## Chapter 1: Aerodynamics

|                                                                                                                                                                                                                             |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Wake Frequency Analysis of a Plunging Airfoil with Trailing-Edge Strips</b><br>F. Ajalli, M. Mani and M. Gharakhanlou                                                                                                    | 3   |
| <b>Numerical Sensitivity Analysis of Axial Flow Fan 3D Aerodynamics under Off Design Conditions</b><br>P.K. Akula, B. Singh and V.G. Nair                                                                                   | 8   |
| <b>A Study on the Effect of Upstream Square Blockage of a Rotating Cylinder</b><br>X.H. Cheong, A.S.M. Rafie, F.I. Romli, M.T.H. Sultan and N. Yidris                                                                       | 13  |
| <b>Generic Modeling and Parametric Study of Flapping Wing Micro-Air-Vehicle</b><br>H. Djojodihardjo, A.S.S. Ramli and S. Wiriadidjaja                                                                                       | 18  |
| <b>Ventilated Brake Disk Air Streamlining Using Curved Vane</b><br>K.M. Munisamy, M.Z. Yusoff and S.K. Thangaraju                                                                                                           | 26  |
| <b>An Experimental Investigation on the Effect of Various Swirl Atomizer Orifice Geometries on the Air Core Diameter</b><br>M.S.F.M. Rashid, A.H.A. Hamid, C.S. Ow and Z.A. Ghaffar                                         | 32  |
| <b>The Effect of Canard to the Aerodynamic Behavior of Blended Wing Body Aircraft</b><br>Z.M. Ali, W. Kuntjoro and W. Wirachman                                                                                             | 38  |
| <b>The Aerodynamics Investigation of Vortex Trap on Helicopter Blade</b><br>M.F. Yaakub, A.A. Wahab, M.F. Abdul Ghafir, S.N.M. Mohd Yunos, S.J.M.M. Salleh, Q.E. Kamarudin and M.F.M. Masrom                                | 43  |
| <b>Effects of Blowing Ratio on Multiple Shallow Angle Film Cooling Holes</b><br>K. Abdullah and K.I. Funazaki                                                                                                               | 49  |
| <b>Assessment on Effects of Under-Relaxation Factors on 2D Incompressible Laminar Flow over a Backward-Facing Step (BFS)</b><br>Y. Sinnasamy, N.A. Yahaya, S. Basri, A.A. Jaafar and A.S.M. Rafie                           | 55  |
| <b>Aerodynamic Interference Correction Methods Case: Subsonic Closed Wind Tunnels</b><br>S. Wiriadidjaja, A.S.M. Rafie, F.I. Romli and O.K. Ariff                                                                           | 60  |
| <b>Coupled Analytical-Numerical Procedure to Solve the Double Wedge Spiked Supersonic Intake Flow Field</b><br>H.H. Al-Kayiem, T.W. Salih and D. Govindasamy                                                                | 67  |
| <b>Rotor-Stator Distance Effect onto Axial Fan Performance Improvement</b><br>K.M. Munisamy, R. Govindasamy and S.K. Thangaraju                                                                                             | 73  |
| <b>Comparative Study of Vortex Generator Orientation on Wing Surface Considering Delta Vortex Generators</b><br>S.M.A. Aftab and P.S. Murthy                                                                                | 79  |
| <b>Cavity Effect of Synthetic Jet Actuators Based on Piezoelectric Diaphragm</b><br>M.N. Dahalan, S. Mansor and A. Ali                                                                                                      | 85  |
| <b>Experimental and Numerical Investigation onto 1250mm Axial Fan</b><br>K.M. Munisamy, R. Govindasamy and S.K. Thangaraju                                                                                                  | 91  |
| <b>Numerical Investigation of Flow-Induced Vibration of a Cantilever Beam for a Piezoelectric Energy Harvester</b><br>M.R. Rasani, J.Y. Tu and N.A.N. Mohamed                                                               | 97  |
| <b>Experimental Study of Free Stream Turbulent Effects on Dynamic Stall of Pitching Airfoil by Using Particle Image Velocimetry</b><br>T.S. Leu, J.M. Yu, C.C. Hu, J.J. Miao, S.Y. Liang, J.Y. Li, J.C. Cheng and S.J. Chen | 103 |
| <b>The Effects of Spatial Resolution in Turbulent Boundary Layers with Pressure Gradients</b><br>Z. Harun, M.D. Isa, M.R. Rasani and S. Abdullah                                                                            | 109 |

## Chapter 2: Aerospace Structures and Material

|                                                                                                                                                                                                                                       |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Effect of Laser Pulse Fatigue on the Mechanical Characteristics of a CFRP Plate</b><br>S.C. Hong, J.R. Lee, S.Y. Chong and C.Y. Park                                                                                               | 121 |
| <b>The Effect of Laser Cutting Parameters on the Aerospace Structure Panel of CFRP Composite Material</b><br>W. Saidin, E.A. Rahim, M.S. Mustafa and N.A. Rahman                                                                      | 127 |
| <b>Modal Properties of a Cantilevered Laminated Woven Composite Plate as Affected by Stacking Sequence and Fiber Orientation: An Experimental Study</b><br>D.L. Majid, M.N.A. Sani, F. Mustapha, H. Hanafi and M.T.H. Sultan          | 132 |
| <b>Damage Identification and Classification in CFRP Laminates – A SEM Based Study</b><br>M.T.H. Sultan, N. Yidris, F. Mustapha, A.S.M. Rafie and D.L. Majid                                                                           | 138 |
| <b>Optimization of the Composite Truncated Cone Structure Layers under Buckling Load</b><br>H.S.S. Pour, M. Sadighi and A. Kami                                                                                                       | 144 |
| <b>Computational Simulation for Static and Dynamic Load of Rectangular Plate in Elastic Region for Analysis of Impact Resilient Structure</b><br>H. Djojodihardjo, H. Jamali, A. Shokrani, F. Mustapha, R. Zahari and S. Wiriadidjaja | 150 |
| <b>Beneficial Patch Repair Effect on Fatigue Crack Growth of Al-Alloy 7050</b><br>M. Benachour, F.Z. Seriari, N. Benachour and M. Benguediab                                                                                          | 158 |
| <b>Geometric Non-Linear Analysis of Composite Laminated Plates Using Higher Order Finite Strip Element</b><br>R. Zahari, F. Mustapha, D.L.A. Majid, A.S.M. Rafie and T.H. Sultan                                                      | 165 |
| <b>Failure Mechanics of Uniformly Compressed Thin-Walled Box-Section Struts</b><br>N. Yidris, J. Loughlan, M.T.H. Sultan and A.S.M. Rafie                                                                                             | 172 |
| <b>Prediction of Energy Absorption Capability of Curved Panel Structure; For Wing Leading Edge Study</b><br>N. Omar, N.A.M. Khalid, N.F. Shamsudin and Y. Aminanda                                                                    | 178 |
| <b>Computational Analysis of a Truss Type Fuselage</b><br>I.A. Yousif, M.A.M. Zein and M.E.A. Elsayed                                                                                                                                 | 183 |
| <b>Damage Classification in CFRP Laminates Using Principal Component Analysis (PCA) Approach</b><br>M.T.H. Sultan, A.S.M. Rafie, N. Yidris, F. Mustapha and D.L. Majid                                                                | 189 |
| <b>Multiple Delaminations Growth in Composite Laminates under Compressive Cyclic Loading in Post-Buckling</b><br>H. Hosseini-Toudeshky, M.S. Goodarzi and B. Mohammadi                                                                | 195 |
| <b>Structural Analysis of Light Aircraft Wing Components</b><br>A. Bushra, M. Mahdi and M.A. Elhadi                                                                                                                                   | 201 |
| <b>Buckling Analysis of Ring-Stiffened Laminated Composite Cylindrical Shells by Fourier-Expansion Based Differential Quadrature Method</b><br>S. Barani, D. Poorveis and S. Moradi                                                   | 207 |
| <b>The Behaviour of Fibre-Metal Laminates under High Velocity Impact Loading with Different Stacking Sequences of Al Alloy</b><br>A.A. Ramadhan, A.R.A. Talib, A.S.M. Rafie and R. Zahari                                             | 213 |
| <b>Composite Repair of Curved Stiffened Aluminum Panels under Combined Tension and Shear Cyclic Loadings</b><br>H. Hosseini-Toudeshky, M.A. Ghaffari and B. Mohammadi                                                                 | 219 |
| <b>Fatigue Damage Mechanism of Titanium in Inert Environments</b><br>N.I. Zahari, H. Yussof and M. Sugano                                                                                                                             | 225 |

### **Chapter 3: Propulsion**

|                                                                                                                                                                                                                                                    |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Effect of Rotor Tip Gap Variation at the Rear Stages of an Axial Flow Compressor</b><br>A.M. Pradeep, R.N. Chiranthan, D. Dutta and B. Roy                                                                                                      | 233 |
| <b>Impact of Operating and Health Conditions on a Helicopter Turbo-Shaft Hot Section Component Using Creep Factor</b><br>M.F. Abdul Ghafir, Y.G. Li, A.A. Wahab, S.N.M. Mohd Yunos, M.F. Yaakub, S.J.M.M. Salleh, Q.E. Kamarudin and M.F.M. Masrom | 239 |
| <b>An Investigation on the Effect of Variable Valve Timing on Piston Engine for Lightweight Aircraft</b><br>A.A. Sabaruddin, S. Wiriadidjaja, D.L.A.A. Majid, H. Djojodihardjo and M.T. Ahmad                                                      | 245 |

|                                                                                                                                                               |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Preliminary Development of Electric Motorcycle Engine for Sport Aviation Vehicles</b><br>M.K. Jamil, M.E. Kadir, M.Z. Zainol, A.H. Abdullah and A.Z. Bakar | 250 |
| <b>Investigation into the Temperature Impact on O-Ring's Sealing Performance Using Advanced Stress Relaxation Test</b><br>Y. Liu and C.W. Wilson              | 255 |
| <b>Thermodynamic Analysis of Flow Field at the End of Combustor Simulator</b><br>K. Ehsan, N.A.C. Sidik and M.A.S.M. Bozorg                                   | 261 |
| <b>Mathematical Model Development of TMM25-Single Shaft Turbojet Engine</b><br>K.I. Azzabi and A. Elmahmodi                                                   | 267 |

## Chapter 4: Aerospace Design

|                                                                                                                                                                                                     |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>A Novel Design of Landing Gear Oleo Strut Damper Using MR Fluid for Aircraft and UAV's</b><br>C.B. Asthana and R.B. Bhat                                                                         | 275 |
| <b>Design of Optimum Torsionally Flexible PropRotors for Tilt-Body MAVs</b><br>F. Zawawi, J. Morlier, G. Grondin and J.M. Moschetta                                                                 | 281 |
| <b>A Preliminary Study of Baseline Design Architecture Effects on Aircraft Redesign Risks</b><br>F.I. Romli, S. Wiriadidjaja and A.S.M. Rafie                                                       | 287 |
| <b>A New Concurrent Engineering – Multi Criteria Decision Making Technique for Conceptual Design Selection</b><br>N. Fatchurrohman, S. Sulaiman, S.M. Sapuan, M.K.A. Ariffin and B.T.H.T. Baharudin | 293 |
| <b>Conceptual Design of Solar Powered Unmanned Aerial Vehicle</b><br>N.H. Abu-Hamdeh, K.A. Alnefaie and M.K. Al-Hajjaj                                                                              | 299 |
| <b>Design and Analysis of UAV Fuselage</b><br>T. Singhanart, C. Srimontok, N. Pisitpan, S. Chitimaworaphan and W. Mongkhonchaiwiwat                                                                 | 305 |
| <b>Computer Aided Design, Analysis and Prototype Development of 2-Axis Stabilized Aerial Image Capturing</b><br>M.M. Zihad, K.A. Ahmad and A.H. Kadarman                                            | 310 |
| <b>Preliminary Design of Solar Powered Unmanned Aerial Vehicle</b><br>S. Jashnani, P. Shaholia, A. Khamker, M. Ishfaq and T. Nada                                                                   | 315 |
| <b>Aircraft Dynamically Similar Model Design Using Simulated Annealing</b><br>A. Shakoori, M. Mortazavi and H. Nobahari                                                                             | 323 |

## Chapter 5: Aerospace System Performance

|                                                                                                                                                                               |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Model Reference Adaptive Control Design for a Ducted Fan Air Vehicle in Vertical Plane</b><br>E. Fadaeian and A. Banazadeh                                                 | 331 |
| <b>Design and Test of a Vertical-Axis Wind Turbine with Pitch Control</b><br>J.J. Miao, S.Y. Liang, R.M. Yu, C.C. Hu, T.S. Leu, J.C. Cheng and S.J. Chen                      | 338 |
| <b>Implementation of Extreme Low Power Micro-Controller for a Wireless Structural Health Monitoring (SHM) System</b><br>M.Z. Zainol, F. Mustapha, M.T.H. Sultan and N. Yidris | 344 |
| <b>Development of Simple-Structure Magnetic Membrane Actuator for Synthetic Jet Application</b><br>A. Pimpin, K. Intarasuksanti, E. Wongweerayoot and W. Srituravanich        | 350 |
