical Representation in a Workflow Process Model</b><br>F.H. Hu, J. Jiang, X.N. Wu and F. Ru                                        | 709 |
| <b>Region Connecting Based Pavement Image Cracks Extraction</b><br>B.B. Song and N. Wei                                                                       | 715 |

|                                                                                                                                                    |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Reliability Analysis of Factors Affecting Gas Pipeline Operational Condition</b><br>Z.X. Zhang and D. Wu                                        | 720 |
| <b>Research of a Driving Equipment for Aero-Engine Rotor Based on FPGA</b><br>L.M. Wen, C.B. Wen and Y.M. Li                                       | 725 |
| <b>Research of Adaptive Extracting Algorithm Facing Blade Crack Image</b><br>L.M. Wen, C.B. Wen and Y.M. Li                                        | 732 |
| <b>Research of Automatic Fingerprint Recognition Essential Algorithms</b><br>J.H. Zhang                                                            | 739 |
| <b>Research of Cleaning and Quality Control of Data in Investment Research System of Fund Management Company</b><br>Q. Guo, Y. Liu and R.R. Fu     | 743 |
| <b>Research of Curve-Fitting on RIA Dosage Reaction</b><br>Y. Chu, H.G. Wang, C.H. Deng and Y. Shao                                                | 747 |
| <b>Research of Information Retrieval Based on Web Semantic Similarity</b><br>Y.X. Yu and L.Y. Wang                                                 | 753 |
| <b>Research of the Cloud Computing Applications in Smart Mobile Phone</b><br>J. Jin, C.X. Fan and Y.X. Wu                                          | 759 |
| <b>Research on Conversion from UML Activity Diagram to Procedure Blueprint</b><br>J.B. Liu and T.Q. Li                                             | 766 |
| <b>Research on Key Techniques of Games Based on Symbian Platform</b><br>D.D. Zhu, J.M. He and Z.H. Shi                                             | 770 |
| <b>Research on License Plate Tracking and Detection Based on Optical Flow</b><br>H.K. Xu, C. Cai, H. Chen, J.W. Fang and S.G. Li                   | 775 |
| <b>Research on MANET Routing Algorithm Based on Ant Colony Algorithm</b><br>Y.F. Ju and H. Chen                                                    | 781 |
| <b>Research on MATLAB Programming Efficiency</b><br>M. Xiao and G.H. Liu                                                                           | 788 |
| <b>Research on Power Adaptive Control Method for Hydraulic Motor Grader Based on Simulink/AMESim</b><br>R.Y. Zhao and X. Wang                      | 793 |
| <b>Research on Railway Wagon-Loading Yard Arrangement Planning</b><br>Q.Q. Liu, H.H. Xie and X.H. Jin                                              | 800 |
| <b>Research on Restful Web Services in Java</b><br>H.J. Li                                                                                         | 806 |
| <b>Research on Signal of Branch Junction Based on Adaptive Fuzzy-PID Control</b><br>Y.F. Ju, L. Zhao and S. Gao                                    | 809 |
| <b>Research on the Bounding-Inbox Localization Algorithm for Wireless Sensor Networks Based on RSSI</b><br>X.C. Yang, Y.B. Hou and L.H. Kong       | 814 |
| <b>Research on the Doppler Shift Mitigation Scheme for OFDM Underwater Acoustic Communication</b><br>Q.W. Chang, X.H. Shen and J. Chang            | 820 |
| <b>Research on the Method of Non-Uniformity Control in Asphalt Pavement Construction with PQI</b><br>Z.S. Zhao, T. Jing, H.F. Yan and X. Zhang     | 826 |
| <b>Research on the Performance of Network Virtualization Based on Xen</b><br>X.D. Li and Z. Lei                                                    | 834 |
| <b>Research on the Semantic of Computer Programming Problem Based on Ontology</b><br>Y. Wang, Y.Q. Cheng and J.H. Shi                              | 840 |
| <b>Research on Uplink Channel Estimation Method in TD-LTE System</b><br>C.Z. Sun and Z.H. Zeng                                                     | 847 |
| <b>Research on Vehicle Fuel Consumption Measuring System Based on Radio Frequency Communication Technology</b><br>Y.P. Jiang, S. Liu and Y.H. Yang | 852 |
| <b>Research on Virtual Assembly Platform Realization Technology of Vehicle Transmission System</b><br>F. Liu, Q.D. Yan and S.W. Yao                | 856 |

|                                                                                                                                         |     |
|-----------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Research Progress of Personalized Content Management System</b><br>B.F. Yu, Z.K. Wang, X. Fang and Z.Q. Ye                           | 862 |
| <b>Risk Evaluation Study on Communication Network Based on Fuzzy Comprehensive Evaluation</b><br>Y. Lan, S.P. Liu, H.Z. Sun and K.Y. Su | 867 |
| <b>Scene Retrieval Approach Based Dynamic Bayesian Networks</b><br>Q. Xiao, X.X. Hu and S. Gao                                          | 873 |
| <b>Selective Harmonics Elimination for PWM Inverters Using the PSO Optimization Technique</b><br>J.P. Chen, Y.F. Ju and Y.Y. He         | 879 |
| <b>Semi-Physical Simulation System for FMCW Radar</b><br>W.H. Chen, X.X. Meng and X.M. Liu                                              | 886 |
| <b>Service Development Research for ICT Companies Based on Service Science Analysis</b><br>H. Wang                                      | 893 |

## **Chapter 7: Mechanical & Automation**

|                                                                                                                                                    |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Simulation and Experimental Research on Crosstalk of Multiconductor Cable's Core Lines</b><br>C.C. Wang, C.Q. Zhu and Z.F. Gu                   | 901 |
| <b>Single-Carrier Frequency Domain Equalization and Wireless Applications</b><br>M.F. Xia, Y.C. Wang and G.Z. Lv                                   | 907 |
| <b>Space-Time Coding Technique Based on Four-Antenna Transceiver System</b><br>Y. Chu, C.H. Deng, Y. Shao and H.G. Wang                            | 913 |
| <b>Stacked Spiral Inductor Design and Modeling for Fully-Integrated DC-DC Converters</b><br>Q.H. Li                                                | 918 |
| <b>Streetlight Monitoring System for Energy Saving Based on GSM Network</b><br>Y.M. Pei and Y.H. Liu                                               | 924 |
| <b>Structure Health Monitoring Using Support Vector Data Description and Wavelet Packet Energy Distributions</b><br>C.D. Duan, Y.Y. Liu and Q. Gao | 930 |
| <b>Study of Expressway Lane Departure Warning and Navigation System under Different Visibility Conditions</b><br>Y.M. Yang, N.Q. Sun and H.K. Xu   | 938 |
