## Preface

## Chapter 1: Properties and Processing of Structural Materials

|                                                                                                                                                                                         |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Potential Al-Fe Cast Alloys for Motor Applications in Electric Vehicles: An Overview</b><br>S. Liu, A. Hu, H. Hu, X.Y. Nie and N.C. Kar                                              | 3  |
| <b>Biocompatibility and Mechanical Properties Evaluation of Ti-6Al-4V Lattice Structures with Varying Porosities</b><br>N. Wang, S.T. Dheen, J.Y.H. Fuh and S.K. Anantharajan           | 21 |
| <b>Effects of Nb and o Contents on the Negative Linear Thermal Expansion Behaviors of Cold Rolled Ti-34Nb Alloys</b><br>X.W. Wu, W.Q. Zou and F. Chen                                   | 31 |
| <b>Efficient Toolpath Generation Method for High-Quality and High-Accuracy Machining of Curved Surfaces</b><br>T.T.K. Dat, V.N. Phong and T.T. Phuc                                     | 37 |
| <b>Determine the Optimal Parameters of the Processing of SUS 304 Sheet Material to the Machining Time by Spif Technology</b><br>T. Vo, L.C.K. Dinh and V.L. Vo                          | 47 |
| <b>A Research on the Influences of Forming Parameters on the Roughness of Plastic Products by Fuse Deposition Modeling Technology</b><br>K.D. Le, T.N. Nguyen, N.H. Hiep and S. Antonov | 55 |
| <b>Design and Manufacturing of Feeding System to Improve Accuracy and Surface Roughness of FDM Products</b><br>H.N. Huynh, T.H. Le, N.H.H. Tran and T.H. Bui                            | 65 |
| <b>Design of 2D Wave Booster Ultrasonic Vibration-Assisted Cutting Tool in Small Size Surface Machining</b><br>T.H. Nam, T.A. Son, N.T. Hai and N.T. Phuoc                              | 75 |

## Chapter 2: Materials Degradation and Failure Analysis

|                                                                                                                                                                                                                      |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Damage and Fracture in Creep of a Cast B1914 Superalloy</b><br>M. Kvapilová, P. Král, J. Dvořák, K. Hrbáček, K. Kuchařová and V. Sklenička                                                                        | 87  |
| <b>Influence of Processing Technology on Creep Damage of Ultrafine-Grained Titanium</b><br>J. Dvořák, P. Král, A.G. Kadomtsev, V.I. Betekhtin, M.V. Narykova, M. Kvapilová and V. Sklenička                          | 93  |
| <b>Effect of Graphite on Residual Lifetime of Superheater Tubes Made of Steel 16Mo3 after Creep Exposure</b><br>Š. Stejskalová, Z. Kuboň and G. Rožnovská                                                            | 99  |
| <b>Creep Damage in Steam Pipelines and the Use of Metallography in Verifying the Possibilities of Testing</b><br>P. Mareš, J. Veselá and Z. Špirit                                                                   | 107 |
| <b><i>In Vitro</i> Corrosion Study of Selected Laser Melted WE43 Magnesium Alloy in Hank's Balanced Salt Solution</b><br>V. Bednaříková, L. Klakurková, M. Remešová, M. Horynová, J. Suchý, D. Paloušek and L. Čelko | 113 |
| <b>Effect of Carburizing Helium Environment on Corrosion Behavior of the High-Temperature Alloys for High-Temperature Gas-Cooled Reactor</b><br>W. Zheng, Q.H. Wang, X.D. He, H.Q. Yin, H.X. Li and T. Ma            | 119 |
| <b>Causes of Injection Mould Insert Block Damage</b><br>Z. Pavloušková, L. Klakurková, M. Juliš, P. Gejdoš and J. Švejcar                                                                                            | 127 |
| <b>Analysis of the Causes of Shaft Damage</b><br>K. Zábanský, L. Klakurková, P. Gejdoš, M. Juliš and J. Švejcar                                                                                                      | 133 |
| <b>Analysis of Cracked Rail of the Crane of Type A120</b><br>J. Kasl                                                                                                                                                 | 139 |

|                                                                                                                                                                                |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Analysis of the Causes of Failure and Material Analysis of Components of the Screw Conveyor of a Coal Boiler for Steam Production</b><br>J. Koc, E. Chvostová and J. Dlouhý | 147 |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|

### **Chapter 3: Concrete Properties**

|                                                                                                                                                                   |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Thermal Stress of Early-Age Concrete Made with Different Cement Compositions</b><br>J.D. Xin, Y. Liu, G.X. Zhang, Z.H. Wang, N. Yang and Y. Qiao               | 157 |
| <b>Creep Behavior of Early-Age Concrete Made with Different Cement Compositions under the Controlled Temperature History</b><br>D.Z. Wang, J.D. Xin and Z.H. Wang | 163 |

### **Chapter 4: Agricultural Product Processing**

|                                                                                                                                                          |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Optimization of the Novel Vacuum Drying Process's Parameters on the Dragon Fruit Chips</b><br>B.Q. Nguyen, L.H. Sam and S. Tran Anh                   | 171 |
| <b>A Study on Effects of Temperature and Velocity of Drying Air on Flavonoids Extraction Rate of Houttuynia Cordata Thunb</b><br>L.M. Nhut and B.D. Sang | 177 |

### **Chapter 5: Innovations in Textile Manufacture**

|                                                                                                                                                                 |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Whiteness Perception under LED Source with High Content of UV Radiation</b><br>M. Vik, A.A. Mukthy and M. Viková                                             | 187 |
| <b>Structural Engineering for Obtaining Functional Terry Towels</b><br>R.V. Costa, C. Silva, P. Silva, J. Bessa, F. Cunha, J. Oliveira, J. Lima and R. Figueiro | 195 |
