

Table of Contents

Preface

Towards an Expert System that Aids in the Diagnosis of Concrete Structures A. Messabhaia and N. Hassounet	1
A FEM Model to Analyze the Structural Mechanical Problem in an Electrostatically Controlled Prestressed Micro-Mirror D. Popovici, V. Manescu Paltanea, G. Paltanea and G. Jiga	9
Optimization by the Reliability of the Damage by Tiredness of a Wire Rope of Lifting A. Meksem, M. El Ghorba, A. Benali and A. El Barkany	15
Thermal Buckling of Simply Supported FGM Square Plates M. Bouazza, A. Tounsi, E.A. Adda-Bedia and A. Megueni	25
Analytical and Finite Element Analysis for Short Term O-Ring Relaxation M. Diany and H. Aissaoui	33
A New Methodology for an Optimal Shape Design W. El Alem, A. El Hami and R. Ellaia	43
A Multi-Scale Analysis of Materials Reinforced by Inclusions Randomly Oriented in the Ply Plane E. Lacoste, S. Fréour and F. Jacquemin	55
Experimental Study of the Short-Term Creep Behavior of CFRP Strengthened Mortar under Compressive Loading F. Khadraoui and M. Karama	65
Contribution of AFM Observations to the Understanding of Ni₃Al Yield Stress Anomaly J. Bonneville, D. Charrier and C. Coupeau	71
The Non Destructive Testing Methods Applied to Detect Cracks in the Hot Section of a Turbojet S. Bennoud and Z. Mourad	79
Simulation of Thermo Mechanical Behavior of Structures by the Numerical Resolution of Direct Problem B. Aouragh, J. Chaoufi, H. Fatmaoui, J.C. Dupre, C. Vallée and K. Atchonouglo	85
Low Temperature Sintering and Characterization of MgTiO₃ M. Aliouat, B. Itaalit, N. Amaouz and A. Chaouchi	95
