## **Table of Contents**

## **Preface and Organizing Committee**

## **Chapter 1: Applied Mechanics and Measurement Technology of Detection and Monitoring**

Study on the Method of Crack Detection of Steel Rods Based on Modal Analysis H.C. Sun, Y.C. Deng and Y.C. You	3
<b>Detection System for Scratch on the Wheel Tread of Train Based on PSD</b> P. He, Y. Li, Y. Guo and P. Li	9
Effects of Time Dependent Temperature and Thermal Radiation on Free Convection Flow in Unsteady Couette Motion M. Narahari and N. Yahya	15
Numerical Simulation of Stress Wave Propagation Induced by Cut Blasting in Multi-Media G.L. Yang, R.S. Yang, C. Huo and Y.L. Che	22
Quantifying Fractal Dynamics of Metallogenic Systems with Detrended Fluctuation Analysis L. Wan, P. Chen and Z.X. Gong	26
Bottom Dead Center Repeat Precision of High-Speed Press Measurement X. Zheng, J.L. Wang and J.L. Yao	31
Research on Fatigue Life of Autofrettaged Thick-Walled Cylinder in Probabilistic Fracture Mechanics	
A.J. Chen, Z.C. Cha and Z.Q. Wang  Numerical Analysis of Ice Accretion and Icing Effects on Airfoils	36
B. An and W.M. Sang  Identification and Reconstruction of Cracks in Ultrasonic Infrared Thermography  E.Z. Fang, C.S. Zhang, O.Y. Min and B.C. Fang.	40
F.Z. Feng, C.S. Zhang, Q.X. Min and P.C. Jiang  Study of the Parameters of Deep Drawing Process Based on the Simulation of Dynaform  Q.W. Qu, T.K. Sun, S.Q. Wang, H.J. Yu and F. Li	46 51
The Simulation and Sensitivity Analysis of S-Lay Installation in Deep Water L.P. Sun, D.J. Wang, S.M. Ai and X. Zheng	59
Finite Element Analysis of Elevator Link Stress Based on Pro/E and ANSYS J.P. Wang, H.T. Wang and Z.F. Bao	65
Quantitative Analysis of Transverse Cracking of Rail Using Eddy Current Non-Destructive Testing	70
Z.L. Song, T. Yamada, H. Shitara and Y. Takemura  Convergence Study on Application of the Over-Deterministic Method for Determination of Near-Tip Fields in a Cracked Plate Loaded in Mixed-Mode	70
L. Šestáková and V. Veselý  Numerical Simulation Studies on Surface Erosion of Transmission Line in Sand and Dust	76
Conditions G.R. Hua, X. Lu, Q. Xiao and H.Y. Wang	82
Experimental Study on Measurement Accuracy of Prediction Index $K_1$ for Rock Crosscut Coal Uncovering Y.J. Chen and C.L. Jiang	88
Temperature Drift Compensation Algorithm Based on BP and GA in Quartzes Flexible Accelerometer	00
X.F. Li, D.H. Li, J.M. Gao and M.S. Pang <b>Buffeting Prediction of a Square Cylinder with Inflow Turbulence</b>	95
Z. Liu  A Practical Method to Calculate Elasto-Plastic J-Integral	100
Y.H. Li, X.L. Bai and Y.W. Zhao  Real-Time Detection of Adhesion Coefficient between Tire and Road K.Y. Wang, J.H. Tang, G.Q. Li and C.Y. Yuan	104 109

Research on WALKER Constitutive Model Tangent Modulus Y. Chen, Q.W. Wang and Q. Shan	113
Flow Microsensor of Thermal Type for Measurements of Gas Fluxes O. Sazhin	118
A Study of Air Flow through Perforated Tile for Air Conditioning System in Data Center J. Priyadumkol and C. Kittichaikarn	126
The Evolution Equation for Wave Processes of the Shift Deformation Y.E. Ivanova and V.E. Ragozina	132
Structural Damage Detection by Integrating Non-Negative Matrix Factorization and Relevance Vector Machines S.M. Zhou and Y.Q. Bao	137
The Sufficient Condition for the Existence of Periodic Solution of Certain Three Dimensional Nonlinear Dynamical Systems	
J. Li, T.T. Quan and X.D. Jin  Combination Method of Kernel Principal Component Analysis and Independent	147
Component Analysis for Process Monitoring Y.W. Xiao and Y. Du	153
Grid Validations for Downburst Simulations H.X. Dang, F.L. Yang and J.B. Yang	159
Semi-Orthogonal Binary Spline Wavelets in Incompressible Fluid Dynamics S.W. Chan, K.F. Lai and M. Syed	164
<b>Two-Dimension Temperature Field Reconstruction in Furnace by Acoustic Method</b> L.N. Jia, Y. Gao and D.C. Lu	170
Tilt Error Analysis and Compensation for Two-Position North Determining Scheme in FOG North-Seeker R.Z. Pei, D.H. Li and K.K. Duan	175
Locomotive Characteristics of Body and Limb in a Terrestrial Vertebrates S.H. Park and D.P. Hong	180
UGNX8.0 Multi-Axis Machining Technology in Impeller Design and Programming Simulation Processing Application Y.Y. Chen, X.L. Ma and Y. Zhang	189
Measurement of Blood Pressure and Heart Beat Based on Sensors and Microcontrollers I. Morsi and Y.Z.A.E. Gawad	193
Numerical and Experimental Investigation on the Weighing System of an Incubator Shaker Y.J. Gu, Z.H. Feng, Y.P. Tang, Z.M. Wang and X.P. Pan	202
<b>Design of a LabVIEW System Applied to Predictive Maintenance</b> M.H. Mathias, E.C. de Medeiros and V.D. Gonçalves	208
<b>Drum Sludge Drying Equipment Energy Dissipation Factor Analysis</b> X.L. Ma and Y. Zhang	213
The Design about Aiming at Amount of Change from Baseline Detector with Characteristics of High-Resolution	
J.S. Wang, Y.C. Zhao and Z.Y. An  Density-Based Distributed Elliptical Anomaly Detection in Wireless Sensor Networks	218
S.H. Ma, J.K. Wang, Z.G. Liu and H.Y. Jiang Interstellar Autonomous Navigation System Using X-Ray Pulsar and Stellar Angle	226
Measurement Y.D. Wang, J.F. Sun and W. Zheng	231
Recognizing Check Magnetic Code Based on Peak-Valley Location and Amplitude D. Fan, Z. Chen, C.C. Bu, Z.S. Yang and J. Li	241
Wireless Gas Detector System Using Microcontrollers, PLC and SCADA System for Monitoring Environmental Pollution	
I. Morsi and M.M.M. Mostafa	247

## **Chapter 2: Mechanical Engineering, Manufacturing Technology and Application**

Suppressing Chatter in a Plunge Grinding Process: Application of Variable Rotational Speed of Workpiece	
Y. Yan and J. Xu	259
An Efficient Model for Trust Force Dynamic Analysis in Drilling of CFRP/AL Stack H. Cheng, Y. Li, K.F. Zhang and B. Luo	263
An Optimal Selection Model of the Satellite Lurk Orbit X.K. Zhang, Y.K. Gong and J.H. Qu	270
Dynamic Responses of Vehicle-Track-Foundation System under Axial Loads H.L. Zhu, L.F. Yu, E.N. Yuan and X. Wang	274
Thermodynamic Performance Analysis of Ammonia-Water Rankine Cycles Using Heat Sources of High and Low Temperatures K.H. Kim, H.J. Ko and S.W. Kim	278
Effects of Repair Weld on Residual Stress Distributions in Offshore Pipelines M. Zeinoddini, S. Arnavaz and S.A. Hoseini	284
Research of Dynamics Simulation of a Six-DOF Segment Erector for Tunnel Boring Machine G. Li, B. Wang, Y.D. Chen and W.S. Wang	291
Experimental Investigations on Characteristics and Welding Forces in Friction Stir Welding of AA 6061-T6 Aluminum Alloy	2)1
Q.X. Wang, J.G. Yang and L.L. Ding	295
The Application of Hasofer-Lind Method in Reliability Design of Thin-Walled Cylindrical Shell	202
Y.L. Zheng, Z.M. Lu, L.L. Wang, L. Zhang and G.L. Zhou	303
Statistical Energy Analysis of Wind Noise in High-Speed Train Cab X.Y. Yang, Y.G. Xiao and Y. Shi	307
Kinematic Model of Mobile-Cylinder Engine S. Fedorenko, A. Nikiforov and V. Fedorov	314
A Method to Test Holding Force of an Electrode Tab-Clamp for Lithium-Ion Battery Formation C.H. Ding and P. Liu	321
Research on the Sufficient Condition for the Existence of Periodic Solution of FGM Subjected to Aero-Thermal Load	226
J. Li, X.N. Yin and X.D. Jin	326
Residual Stress Prediction for High Speed Machining S.Y. Lin and S.H. Cheng	332
Slip-Slope Estimation of Mutative Road Friction Coefficient Based on Unscented Particle Filter	
F. Lin and C. Huang	337
Stress Analysis and Safety Prediction of Alloy Wheel Hub W.X. Qian, X.W. Yin and L.Y. Xie	343
The Refined Equations of Special Orthotropic Piezoelectric Plate-I: Anti-Symmetrical Transverse Surface Loadings	
B.S. Zhao and D. Wu	348
The Refined Equations of Special Orthotropic Piezoelectric Plate-II: Symmetrical Transverse Surface Loadings B.S. Zhao and D. Wu	352
Analysis of Contacting Mechanical Characters Based on Cyclical Symmetrical Theory D. Zhao	356
A Coupled Fluid-Structure Simulation for Variable Displacement Pump Used in Vehicle W.W. Wu, J.G. Li, H.H. Zheng and Z.S. Wu	361
Characteristics of Self-Synchronization of Dual-Rotors System N. Zhang	366
The Simulation Application for the Structure Design of the Etcher Nozzle L. Sheng	372
Design Method of the Advanced Actuator C.P. Zou and J.Q. Feng	378
Innovation of the Advanced Actuator C.P. Zou and J.Q. Feng	382

Study on Inversions of the Offset Planetary Train with Bevel Gears C.P. Zou and J.Q. Feng	386
Steady-State Load Analysis of a Caterpillar Chassis by Finite Element Method Q.W. Qu, H.J. Yu, S.Q. Wang, T.K. Sun and J.Z. Che	389
Green NC Transformation of Lathe C6132 Based on the Green Manufacturing Process Y.H. Fu, R.Y. Zhang and Y. Xu	394
<b>Data-Driven Based Gas Path Fault Diagnosis for Turbo-Shaft Engine</b> F. Lu, T.B. Zhu and Y.Q. Lv	400
The Study of Electromagnetic Slip Clutch Application in Step Less Speed Regulation of Small Cars	405
R.X. Bai, J. Zhu, J.G. Dong and S.C. Chen  Improved Design and Dynamic Simulation of High Aspect Ratio Folding Wings S.L. Lv, P. Liu, G.J. Yang and X.Y. Tong	405 410
Manufacturing Information Model for Design for Manufacturing H.J. Liu, Q.M. Fan and T.X. Yan	415
Two Layer Fuzzy Generalized Maxwell-Slip Compensator in Direct Drive Servo Hydraulic System	413
P. Guansak, D. Kogphimai and W. Po-Ngaen	420
Large Eddy Simulation of Two-Phase Mixing Layer Flows in the Scramjet Z.X. Ren, B. Wang and H.Q. Zhang	428
Investigation for Convective Heat Transfer on Grinding Work-Piece Surface Subjected to a Mist/Air Impinging Jet J.Z. Zhang, X.M. Tan, B. Liu and X.D. Zhu	434
Investigation on Convective Heat Transfer over a Rotating Disk with Bottom Wall	434
Subjected to Uniform Heat Flux J.Z. Zhang, X.M. Tan and X.D. Zhu	443
Numerical Simulation of Impinging Jet with Mist Injection X.M. Tan, Y.F. Li and J.Z. Zhang	452
Effects of Centrifugal Pumps Outlet Angle on Flow Induced Vibration and Noise Y. Wang, J. Wang, D.X. Liu and H.L. Liu	460
Preliminary Research of Manufacturing Technology for ITER Magnet Supports B.L. Hou, P.Y. Li, S.J. Yang and C.J. Pan	466
A Numerical Study of an Injection-Compression Molding Process by Using a Moving Grid B. Dwiyantoro	472
The Control of Hydrogen Flow in Keeping with Load Changing at the PEMFC Y.G. Jung, C.M. Hwang, D.H. Park, K.H. Kim and C.H. Han	477
Neural Network and D-S Evidence Theory Based Condition Monitoring and Fault Diagnosis of Drilling	401
J.P. Wang, S.D. Lin and Z.F. Bao  Evaluation of a Three-Parameter Equation in the Multiaxial Fatigue Life Prediction	481
Y. Xiong and L.X. Cheng  Effects of Droplet Size on Transient Behavior of after Fogging Process	487
K.H. Kim, C.H. Han and Y.G. Jung	493
Analysis on Thermal-Fluid-Solid Interaction of Straight Pad Finger Seal Performance C. Chang and S. Hua	498
Theoretical Analysis and Experiment of Super Hybrid Rice Seeds Embryo Oriented Based on Arc-Shaped Guided Plate Y.X. Yu, B. Zheng and Y.Y. Yang	505
The Influence of Speed on the Performance of Centrifugal Pump H.M. Zhang, G.J. Li and D.M. Peng	512
A Numerical Study on the Influence of Grooves on Heat Transfer Performance of Wet	J.2
Clutch Y.L. Lei, J.T. Wen, X.Z. Li and C. Yang	517
<b>Development of Connecting Rod Three-Dimensional Parametric Design System</b> K.X. Guo, H. Tang and Q. Cao	523
Numerical Simulation of Non-Equal Diameter Cylinder G.J. Yang and J. Sun	527

Ontology Based Knowledge Processing in Condition Based Maintenance System G.Y. Jin, F.Z. Lv and Z.Q. Xiang	533
A Novel Shape Memory Alloy Damper and its Application in the Vibration Control of Transmission Towers	
F.C. Liang, H.L. Chen, Y.Q. Wang, C.Q. Liu and J.H. Qiang	542
<b>Development of 1×4 MEMS Multifunction Integrated Optical Device</b> Q.H. Chen, Y.J. Chen, Y.M. Li and W.G. Wu	551
Numerical Study of Inverse Problems of Nonscattering Anisotropic Shell Theory G.V. Alekseev, A. Lobanov and G. Grenkin	557
Three-Dimensional Structure Modeling in Tuo128 Block of Shengtuo Oilfield H.B. Zhao, X. Li, F.H. Wang and Y.B. Cui	563
A Kind of New Switching Power Supply with Multiple Isolated Outputs Used in High-Voltage Static Synchronous Compensator B.J. Yan, A.D. Xu and Z.Y. Bai	567
<b>Application of Generalized Predictive Control to a Peristaltic Pump</b> G.F. Hu and L.G. Chen	572
The Research of the Stability of Rotation Super-Rice Seed Based on Single Axisymmetric Characteristics Y.X. Yu, B. Zheng, Y.Y. Yang and J.H. Lin	577
Comprehensive Evaluation for Safety Working Status of Hoisting Mechanism of Crawler Crane Based on 3-Scale AHP	
G.N. Xu and P. Li  Research on Stochastic Finite Element Reliability Analysis Method of the Structure for the	583
Truck Crane Boom F.Y. Lu, J.J. Gao, R.G. Yang and G.N. Xu	589
Research on Integrated System Control Strategy of Regenerative Braking and Anti-Lock Braking System for Electric Vehicle	506
J. Wang, J.K. Qiao, Z.Q. Qi and B.Z. Liu  Dynamic Characteristic Analysis and Experiment of Piezoelectric Vibration Table of	596
Industrialized Precision Seeding Device S.F. Chen, L.Y. Hou and S.P. Zhang	604
<b>Design and Research on Variable-Rate Fertilization Computer Control System</b> S.F. Chen, C.L. Feng and S.P. Zhang	610
<b>Design and Experiment on Paddy Hydraulic Drive Variable-Rate Fertilization Device</b> S.F. Chen, Z. Zhao and C.L. Feng	616
Modeling and Analysis of Brake by Wire System in Electric Vehicle L.Y. Yu, W.Z. Zhao and J.B. Yi	622
The Iterative Method for Reliability Estimation of Fatigue Life X.L. Bai, P. Xu and J.Y. Li	628
Reliability Estimation of Fatigue Life for Machine Parts under Uniaxial Constant Amplitude Load	
Y.H. Li, X.L. Bai and Y.F. Zhang	632
Optimization of Two-Stage Closure Law of Turbine Wicket Gates and its Application S. Chen, J. Zhang and X.D. Yu	636
Study on Fatigue Performance of Large Volume Seamless Steel Cylinder Served in CNG Hydraulic Daughter Station System	(12
H.L. Dong, Z.X. Duan, B.X. Li and D.Y. Wang  Shape Optimization of High-Speed Train Pantograph Insulators for Low Aerodynamic	642
Noise X.Y. Yang, Y.G. Xiao and Y. Shi	646
<b>Discussion on Solving Systematic Matrix for Linear System of Invariant Time</b> C.H. He and Z.H. Yin	652
Numerical Simulation and Experiment of Motion of Rice Seed in Pneumatic Seed-Metering Device	657
Y.X. Yu, Y.Y. Yang, B. Zheng and F. Zhang  Analysis of Ring Compression Test for Determination of Friction Circumstances in Forging	657
Process M. Dehghan, F. Qods, M. Gerdooei and J. Doai	663

Research on Vehicle Chassis Integrated Control Technology Based on Coordination	
Strategy K.Y. Wang, C.Y. Yuan, J.H. Tang and G.Q. Li	667
Research on Stochastic Stability of Wheelsets with Primary Suspension W.W. Liu and H.Y. Dai	672
The Union Algorithm of Rolling Stocks' Kinematic Envelope H. Dong and R. Luo	678
Vibra-Acoustic Characteristic Matching of Mini-Car Body Structure and Interior Acoustic Cavity in Low Frequency Range Q. Wang, Y. Yu, Y.B. Li, S.K. Li and W.J. Zheng	685
Thermal Analysis of Cold Plate for Motor Controller Based on Fluent	003
G.L. Lin, G.Q. Xu, W.M. Li and B.B. Liu	691
The Optimum Windshield-Defog and Passenger-Comfort Methods of a Vehicle in all Seasons	
K.L. Wong, W.L. Chen and Y.C. Li	696
<b>Design of a Cutting Point Control Algorithm for Five-Axis Machining</b> C.H. She and T.H. Yang	702
Study on the Mechanical Characteristics of an Electrode Tab-Clamp for Lithium-Ion	
Battery Formation C.H. Ding and N. Feng	707
Heat Dissipation and Temperature Distribution of Brake Liner Using Steady State Analysis M.P. Natarajan and B. Rajmohan	712
<b>Application of Micro Capillary Groove Radiator to Electric Vehicle Power-Control Unit</b> B.B. Liu, G.Q. Xu, W.M. Li and G.L. Lin	718
An Experimental Study on Cycle Performance of the Mobile Air Conditioner with and without Indoor Fan Operation Y.C. Park and J. Kim	725
A Comprehensive Approach for Resistance Spot Welding Quality Estimation Using Dynamic Resistance Based Model A. El Ouafi, R. Belanger and M. Guillot	732
Research on Electric Weft Insertion Method for the Rapier Loom Y. He, S.W. Fei, Y.C. Chen and B. Wang	732
Novel Scanning Immersion Lithography for 3D Microfabrication Y.C. Chen and S.C. Tseng	747
Topology-Preserving Transformation Based on the Correspondence of Control Points Using Radial Basis Functions	7.50
X. Yang and S.S. Fan  Stability Analysis and Numerical Simulation of the Conical Tower of the Wind Turbine X. Song, Y.G. Wu, H.Z. Li and J.X. Dai	752 759
The Practical Use and Method for Diagnosing Roller Axle Troubles on Site	139
S.S. Chen	765
Analysis on the Finite Element of Electromechanic Coupling of Flexible Gear in Electromagnetic Harmonic Drive Y.B. Ren and L.Z. Xu	771
Multi-Axle Electro-Hydraulic Control Steering System Based on Servo Solenoid Valve H. Du, J.H. Wei, B. Hu and J.H. Fang	778
An Analytical Study on Thermally Induced Vibration Analysis of FG Beams Using Different HSDTs	
S. Mareishi, M. Mohammadi and M. Rafiee	784
Finite Element Resistivity Forward Modeling Using Algebraic Multigrid Preconditioned Conjugate Gradient Method G.H. Zou and H.Q. Liang	792
Simulation and Experiential Research for Broken Conductor Load of Suspension Towers of	
UHVDC Power Transmission Z.F. Zhang, Z.L. Mo and J.D. Geng	798

Force Propagation of Flow of Granular Materials through an Orifice in Start up Stage H.P. Zhu, B.S. Xia and A.B. Yu	807
Control Problems for the Models of Thermally and Electrically Conductive Viscous Fluid R. Brizitskii and D. Tereshko	812
A Comparative Experimental Investigation of 3D Angle-Interlock Woven Composite between Quasi-Static Tension and Three-Point Bending Loading Conditions F. Zhang, L.M. Jin and B.Z. Sun	818
Finite Element Model Analysis of 3-D Angle-Interlock Woven Composite under Quasi-Static Tensile Loading H.J. Hu, L.M. Jin and B.Z. Sun	823
Kinetic Study on Photopolymerization of TPGDA under Containerless Condition H.P. Zhang, Q.Y. Zhang, J.B. Dou and S. Xu	828
<b>Development of Approaches to the Creep Process Modeling under Large Deformations</b> E.V. Murashkin and M.V. Polonik	833
Spectral Element Model for the PZT-Bonded Laminated Composite Beams U. Lee, I.W. Park and I.J. Jang	838
<b>Study on UV Curable Waterborne Polyurethane Modified by Epoxy Resin</b> W.Y. Li, Y.M. Cao and X.Q. Zhou	842
A Strain Sensing Structural Health Monitoring System for Delaminated Composite Structures	0.40
A. Alaimo, A. Milazzo and C. Orlando  Damage Detection of Filament Wound Composite Cylinder Using Ultrasonic Waves	849
L. Gu, K.Z. Gong, G.Y. Gao and Z. Li  Constitutive Modeling of Flow Behaviour of AISI 4340 Steel under Hot Working Conditions	856
A. Sanrutsadakorn, V. Uthaisangsuk, S. Suranuntchai and B. Thossatheppitak	863
Inhibition Effect of Sodium Molybdate on Friction Stir Weld of 5083 in Aqueous Solution C.B. Shen	870
Fracture Finite Element Analysis for Roll Forming of U Section Parts of TRIP 600 Steel Y.Z. Guan, Q. Li and Y. Yan	874
1.2. Guan, Q. El and 1. Tan	0,.
Optimization of Elastic Supports for Laminated Composite Plates J. Kong	881
<b>Optimization of Elastic Supports for Laminated Composite Plates</b>	
Optimization of Elastic Supports for Laminated Composite Plates J. Kong Research on Debonding Damage of Adhesive-Bonded Composite Integrated Structure	881
Optimization of Elastic Supports for Laminated Composite Plates J. Kong  Research on Debonding Damage of Adhesive-Bonded Composite Integrated Structure G.Q. Yuan and Z.X. Chen  Transient Plasma Ignition for Delay Reduction of Ethene-Air Mixtures	881 887
Optimization of Elastic Supports for Laminated Composite Plates J. Kong  Research on Debonding Damage of Adhesive-Bonded Composite Integrated Structure G.Q. Yuan and Z.X. Chen  Transient Plasma Ignition for Delay Reduction of Ethene-Air Mixtures L.W. Duan and Y.J. Hong  Oxidation Behavior of Reheating Hot Work Die Steels J.U. Choi and H.S. Lee  A Study on Failure of Welded Lap Joints in Alloy 718	881 887 893 896
Optimization of Elastic Supports for Laminated Composite Plates J. Kong  Research on Debonding Damage of Adhesive-Bonded Composite Integrated Structure G.Q. Yuan and Z.X. Chen  Transient Plasma Ignition for Delay Reduction of Ethene-Air Mixtures L.W. Duan and Y.J. Hong  Oxidation Behavior of Reheating Hot Work Die Steels J.U. Choi and H.S. Lee  A Study on Failure of Welded Lap Joints in Alloy 718 J.U. Choi, W.H. Cho, J.H. Yoon, J.T. Yoo and H.S. Lee  An Analytical Modeling for Effective Thermal Conductivity of Multi-Phase Transversely Isotropic Fiberous Composites Using Generalized Self-Consistent Method	881 887 893 896 900
Optimization of Elastic Supports for Laminated Composite Plates J. Kong  Research on Debonding Damage of Adhesive-Bonded Composite Integrated Structure G.Q. Yuan and Z.X. Chen  Transient Plasma Ignition for Delay Reduction of Ethene-Air Mixtures L.W. Duan and Y.J. Hong  Oxidation Behavior of Reheating Hot Work Die Steels J.U. Choi and H.S. Lee  A Study on Failure of Welded Lap Joints in Alloy 718 J.U. Choi, W.H. Cho, J.H. Yoon, J.T. Yoo and H.S. Lee  An Analytical Modeling for Effective Thermal Conductivity of Multi-Phase Transversely	881 887 893 896
Optimization of Elastic Supports for Laminated Composite Plates J. Kong  Research on Debonding Damage of Adhesive-Bonded Composite Integrated Structure G.Q. Yuan and Z.X. Chen  Transient Plasma Ignition for Delay Reduction of Ethene-Air Mixtures L.W. Duan and Y.J. Hong  Oxidation Behavior of Reheating Hot Work Die Steels J.U. Choi and H.S. Lee  A Study on Failure of Welded Lap Joints in Alloy 718 J.U. Choi, W.H. Cho, J.H. Yoon, J.T. Yoo and H.S. Lee  An Analytical Modeling for Effective Thermal Conductivity of Multi-Phase Transversely Isotropic Fiberous Composites Using Generalized Self-Consistent Method S.A. Hassan, H. Ahmed and A. Israr  Several Models for Piezoelectric Composites R.Y. Dou, Z.X. Huang, Z. Chen, J. Dai and M.X. Shi	881 887 893 896 900
Optimization of Elastic Supports for Laminated Composite Plates J. Kong Research on Debonding Damage of Adhesive-Bonded Composite Integrated Structure G.Q. Yuan and Z.X. Chen Transient Plasma Ignition for Delay Reduction of Ethene-Air Mixtures L.W. Duan and Y.J. Hong Oxidation Behavior of Reheating Hot Work Die Steels J.U. Choi and H.S. Lee A Study on Failure of Welded Lap Joints in Alloy 718 J.U. Choi, W.H. Cho, J.H. Yoon, J.T. Yoo and H.S. Lee An Analytical Modeling for Effective Thermal Conductivity of Multi-Phase Transversely Isotropic Fiberous Composites Using Generalized Self-Consistent Method S.A. Hassan, H. Ahmed and A. Israr Several Models for Piezoelectric Composites R.Y. Dou, Z.X. Huang, Z. Chen, J. Dai and M.X. Shi Microstructure of the Acid Welding Slag Y.B. Zhang and K. Zhang	881 887 893 896 900
Optimization of Elastic Supports for Laminated Composite Plates J. Kong Research on Debonding Damage of Adhesive-Bonded Composite Integrated Structure G.Q. Yuan and Z.X. Chen Transient Plasma Ignition for Delay Reduction of Ethene-Air Mixtures L.W. Duan and Y.J. Hong Oxidation Behavior of Reheating Hot Work Die Steels J.U. Choi and H.S.
