Preface

CHAPTER 1: MATERIALS

EAP Actuators for Biomimetic Technologies with Humanlike Robots as one of the Ultimate Challenges

Y. Bar-Cohen 1

Synthesis and Characterization of IPNs for Electrochemical Actuators

F. Vidal, C. Plesse, G. Palaprat, J. Juger, J. Citerin, A. Kheddar, C. Chevrot and D. Teyssié 8

Metal Ion Implanted Compliant Electrodes in Dielectric Electroactive Polymer (EAP) Membranes

P. Dubois, S. Rosset, M. Niklaus, M. Dadras and H. Shea 18

Rate Limits in Conducting Polymers

T. Shoa, J.D. Madden, C.W.E. Fok and T. Mirfakhrai 26

New Composites Based on Liquid Crystalline Elastomers and Electroactive Nanomaterials

V. Domenici, B. Župančič, M. Remškar, V.V. Laguta, C.A. Veracini and B. Zalar 34

Tough Hydrogel - Learn from Nature

H. Furukawa and J.P. Gong 40

Enhancing the Electro-Mechanical Response of Maxwell Stress Actuators

G. Gallone, F. Carpi, F. Galantini, D. De Rossi and G. Levita 46

Conducting IPN Fibers: A New Design for Linear Actuation in Open Air

C. Plesse, F. Vidal, D. Teyssié and C. Chevrot 53

Sprayed Sensor Using IPMC PAINT

I.S. Park, R. Tiwari and K.J. Kim 59

Carbon Nanotube Yarns as High Load Actuators and Sensors

T. Mirfakhrai, J.Y. Oh, M. Kozlov, S.L. Fang, M. Zhang, R.H. Baughman and J.D. Madden 65

Electrode Reactions in Cu-Pt Coated Nafion[®] Actuators

U. Johanson, U. Mäeorg, D. Brandell, A. Punning, J. Torop, M. Kruusmaa and A. Aabloo 75

A Co-Axial Dielectric Elastomer Actuator

H. Stoyanov, G. Kofod and R. Gerhard 81

A Closer Look at the Polyacrylamide Fibers for Natural-Like Artificial Muscle Fabrication

M. Bassil, J. Davenas and M. El Tahchi 85

CHAPTER 2: ANALYSIS, PHYSICAL MECHANISMS AND CHARACTERIZATION

Finite-Strain Models of Actuation: Prestretch and Elasticity Parameters

G. Kofod 91

Monte Carlo Simulation of Electroactive Polymer Actuators

K. Kiyohara, T. Sugino and K. Asaka 101

Dielectric Elastomer Actuators as Elements of Active Vibration Control Systems

F.G. Paspapiridis and I.A. Antoniadis 103

Electro-Chemo-Mechanical Actuators Touching and Sensing Both, Physical and Chemical Ambient

T.F. Otero 112

Conducting Polymer Soft Actuators Based on Polypyrrole -Training Effect and Fatigue

K. Kaneto, H. Suematsu and K. Yamato 122

Optimization of IPMC Actuator Conversion Efficiency

P. Brunetto, L. Fortuna, P. Giannone, S. Graziani and S. Strazzeri 131

Tunable Membrane for Electromagnetic Devices Using Dielectric Elastomers

C. Bolzmacher, K. Bauer, U. Schmid, H. Seidel and M. Hafez 141

Synthesis and Application of Electro-Thermally Sensitive Gels

K.F. Arndt, A. Richter, S. Klatt and G. Paschew 147

Distributed Impedance Model of Ionic Polymer-Metal Composite Actuators K. Takagi, K. Asaka, G. Nishida, Y. Nakabo and Z.W. Luo	157
Ionic Polymer-Metal Composite Actuator Behaviour in Two Novel Configurations M. Khazravi and A.A. Dehghani-Sanij	163
CHAPTER 3: DEVICES AND APPLICATIONS	
Multilayer Actuator and Sensor Sheets with Smart Compliant Electrodes P. Sommer-Larsen, K. Hansen and M. Benslimane	169
Bio-Inspired Distributed Electroactive Polymer Actuators for Possible Space Applications: Concept Design F. Carpi, C. Menon and D. De Rossi	180
Contractile and Buckling Actuators Based on Dielectric Elastomers: Devices and Applications F. Carpi, G. Frediani, A. Mannini and D. De Rossi	186
Variable-Stiffness-Mode Dielectric Elastomer Devices R. Pelrine and R. Kornbluh	192
