

Table of Contents

Preface and Committees

I. Applied Superconductivity

Spark Plasma Synthesis and Sintering of Superconducting MgB₂-Based Materials

T. Prikhna, J.G. Noudem, W. Gawalek, A.G. Mamalis, A. Soldatov, Y. Savchuk, V. Moshchil, M. Eisterer, H.W. Weber, S. Dub, T. Habisreuther, J. Dellith, S.J. You, C. Schmidt, F. Karau, U. Dittrich, I. Vajda, N. Sergienko, V. Sokolovsky, D. Litzkendorf, X. Chaud, V. Sverdun and R. Kuznetsov

3

High Speed Propulsion System for UAQ4 Magnetic Levitating Train

G. D'Ovidio and F. Crisi

9

Novel Application of the Perfect Closed Superconducting Loop Made of HTS Wire

J. Kósa and I. Vajda

15

Benchmark Solutions for Magnetic Fields in the Presence of Two Superconducting Spheres

I.R. Ceric and K.S.C.M. Kotuwage

21

Measuring AC Losses and Critical Current of High Pressure Synthesized MgB₂ Bulk Rings by the Transformer Method

V. Meerovich, V. Sokolovsky, T. Prikhna and W. Gawalek

27

Numerical Simulation of MgB₂ Superconducting Magnetic Energy Storage Coil

A.G. Mamalis, A. Kladas and I.D. Theodorakopoulos

33

II. Innovative Magnetic Materials

Construction of the Pulsed High Magnetic Field Generator up to 33T and the Enhancements of the Magnetic Coercivity in High Fields

Y. Nakahata, K. Yamada, J.L. Luo, H. Shimoji, B.E. Borkowski, T. Todaka and M. Enokizono

41

Spin-Lattice Relaxation of Dipolar Energy in Fluid Confined to Nanosize Cavities

G. Furman and S. Goren

47

Fe-Mn-Si/6.5wt%Si-Fe Bilayer Ribbons produced by Using Melt Spinning Technique

D. Imamura, T. Todaka and M. Enokizono

53

Metamaterial Based High Impedance Surface with Band-Pass Frequency Response

A. de Sabata, L. Matekovits, I. Peter, U.L. Rohde and A.M. Silaghi

59

The Sigma Phase Evaluation in Duplex Stainless Steel Using ECT Method

C.G. Camerini, G. Psuj, T. Chady and J.M.A. Rebello

65

Some Size and Quantum Effects in Molecular Nanostructures

P.J. Kervalishvili and M.G. Khachidze

71

III. Advanced Measurements and Testing Techniques

Temperature Distribution Sensors Based on the Magnetostrictive Delay Line Principle

E. Hristoforou and A.G. Mamalis

79

Experimental Study on the Iron Loss Curve at High Field Strength of Non-Oriented Electrical Steel Sheet

T. Kanada, A. Kutsukake, Y. Kido, T. Ikeda and M. Enokizono

84

Evaluation of the Iron Loss Distribution of the Actual Stator Core Using Small Excitation Inner Cores

M. Oka, S. Kazunori, K. Makoto and M. Enokizono

90

Magnetic Measurement and Model Based Characterisation of Phase Transformation in Lean Duplex Stainless Steel

I. Mészáros

96

Alternating Magnetic Field Responses of Magnetic Fluid Drop Adsorbed to a Small Permanent Magnet

S. Sudo, D. Asano, H. Takana and H. Nishiyama

102

| | |
|---|-----|
| Vibration Characteristics of Magnetic Fluid Droplet Adsorbed to Magnetized Needlepoint in Alternating Magnetic Field | 108 |
| S. Inomata, S. Sudo, H. Takana and H. Nishiyama | |
| Development and Verification of Viscoelasticity Measurement System of MR Fluids in Magnetic Field | 114 |
| Y. Enokizono, T. Todaka and M. Enokizono | |
| Observation of Material Degradation under Fatigue and Static Loading Condition Using Selected Electromagnetic NDT Methods | 120 |
| G. Psuj, T. Chady and M. Enokizono | |
| Development of Miniature Transducer-Type Magnetic Property Measurement for Motor Stator Core | 127 |
| S. Nagata, Y. Kido and M. Enokizono | |
| Energy and Entropy Based Signal Processing for Terahertz Inspection of Homogeneous and Composite Materials Adhesive Joints | 132 |
| P. Lopato and T. Chady | |

IV. Computational Electromagnetics

| | |
|--|-----|
| High Temperature Permanent Magnet Machine Actuators for Aerospace Applications | 141 |
| E.M. Tsampouris, P.E. Kakosimos and A. Kladas | |
| Improved Dynamic E&S Vector Hysteresis Model for Non-Elliptic Magnetic Flux Density Condition and its Implementation to Finite Element Method for Iron Loss Analysis of a Three-Phase Transformer | 147 |
| H.S. Yoon, M.H. Song and C.S. Koh | |
| A Three-Element Handheld Mobile Communication Antenna for Desired Signal Reception and Reflected Signal Cancellation | 153 |
| P.R.P. Hoole, L.M.A. Raheem, R. Harikrishnan, K. Jeevan and S.R.H. Hoole | |
| Design Optimization Procedure for Amorphous Core Distribution Transformers | 159 |
| E.I. Amoiralis, M.A. Tsili and A. Kladas | |
| A New Reliability Calculation Algorithm Based on Sensitivity Analysis and its Application to Reliability-Based Robust Global Optimization of Electromagnetic Device with Uncertain Design Variables | 165 |
| Z.Y. Ren, D.H. Zhang, M.T. Pham and C.S. Koh | |
| Experimental and Theoretical Analysis of Iron Losses of Electrical Steels Subjected to Distorted Supply Voltage Waveform Conditions | 171 |
| T.D. Kefalas, Z.K. Papazacharopoulos and A. Kladas | |

V. Applications in Energy and Magnetohydrodynamics

| | |
|---|-----|
| Experimental Investigation into the Effect of a Magnetic Field on Magnetorheological Fluids under an Impact Load | 179 |
| A. Isnikurniawan, Y. Moroka, H. Ohba and T. Sawada | |
| Impact of Increased RES Generation on Power Systems Dynamic Performance | 185 |
| E.S. Karapidakis, A.G. Tsikalakis, Y.A. Katsigiannis and M. Moschakis | |
| Consideration of Array Module Design for Energy Harvesting of Power-Line Magnetic Noise | 191 |
| K. Tashiro, H. Wakiwaka and Y. Uchiyama | |
| Power Quality Considerations for Microgrids Integrating Pairs of Mechanically Coupled Electrical Machines Driven by Power Converters | 199 |
| E.M. Tsampouris, P.E. Kakosimos, C.K. Patsios and A. Kladas | |
| Simulation of Behavior of Micrometer-Size Particles in the Polishing Process of a Micro-Tube Filled with a Magnetic Fluid under Uniform Magnetic Field | 205 |
| Y. Ido, K. Arakawa, K. Asakura and H. Nishida | |
| Retention of Fuel Hydrogen Retention of Tungsten Plasma Facing Wall in Fusion Reactor | 211 |
| T. Hino, Y. Yamauchi, K. Nishimura and Y. Ueda | |

VI. Applied Electromagnetics

| | |
|--|-----|
| Measurement of Local Vector Magnetic Properties in Three-Phase Induction Motor Model Core with a Small-Sized Vector Hysteresis Sensor | 219 |
| T. Kai, S. Aihara, T. Todaka and M. Enokizono | |
| Detection of White Layer on Rail by Using SQUID | 225 |
| Y. Miyazaki, Y. Arai, K. Nagashima and H. Itozaki | |
| Non-Destructive Testing of Hardened Carbon Steel Using Frequency Sweeping Excitation and Spectrogram Method | 231 |
| T. Matsuda, Y. Tsuchida and M. Enokizono | |
| Study on Improvement of Transmission Torque for a Surface Permanent Magnet Type Magnetic Gear | 237 |
| M. Oka, T. Todaka, M. Enokizono, K. Nagaya and T. Fujita | |
| Evaluation of Ultrasonic Waveform for Flaw-Image Reconstruction Using EMAT Probe | 243 |
| Y. Nishimura and T. Suzuki | |
| Analysis and Experiment of Cylindrical Magnetic Gear | 249 |
| Y. Ando, M.A.Q. Nor Aziz, I. Murakami and K. Yamada | |
| Study of the Spinning Mechanism Resulting from Permanent Magnet Linear Actuation | 255 |
| K. Oka, F. Sun, A. Tsurumi and G. Nakamura | |

VII. Electric Power Applications

| | |
|--|-----|
| Joint Operation of a Solar Station and a Superconducting Kinetic Energy Storage Device | 263 |
| V. Sokolovsky, V. Meerovich, S. Goren, L. Chubraeva and I. Vajda | |
| Reduction of Power Grid Losses by Using Energy Efficient Distribution Transformers | 269 |
| T.D. Kefalas and A. Kladas | |
| Reduction of the Distortion Current Factor of the Current Drawn by the Electromagnetic Vibrators Supplied at Variable Frequency | 275 |
| H. Balan, M.I. Buzdugan, C. Chiorean and P. Karaissas | |
| Overview of the Alternative Topologies of Linear Generators in Wave Energy Conversion Systems | 281 |
| P.E. Kakosimos, E.M. Tsampouris, N.M. Kimoulakis and A. Kladas | |
| Techno-Economic and Environmental Evaluation of Large Scale PV Integration in Greece | 287 |
| Y.A. Katsigiannis, E.S. Karapidakis, A.G. Tsikalakis and E.G. Maravelakis | |
| Wind Turbine Control Strategy Enabling Mechanical Stress Reduction Based on Dynamic Model Including Blade Oscillation Effects | 293 |
| C. Pournaras, V. Riziotis and A. Kladas | |

VIII. Advanced Computational Techniques

| | |
|--|-----|
| A Periodical Loaded Dynamical System | 301 |
| A. Ivanyi, P. Ivanyi, M.M. Ivanyi and M. Ivanyi | |
| Reverse Engineering Legacy Finite Element Code | 307 |
| S.R.H. Hoole, T. Arudchelvam and J. Wijayakulasooriya | |
| High Efficiency Permanent Magnet Wheel Motor Design for Light Electric Vehicle Applications | 313 |
| K. Laskaris, E. Theodorou, V. Papanikolaou and A. Kladas | |
| Protein Surface Functional Imaging | 319 |
| P.D. Cristea, O. Arsene, R. Tuduce and D. Nicolau | |
| Simulation of Segmented Double-Gate MOSFETs | 325 |
| A. Reichardt and G. Varga | |
| Aircraft Mounted Neural Network Electrostatic Discharge (ESD) Location | 331 |
| P.R.P. Hoole, N.F. Aziz, V. Ganapathy, K. Jeevan, R. Harikrishnan and S.R.H. Hoole | |
