## **Applied Mechanics and Engineering**

## **Table of Contents**

Preface	
Modeling the Output Power of Direct Methanol Fuel Cells Using SVR J.L. Tang and X.J. Zhu	1
The Impact of 3D Coordinate Technology Using Nanomaterials on Architecture Engineering Industry S.H.R. Ali and G.A. Ebrahim	7
Large Torsion Deformation: Centrosymmetric Reentrant Honeycomb B.H. Xu, S. Wang, K.F. Zhou, W.Y. Ma and N. Sun	17
Evaluation of the Effect of the Difference between the Real Attachment Unit and the Sealing in the Study of the Stress-Strain State of the Solar Panel of a Small Spacecraft as a Result of a Temperature Shock A.V. Sedelnikov and V.V. Serdakova	27
Numerical Calculation and Prediction of the Water Temperature in Reservoir of a Hydropower Station in Laos H. Zhou, J.X. Ding, Z.C. Zhang and Z.J. Wang	35
Research on the Denoising Method of Intelligent Ultrasonic Fuel Consumption Testing in Automobiles B.X. Fu, W. Wang, Z.Y. Cheng and Y. Bao	43
Vibration Analysis of Cylindrical with Splitter Plates under Different Deflection Angles at High Reynolds Number J.Y. Ding and C.X. Jiang	51
