

Table of Contents

Preface

Committees

I. Keynotes

Combined Numerical Simulation and Microstructure Characterization for Prediction of Physical Properties in Extruded Aluminum Alloys

W.Z. Misiolek and W.R. Van Geertruyden 1

Towards Predictive Control of Extrusion Weld Seams: An Integrated Approach

A.J. den Bakker, R.J. Werkhoven, W.H. Sillekens and L. Katgerman 9

II. Extrusion Benchmark

Extrusion Benchmark 2009 Experimental Analysis of Deflection in Extrusion Dies

D. Pietzka, N. Ben Khalifa, L. Donati, L. Tomesani and A.E. Tekkaya 19

III. Microstructure and Heat Treatment

Physically Based Microstructure Modelling of AA6082 during Hot Extrusion

F. Krumpals, P. Sherstnev, S. Mitsche, S. Randjelovic and C. Sommitsch 27

An Assessment of the Grain Structure Evolution during Hot Forward Extrusion of Aluminum Alloy 7020

A. Foydl, N. Ben Khalifa, A. Brosius and A.E. Tekkaya 35

Modeling and Simulation of Microstructure Evolution in Extruded Aluminum Profiles

F. Parvizian, T. Kayser and B. Svendsen 43

Simulation of the Quench Sensitivity of the Aluminum Alloy 6082

A. Güzel, A. Jäger, N. Ben Khalifa and A.E. Tekkaya 51

Simulation of Gas and Spray Quenching during Extrusion of Aluminium Alloys

M. Reich, S. Schöne, O. Kessler, M. Nowak, O. Grydin, F. Nürnberger and M. Schaper 57

An Approach to Simulate Shape Distortion due to Cooling in Aluminum Extrusion

S. Bikass, B. Andersson and X. Ma 65

Analysis of Polypropylene Deformation in a 135° ECAE Die: Experiments and Three-Dimensional Finite Element Simulations

B. Aour, F. Zaïri, M. Naït-Abdelaziz, J.M. Gloaguen and J.M. Lefebvre 71

IV. Seam Welds and Composite Extrusion

Analysis of Joint Quality along Welding Plane

E. Ceretti, L. Filice, L. Fratini, F. Gagliardi, C. Giardini and D. La Spisa 79

Accurate Welding Line Prediction in Extrusion Processes

T. Kloppenborg, N. Ben Khalifa and A.E. Tekkaya 87

Simulation of Porthole Die Extrusion Process Comparing NEM and FEM Modelling

I. Alfaro, F. Gagliardi, E. Cueto, L. Filice and F. Chinesta 97

Numerical Analysis of Aluminum Alloys Extrusion through Porthole Dies

J. Zasadziński, A. Rękas, W. Libura, J. Richert and D. Lesniak 105

Simulation of the Co-Extrusion of Hybrid Mg/Al Profiles

J. Muehlhause, S. Gall and S. Müller 113

Effect of Tube Wall Thickness in Joining of Aluminum Tube and Holed Rib by Extrusion

T. Moroi, T. Kuboki and M. Murata 121

Numerical and Experimental Investigations of the Production Processes of Coextruded Al/Mg-Compounds and the Strength of the Interface

K. Kittner and B. Awiszus 129

The Use of Extruded Profiles as Filling Material in Friction Stir Welding (FSW)

L. Donati and L. Tomesani 137

V. Material Flow and Constitutive Equations

Analysis of Metal Flow of Aluminum through Long Choked Die Channels H.S. Valberg	145
Friction in Double Action Extrusion L.L. Wang, J. Zhou and J. Duczcyk	153
A New Cone-Friction Test for Evaluating Friction Phenomena in Extrusion Processes C. Karadogan, R. Grueebler and P. Hora	161
Modelling of Thermo-Mechanical Behaviour of Magnesium Alloys during Indirect Extrusion S. Ertürk, D. Steglich, J. Bohlen, D. Letzig and W. Brocks	167
Numerical Analysis of Four-Hole Extrusion of Aluminum Alloys W. Libura, A. Rękas and D. Lesniak	173
Computer-Aided Simulation of Metal Flow through Curved Die for Extrusion of Square Section from Square Billet K.P. Maity, A.K. Rout and K. Majhi	181
Three Dimensional Upper Bound Modelling for Extrusion of Round-to-Octagon Section Using Linearly Converging Die K.P. Maity and A.K. Rout	189

VI. Dies and Tools

Measuring the Deformation of a Flat Die by Applying a Laser Beam on a Reflecting Surface W. Assaad, B. Geijselaers and K.E. Nilsen	197
Creep-Fatigue Interaction in the AISI H11 Tool Steel B. Reggiani, M. D'Ascenzo, L. Donati, J. Zhou and L. Tomesani	205
FEM-Assisted Design of a Multi-Hole Pocket Die to Extrude U-Shaped Aluminum Profiles with Different Wall Thicknesses G. Fang, J. Zhou and J. Duczcyk	213
Localization of the Shear Zone in Extrusion Processes by Means of Finite Element Analysis M. Kammler	221
A Case Study to Solve the Problem of Wall Thickness Attenuation during Extrusion to Produce a Complex Hollow Magnesium Profile L.X. Li, J. Zhou, X. He, J. Zhou and J. Duczcyk	227
Manufacturing of Carbon/Resin Separator by Die Sliding Extrusion M. Hoshino and K. Suzuki	235

VII. Process Control and Optimization

Prediction of the Extrusion Load and Exit Temperature Using Artificial Neural Networks Based on FEM Simulation J. Zhou, L.X. Li, J. Mo, J. Zhou and J. Duczcyk	241
Contrasting Models to Determine the Approximate Extrusion Process Conditions for the First Billet M. Sabater and M.L. García-Romeu	249
Study of Flow Balance and Temperature Evolution over Multiple Aluminum Extrusion Press Cycles with HyperXtrude 9.0 A. Farjad Bastani, T. Aukrust and I. Skauvik	257
Numerical Design of Extrusion Process Using Finite Thermo-Elastoviscoplasticity with Damage. Prediction of Chevron Shaped Cracks C. Labergère, K. Saanouni and P. Lestriez	265
Integrated Extruder Plant Automation with Learning Control M. Pandit	273
