

Table of Contents

Preface, Committees, Sponsors

Chapter 1: Biotechnology

Removal of Copper (II) Ions from Aqua Growth Medium by Red Yeast	3
E. Breierová, M. Čertík and I. Marova	
Functional Cereal-Derived Biomaterials Enriched with Lipophilic Compounds Prepared by Fungal Solid-State Fermentations	8
M. Čertík and T. Klempová	
Applications of New Types of Biomaterials Obtained by Fungal Solid-State Fermentation in Bakery Products Manufacturing	14
T. Klempová, J. Janštová, S. Gavurniková, M. Havrlentová and M. Čertík	
Polyhydroxyalkanoates in Bacterial Cells - More Than just Storage Materials	20
S. Řbruča, L. Doskocil, V. Krzyzanek, K. Hrubanová, P. Sedlacek, F. Mravec, O. Samek, D. Kucera, P. Benesova and I. Marova	
Interaction between Cationic Micelles and Hyaluronan	26
T. Pilgrová and M. Pekař	
Silver Nanoparticles Production with Probiotic Bacteria	32
D. Sásková, J. Pořízka, P. Kulich, A. Španová, P. Diviš and B. Rittich	

Chapter 2: Chemistry of Silicates

The Preparation of Heat Insulating Moulded Refractories	39
J. Bednárek, R. Novotný, F. Šoukal and L. Tvrdík	
Strength and Porosity of Materials on the Basis of Blast Furnace Slag Activated by Liquid Sodium Silicate	45
V. Bílek Jr., L. Pařízek, P. Kosár, J. Kratochvíl and L. Kalina	
The Role of Temperature on Hydration of Binary System of Metakaolin/Portland Cement	51
M. Boháč, R. Novotný, J. Tkacz, M. Hajdúchová, M. Palou and T. Staněk	
Possibilities of Using Plasticizers in Alkali-Activated Systems	57
L. Kalina, M. Hajdúchová, M. Langová and V. Enev	
Effect of Phosphates on the Hydration Process of Alkali Activated Materials	63
L. Kalina, V. Bílek Jr., K. Komosná, R. Novotný and J. Tkacz	
The Basics of Low Volume Weight Aerated Autoclaved Concrete Preparation	69
O. Koutný and T. Opravil	
Optimization of Alternative Aggregates Based on Fluid Combustion Fly Ashes	75
J. Kratochvíl, H. Kalousová and T. Opravil	
Verification of Synthetic Preparation of Thaumasite	80
A. Masárová	
Mechanisms of Macro-Pores Origin in the MDF Composites Fabrication	86
J. Máslík, F. Šoukal, M. Žurová, J. Koplík and J. Havlίca	
Application of Sol-Gel Method to Investigate the Influence of P_2O_5 on the Course of Reactions in $CaO-SiO_2$ System	92
J. Baraček, M. Palou, J. Máslík, J. Wasserbauer, F. Šoukal, T. Opravil and M. Boháč	
Chloride Resistance of Alkali Activated Slag Pastes with Fly Ash Replacement	98
L. Pařízek, V. Bílek Jr. and M. Březina	
The Influence of Particle Size of Cement and Different Additives on the Properties of Portland Cement Pastes	104
P. Šiler, I. Kolářová, T. Sehnal, R. Snop, T. Opravil and F. Šoukal	
Synthesis of Layered Calcium Cobaltites Intended for Thermoelectric Application	110
J. Švec, E. Bartoníčková, A. Jebavá, J. Máslík and P. Ptacek	
The Influence of Barium Compounds on the Formation of Portland Cement Clinker	116
A. Zezulová, T. Staněk and T. Opravil	

Chapter 3: Environmental Chemistry and Technology in Environmental Engineering

Are Terrestrial Organisms Able to Live in Contaminated Soil after Fire-Fighting?	125
Š. Hřibová, M. Vavrova and H. Zlamalova Gargosova	
Reactivity-Mapping Tool Based on Diffusion Techniques for Characterization of Biocolloids	130
J. Smilek, M. Kalina, M. Laštůvková, I. Türkeová, P. Sedlacek and M. Klučáková	
Fluorescence Analysis of Cu(II), Pb(II) and Hg(II) Ion Binding to Humic and Fulvic Acids	135
V. Enev, I. Türkeová, J. Szewieczková, L. Doskocil and M. Klučáková	
The Leachability of Heavy Metals from Alkali-Activated Fly Ash and Blast Furnace Slag Matrices	141
J. Koplík, M. Smolková and J. Tkacz	
Application of Simplified Mathematical Model on Gas Scrubbing Process	147
J. Kalivoda and T. Svěrák	
TiO₂ Surface Coating of Mn-Zn Dopped Ferrites Study	153
T. Solný, P. Ptacek, J. Másilko, J. Tkacz, E. Bartoníčková, S. Daviðsdóttir and R. Ambat	
Preparation and Utilization of Alumina Oxide Membranes for Sensor Devices	159
H. Kynclová, J. Smilek, P. Sedlacek, J. Prášek, M. Klučáková and J. Hubálek	

Chapter 4: Materials and Technologies for Organic Electronics

SEC-DAD - Effective Method for the Characterization of π-Conjugated Polymers	167
O. Trhlíková, S. Hladyš, J. Sedláček and D. Bondarev	
Semiconducting Conjugated Copolymer Series for Organic Photonics and Electronics	173
V. Cimrová, V. Pokorná, V. Dzhabarov and D. Výprachtický	
Simple Method for the Determination of the Type of Charge Carriers in Semiconductors	179
P. Florian, J. Pospisil and O. Zmeskal	
Optical and Optoelectronic Characterization of Novel Diketopyrrolopyrroles for Organic Electronics and Photonics	183
M. Sionova, M. Vala, J. Krajčovič and M. Weiter	
The Influence of Diketopyrrolopyrrole Chemical Structure on Organic Field-Effect Transistors Performance	189
S. Stříteský, J. Krajčovič, M. Vala and M. Weiter	
Organic Sensor for Cardiomyocytes Research	194
O. Salyk, L. Omasta, M. Vala and M. Weiter	
Optical Characterization of Graphene Oxide Films by Spectroscopic Ellipsometry	199
V. Schmiedová, J. Pospisil, O. Zmeskal and V. Vretenar	

Chapter 5: Polymer Composites and Nanocomposites

Morphogenesis of Photo-Polymerized Dimethacrylate Networks, Kinetics of Curing and Viscoelastic Parameters	207
Z. Bystřický and J. Jancar	
Rheological Behavior of Polystyrene-Based Nanocomposite Suspensions under LAOS	215
P. Lepcio, F. Ondreas and J. Jancar	
Force-Assembled Fe₃O₄ Particle Chains in Polyurethane Matrix	221
M. Zbončák, F. Ondreas and J. Jancar
