

Table of Contents

Preface

Section 1: FERROUS ALLOYS

The Fatigue Behavior of Steel Structures under Random Loading H. Agerskov	3
Low Cycle Fatigue Behavior and Microcracks Nucleation on Duplex Stainless Steels I. Alvarez-Armas and S. Degallaix	17
High Cycle Fatigue Behavior of Normalized 0.15% C Steel under Tension-Compression and Torsion Loading H. Mayer, S. Stojanovic, S. Stanzl-Tschegg and B. Zettl	29
On the Cyclic Stability and Fatigue Performance of Ultrafine-Grained Interstitial-Free Steel under Mean Stress T. Niendorf, H.J. Maier, D. Canadine and I. Karaman	39
Fatigue Crack Growth Resistance of Special Nodular Cast Irons O.P. Ostash and I.M. Andreiko	53
Internal Fatigue Failure Mechanism of High Strength Steels in Gigacycle Regime K. Shiozawa and L.T. Lu	65
Advances in Cyclic Behavior and Lifetime Modeling of Tempered Martensitic Steels Based on Microstructural Considerations V. Velay, D. Delagnes and G. Bernhart	81
The Fatigue Properties of Duplex Stainless Steels: Role of Microstructure J.B. Vogt	101

Section 2: NON-FERROUS ALLOYS

Comparison of the Fatigue Crack Propagation Resistance of $\alpha+\beta$ and β Titanium Alloys M. Benedetti	117
High Cycle Fatigue Behavior of Magnesium Alloys under Corrosive Environment Y. Mutoh, M. Shahnewaz Bhuiyan and Z. Sajuri	131
The Fretting Fatigue Behavior of Ti-6Al-4V R.W. Neu	147
Cyclic Depth-Sensing Indentation of Gold Wire T. Sriharan, T. Saraswati and S. Mhaisalkar	163
The High Cycle Fatigue and Fracture Behavior of Friction Stir Welded Aluminum Alloy 2024 T.S. Srivatsan, S. Vasudevan, L. Park and R.J. Lederich	175
An Investigation of the High Cycle Fatigue and Final Fracture Behavior of Aluminum Alloy 2219 T.S. Srivatsan, S. Vasudevan, L. Park and R.J. Lederich	207
Low Cycle Fatigue in Model Al-Si Alloys. A Contribution to the Understanding of Cyclic Damage in Two Phase Materials J. Stolarz	231
High Temperature Low-Cycle Fatigue, Deformation Microstructure and Final Fracture Behavior of a Nickel-Base Superalloy D.Y. Ye and J. Zheng	249
An Investigation of the Cyclic Fatigue and Final Fracture Behavior of a Titanium Alloy T.S. Srivatsan, M. Kuruvilla and L. Park	271

Section 3: EMERGING MATERIALS

Understanding the Fatigue Behaviour of NiTiCu Shape Memory Alloy Wire Thermal Actuators	
S.K. Bhaumik, C.N. Saikrishna, K.V. Ramaiah and M.A. Venkataswamy	301
Mechanisms and Mechanics of Fatigue Crack Propagation in Zr-Based Bulk Metallic Glass	
Y. Nakai and M. Seki	317
Direct Comparisons of the Fatigue Behavior of Bulk-Metallic Glasses and Crystalline Alloys	
G.Y. Wang, P.K. Liaw, Y. Yokoyama, A. Peker, M. Freels, D.E. Fielden and A. Inoue	329

Section 4: ALTERNATIVE NOVEL APPROACHES TO STUDYING FATIGUE

Surface Cracks in Round Bars under Cyclic Tension or Bending	
A. Carpinteri and S. Vantadori	341
Some Applications of Fractal Fracture Mechanics to Describe the Fatigue Behaviour of Materials	
A. Carpinteri, A. Spagnoli and S. Vantadori	355
A Study of Fatigue (Cyclic Deformation) Behavior in FCC Metals Using Strain Rate Change Tests	
G.C. Kaschner and J.C. Gibeling	371
A Dissipated Energy Approach to Fatigue Crack Growth in Ductile Solids and Layered Materials	
N. Klingbeil, J. Daily and C. Baudendistel	385
