

Table of Contents

Preface, Committees, Sponsors

Chapter 1: Biotechnology

Removal of Copper (II) Ions from Aqua Growth Medium by Red Yeast E. Breierová, M. Čertík and I. Marova	3
Functional Cereal-Derived Biomaterials Enriched with Lipophilic Compounds Prepared by Fungal Solid-State Fermentations M. Čertík and T. Klemková	8
Applications of New Types of Biomaterials Obtained by Fungal Solid-State Fermentation in Bakery Products Manufacturing T. Klemková, J. Janštová, S. Gavurníková, M. Havrlentová and M. Čertík	14
Polyhydroxyalkanoates in Bacterial Cells - More Than just Storage Materials S. Obruča, L. Doskocil, V. Krzyzanek, K. Hrubanova, P. Sedlacek, F. Mravec, O. Samek, D. Kucera, P. Benesova and I. Marova	20
Interaction between Cationic Micelles and Hyaluronan T. Pilgrová and M. Pekař	26
Silver Nanoparticles Production with Probiotic Bacteria D. Sásková, J. Pořízka, P. Kulich, A. Španová, P. Diviš and B. Rittich	32

Chapter 2: Chemistry of Silicates

The Preparation of Heat Insulating Moulded Refractories J. Bednárek, R. Novotný, F. Šoukal and L. Tvrdík	39
Strength and Porosity of Materials on the Basis of Blast Furnace Slag Activated by Liquid Sodium Silicate V. Bílek Jr., L. Pařízek, P. Kosár, J. Kratochvíl and L. Kalina	45
The Role of Temperature on Hydration of Binary System of Metakaolin/Portland Cement M. Boháč, R. Novotný, J. Tkacz, M. Hajdúchová, M. Palou and T. Staněk	51
Possibilities of Using Plasticizers in Alkali-Activated Systems L. Kalina, M. Hajdúchová, M. Langová and V. Enev	57
Effect of Phosphates on the Hydration Process of Alkali Activated Materials L. Kalina, V. Bílek Jr., K. Komosná, R. Novotný and J. Tkacz	63
The Basics of Low Volume Weight Aerated Autoclaved Concrete Preparation O. Koutný and T. Opravil	69
Optimization of Alternative Aggregates Based on Fluid Combustion Fly Ashes J. Kratochvíl, H. Kalousová and T. Opravil	75
Verification of Synthetic Preparation of Thaumasite A. Masárová	80
Mechanisms of Macro-Pores Origin in the MDF Composites Fabrication J. Másilko, F. Šoukal, M. Žůrová, J. Koplík and J. Havlica	86
Application of Sol-Gel Method to Investigate the Influence of P₂O₅ on the Course of Reactions in CaO-SiO₂ System J. Baráček, M. Palou, J. Másilko, J. Wasserbauer, F. Šoukal, T. Opravil and M. Boháč	92
Chloride Resistance of Alkali Activated Slag Pastes with Fly Ash Replacement L. Pařízek, V. Bílek Jr. and M. Březina	98
The Influence of Particle Size of Cement and Different Additives on the Properties of Portland Cement Pastes P. Šiler, I. Kolářová, T. Sehnal, R. Snop, T. Opravil and F. Šoukal	104
Synthesis of Layered Calcium Cobaltites Intended for Thermoelectric Application J. Švec, E. Bartoničková, A. Jebavá, J. Másilko and P. Ptacek	110
The Influence of Barium Compounds on the Formation of Portland Cement Clinker A. Zezulová, T. Staněk and T. Opravil	116

Chapter 3: Environmental Chemistry and Technology in Environmental Engineering

Are Terrestrial Organisms Able to Live in Contaminated Soil after Fire-Fighting? Š. Hřibová, M. Vavrova and H. Zlamalova Gargosova	125
Reactivity-Mapping Tool Based on Diffusion Techniques for Characterization of Biocolloids J. Smilek, M. Kalina, M. Laštůvková, I. Türkeová, P. Sedlacek and M. Klučáková	130
Fluorescence Analysis of Cu(II), Pb(II) and Hg(II) Ion Binding to Humic and Fulvic Acids V. Enev, I. Türkeová, J. Szewieczková, L. Dskocil and M. Klučáková	135
The Leachability of Heavy Metals from Alkali-Activated Fly Ash and Blast Furnace Slag Matrices J. Koplík, M. Smolková and J. Tkacz	141
Application of Simplified Mathematical Model on Gas Scrubbing Process J. Kalivoda and T. Svěrák	147
TiO₂ Surface Coating of Mn-Zn Doped Ferrites Study T. Solný, P. Ptacek, J. Másilko, J. Tkacz, E. Bartoníčková, S. Daviðsdóttir and R. Ambat	153
Preparation and Utilization of Alumina Oxide Membranes for Sensor Devices H. Kynclová, J. Smilek, P. Sedlacek, J. Prášek, M. Klučáková and J. Hubálek	159

Chapter 4: Materials and Technologies for Organic Electronics

SEC-DAD - Effective Method for the Characterization of π-Conjugated Polymers O. Trhlíková, S. Hladýš, J. Sedláček and D. Bondarev	167
Semiconducting Conjugated Copolymer Series for Organic Photonics and Electronics V. Cimrová, V. Pokorná, V. Dzhabarov and D. Výprachtický	173
Simple Method for the Determination of the Type of Charge Carriers in Semiconductors P. Florian, J. Pospisil and O. Zmeskal	179
Optical and Optoelectronic Characterization of Novel Diketopyrrolopyrroles for Organic Electronics and Photonics M. Sionova, M. Vala, J. Krajčovič and M. Weiter	183
The Influence of Diketopyrrolopyrrole Chemical Structure on Organic Field-Effect Transistors Performance S. Střiteský, J. Krajčovič, M. Vala and M. Weiter	189
Organic Sensor for Cardiomyocytes Research O. Salyk, L. Omasta, M. Vala and M. Weiter	194
Optical Characterization of Graphene Oxide Films by Spectroscopic Ellipsometry V. Schmiedová, J. Pospisil, O. Zmeskal and V. Vretenar	199

Chapter 5: Polymer Composites and Nanocomposites

Morphogenesis of Photo-Polymerized Dimethacrylate Networks, Kinetics of Curing and Viscoelastic Parameters Z. Bystřický and J. Jancar	207
Rheological Behavior of Polystyrene-Based Nanocomposite Suspensions under LAOS P. Lepcio, F. Ondreas and J. Jancar	215
Force-Assembled Fe₃O₄ Particle Chains in Polyurethane Matrix M. Zbončák, F. Ondreas and J. Jancar	221
