Preface

I. Extrusion Benchmark

Extrusion Benchmark 2007 – Benchmark Experiments: Study on Material Flow Extrusion of a Flat Die

M. Schikorra, L. Donati, L. Tomesani and A.E. Tekkaya

1

II. Keynotes

Modifications of the Extrusion Process of Magnesium Alloys for Improved Mechanical Properties

S. Müller, K. Mueller and W. Reimers

9

Experimental Techniques to Characterize Large Plastic Deformations in Unlubricated Hot Aluminum Extrusion

H.S. Valberg

17

Innovative Methodologies for the Simulation of Static Recrystallisation during the Solution Soaking Process of Shape Extrusion

T. Sheppard and X. Velay

25

III. Material Flow and Constitutive Equations

Flow Front Tracking in ALE/Eulerian Formulation FEM Simulations of Aluminium Extrusion

A.J. Koopman, B. Geijsselaers and J. Huétink

39

Numerical Optimization of Bearing Length in Composite Extrusion Processes

T. Kloppenborg, M. Schikorra, M. Schomäcker and A.E. Tekkaya

47

Recent Developments in the Manufacture of Complex Components by Influencing the Material Flow during Extrusion

N. Ben Khalifa, D. Becker, M. Schikorra and A.E. Tekkaya

55

FE Simulation of Extrusion to Produce a Thin-Walled Wide Profile through a Spreading Pocket Die

G. Fang, J. Zhou, J. Duczczak and X.K. Wu

63

Aluminum Rod Extrusion and Material Modeling

P.T. Moe, Y.A. Khan, H.S. Valberg and S. Støren

71

Hot Workability and Constitutive Equations of ZM21 Magnesium Alloy

M. El Mehtedi, L. Balloni, S. Spigarelli, E. Evangelista and G.I. Rosen

79

Constitutive Models for AZ31 Magnesium Alloys

C. Bruni, L. Donati, M. El Mehtedi and M. Simoncini

87

IV. Microstructure

Insights to Extrusion from Finite Element Modeling

H.J. McQueen and E. Evangelista

95

Study on Thixo-Extrusion of Semi-Solid Wrought Magnesium Alloy

H. Yan, M.F. Fu, X.C. Tao and H.W. Hu

103

Microstructure Prediction of Hot-Deformed Aluminium Alloys

L. Donati, J.S. Dzwonczyk, J. Zhou and L. Tomesani

107

Application of Adaptive Mesh and ALE Method in Simulation of Extrusion of Aluminum Alloys

T. Kayser, F. Parvizian, C. Hortig and B. Svendsen

117

V. Seam Welds and Process Optimization

Seam Welds Modeling and Mechanical Properties Prediction in the Extrusion of AA6082 Alloy	125
L. Donati and L. Tomesani	
A Laboratory Scale Equipment to Relieve Force and Pressure in Cold Extrusion of Lead Hollow Components	137
L. Filice, F. Gagliardi and F. Micari	
Analysis of Metal Flow through a Porthole Die to Produce a Rectangular Hollow Profile with Longitudinal Weld Seams	145
G. Liu, J. Zhou, K. Huang and J. Duczczyk	
Simulation-Based Design of Ram Speed Profile for Isothermal Extrusion	153
L.X. Li, H. Zhang, J. Hu, J. Zhou and J. Duczczyk	
Input Parameters Determination for Predicting Ram Speed and Billet Temperature for the First Billet	161
M. Sabater, M.L. García-Romeu and J. de Ciurana	

VI. Dies and Tools

Creep and Fatigue Damage in Hot Work Tools Steels during Copper and Aluminium Extrusion	169
C. Sommitsch, T. Wlanis, T. Hatzenbichler and C. Redl	
Microscopic Examination of the Fracture Surfaces of an H 13 Hot Extrusion Die due to Failure at the Initial Usage Stage	177
D. Tseronis, I.F. Sideris, C. Medrea and I. Chicinaş	
Simulation of Direct Extrusion Process and Optimal Design of Technological Parameters Using FEM and Artificial Neural Network	185
D. Karayel	
Numerical Simulation of Combined Forward-Backward Extrusion	193
B. Grizelj, M. Plancak and B. Barisic	
Mechanical Solutions for Hot Forward Extrusion under Plane Strain Conditions by upper Bound Method	201
R. Domingo, A.M. Camacho, E.M. Rubio Alvir and M.A. Sebastián	
Different Possibilities of Process Analysis in Cold Extrusion	209
M. Plancak, B. Barisic and B. Grizelj	
A New Low Friction Die Design for Equal Channel Angular Extrusion	215
T. Canta, D. Frunză, E. Szilagyi and M. Lungu	
Modeling Approach for Determination of Backward Extrusion Strain Energy on AlCu5PbBi	221
B. Barisic, B. Grizelj and M. Plancak
