

Table of Contents

Preface and Conference Organization

Chapter 1: Development and Utilization of Solar Energy

A Power Prediction Method for Photovoltaic Power Station Based on Neutral Network Using Numerical Weather Information H.L. Zhu and J.X. Yao	3
A PV Cell Mathematical Model and MPPT Algorithm in PSCAD L.M. Xu, C. Pan and S.Q. Shao	10
A Simple and Accurate Modeling Method for Photovoltaic Cells Using Explicit Equations X.Y. Kong, Y.H. Xu, Y.W. Zeng, S. Tao and X.N. Xiao	17
Application of Prediction Algorithm of Photovoltaic Power in Distributed Photovoltaic Volatility Control H.X. Xiao, H. Chen and H. Mo	22
Application of Solar Energy and Gas Compound Hot Water Supply Technique P.J. Huang	27
Application of Solar Energy Integration Technology in Metallurgy Q.S. Liu, E.H. Wu, J. Hou, J. Li and P. Huang	33
Comprehensive Utilization of Solar Energy and Building Energy Saving Z.Q. Gong, B.Y. Zhang and Y.P. Zhang	38
Design and Implementation of Dual-Axis Solar Tracking System with GSM Fault Reporting Capability Y.E. Wu and K.C. Huang	43
Exploration of Composite Solar and Wind Power Generation Device Control L.Z. Zhang	52
Optimal Design for Photovoltaic and Photothermal Hybrid Solar Cells of Solar Powered Aircraft K.W. Sun and M. Ni	57
Preparation of Anodic Aluminum Oxide Nano-Templates on Polycrystalline Silicon Substrates G.F. Ma, H.L. Zhang, H.B. Fu, L.N. Sun and C.L. He	63
Research of the Model and MPPT Algorithm of Solar Cells J.L. Gao, Y.H. Que, D.Y. Feng and W. Chen	67
Research on Control Simulation of Photovoltaic Power Generation System Based on MPPT Y.T. Dai, Y.H. Xie and W.K. Li	74
Research on Mode of Solar Automatic Tracker Z.Y. Yuan	78
Research on the Angle of Quasi-Fixed Solar Collector X.Q. Li, X.Y. Liu and Y. Xu	84
Synthesis of Mixed TiO₂-Rare Earth Up-Conversion Material and Application in the Dye-Sensitized Solar Cells F. Xue, J. Zhang, Y.H. Wu, X.F. Wang, N. Liu, M.J. Yuan, C.X. Yang and Y. Huo	89
The Design of Remote Analysis and Control for Photovoltaic System Based on Computer Software F.S. Sheng and J.H. Hu	93
The Performance of Thermal Storage Tank in Solar Energy System X.M. Zhang and Y.R. Zhang	97
The Analysis of Solar-Earth Source Heat Pump Combined Operating J. Zhang and J.J. He	101
Study of MPPT Simulation Based on Power Prediction Method and Variable Step Incremental Conductance Method Q.R. Lu and J.H. Luo	105

Modeling and Control Technology of the Z-Source Inverter PV Grid-Connected System in the New Energy Equipment	110
X.L. Xu, L.X. Meng, Q.S. Liu and X.B. Wang	
A Photovoltaic and Commercial Power Complementary Hybrid System for University Classroom Energy-Saving Lighting	116
Y.W. Wang	
A Study of the Reliable Receivers for Dish/Stirling Solar Electric Generating System	120
J.M. Zhou, W.M. Pan, G. Yang, W.Q. Liang, J.L. Liu and S. Zhou	
Asymmetric Voltage Sag Control Strategy for Grid-Connected PV System Based on PIR Controller	128
F. Zheng, X.L. Zhang and M.C. Ding	
Calculation and Distributive Characteristics of Solar Radiation in Henan Province	132
Y.Y. Zhu, X.J. Ji, Y.J. He, Y.X. Liu and X. Luo	
Design and Implementation of a High Power Battery Charger of a Hydroelectric-Connected PV Plant	137
C.B. Ju, H. Wang, W. Feng and H.H. Xu	
Design Methods of the Space Photovoltaic Support	141
H. Su, Q.H. Ma, X.P. Tang and P.X. Wang	
Effect of Solvent Annealing for Efficient Polymer Solar Cells	147
M.H. Seo, K.J. Kim, B.Y. Han, G.S. Anand, S.H. Kim, S.W. Lee and S.W. Kang	
Effects of Progressive SiN_x Films on the Performance of Polycrystalline Silicon Solar Cells	151
P. Wang, X.F. Gou, W.T. Fan and C.C. Sun	
Exergetic Analysis of a Solar Thermal Power Plant	156
J.Q. Wu, D.F. Zhu, H. Wang and Y. Zhu	
Experimental Research on a Novel Solar Water Heating System by Using Loop Heat Pipe	163
Z.Y. Wang, X.M. Zhang, W.S. Yang and Z.W. Chen	
Key Technologies Research of New Generation Concentrating Photovoltaic	171
C.T. Liu, L. Bing, W. Tao and H.C. Li	
Preparation and Optical Properties of Gallium-Titanium Codoped Zinc Oxide Transparent Conductive Films for Solar Cells	176
T. Zhang, H. Wang, Z.Y. Zhong, C.Y. Yang and J. Hou	
Research Progress of Solar Pond Technology	180
C.J. Gao, Q. Zhang, H.H. Wu and X.P. Huang	
Study on Single-Axis Tracking PV System Measurement	185
Y.H. Dong, J.S. Huang, M.Y. Liu and L. Cao	
Study on the Output Power of the PV Power Plant Model Based on ANFIS	190
H.F. Liang, H.H. Wang and Z.X. Liu	
The Research and Design of Automatic Tracking System of the Light Based on the LOGO Controller	195
Z.J. Tang, P.Z. Yang and T. Zhang	
The Status and Trends of Crystalline Silicon PV Module Recycling Treatment Methods in Europe and China	200
J. Zhang, F. Lv, L.Y. Ma and L.J. Yang	

Chapter 2: Development and Utilization of Biomass Energy

Acid-Alkaline Two-Stage Pretreatments of Corn Stover for Enhancing Enzymatic Saccharification	207
H.S. Wang, H.L. Gao, B. Li and X.D. Mu	
Analysis on Biomass Resources and Potential of Developing Biomass Energy in Yunnan Province	212
X. Zhang, Z.S. Cai, L.H. Chen and Y. Chen	
Comparison of Different Pretreatment Methods to Increase Hydrogen Production from Cornstalk	216
C. Varrone, L. Zhao, G.L. Cao, T. Sheng, N.Q. Ren and A.J. Wang	
Comparison of Methods of Wood Chip Moisture Evaluation	222
M. Rimár and Š. Kuna	

Conversion of Fructose to 5-hydroxymethylfurfural Catalyzed by Coaled Carbon-Based Solid Acid	
R.Y. Zheng, N. Liu, W.Y. Liu, J.X. Ma and B. Li	226
Effect of Acid Curing Agent on the Foaming of Liquefied Bamboo-Based Resol Resin	
X.H. Liu, S.Y. Fu, Y.Z. Xu, C.P. Wang and F.X. Chu	231
Electric Heating Biogas Digester Experimental Research and Numerical Simulation of Fluent	
L. Jia, S.L. Xing, R. Tian, L.Y. Wang and S. Li	236
Experiment Research and Mechanism Analysis on the Thermal Properties of Solar Anaerobic Digester	
L.Y. Wang, L.H. Lin, H. Gao, L. Jia and R. Tian	241
Experimental Investigation of Biomass Slag Deposit on the Surface of Super-Heaters	
F. Shi, L. An and B.M. Sun	248
Experimental Study on Oxygen-Enriched Combustion Characteristics of Pure Cotton	
H.Y. Meng, S.Z. Wang, L. Chen, J. Zhao and Z.Q. Wu	253
Freeze-Thaw and Sulfuric Acid Pretreatment of Wheat Straw for Fermentable Sugar Release	
X.M. Wang, L.J. Wang, M. Yu and H. Chen	257
Improving Calorific Value and Reducing Corrosiveness of Biological Oils	
Y.M. Xu, W. Wang, Q. Liu, Z.X. Song, L. Sun, M.J. Zhao and Q.M. Zhang	261
Key Factors of Thermal Efficiency Test Protocols for Household Biomass Cookstoves	
H.Y. Ding, J.X. Liu, Y.X. Zhang, R.J. Dong and C.L. Pang	268
New Biogas Heater Burner 3D Virtual Design	
Y. Xiang, X.M. Jiang and M.Y. Chen	274
Optimizing the Formula for Rice Husk Pellet Fuel Using Orthogonal Array Testing	
S. Xu, Y.G. Tao, W.C. Liao and B. Yan	279
Research on Optimization Model of China's Bio-Fuel Ethanol Subsidy	
L. Cao and S.J. Lei	283
Single Cell Oil and Lipid-Producing Microorganism	
C.H. Zhao, Z.Q. Li, G.R. Sun, X.R. Tang, W.S. Shi and Z.G. Liu	288
Study on Biomass Carbonization for Bio-Char Production	
S.W. Xiong, S.Y. Zhang, X. Guo, A.X. Dong, C. Chen, Q.M. Wu and J. Wang	291
Study on Drying Characteristics of Microalgae under Different Conditions	
C.X. Chen, X.Q. Ma, X.C. Li and W.P. Qin	296
Study on Mechanism of Low Temperature Co-Pyrolysis of Duckweed and Flame Coal	
X.M. He, J.Q. Fang, Y. Pan, W. Li and X.J. Wang	300
Study on the Conditions of Straw Powder Degradation to Produce Reducing Sugar in Mixed Cultivation	
Y. Liu and Y.H. Yuan	306
Study on the NaOH Modified Bagasse as Briquette Binder	
Y. Niu, R.Z. Wang and F.Y. Li	310
Syngas Production from Biomass Gasification Using Copper Slag Catalysts	
F.X. Zhang, J.H. Hu, B. Yang and Y.N. Yu	313
The Advancement of Algal Biomass: A Review	
G.C. Zheng, S.L. Liu, L. Wei, A.K. Jha, L.G. Zhang and D.Y. Zhang	319
The Effect of Light on the Growth and Product Accumulation of <i>Chlorella</i>	
B.L. Lu, M.X. Li and L. Qi	323
The Interaction Mechanism of Biomass and Coal Co-Gasification	
J. Hao and Q.M. Wang	330
The Study of Oxidative Stability of Castor Oil Based Biodiesel	
Y.F. Yang, G.S. Hu and Y.J. Chen	334
Experimental Study on Combustion Characteristics of Biomass Charcoal in Air and O₂/CO₂ Atmosphere	
Y.J. Wang, K.H. Han, H. Li and J.L. Zhao	338
Analysis of Chemical Constituents of Volatile Oil Fruit of <i>Cinnamomun amphora</i>(L)Presl GC-MS	
C. Zhang and X.P. Liu	343

Analysis of Environmental Cost Accounting of Forest Biomass Power Generation L. Huang, J. Cao and Y.B. Wang	348
Base-Catalyzed Transesterification of Soybean Oil by Ultrasonication M. Gao and Q.G. Gao	356
Biohydrogen Production by Co-Fermentation of Starch Wastewater and Sludge under Thermophilic Condition H.S. Zheng, W.Q. Guo, S.S. Yang, X.C. Feng, X.J. Zhou, B. Liu and N.Q. Ren	360
Conversion of Glucose into 5-Hydroxymethylfurfural with WO₃ - MoO₃ Mixed Metal Oxides C.H. Du and Z.W. Zhang	365
Effect of Acetic Acid on Ethanol Fermentation by Engineered <i>Escherichia coli</i> SZ470 J.H. Wang, F. Huang, X. Zhao, J.F. Zhao, Y.Z. Wang and S.D. Zhou	369
Effects of Urea Treatment on the Structure and Properties of Wheat Straw X.Y. Ma, X.P. Yang, S.F. Zhang and J. Ma	373
Establishment of Methanogenesis Dynamics Model in the Process of Methane Fermentation with Manure Wastewater H.L. Chen, G.H. Yang, J.C. Chen and Y. Liu	378
Improving Biogas Production and Biodegradability of Acid Hydrolytic Cotton Stalk with Addition of Nutritive Salts and Complex Anaerobic Cellulose Decomposing Bacteria Y.B. Li, Q. Zhang and Y. Sun	383
Optimization of Simultaneous Saccharification and Fermentation for Ethanol Production from Steam-Exploded Cotton Stalk Q. Zhang, Y.B. Li, Z.W. Liu, Y.F. Pu and L.M. Xia	391
Pentosan Extraction from Poplar Treated by Green Liquid J.Y. Zhang, J.H. Zhou, H.M. Li, Y. Han and J.F. Shi	399
Physico Chemical Analysis of Linseed Oil and its Blends as a Potential Fuel for Diesel Engine A.K. Rai, B.S. Chauhan, N. Kumar, H.M. Cho and A. Pandey	405
Preparation of Small Molecular Hemicelluloses from Coconut Shell Z. Wang, F.H. Zhao, Y.Q. Guo and Y. Chen	409
Selective Pyrolysis Behaviors of Willow Catalyzed via Phosphoric Acid J.L. Liu, J.C. Jiang and H.T. Huang	413
Solid Super Acid Base Co-Catalyzed Transesterification of Soybean Oil Using Ultrasonication M. Gao and Q.G. Gao	419
Study on Ethanol Production from Sweet Sorghum Straw Q. Sun, S.H. Huang, S.Y. Gu, F.Q. Zhao, J.F. Ge and W.M. Yi	423
Study on the Characteristics of the Aquatic Vegetables Waste Fermentation to Biogas J.H. Wang, Y.Y. Xiong, Y.M. Lei, J.F. Zhao and Y. Shi	427
The Biological Sources of the Organic Matter in Poyang Lake Sediments M.S. Yang	431
The Cultivation Technique for Increasing the Stalk Sugar Content of Energy Plant Sweet Sorghum in Yellow River Delta T.L. Ding, J. Song, J.R. Guo, N. Sui, H. Fan, M. Chen and B.S. Wang	437
Elevated N Supply Reduces the Inhibition of Growth and Photosynthesis Caused by Salinity in the Bioenergy Plant Hybrid Pennisetum M. Chen, D. Wang, J. Song, T.S. Chen, N. Sui and B.S. Wang	443
Study on Characteristics of Ammonium Nitrogen Adsorption by Biochar Prepared in Different Temperature N. Liu, C.J. Zhou, S.F. Fu, M.I. Ashraf, E.F. Zhao, H. Shi, X.R. Han and Z.B. Hong	452

Chapter 3: Development and Utilization of Wind Energy

Direct Drive Permanent Magnet Synchronous Wind Generator Maximum Power Tracking Control J.Y. Zhang, L.P. Zhang and G.L. Xiao	459
--	-----

A Wind-Thermal Hydropower Coordination Control Strategy Based on Multiple Constraints of Large-Scale Wind Power Integration	463
J.B. Wang, W.Y. Liu, W. Zheng and C. Liang	
An Investigation of the Low Performance of the First Wind Farm in Thailand: A Case of Poor Wind Turbine-Site Matching	469
A. Janon, T. Wongwuttanasatian, G. Faikaow and P. Srinor	
Development of a Wind Power Generation Experiment Device	476
Y.H. Geng, D. Yu and J. Lv	
Improve the Forecast of Surface-Layer Wind in Wind Power Farm with WRF-3DVAR	480
Y. Wang, Y. Yang, F.M. Zhang and L.L. Yang	
Mechanism of Large Scale Cascading Trip-Off of Wind Turbine Generators	485
L. Zhou, X.F. Song, H.B. Xu, K. Chang, J.C. Li and Y.H. Chen	
Modeling and Simulation of the Brushless Double Rotor Motor for the Novel Wind Power Generation System	491
L.F. Fu, H.J. Wang and H.X. Sun	
Offset-Free Model Predictive Control for Wind Power Generation Systems	495
X.L. Wang and L.S. Ye	
Study on Different Impacts on the Reliability of Grid Connecting with the Offshore and Onshore Wind Farms	501
X. Xu, Y. Zeng, X.Z. Wang, P. Li and Y. Zhang	
The Dynamic Interactional Model of SVC and DFIG to Maintain Grid Voltage	506
J.Y. Li, W.Y. Liu, W. Wang, J.Y. Fu and N.B. Wang	
The Wind Power Industry in China: Status and Issues	512
J.H. Yuan and S.H. Sun	
Vibration Analysis on the Megawatt-Class Wind Turbine Based on the Rigid-Flexible Coupling Model	517
J.Q. E, Y. Chen, S.H. Wang, Z.Q. Li and C. Qian	
Peak-Load Regulating Adequacy Evaluation in Wind Power Accessed System Considering the Correlation of Wind Farms	522
Y.L. Li, D.H. You, K. Wang, K. Tian and K. Pan	
A Study on Water Pumping by Using a Small Multi-Blades Windmill for Used in a Remote Area	527
Y. Keawsuntia	
China Wind Power Development Status and Trends	531
D.B. Liu	
Control Strategy of Wind Turbine Power Limitation under High Winds	540
C.M. Wu and J. Zhang	
Coordinated Control of Large Scale Offshore Wind Farms Integrating into VSC-HVDC System	546
N.Q. Jiang and Y.F. Xie	
Detection of Flicker Caused by Wind Farm Based on Mathematical Morphology Filter and Hilbert-Huang Transform	555
T.Y. Xu, H.F. Zhen and L.D. Wang	
Fuzzy Comprehensive Appraisal of China's Offshore Wind Industry Competitiveness Based on SWOT	561
J.C. Liu, Y. Li and J.L. Liu	
Modeling and Simulation of Variable-Pitch Wind Power Generation System	568
X.H. Yang and C. Chen	
Numerical Simulation of Influence with Surface Contamination on Aerodynamic Performance of Dedicated Wind Turbine Airfoil	572
P. Wu, C. Li and Z.M. Li	
Optimal Configuration Method of Hybrid Energy Storage System for Wind Farm	576
R.Z. Jiang, Z.Y. Lin and H. Teng	
Probabilistic Available Transfer Capability Calculation of Wind Farm Incorporated Power System	582
Z.C. Li, B.H. Zhang, Y.B. Ge, Y. Chen, X.G. Miao, L.D. Zhang, J.L. Wu and P. Bie	
Reliability Assessment of Power Generation and Transmission System Considering Wind Farm Based on Monte-Carlo Methods	587
J.H. Zhang, X.W. Wang and C. Jiang	

Research on Fault Diagnosis Method of Wind Turbine Based on Wavelet Analysis and LS-SVM	
C.L. Liu and W.X. Qi	593
Research on the Compensation Coefficients of the Improved MPPT Control Based on Reduction of Tracking Range	
X.L. Zhang, M.H. Yin, L.J. Zhou and Y. Zou	598
Research on Wind Turbine Control System Based on CAN Bus	
X.M. Wang and M.L. Zhang	605
Running State Study on Wind-Driven Generator Gearbox	
W.Z. Yang, H. Li and W.J. Chen	610
Strength Analysis of Bolt Connection on Yaw Gear of the MW Wind Turbine Generator System	
J.Q. E, Z.Q. Li, C. Qian and Y. Chen	614
Study of Reactive Power Compensation for Improvement of Low-Voltage-Ride-Through Capability of Wind Farm	
C.Y. Hsu, T.H. Tseng and P.H. Huang	619
Study on Wind Speed Forecasting Based on STC and BP Neural Network	
X.J. Liu, W.S. Zheng and T.Y. Cen	623
The Application of Energy Storage System in Wind Power Integration	
Q.H. Liu, X.M. Wang and Z.Y. Li	630
The Coordination Control Method of Dynamic Reactive Power Compensation Equipment Based Multi-Objective	
Y.L. Sun, W.Y. Liu, N.B. Wang and Y.H. Ma	635
Wavelet Packet Diagnosis for Wind Turbine and Vector Control for Wind Power Generation System	
Z.R. Hou	641
Performance Research on Tension Leg Platform of Floating Offshore Wind Turbine	
Y.W. Gao, C. Li and X. Cheng	645
Application of Portfolio Theory Based on CVaR in Determining Optimal Spinning Reserve with Consideration of Load and Wind Power Uncertainties	
J.L. Wu, B.H. Zhang, Z.Y. Xiao and K. Wang	649
Application of Power Communication System in Wind Power Plant	
R.J. Shi, X.C. Fan, F.T. Li and B. Wei	655
Impact of Large-Scale Integrated Wind Farms on the Voltage Stability of Regional Power System	
Q. He, Z.Y. Xu, Z. Qiao and X. Zhang	659
Reserve Capacity Optimization of the Regional Power System with Wind Farms	
S.Q. Sheng, X.L. Tan and L.T. Fan	664
Wavelet-ARMA Model Revised by Neural Network to Predict Wind Power	
B.J. Jin, B.H. Zhang, C.H. Deng and J.L. Wu	669

Chapter 4: Nuclear Energy and Nuclear Engineering

A Conceptual Study on Helium-Cooled Solid Breeder Blanket for Prototype CH DEMO	
J.H. Li, R.H. Huang and H.R. Cao	677
Optimization Design and Analysis for the First Wall of CH HCSB TMB Based on Thermal Hydraulic	
H.R. Cao, R.H. Huang and J.H. Li	681
The Experimental Research on Uniformity of Argon Inductively Coupled Plasma at Different Cylinder Heights	
S.B. Wang, X.H. Zhang, H.Z. Wang, L.Y. Liu, R.W. Zhou, S.Z. Yang and D.P. Liu	686
Analysis of the Safety of Nuclear Power Plants	
D.W. Liu, J.X. Zheng, Z.K. Chen and L.K. Liu	692
Design and Numerical Analysis of Oil-Cooled Cooler of Liquid Lead-Bismuth Loop	
S.Q. Huang, Q.Y. Huang, S. Gao, Z.Z. Jiang and R.Y. Sa	696
Sustainable Development of Nuclear Energy and Study on ADS in China	
J. Zhao, Y.W. Yang and Y.G. Fu	703

Technology Selection for Emergency Radioactive Wastewater Treatment J.F. Li and J.L. Wang	708
---	-----

Chapter 5: Hydrogen, Fuel Cell and Related Technologies

Challenges Facing Hydrogen Fuel Cell Technology to Replace Combustion Engines R.K. Calay, M.Y. Mustafa and M.F. Mustafa	715
Effects of CO on Performance of HT-PEM Fuel Cells X.N. Zhao, H. Sun and Z.J. Li	723
Hydrogen Production from Ethanol Steam Reforming over Co-Ni/CeO₂ Catalysts Prepared by Coprecipitation R.Q. Dai, Y.Z. Chen, F. Jin and P. Cui	729
Investigation into Hydrogen Production in Hydrolysis of Sodium Borohydride in the Presence of Co-La-B Catalyst J. Chang and F.L. Du	735
Preparation of CuO-Decorated Core-Shell Montmorillonite-TiO₂ Colloids and their Photocatalytic Activity for Hydrogen Evolution from Water S.Z. Kang, T. Wu, X.Q. Li, Q.F. Wang and J. Mu	740
Sulfonated Polyphosphazene-Montmorillonite Hybrid Composite Membranes for Fuel Cells M.L. He, C.J. Zhu and C.J. Jing	744
Visible Light Photocatalytic Hydrogen Evolution from Water Reduction Using Eosin y Containing Trace Vitamin B₁₂ as a Light Harvesting Unit L. Zhang, Q. Zhou, S.Z. Kang, X.Q. Li and J. Mu	753
CFD Investigation into Internal Flows of PEM Fuel Cell for Optimal Performances Z.J. Peng and P. Choopanya	757
Effect of Different Operating Conditions on MFC Performance S.S. Lu, Y.G. Zhao and R. Liu	762
Hydrogen Production via Sorption Enhanced Steam Reforming of Acetic Acid: A Thermodynamic Study P. Fu, W.M. Yi, Z.H. Li and X.Y. Bai	769
Investigation into the Catalytic Ability of Fibrillar Co-Y-B Catalyst in Hydrogen Production from Hydrolysis of Sodium Borohydride J. Chang and F.L. Du	773
Performance Study of Direct-Boron-Hydrogen Fuel Cells (DBFC) Applied in Micro Power Systems J.K. Lee, C.C. Chuang, Y.C. Chang and C.H. Yeh	778
A μDMFC Stack with Hybrid Mass Transportation Scheme S. Chai and X.H. Wang	790

Chapter 6: Storage Battery and Other Energy Sources

Discussion on the Li-Ion Battery Health Monitoring and Remaining-Useful-Life Prediction J. Zhang, A.T. Gao, R.G. Chen and Y.S. Han	797
Thermal Security Analysis of Lithium-Ion Batteries Based on Electro-Thermal Modeling Z.J. Wang, Z.X. Zhu and Y.H. Ma	804
Microwave Synthesis of MnO₂/C and its Applications in Zinc-Air Battery D.L. Liu, J.N. Cheng and J.J. Han	808
Preparation and Study of Zinc-Air Batteries with Carbon-Supported Amorphous MnO₂ Catalyst J.N. Cheng, D.L. Liu, L. Yang and J.J. Han	813
The Study on Technology of Ocean Wave Energy Generation S. Ye, W.J. Wang, B. Li and L.B. Mao	818
Close-Packed Al₂O₃ Nanoparticles/Waterborne Polyurethane Layer-Coated Polyethylene Separators for Lithium-Ion Batteries Y.P. Gao, J. Le, X.C. Sheng and X.W. Zhang	823
Dynamic Measurement and Estimation of Power Battery Residual Capacity W.Q. Ye and B. Li	829

Hard Carbon Prepared from Willow Leaves Using as Anode Materials for Li-Ion Batteries S. Sun, C.Y. Wang, M.M. Chen and M.W. Li	834
Preparation of $\text{Li}_2\text{FeSiO}_4/\text{C}$ Composite Cathode Materials for Lithium Ion Batteries by Carbothermal Reduction Method Z. Zhang, X.Q. Liu, S.S. Ma and H.Y. Zhao	838
Dual Carbon Coating Used in the Preparation of LiFePO_4/C Cathode Material Y. Jiang, F.X. Zhong, Z.Y. Cheng, P.F. Yu, Y.X. Jin and S.H. Xiao	844
Renewable Generation and its Integration in the Power System of Green Island Y.K. Wu, G.Y. Han, S.H. Tsai and C.Y. Lee	848
VRB/EDLC Hybrid Storage System with PID Controller Based on BP Neural Network Y. Chen, B.H. Zhang, C.X. Mao and X.K. Dai	855

Chapter 7: Energy-Saving Technology and Energy Conversation

A New Thought and Method to Estimate and Design Power Capacity from Terminal Electricity Consumption (Power Load) in the Civil Airport J.K. Xu, S.M. Sun and W. Zhang	865
A Research on Energy-Saving Technological Transformation of Cement Grinding System Based on FPP Grinding W. Cao, W.L. Ni and W.W. Zha	869
An Analysis of the Seasonal Energy Consumption of Culture and Education Comprehensive Building H.W. Lu and H.W. Gong	874
Analysis of Heat Distributing to Ensure Energy Saving X. Chang, T.C. Li, Y.B. Xian and X.C. Zhao	880
Analysis of Natural Lighting Stadium Negative Effect X.J. Chen	885
Application of Heat Pump Energy-Saving Control Temperature Technology in Large Warehouse on Preservation Quality of Rice L.N. Xu, X.H. Li, Y.Y. Chen and X. Liu	889
Comprehensive Evaluation of Energy Conservation and Emissions Reduction for Green Power Grid W. Wang	893
Energy-Saving Measures of a 1Mt/a Gasoline and Diesel Hydrofining Unit S.K. Wu, K.X. Xu, L. Wang and Q.J. Wei	898
New Energy-Saving Elevator Energy Consumption Analysis and Simulation Based on MATLAB S.Y. Hao, T.T. Yang and L. Wu	902

Chapter 7: Energy-Saving Technology and Energy Conversation

Performance Evaluation of a Vertical U-Tube Ground Heat Exchanger Using a Numerical Simulation Approach P.F. Hu, Z.Y. Yu, F. Lei, N. Zhu, Q.M. Sun and X.D. Yuan	909
Research on the Energy Consumption and Potential Emission Reduction of District Heating in the North of China C. Huang, X.Q. Ma, W. Li and Y.S. Sun	916
Research on the Energy Consumption Efficiency Based on Generalized DEA Method with Cluster Analysis S.Y. Ma, Z.X. Ma and R.M.T. Ji	921
Study on Waste Heat Recovery of Soy Sauce Production Process in Jinshilongmen Brewery Y.J. Zhang, J.Y. Jiang, J.D. Ye, M. Fu and F. Zhang	925
A Novel Two-Stage Ethylene Rankine Power Cycle with Cold Energy Recovery of LNG H.M. Zhu, Q. Li and H. Sun	932
A Simple way to Estimate the Signal-To-Noise Ratio and to Save Energy W.Z. Li	937

Analysis about Main Influence Factors of Vehicle's Fuel Consumption B. Peng and S.L. Ma	941
Analysis on the Cycle Characteristics of Dual Swash Plate Stirling Engine X.D. Han and W.Z. Xu	946
District Energy-Saving Measures and their Selection Method X.Q. Li	951
Ground Source Heat Pump and Conventional Heat Sources to Match the Design and Operation Mode for Energy Saving L. Sun, J.F. Xiao, C.Y. Ran and L.Y. Zhang	955
How to Implement the Method that can Annually Save more Energy than the Corresponding Energy of Large Oil Field Output L.S. Cheng	960
Hybrid of Daylight and LEDs in the Lighting Design of a Tunnel S.M. Ji, G.Y. Cao, Y.M. Gao, J.H. Zhang and N.Y. Zou	965
Optimal Design for the Room Temperature Control and Household Heat Metering System M. Fu, Y.J. Zhang, J.D. Ye, J.Y. Jiang and F. Zhang	969
Problem and Solution of Frequency Conversion Transformation on Axial FGD Booster Fan in 600MW Unit X.C. Lan, C.Y. Wang, L. Li and L. Wang	976
Research on Coordination and Optimization Model of User's Electricity Energy Efficiency with Load of Diversity C. Fang, L.F. Yang, F.Y. Wang and J.P. Jin	980
Study of Optimization Design and Energy Saving Effect Prediction of Rudder Bulb Based on CFD Technique H.L. Shen, Y.B. Liu and Y.M. Su	986
Synergetic Utilization of Coal and Industrial Waste Heat in Power Generation System Z. Chen and W.D. Ni	990
Water Supply Pumping Station Energy Consumption Analysis and Energy Saving Research Based on the Energy Consumption Coefficient J.Y. Fang, Z.P. Li, F.F. Chen and Y.H. Chen	999
Thermodynamic Analysis of Ethanol Diesel-Oil Alternative Fuel M.Y. He, H.T. Gao, Y.H. Wang, W. Yan, Q. Yin and J. Dong	1005

Chapter 8: Energy Materials and Technology

Abnormal Heat Triggered by Pressure Change in a D/Pd Gas-Loading System H.Y. Wang, X.L. Zhao, B.J. Shen, L.H. Jin, X. Lu and J. Tian	1011
Analysis of Chinese Natural Gas Interchangeability Predicted by Weaver Indices Z.G. Chen, C.K. Qin, Y.J. Zhan and J. Qiu	1017
Crystallitic Structure and Thermodynamics of Magnesium-Based Hydrogen Storage Materials from Reactive Milling under Hydrogen Atmosphere S.X. Zhou, Q.Q. Zhang, N.F. Wang, Z.Y. Han, W.X. Ran, C.Z. Li, C. Ding and P.B. Li	1021
Effects of FEC Additive on the Low Temperature Performance of LiODFB-Based Lithium-Ion Batteries R. Xiang, F.Q. Li, G.F. Jia, Z.J. Peng and Q. Zhuge	1025
Influence of Eu Substitution for Y on the High Temperature Electric Transport Properties of $\text{YBaCo}_4\text{O}_{7+\delta}$ Q.L. He, F. Gao, H.Z. Song and X. Hu	1029
Magnesium Hydride of Orthorhombic Crystal from High-Energy Ball Milling under Hydrogen Atmosphere S.X. Zhou, W.X. Ran, M.J. Yang, D.X. Wang, G.Q. Chen, Y. Zhang, Z.Y. Han and Q.Q. Zhang	1033
One-Pot Synthesis of Carbon-Coated ZnFe_2O_4 with Excellent Electrochemical Performance as an Anode in Lithium Ion Battery L.M. Yao, X.H. Hou, S.J. Hu, X.Q. Tang and X. Liu	1037
Pyrolysis Characteristics of Long Flame Coal Y.B. Deng, Z. Xu and F.M. Su	1042
Structure Characteristics Analysis of Long Flame Coal Y.B. Deng, Z. Xu and J.M. Dong	1046

Study of Influence Factors on Wettability of Coal Dust Y.Y. Sun, R.C. Nie and L.L. Zhang	1050
Study on Pre-Esterification of Trench Oil and Preparation of Bio-Diesel Z.H. Xiao, A.H. Zhang, W.W. Jiang, H.Q. Zhang and C.Z. Li	1054
Study on Consist Property of High Wax and Super-Viscous Crude Oil H. Zhang	1062
Effects of Na and V Co-Doping on Electrochemical Performance of LiFePO₄/C N.Y. Gu, Y. Li and C. Li	1067
Influences of Precursor's Processing Method on the Electrochemical Properties of Synthesized Lithium Vanadium Phosphate D.W.S. Shi, Z. Zhang, H.Y. Zhao and X.Q. Liu	1071
Sol-Gel Synthesis of LiFePO₄/C Composite Cathode Material from FePO₄/PANI Z.Y. Cheng, F.X. Zhong, Y. Jiang, P.F. Yu, Y.X. Jin and S.H. Xiao	1075
The Preparation of Primary Battery Separator Using Polyamide Nonwoven and Nanofiber H.R. Lee, J.H. Yun, H.H. Choi, D.Y. Kim and H.S. Byun	1079
The Study of Theoretic Coated Carbon Amount and Excess Lithium in LiFePO₄/C Synthesis by Means of Carbon Thermal Reduction Route L. Zhao, W. Wang, Z. Zhang and X.Q. Liu	1083

Chapter 9: Energy Chemical Engineering and Processes

Experimental Investigation of Emissions from Biodiesel R.K. Calay and C. Pisac	1089
A Novel Active Ni-Ce-Al-Mixed Oxide Catalysts for Oxidative Dehydrogenation of Propane A. Ruheng, J. Wang and Z.R.G.T. Bao	1098
Analysis of Extraction of Coal Oxidation Residue in NaOCl G.Z. Gong, J.M. Chu, X.Y. Wei and Z.M. Zong	1103
Calculation of Enthalpy and Entropy of Oil Vapor in Condensation Process L.L. Guo and G.S. Du	1107
Catalytic Cracking of Coker Gas Oil at High Reaction Temperature and Catalyst to Oil Ratio J.H. Zhang, H.H. Shan, C.H. Yang, X.B. Chen and C.Y. Li	1112
Effect of by-Products from Wet-Oxidation Explosion on the Growth and Fermentation of <i>Saccharomyces cerevisiae</i> M.Z. Gong, R.M. Zhao, Z.J. Li, J. Yao and D.C. Gong	1116
Effects of Fuel Supply Advance Angle on Engine Thermal Efficiency and Emission Performance Fueled with Bio-Diesel Q. Zeng	1122
Experimental Studies on H₂-Rich Gas Production by Co-Gasification of Coal and Biomass in an Intermittent Fluidized Bed Reactor L.Q. Wang and Z.S. Chen	1127
Process Improvement of a 1Mt/a Gasoline and Diesel Hydrofining Unit for Energy-Saving (II) S.K. Wu, K.X. Xu, L. Wang and Q.J. Wei	1132
Simulation of a Novel Chemical Looping System for Recovering Elemental Sulfur from Acid Gases Using Ca-Based Oxygen Carriers J. Chang, M.D. Han and H.J. Tian	1136
Study on the Kinetics of Chemical Looping Combustion of Copper-Based Oxygen Carrier Y.Q. Liu, Z.Q. Wang, J.L. Wu and J.H. Wu	1140
The Preparation Methods of Fe₂O₃/Al₂O₃ Oxygen Carriers and their Chemical Looping Combustion Performance Z.S. Liu, Y.G. Wei, K.Z. Li, H. Wang, X. Zhu and Y.P. Du	1145
Effect of Oxygen Plasma Treatment on Bacterial Cellulose-Alginate Composite Sponge as a Yeast Cell Carrier for Ethanol Fermentation S. Kirdponpattara, B.Z. Newby and M.K.M. Phisalaphong	1150
Esterification of Oleic Acid and Bioalcohols Using Immobilized Lipase S. Mulalee, J. Chanprasert, P. Kerdpoksup, N.S. Sawangpanya and M.K.M. Phisalaphong	1154

Investigation into the Reactivity Behavior of CaSO₄ with Coal Chars in the Chemical Looping Combustion System	
H.J. Tian, J. Chang and Q.J. Guo	1158
Numerical Simulation and Optimization of Urea-SCR Catalyst for Diesel Engine	
D.C. Wang and M. Li	1163
Research and Application of Floaters Produced from Water Treatment in Oilfield SZ36-1 as Profile Control Agent	
L.W. Niu, X.G. Lu, W. Li and S.W. Yuan	1171
Study on Measurement and Simplified Model of Burning Rate of AP/HTPB Base Bleed Propellant under High Pressure	
H. Shen and Y.G. Yu	1176
Transesterification of Palm Olein Oil Using Na₃PO₄ as Heterogeneous Catalyst	
K. Thinnakorn and J. Tscheikuna	1181
Transformation of Methane into Synthesis Gas Using the Redox Property of Pr-Zr Mixed Oxides: Effect of Calcination Temperature	
Y.G. Wei, Y.P. Du, K.Z. Li, X. Zhu and H. Wang	1187
Experimental Study on Catalytic Combustion Parameters of Gasoline Vapor in Oxygen-Poor Condition	
J.J. Liang, Y. Du, Y.H. Ou, P.W. Wang, H.B. Qian and X.S. Jiang	1192

Chapter 10: Energy Security and Clean Use

A Performance Study of Coke Oven Gas Vehicle	
F. He, Y.M. Li, H.B. Wu and H. Li	1201
Analysis of Chinese Energy Security Based on Quantitative Evaluation Method	
Y. Zhang, L. Shen and M.J. Shi	1206
Energy Security Assessment: A Review	
W.W. Lu and M.R. Su	1211
Impact Analysis of Integration of Coal Resources on China's Energy Security	
Y. Zhang, L. Shen and M.J. Shi	1216
Index System Construction and Research of Inexact Influence Analysis Model of Energy Risk System	
M.Y. Wang, Y.Y. Wang, B.J. Bai and X.L. Shen	1221
Investigations of Energy Separation Effect in Vortex Tube for Different Gases	
W.C. Wang, X.J. Fang, W.L. Sun, Q.T. Eri and S.L. Liu	1227
Mapping the Energy Flows of Coal Utilization in China: The Methodology and Case Studies for the Year 2005 and 2010	
F.F. Yu, L.W. Ma, L.X. Jiang, Z. Li and W.D. Ni	1234
Process Analysis of Ocean Thermal Energy Used for Desalination	
Z.J. Jin and H. Wang	1242
Research on the Wear Characteristics of Injection Pump in Di-Engine Fueled with Dimethyl Ether	
W. Li, F.B. Li and W. Wang	1249
Simulation of Chemical Looping Hydrogen Production Using Solid Fuel	
L.F. Wang, S.Z. Wang and M. Luo	1254
Study on Diesel Combustion Dust with ASE and HPLC	
S.J. Liu, H.N. Xu, K. Feng and Y. Wang	1258
The Use of Tailored Micro-Hydro System in Micro-Urban Scale as a Partial Presumption for Creating the Autarchic Micro-Urban Structures	
S. Tkac and Z. Vranayova	1264
Development and Utilization of Green Energy in Hanjiang River Basin: Example from Xiangyang Section	
X. Li	1268
Corrosion Mechanism of 316L Stainless Steel in a Expansion Joint of Blast Furnace Gas Pipeline in a Power Plant	
Z.H. Jin, H.H. Ge, Y.W. Zong and F.Y. Yang	1272
Dynamic Simulation and Influencing Factors Analysis of Biofouling	
D.C. Wang, C.F. Qian, S.X. Cao, Y. Liu and J.W. Sun	1276

Effect of Different Biofouling Characteristics on Heat Transfer of the Heat Exchanger D.C. Wang, C.F. Qian, S.X. Cao, Y. Liu and J.W. Sun	1282
Hazard of Coal Mine Gas and its Preventive Measures Z.J. Yu, F.C. Jiang, X.X. Mao and J. Wang	1289
Investigations of Energy Separation Effect in Vortex Tube for Real Gases J. Tang, W.C. Wang, X.J. Fang, S.L. Liu and W.L. Sun	1293
The Effect of CO₂ on Pyrite Transformation W.Z. Lv, D.X. Yu, L.L. He, J.Q. Wu and M.H. Xu	1301
Causes Analysis of Wet Flue Gas Desulphurization Stack Rainout for the Thermal Powerplant without GGH and its Countermeasures P.F. Nie, H.Y. Zhang and Y. Wang	1306
Status Analysis of Energy Consumption, Supply and Conservation in Beijing A.J. Mao and H. Li	1310

Chapter 11: New Energy Vehicles, Engine and Electric Vehicles

A Research on Compressed Natural Gas Engine Fuel Supply System for Rapid Prototyping Based on AMESim D.G. Chen, R.Y. Sun, Y.D. Wu and B. Wang	1317
Analysis and Research on Fire Risk of Electric Vehicle Charging and Swapping Station S.P. Wang, W. Li, M.H. Fan, H.C. Wu and H.C. Wang	1324
Analysis On-Board Charger to the Influence of Power Quality D.M. Jia, C.L. Guo, Y.B. Fan and Z.C. Tang	1330
Effect of Excess Air Ratio on Idle Performance of a HCNG (H₂+CNG) Engine with Different Hydrogen Blend Ratios Y.T. He and H.J. Qiao	1336
Effect of Ignition Timing and Excess Air Ratio on Combustion Characteristic of Linear Engine Z.L. Yin, Z. Wang, C.L. Sun and T. Zhang	1340
Impact of Peak and Valley Period Partition on Load Curve of Distribution System with EV Z.F. Zhang, X.Q. Huang and B. Xiao	1344
Influence of Piston Initial State on HCCI Combustion in Micro Free-Piston Engine Using Experiment Images and CFD Analysis J. Bai, Q. Wang, Z.X. He and P.G. Zhang	1350
Optimal Planning of Electric Vehicle Charging Stations Location Based on Hybrid Particle Swarm Optimization Z.C. Tang, C.L. Guo, P.X. Hou, Y.B. Fan and D.M. Jia	1355
Power Generation System by Vehicle on the Downhill of Expressway X.T. Zeng and Q.H. Ren	1361
Safety Research and Lightweight Design of Electric Vehicle Battery Protection Device G.F. Zhao, M.M. Liu and Y. Li	1366
Study on Zn-PANi Battery Characteristics Used for Electric Vehicles S.M. Cui, Y. Lu, J.P. Song, J.F. Wang and W.F. Ding	1374
The Economic Benefit of Electric Taxi Based on Total Ownership Cost Model N. Wang and Y. Li	1379
The Technical Modification and Performance Analysis of Diesel/LNG Dual Fuel Engines C. Meng, J.P. Si, G.X. Liang and J.H. Niu	1383
A New Power Allocation Strategy of Supercapacitor/Battery Hybrid Energy Storage System for Electric Vehicles Y. Fan, L. Zhang and K. Wang	1389
Analysis on Harmonics Caused by Connecting Electric Vehicle Chargers with Power Network X.Z. Li, G.M. Hu, P.X. Hou, Y.B. Fan and C.L. Guo	1393
Application and Control of Brushless DC Motor for Electric Vehicle D.F. Wang, D.M. Bu, C. Zhu and C.W. Zhou	1398
Bond Graph Modeling and Analysis of HEV System Based on Ravigneaux Planetary Mechanism L.H. Xi, H.W. Chen and X. Zhang	1402

Control Strategies for AC Motor of Electric Vehicles D.F. Wang, Z.F. Hu, N. Li, Y. Jin and B.W. Yang	1409
Effect of Ignition Timing on the Starting Characteristics for Linear Engine H.C. Li, Z. Wang, Z.L. Yin and T. Zhang	1413
Energy Efficiency Assessment Study of Electric Vehicle Charging Network F. Xue, S. Zhang, Y.B. Fan, P.X. Hou and C.L. Guo	1417
Experimental Research on the Effect of Excess Air Ratio on Turbocharged Lean-Burned CNG Engine J.X. Pang, D.W. Qu, X. Lu and G.Y. Liu	1422
Piezoelectric Vibration Energy Harvester in Electric Vehicles S.S. Li, Z.B. Wu, Y.K. Su and K. Xi	1427
Remote Monitoring System Development for Electric Vehicles Q.X. Yin, L.Y. Fan, D.W. Qu and Y. Tian	1431
Research of Electric Vehicle Regenerative Braking Control Strategy Based on EHB System H.Y. Zheng, R. He and C.F. Zong	1436
The Design of APU(Auxiliary Power Unit) Control Strategy L.S. Chen, X.E. Huang, P. Gan and W. Cheng	1440
Thermal Analysis of the Battery Box in Electric Vehicles W. Fan, W.J. Wu, Y.H. Chen, S. Shen and C.Y. Li	1444
Thinking and Suggestions to the Competitiveness of New Energy Vehicle in China J. Zhang and F. Hu	1450
Analysis Research of Technology Schemes of Reduction NO_x Emission in Lean Burn Gasoline Engine D.P. Yue, W. Zhang, Z.J. Li, Y. Zhang, L. Liu, S.S. Chen and P.H. Jiao	1454
Photovoltaic Electric Vehicle Charging System with the Function of Active Power Filter Q. Liu, X.N. Xiao and Z. Chen	1459

Chapter 12: Building Materials and Technologies, Energy-Saving Buildings, Civil Engineering

Incorporate Design of SWH System with High-Rise Residential Building in Northern Guangxi Province - Principle of Design and Calculation J.M. Chen, Y. Wei and D.Q. Xu	1467
The Simulation Analysis of Tunnel Wind Cooling System in Shenyang Area X.M. Zhang, Y. Gao and X. Zhang	1474
A Case Study of Retaining Wall Using Pre-Stressed High-Strength Concrete (PHC) Pile for Deep Excavation Work G.H. Kim, H.W. Joh and Y.S. Shin	1478
Based on MIDAS/CIVIL the Anchorage of Mass Concrete Temperature Field and Stress Field Simulation Analysis M.R. Zhou, Q.F. Shen, Z.N. Zhang, H.S. Li, Z.Y. Guo and Z.B. Li	1482
Coarse Aggregate Gradation Design Index and Method of Asphalt Mixture Y.M. Zhang, M.L. Zheng, G.W. Hu and Q.Y. Zhu	1489
Concrete Exterior Wall Insulation without Network System S.H. Wei and X.J. Wang	1495
Dynamic Responses of Red Sandstone with Fluid-Solid Coupling under Impact Loading H. Lu, B. Huang, H.S. Zhao, M. Meng and M. Liang	1500
Energy Consumption Simulation of the Air Conditioning System in Large-Scale Buildings G.M. Zhang, X. Shen and G.Z. Tang	1506
Experimental Research of Arrangement Method of Prestressed Concrete Slab with Unbonded Reinforcement P. Pang and X.S. Yin	1510
Material Properties of Bridge Deck Dedicated Interface Agent and Key Construction Techniques Y. Liu and P. Peng	1514
New Type of High-Strength Support in Deep Soft Rock Roadway J.C. Feng, H.J. Li, Z.C. Zhao and W.L. Zhang	1520

Numerical Analysis on Hollow EPSRC Block and its Thermal Insulation Wall X.S. Fan, Y.L. Chen, X.L. Niu, X.C. Wang and C.F. Liang	1526
Performance of Hemp-Starch Concrete Composite A. Li, A. Gacoin and T.H. Mai	1531
Rebounding Method Application of Structure Concrete Compression Strength Detecting in Datong Area G.L. Liu and F. Gao	1535
Reflection upon Energy Saving and Emission Reduction in Colleges in the Context of Low-Carbon City Construction H.H. Fen	1539
Simulation of the Indoor Thermal Environment of Sunspaces-Attaching Passive Solar House in Shihezi of Xinjiang L.Q. Dong and S.G. Jiang	1543
Study on the Green Earthen Buildings X.X. Liu, J. Xu and H. Wang	1549
Study on Water Stability of Granite Asphalt Mixture D.D. Guo	1555
Studying on Optimum Insulation Thickness of External Wall for Existing Residential Building Energy Saving Reform in Severe Cold Area L. Yao and S.G. Jiang	1560
The Analyses of Daylighting in High-Rise Office Buildings and the Design Essentials H.J. Huang and H.Q. Wu	1565
The Green Energy-Saving Design of Stadium X.J. Chen	1571
The Guiding System Design of Medical Architectural Interior Space Take the Third People's Hospital of Nantong for Instance J. Zhao	1575
The Research of Mixture Ratio Factors on the Concrete Consumption Norm M.R. Zhou, Z.B. Li, Q.F. Shen and Z.Y. Guo	1580
Ultrasonic Non-Destruction Detecting Method for Concrete Compression Strength F. Gao, G.L. Liu and Q.G. Huang	1585
Acid Attack on Cement Paste Containing Limestone Powder S.H. Liu, Z.G. Wang, Y.N. Kong, L.H. Li and M.J. Rao	1589
A Brief Review of the Relationship between Energy-Saving Buildings and Total Cost Management Y.X. Ding, N.B. Ma and Y.X. Ding	1593
A Review of the Application of LCA for Sustainable Buildings in Asia A.F. Abd Rashid, S. Yusoff and N. Mahat	1597
A Study on the Energy Conservation Policy of South Korean Universities J.C. Park, K.G. Lee, I.C. Shim and W.H. Hong	1602
A Study on Building Energy Efficiency and Green Building L. Wang	1608
An Intelligent Controlled External Shutter for Building Shading K.W. Zhang and P.W. Guo	1614
Analysis on Light Brick Research and the Application in China D.Y. Jin and X.G. Wu	1618
Arrangement Method Research of Prestressed Concrete Slab with Unbonded Reinforcement P. Pang and X.S. Yin	1622
Comparison of Optical Smoke Density of Expanded Polystyrene without and with Cover Components Used in ETICS P. Rantuch, T. Chrebet and K. Balog	1625
Daylight Factor for Energy Saving in Retrofitting Institutional Building R. Zakaria, A. Amirazar, M. Mustaffar, R. Mohammad Zin and M.Z. Abd Majid	1630
Integrated Application of Marine Geophysical Technology in a Seawall Reinforcement Project Y.C. Dai	1636

Life Cycle Assessment for Building Envelope D.J. Bao, W.X. Zhang and J.B. Yang	1643
New Type Rural Residence Energy-Saving Effect Analysis in Northeast China Q. Sun, L.N. Gao, Z.L. Piao and S.Y. Gu	1650
On the Preparation and Properties of Luminous Concrete S. Zhao, Y.Q. Li and Q. Wang	1654
Practice of Government's Comprehensive and Whole Process Quality Supervision on Energy Efficiency Project in Civil Building H.D. Guo, X. Wei, Y.X. Zhang, H.Y. Zeng and X.F. Men	1659
Primary Research about Energy Consumption Analysis and Optimization Strategy of Office Buildings H.F. Zou, Y.C. Fei, X.Z. Cao and S. Ye	1666
Research on Key Prestress Construction Techniques of Continuous Box Girder Y. Mo, X.B. Huang, Y.S. Zeng, F.H. Chen, H.W. He, L. Xiao and X.J. Shu	1670
Research on the Calculation Method for Diagonal Shear Capacity of Steel Reinforced Lightweight Concrete Beams H. Jin	1677
Rigid Polyurethane Foam Based on Modified Soybean Oil D. Ji, Z. Fang, Z.D. Wan, H.C. Chen, W. He, X.L. Li and K. Guo	1681
Studies on Energy-saving Control of the Whole Process of Construction Project Y.X. Ding, N.B. Ma and Y.X. Ding	1685
Study on Structure Safety of the Tunnel Secondary Lining of Passenger Dedicated Line for High-Speed Railway during Service Period Y. Liu	1689
Study on the Green Building Evaluation Standard J. Zhang, L.J. Jiao and S.Z. Li	1693
Study on the Performance of Cushion in the Rigid Pile Composite Foundation under Flexible Load D. Li and D. Wu	1698
Study on the Seismic Performance of Cavity Walls Constraint Masonry Construction S.H. Zuo, H.L. Bai, L.H. Xiong, B.Y. Liu and Z.M. Tian	1702
The Analysis of Double-Nonlinearity Stability of Concrete Filled Steel-Tube Arch Bridge X. Han, B. Zhu, G.M. Liu, J.P. Wang and B.S. Xiang	1709
The Architecture Research of the Building External Shading and Building Energy-Saving System Based on the Intelligent Control Z.G. Hu, P.W. Guo and X.L. Wang	1714
The Influence of Fly Ash on the Crack Performance of Airport Pavement Concrete by Dumbbell Test Method Y. Liu	1719
The Research on the DEM Simulation of the Railway Ballast Tamping Process X.J. Wang, B. Hua, B. Hu, Y.L. Chi and Y.F. Ding	1723
The Study on Design Method of the Sustainable Dwellings in Mountain Areas Based on BIM Z. Zhuang, S.X. Wang and X.D. Zeng	1727
Study on Temperature and Stress Development of Channel Lining Concrete in Construction S. Qiang, Y.J. Bie and H.L. Cai	1731
Study on the Cyclic Loading Effects to the Railway Ballast X.J. Wang, B. Hua, Y.L. Chi, X.Y. Zhao and F.Y. Li	1736
Laboratory Studies of the Mechanical Properties of Bolt Thread Connection X.Z. Meng	1740
Analysis of Influence of Slab's Reinforcement on Seismic Bearing Capacity of Beam's Cross-Section in Cast-In Situ Frame Structure J.S. Guo and J.S. Jin	1745
Experimental Study on Seismic Performance of CFRP Strengthened RC Frames Damaged by Earthquake Q.M. Gao, L. Wang and Y. Zhang	1749

Study on the Effect of Grid Beam on Seismic Performance of Improved Multi-Ribbed Slab Structure

K. Qian, G.Y. Dong, J. Zhang and Q. Yuan

1754
