

Table of Contents

Preface and Organizing Committee

Chapter 1: Advanced Materials Science and Chemical Engineering

Chemical Extraction of Heavy Metals from the Ash Using Perchloric Acid H.Y. Zhang and S.Z. Li	3
XRD (X-Ray Diffraction) Analysis of the Stabilized Ash H.Y. Zhang and S.Z. Li	7
Fabrication and Microstructural Analysis of CNTs Reinforced Copper Matrix Nanocomposites via MIM Technique A.S. Muhsan, F. Ahmad, N.M. Mohamed and M.R. Raza Malik	11
Corrosion of Copper Pipeline Systems under Different Flow Conditions T. Liptakova, A. Alaskari, A. Dodek and P. Fajnor	18
Molecular Dynamics Simulation of Stick-Slip Friction on a Metal Surface T. Uehara	26
Study on the Effects of Diluent on Silica/Epoxy Resin Composite Material Phase Change H.L. Chang, C.M. Chen, K.L. Lin and B.K. Chang	34
Optimization of Epoxy Composite on Thermal Decomposition Utilizing Experimental Design Method H.L. Chang, C.M. Chen and C.H. Chen	40
The Structure and Adhesion of Zr/TiAlN Coatings on High-Speed Steel and Cemented Carbide Substrates G. Xian, H.B. Zhao, H.Y. Fan and H. Du	46
Preparation and Characterization of Fe₃O₄ Magnetic Nanoparticles Labeled with Technetium-99m Pertechnetate C.S. Tsai, W.C. Liu, H.Y. Chen and W.C. Hsu	51
Predicting the Characteristics of Biofouling Mass Based on Support Vector Machine X.Q. Wen	60
Evaluation of Threshold Condition of Interior Annular Crack Growth in Gigacycle Regime W. Li and P. Wang	65
Study of Characteristics of Partial Discharge for Assessment of Condition of Electrical Insulating Materials of Power Supply System N.K. Poluyanovich and M.N. Dubyago	70
The Study about the Effect of Geometric Parameters' and Material Properties' Changing on the Electromagnetic Performance of BSSAS F. Peng and Z.H. Xie	76
The Comprehensive Utilization of Fly Ash S.Q. Xu	82
Microstructure and Properties of High Performance Steels by Controlled Rolling Y.B. Zhu and X.M. Wang	87
Coefficient of Performance of Thermoelectric Cooling on Nanofluids S. Maneewan, A. Thongtha and C. Punlek	91
Prediction of the Theoretical Strain Limit for the Bulging of Sheet Metals by the Approximate Analytic Method G.F. Gao, L. Sun, J.W. Chao and M.J. Pang	100
Solid Oxide Electrolysis Cell Systems — Variant Analysis of the Structures and Parameters J. Milewski, M. Wołowicz and J. Lewandowski	106

Chapter 2: Measurement Technology of Detection and Monitoring

Using Shear Wave Velocity to Assess the Stiffness of Soil-Cement-Fly Ash K. Piriyakul	115
---	-----

An Automatical Matching Method Applied in Kinematics Measurement for the Flapping Rotary Wing	
F. Chen, J.H. Wu, C. Zhou and Y.L. Zhang	119
Fault Diagnosis of VCM Type AF Actuator Module for Phone Camera by Vibration Analysis	
T.H. Ha, J.Y. Song, C.W. Lee, J.H. Lee and Y.J. Kim	125
Glycophorin a Expression in HEL-92 Cells Treated with Silica Gel Particles	
N.T. Keng, C.S. Tsai, Y.Y. Chen, S.Y. Kao and W.C. Liu	130
Detection for Rail Route State Deformation Based on Trap-Down Inertial Technology	
X.D. Chai, S.B. Zheng, W.F. Zhu and Q.Z. Jiang	136
An Analysis of Algebraic Reasoning Test of the Life Situation of Multiple-Representation by Using Grey Relational to Assess	
H.L. Ma, C.I. Jen, Y.K. Cheng and D.B. Wu	144
Study on the Influence Factors of DWTT for X70 Thick Wall Linepipe	
M.H. Liang, H.Y. Liu and X.D. He	149
Study on the Methods of Predicting the Fouling Characteristics of Plate Heat Exchanger Based on Water Quality Parameters	
X.Q. Wen	153
Extraction of Modal Parameters from Structural Acoustical Responses	
X.R. Qin, Y. Nie, J.J. Hu, Q. Zhang and Y.T. Sun	159
The Application of Mobile P2P Communication Mechanism in Geological Disaster Monitoring	
F.L. Peng, H.H. Wang, X.G. Tuo, J.H. Pu, S.B. Xu and B. Liao	164

Chapter 3: Control, Electronic, Automation Technology and Communication Engineering

The Distributions and Moments of the First Entrance Time for Nonhomogeneous (H,Q) Process	
L.X. Chen and G. Li	173
Compliant Control for the Redundant Dual-Arm Live-Working Robot	
H.B. Gao, S.Y. Lu and G.H. Tian	177
Waveform Relaxation Approach to Solution of Nonlinear Circuit	
W.Z. Song, X.L. Liu and L. Zhang	183
Impact of Wind Penetration Level on System Dynamic Performance	
M. Tang, S.H. Zhang, Y.F. Shen and Y. Li	189
The Judgment of Algebraic Immunity and Resilience of Balanced H Boolean Functions	
J.L. Huang, Z. Wang and Y.J. Liu	195
A Study of RootLocus with Application to the Design of PD Controller for Linear Control Systems	
D.C. Liaw and C.W. Liu	201
Design and Development of the Short Message System on the Campus Network	
H. Tian and H. Tian	207
Robust Control Techniques Applied to the Hot-Dip Galvanizing Process	
G. Romero, A. Palacios, J. Rivera, I. Pérez, D. Lara, J. Rivera and J. Arredondo	212
A Dual-Arm Cooperating Physiotherapy Service Robot Based on Visual Position	
H.B. Gao, S.Y. Lu and T. Wang	222
EEG Classification for BCI Based on CSP and SVM-GA	
H. Yang and S. Wu	228
Study on Improved Multi-Objective Adaptive Artificial Immune Genetic Algorithm	
Z.Y. Hu, W. Zhang and C. Chen	232
The On-Line Monitoring Method for Drainage Wire Galloping in High Voltage Overhead Power Transmission Line	
C.G. Liu, J.C. Liu, X.P. Huang and Y. Liu	239
Research on the Improving of the Large-Scale Wind Power Accommodation Ability in Inner Mongolia Grid	
G.T. Zhao, W.W. Gong, Y. Cong and Q. Li	245

The Research of Power Grid Reserve Capacity Model Based on Equivalent Continuous Load	
H.F. Sun, L.D. Gong and L.P. Zhou	251
H[∞] Fuzzy Control for Nonlinear Interconnected Systems via Genetic Algorithm	
F.H. Hsiao and C.Y. Liu	256
Design and Beam Quality Analysis of Reflective Telescopes through Diffraction Effects and Third Order Aberrations	
K.S. Lakshmi and R. Sudhakar	262
A Wireless Control System for 3D Microscope	
Y.B. Choi, K.J. Nam, W.J. Kim and D.H. Jung	267
Theoretical and Numerical Solutions of Maglev Train Induced Vibration	
S.H. Ju, C.C. Leong and Y.S. Ho	271
Pressure Control Technology of DDVC Gas Regulating System for Butterfly Valve	
Z. Wang, X.T. Ran, C.J. Lu, L. Yang and C.X. Wang	278
Thermal Performance of Commercial Vehicle Braking Process during the Vehicle Descending Speed Control on Roads with Long Length Steep Inclination - A Case Study	
J.C.H. Gutiérrez, A.C. Canale and A.A.T. Maia	283
Thermal Effects Analysis of Flip Chip LED Packages with through Silicon via (TSV) by Using Numerical Simulation	
C.H. Chien, B.S. Chen and Y.D. Wu	289

Chapter 4: Mechanical Engineering, Manufacturing Technology and Management

An Automatic Assembly Technology for Perforated Discs Based on Contour Optimized Hough Circle Transform	
C. Shang and G.L. Tao	297
Finite Element Analysis of the Piston Thermal Load in a Diesel Engine	
Q.P. Zheng, C.Y. Ma and J.Z. Zhang	304
Numerical Simulation of High Frequency Electromagnetic Wave in Microwave Cavity for Soot Oxidation	
H.B. Al-Wakeel, Z.A.A. Karim, H.H. Al-Kayiem and H. Fawad	310
Decision Making Toolset for Woody Biomass Supply Chain in Karelia	
Y. Gerasimov and A. Sokolov	319
Development of CAD-to-CAE Model Preparation Technology	
T. Kubota and P. Chow	325
Fatigue Strength of the Rolls with Grooves	
Ž. Domazet, F. Lukša and M. Bugarin	330
Dynamics Analysis of Vibrating Screen Based on Double Compound Pendulum with Single Motor Driving	
Y.J. Hou	335
Development of a High Precision Silicone Rubber Mold for Cylinder Block	
C.C. Kuo, Y.J. Wang and Z.S. Shi	342
Development of a Low-Cost Automatic Vacuum Degassing System for Rapid Tooling	
C.C. Kuo, M.H. Wu and M.Y. Lai	349
Layout Optimization for Welding Workshop of Vehicle Door Based on SLP	
J.H. Xu, H.B. Yang, Z.L. Chen, F.Y. Mao and H.T. Wang	356
System Dynamics Analysis and Mode-Switch Control for a 3-Mode Range-Extender Electric Vehicle	
Y.H. Hung, C.H. Wu, C.Y. Lin and Y.M. Tung	361
Manual Assembly Workstation Redesign Based on a New Quantitative Method for Postural Comfort Evaluation	
A. Naddeo, N. Cappetti, R. Califano and M. Vallone	368
Deformation Solution in Thin Ring Plates with Circular Holes	
N. Arab	380
Theoretical Analysis and Modeling For a Piezoelectric Bimorph Actuator with Overhanging	
Y.H. Yuan, W.J. Zhao and Z.F. Sun	386

A Numerical Study on the Influencing Parameters of Tire-Acoustic Cavity B.V.S.S. Bharadwaja and P.N. Siva	390
The Influence of On-off Shift Solenoid Valve's Design Parameters on Electromagnetic Force F. Huang, Y.Q. Li, W. Zhang and C.Y. Wang	396
Design of an Innovative Piezoelectric Jacquard Selection Mechanism F.J. Liu and Y.H. Yuan	402
Theoretical Analysis and Experimental Verification that Influence Factors of Climb and Conventional Milling on Surface Roughness Y.W. Li, Y.S. Sun and X.G. Zhou	407
Innovation Research on Medium and Low-Tech Traditional Industry H. Tian	413
Design of a Kind of Non-Resonant Linear Piezoelectric Motor X.F. Chen, W.Q. Huang, J.Q. Luo and J.J. Xu	418
Study of the Tool Life and the Tool Wear Mechanisms in the Production of Holes in Stainless Steel J. Jurko and A. Panda	424
Change of Material Deformation under the Machined Surface when Drilling Steel C45 and DIN 1.4301 J. Jurko and A. Panda	428
Lubrication in Push-Through Bending on Bending of Aluminum Extrusion Section H. Hamano and H. Watari	432
Effect of Die Properties on Bending Characteristics of Push-Through Bending of Aluminum Extrusion Section H. Hamano and H. Watari	440
Numerical Dynamic Analysis of a Single Link Soft Robot Finger E. Natarajan, A.A. Mohd Faudzi, V.M. Jeevanantham, M.R. Muhammad Razif and I.N.A. Mohd Nordin	449
A 3D Finite Element Simulation of Cold Roll Forming of Wrought Magnesium Alloy Sheets H. Watari, H. Hamano, S.I. Nishida and H. Asou	455
Supply Chain Controllable Costs Management and Strategy Analysis H.F. Sun, W.X. Li and Q.S. Tang	462
Design of the Typical Claw Structure Using the Technology of LFC X.Z. Feng, Y.M. Cui, L.H. Yu, L.J. Chen, Z.Q. Jiang and J.W. Cheng	469
Discuss the Fault Disposal of Wind Vane and Anemometer of MW Wind Turbine T. Yu and S.Q. Xu	475
A Stochastic Collocation Method for Uncertainty Analysis of Fatigue Damage Prognosis L.J. Xie, H.S. Tang and S.T. Xue	479
Develop on Tutorial Courseware for the Theoretical Mechanics Based on the Basic Conception Y.R. Ren	485
Research of Parallel Machine Scheduling with Flexible Resources Based on Nested Partition Method H.F. Sun, X.D. Liu and W. Hou	488
Applying Technology Acceptance Model to Explore the Adoption of Hydrogen-Electric Motorcycle in Taiwan H.S. Chen	494
Design Optimization of Blade's Stacking Line Based on Fluid-Structure Coupling Technique Y.Q. Shi, Y. Wang and Q.Z. Yang	499
Chaotic Motions of a Damped and Driven Morse Oscillator L.Q. Zhou and F.Q. Chen	505
Development of Landing and Taxiing Response Analysis System for Aircraft with Multi-Wheels and Multi-Landing Gears H. Wang and L. Wang	511

Chapter 5: Biomechanics Technology

State of the Art Analysis of Device for “CPM” Rehabilitation of Wrist and Hand F. Ragazzo	519
Evaluation of Stress Shielding for Three Types of Implanted Femurs Based on Stress Distribution K. Ouchi, G. Deng, G. Yamako, E. Chosa and T. Nakanishi	524
Biomechanical Analysis of Starting Action on an Outstanding Short Track Speed Skating Female Athlete C.B. Zhang	530
Cable-Driven Parallel Manipulator for Lower Limb Rehabilitation R.S. Gonçalves, J.C.M. Carvalho, L.A.O. Rodrigues and A.M. Barbosa	535
Design and Supporting Force Experimental for the Bionic Water Strider Model Q.C. Wang, X.D. Yang and Z.J. Yang	543
Research on Micro and Nano Structure and Wettability for Water Strider’S Leg, Abdomen, Back and Wing Q.C. Wang, X.D. Yang and Z. Yang	547
Study on Micro and Nano Structure and Superhydrophobicity for Several Typical Planing Animals Legs Q.C. Wang, X.D. Yang and Z.J. Yang	551
Substrate Stiffness as a Regulator in Catalyzing Integrin-Mediated Cell Adhesion Nucleation: A Mechanochemical Model X.L. Peng	555

Chapter 6: Rock, Civil and Structural Engineering

Reducing Air Pollutants through Road Innovative Intersections M. Guerrieri, F. Corriere, G. Parla, D.D. Vincenzo and A. Messineo	563
Estimation of Measures of Effectiveness (MOE) for the C-Roundabouts M. Guerrieri and F. Corriere	569
Study on Damage Characteristics of Unstable Rocks under Excitation Effect H.K. Chen, Y.T. Zhou and Z. Wang	575
Design Analysis of Shallow Embedded Column Foot of Reactive Powder Concrete Pole Y.Z. Jia, X.M. Yu and L. Zhang	582
Research on Application of Non-Equilateral Angle Steel for Transmission Towers Y.Z. Jia, H.H. Xi and L. Zhang	589
Calculation of Turbo-Roundabouts with Slip Lanes M. Guerrieri and F. Corriere	595
Asismic Analysis on Separation Joint of Atrium Roof and Connection Modes with Tower J. Zhou, X. Han and M. Jin	601
Performance of Steel Pipeline with Concrete Coating (Modeled with Concrete Damage Plasticity) Underseismic Wave Passage J.M. Dulinska and D. Jasinska	608
Case Study for Rectangular Composite Panel Zone W.H. Jong and M. Hee	614
Orthogonal Expansion Method of Random Processes for Fluctuating Pressure of Water Flow E.L. Ye and Y.H. Zhou	619
Finite Element Model of High-Voltage Transmission Tower Confirmed C.C. Liu and Q.S. Xu	625
Gobi Inclined Excavation Based Numerical Analysis L. Qin and H.J. Zhang	631
A New Type of Phase-to-Phase Spacer W. Kong, Y.X. Wang and Y.S. Wang	637
The Numerical Simulation Analysis of Transmission Lines New Composite Type Foundation Y.Z. Jia, M.Q. Wang, J. Zhang and J. Liu	641
Dynamic Stability Analysis of the Tower Structure of Construction Elevators X.R. Qin, Y. Hong, P. Yue, Q. Zhang and Y.T. Sun	646

Laboratory Experiments on Effects of Water Jet on Heat-Affected Concretes L. Bodnárová, L. Sitek, J. Foldyna, J. Klich and P. Hlaváček	650
Development of High Compressive Strength Fire Brick S.S.H. Pisitsungkakarn, P. Ubolsook and A. Watanapa	658
Application Using Sugar Sediment to Enhance Mechanical Properties of Autoclaved Aerated Concrete A. Thongtha, S. Maneewan, C. Punlek and Y. Ungkoon	664
Calculating Algorithm for Torsional Stiffness of Conductors-Spacers L. Qin and C. Zhang	669
Constitutes Model of Housing Prices and Analysis of the Reasons for High Prices in China J.L. Huang and Y.J. Liu	674
Failure Patterns Analysis of Transmission Tower under Longitudinal Tensions Based on the Finite Element Numerical Simulation X. Hu, X.L. Liu and Y.X. Li	680
An Analysis of Visitors' Satisfaction toward Urban Parks Based on the Method of IPA - Illustrated with the Example of Beijing Lotus Pond Park Y.G. An, Z.H. Tian and N. Gan	686
Seepage Mechanics Mechanism of Undercompacted Mudstone's Formation C. Feng and H. Cai	693
