Preface, Committees and Sponsors

Chapter I: Applied Mechanics

System Configuration and Evaluation for Optical Sled Drive Using Constraint-Tuning Ultrasonic Actuator M.H. Lai, F.L. Wen, Y.L. Shen and M.S. Ouyang	1
Mechanical Properties of Several NiTi Alloy Wires in Three-Point Bending Tests S. Dechkunakorn, R. Isarapatanapong, N. Anuwongnukroh, N. Chirananit, J. Kajorchaiyakul and A. Khantachawana	14
Composition and Transitional Temperature Range of Several Nickel-Titanium Alloy Wires in Orthodontic Treatment R. Isarapatanapong, S. Dechkunakorn, N. Anuwongnukroh, N. Chirananit, J. Kajorchaiyakul and A. Khantachawana	20
Radial Oscillation of Incompressible Rectangular Vulcanized Rubber Sealing Rings X.G. Yuan, D.T. Niu, S.Q. Cong and X.W. Liu	26
Multiobjective Optimization of Hybrid Electrical Vehicle Powertrain Mounting System Using Hybrid Genetic Algorithm J.F. He and X.X. Jin	30
Mechanical Properties and Reinforcement Mechanism of Amorphous Particles Reinforced Aluminum Matrix Composites J.X. Wang, R.J. Zhao and X.L. Zhang	38
Error Analysis Model of Aircraft Multi-Joint Assembly Based on Linkage Mechanism Theory C.B. Tan, J. Xu, L.S. Zhou, L.L. An and W. Wei	43
Layup Analyzing of a Carbon/Glass Hybrid Composite Wind Turbine Blade Using Finite Element Analysis H.C. Lin	49
Analysis of A/C Double Angular Milling Head's Performance P. Zheng, D. Zuo and Y.H. Wang	55
Analysis on the Thermal Error Compensation Model of Direct-Drive A/C Bi-Rotary Milling Head P. Zheng, X. Bao and F. Cui	59
Bi-Layered Model of Interfacial Thermal Stresses with the Effect of Different Temperatures in the Layers S. Debnath, M.E. Rahman, W.D. Engida, M.V.V. Murthy and K.N. Seetharamu	63
Mesoscale Simulation of Uniaxial Tension of FCC Polycrystal Using Viscoplastic Self Consistent Method F.A. Hua, J.P. Li, W. Di and G.D. Wang	71
Experimental Investigation a Hydrofoil Lift Characteristic under the Action of Lorentz Force Y.H. Chen, B.C. Fan and Z.H. Chen	78
Application of Taguchi and Response Surface Methodologies for Surface Roughness in Rotary Tool Polishing Hardness Mould Steels P. Potejana and C. Thongchattu	82
Portable Underwater Pressure Measurement System Y.S. Liu, A.J. Zhang and Y.F. He	90
Property Improvement of TiNi by Cu Addition for Orthodontics Applications A. Phukaoluan, A. Khantachawana, P. Kaewtatip, S. Dechkunakorn, N. Anuwongnukroh, P. Santiwong and J. Kajorchaiyakul	95
A New Information Entropy-Based Ant Clustering Algorithm W.L. Zhao, Z.G. Zhang and Z.J. Zhang	101
Experimental and Finite Element Analysis Approach for Fatigue of Unidirectional Fibrous Composites A.A. Alireza, A. Sayid and K. Reza Kashyzadeh	106

Analysis of the Impact of <i>In Situ</i> Repair Technology on the Surface Integrity of Excavator Bucket Bores	
T. Torims, A. Ratkus, J. Vilcāns, M. Zarins and A. Rusa	113
A Fuzzy Logic Based Rocket Launch Tube's DFMEA	
T. Pornpibunsompop, A. Charoenpon and E. Pankaew	119
Active Vibration Suppression Based on Intelligent Control for a Long-Range Ultra-Precise Positioning System	
L.T. Sun, J.S. Wang, Z.Q. Han and C.A. Zhu	123
Mechanical Strain for 0.16 μm nMOSFET on 30 μm Si-Substrate	
H.L. Kao, J.Y. Ke, M.T. Chen, Y.C. Lee, C.S. Yeh and S.P. Shih	129
Superplastic Forming of Combustion Chamber	
H.S. Lee, J.H. Yoon, J.T. Yoo and Y.M. Yi	132
Experimental Verifications and Simulations of Magnetic Motor of Circular Miniature Loudspeaker for Total Harmonic Distortion Improvement	
S.J. Pawar, S. Weng and J.H. Huang	136
Droplet Movement on a Low Cost EWOD According to Applied Frequencies and Voltages	
C. Phongsomboon, K. Sukhthang, W. Wechsato, A. Tuantranont and T. Lomas	140
Transient Behavior of Air Flow through the Intake Manifold of a Heavy Duty Diesel Engine	
T. Srisattha, S. Issarakul, W. Wechsato and K. Wannatong	146
Structure Parameter Analysis of Loop Outlet Based on the Orthogonal Experiment	
C.Z. Liang, M.M. Lu, Z. Tian and N. Zhu	151
Influence of Size of Abrasive Particles in Conveyor Liquid on Ultrasonic Cavitation Machining Process	
M. Hadi	155
Chapter II: Manufacturing Technology	
Investigating Mass Customization Implementation in Iranian Manufacturing Organizations	
C. Valmohammadi	159
Comparison of Digitized Images for Cephalometric Analysis from Scanner and Digital Cameras	
N. Anuwongnukroh, S. Dechkunakorn, C. Sinthanayothin and L. Shinawatra	164
Effect of Amount of Cutting Fluid on Surface Finish of Turned Parts	
M.N. Islam	170
Study on Improved Tabu Search Algorithm for Min-Max Vehicle Routing Problem	
C.Y. Ren	178
Manufacturing of Aerospace Parts with Diffusion Bonding Technology	
H.S. Lee, J.H. Yoon and J.T. Yoo	182
Properties of TaN Coating Film Deposited on WC-Co-Based Cemented Carbide Using Magnetron Sputter Ion Plating	
T. Wada, K. Iwamoto, K. Tsukamoto and K. Hiro	186
High-Precision Moment of Inertia Testing System and Error Analysis	
A.J. Zhang, X.L. Cheng and W.S. Pan	191
High-Temperature Response of TiC Particulate Reinforced Titanium Matrix Composite	
W.D. Song, J.G. Ning and X.N. Mao	196
Modeling and Validation of Ultra Precision Positioning System	
J.S. Wang, L.T. Sun, M.C. Feng and C.A. Zhu	200
Modelling of Unilateral Contact of Metal and Fiberglass Shells	
E.T. Karash	206
Chapter III: Others	
An Adaptive Ant Colony Algorithm Improved and Simulation	
Y.S. He and X. Li	209
Research on Preparation and Properties of Edible Composite Protein Films	
G.Y. Chen and Q. Lei	213
Development of Cutting Force Model of Aluminum Nitride Ceramic Processed by Micro End Milling	
M.M. Reddy, A. Gorin and K.A. Abou-El-Hossein	223

Investigating Effect of Industrial Coatings on Fatigue Damage A. Arghavan, K. Reza Kashyzadeh and A.A. Asfarjani	230
Rock Damage Research Based on the Energy Principles W. Gao, L. Wang and D.Y. Yang	238
Microstructure and Strengthening Mechanisms of Oxide Dispersion Strengthened Ferritic Alloy J.H. Lee	243
A Novel Identification Method of Rotor Time Constant of Induction Motor Q. Li and T.G. Yang	249
Load Test on Reinforced Concrete Beams Strengthened by Carbon Fiber Laminated Plates - A Case Study H.R.H. Kabir and A.L. Al-Khaleefi	255
