Preface and Committees

Chapter 1: Markets and Cast House Layouts

Improving Casthouse Throughput Using Discrete-Event Modelling B. Gunn and Y. Frayman	3
------------------------------------------------------------------------------------------------	---

Chapter 2: Controlling Melt Loss

A Historical Perspective on Dross Processing R.D. Peterson	13
The Approach to Zero Waste from Smelter and Secondary Dross Processing D.J. Roth	24
Preserving Metal Units Utilising the Latest Generation of Aluminium Dross Press A. Peel, J. Herbert, R. Connaughton and H. Cotton	33
Crucible Fluxing with Hycast™ RAM- Effect on Metal Quality and Operational Cost T. Haugen, I.K. Steen, E. Myrbostad and A. Håkonsen	44
SPH Modeling of the Effect of Crucible Tipping Rate on Oxide Formation M. Prakash, P.W. Cleary and J.A. Taylor	54
Oxidation of Rolled and Flash Anodized 3000 Aluminum in Air, Nitrogen, Oxygen, and Carbon Dioxide Atmospheres D. Stevens, A. Kvithyld and T.A. Engh	63

Chapter 3: Furnaces and Refractories

A Historical Perspective of Aluminium Casthouse Furnace Developments P. Whiteley	73
Improved Monolithic Materials for Lining Aluminium Holding and Melting Furnaces – Roof, Upper Walls and Flue A. Wynn, J. Coppack, T. Steele and G. Latter	80
Phosphate Bonded Monolithic Refractory Materials with Improved Hot Strengths as a Potential Replacement for Phosphate Bonded Bricks J. Decker	90
Cost Savings in the Cast House through Optimizing Furnace Operation, Staff Training and Associated Variables J.T. Grayson	104
Thermocouple Protection Tube Options for Aluminium Casthouses P. Herd and J. Chen	112
The Challenges to Supply New Casthouse Furnaces in a Modern Aluminium Smelter Project M. Unitt, G. Guest, S. Williams and G. Proffitt	122

Chapter 4: Safety

Can the Aluminium Industry Learn from another Industry's Catastrophe? A.W. Lowery and T. Bateman	133
------------------------------------------------------------------------------------------------------------	-----

Chapter 5: Melt Quality and Treatment

Increasing Cast House Throughput through “In-Spec First Time” G. Girard, M. Bishop, P. Austen and L. Swain	141
----------------------------------------------------------------------------------------------------------------------	-----

Control and Removal of Impurities from Al Melts: A Review M.A. Dewan, M.A. Rhamdhani, J.B. Mitchell, C.J. Davidson, G.A. Brooks, M. Easton and J.F. Grandfield	149
Development of a Fused Magnesium Chloride Containing Refining Flux Based on a Ternary System J.H. Courtenay	161
Recent Results with New Filter Technologies Based on the Principle of Multi Stage Filtration with Grain Refiner Added in the Intermediate Stage J.H. Courtenay, F. Reusch and S. Instone	169
Automatic Control of Molten Metal Flow for Improving Casting Performance T. Jarlsmark, J. Strömbeck, M. Turner and J. Wilkins	179

Chapter 6: Direct Chill Casting

The Development of Alsim – a Modelling Tool for Direct Chill Casting, Twin Roll Casting, Wheel and Belt Casting and Chain Conveyor Casting D. Mortensen, H.G. Fjær, D. Lindholm, M. Rudshaug and E.A. Sørheim	187
Aluminum Ingot Thermal Stress Development Modeling of the Wagstaff® Epsilon™ Rolling Ingot DC Casting System during the Start-up Phase B. Zhang and C. Shaber	196
Mold and Casting Table Maintenance Management System at Aluar: A Key to Quality Billets and Saving Costs L.S. Batalla, O.A. Godoy and M.V. Canullo	208
Hot Tearing in Al-Mg-Si Alloys with Minor Additions of Cu or Mn L. Sweet, J.A. Taylor, M.J. Couper and M.A. Easton	217

Chapter 7: Ingot and Continuous Casting

Implementation of CASTfill Low-Dross Pouring System for Ingot Casting V. Nguyen, P. Rohan, J.F. Grandfield, A. Levin, K. Naidoo, K. Oswald, G. Girard, B. Harker and J. Rea	227
3D Thermo-Mechanical Modelling of Wheel and Belt Continuous Casting J.F. Grandfield, S. Dablement, H.G. Fjær, D. Mortensen, M. Lee, V. Nguyen and G. Savage	235

Chapter 8: Alloys and Heat Treatment

Design of Secondary Alloy Compositions for High Performance Aluminium Pressure Diecastings R. Lumley	247
The Effect of Calcium on the Rolling Behaviour and Hot Tensile Properties of AA5182 D.A. Dautre and P.A. Wycliffe	256
The Metallurgy of Homogenisation B. Rinderer	264
Effect of Homogenisation Parameters on Dissolution and Precipitation in Aluminium Alloy AA7150 L.J. Wang, D.K. Xu, P.A. Rometsch, S.X. Gao, Y. Zhang, Z.B. He, M.J. Couper and B.C. Muddle	276
