

# Table of Contents

## Preface

<b>Microstructural Identification and Control of Very Low Carbon Modern High Strength Low Alloy Steels</b> T. Araki, M. Enomoto and K. Shibata	3
<b>Thermal Cycling in the Austenite Temperature Region for Grain Size Control in Steels</b> S.J. Mikalac, A.V. Brandemarte, L.M. Brown, M.G. Vassilaros and M.E. Natishan	11
<b>The Heat Treatment of P/M Tool Steels</b> A. Kulmburg and B. Hribernik	31
<b>Surface Chemical Properties of Heat-Treated Industrial Steel</b> S.K.E. Forghany	43
<b>Heat Resistant Alloy Performance in the Heat Treatment Industry</b> J.C. Kelly	53
<b>Commercial Heat Treatment to 2000 AD</b> T.L. Elliott	63
<b>Towards the Optimization of Heat-Treatment in Aluminium Alloys</b> C.W. Meyers, K.H. Hinton and J. Chou	75
<b>Hardness, Melting Reactions and Heat Treatment of Al-Si-Cu-Mg Alloys Reinforced with Aluminiumoxide Particles</b> M.J. Starink, V. Jooris and P. Van Mourik	85
<b>Advances in the Heat Treatment of 7000 Type Aluminium Alloys by Retrogression and Reaging</b> B. Cina and F. Zeidess	99
<b>Effect of High Temperature Treatment on the Structure and Mechanical Properties of Aluminium Foundry Alloys</b> V.S. Zolotarevsky, N.A. Belov, A.A. Axenov and D. Goutam	109
<b>Heat Treatment and Phase Inter-Relationships of the Spray Cast Cu-15 wt%Ni-8 wt%Sn Alloy</b> E.W.J. van Hunnik, J. Colijn and J.A.F.M. Schade van Westrum	115
<b>Influence of Heat Treatment on the Microstructural and Chemical Evolution of Au<sub>80</sub>Sn<sub>20</sub> Alloys for Welding Applications</b>	125
<b>Gas Flow Regulation in a Carburizing Heat Treatment of Steels</b> P. Casadesus and M. Gantois	149
<b>Plasma Overcarburizing of Chromium Steels for Hot Working and Wear Applications</b> J.P. Souchard, P. Jacquot and M. Buvron	155
<b>Influence of the Base Material Hardenability on Effective Case Depth and Core Hardness</b> B. Vandewiele	169
<b>Bending Fatigue and Microstructure of Gas-Carburized Alloy Steels</b> K.A. Erven, D.K. Matlock and G. Krauss	183
<b>Influence of Surface Microstructure on Bending Fatigue Strength of Carburized Steels</b> A. Melander and S. Preston	199
<b>Case Hardening in the Next Century</b> F. Kühn and B. Lineberg	211
<b>Model Description of Iron-Carbonitride Compound-Layer Formation during Gaseous and Salt-Bath Nitrocarburizing</b> M.A.J. Somers and E.J. Mittemeijer	223
<b>Control of the Compound-Layer Structure in Gaseous Nitrocarburising</b> L. Sproge and J. Slycke	229
<b>Kinetics of Compound-Layer Growth during Nitrocarburizing</b> H. Du and J. Ägren	243
<b>Nitriding of Sintered Steels and Nitrocarburizing of Steels in Fluidized Bed Furnace</b> F. Cavalleri, G.F. Tosi and P.L. Cavallotti	249
<b>The Structure and Properties of Ion Nitrided 410 Stainless</b> M.F. Danke and F.J. Worzala	259

<b>A Fracture Mechanics Approach to Toughness Characterization of Nitrided Layers</b> R. Roberti, G.M. La Vecchia and G. Colombo	271
<b>Influence of Thermochemical Treatment on Corrosion Resistance of Steels</b> J. Straus and D. Hitzenko	279
<b>Modified Process Parameters in Nitrocarburizing Improve Component Properties and Give Greater Economy</b> G. Wahl	285
<b>Plasma Nitriding and Plasma Carburizing of Pure Titanium and Ti6Al4V Alloy</b> P. Jacquot, M. Buvron and J.P. Souchard	301
<b>The Influence of Tempering and Surface Conditions on the Fatigue Behaviour of Surface Induction Hardened Parts</b> P.K. Braisch	319
<b>Induction Heat Treatment of Case Hardening Steels</b> P. Archambault, M. Pierronnet, F. Moreaux and Y. Pourprix	335
<b>Selective Surface Treatment of Gears by Induction Profile Hardening</b> G.D. Pfaffmann	345
<b>Induction Hardening of Cast Iron Cylinder Head Valve Seats</b> C.C. Lal	365
<b>TFX An Induction Heating Process for the Ultra Rapid Heat Treatment of Metal Strip</b> R.C. Gibson, W.B.R. Moore and R.A. Walker	373
<b>Production and Concentration of Magnetic Flux for Eddy Current Heating Applications</b> R.S. Ruffini and R.J. Madeira	383
<b>Reduction of the Tensile Stress State in Laser Treated Materials</b> J.T.M. de Hosson, J. Noordhuis and B.A. van Brussel	393
<b>Laser Surface Nitriding of Titanium and a Titanium Alloy</b> V.M. Weerasinghe, D.R.F. West and M. Czajlik	401
<b>Fatigue Properties and Residual Stresses in Laser Hardened Steels</b> R. Lin and T. Ericsson	409
<b>Coupled Growth in Eutectic Systems</b> S.M. Copley, E.Y. Yankov, J.A. Todd and M.I. Yankova	417
<b>CO<sub>2</sub> Laser Subcritical Annealing of 2Cr-1Mo Steel Laser Welded Joint</b> W. Cerri, G.P. Mor, M. Balbi and T. Zavanella	433
<b>Creating Tailor-Made Surfaces with High Power CO<sub>2</sub>-Lasers</b> C.F. Magnusson, G. Wiklund, E. Vuorinen, E. Engström and T.F. Pedersen	443
<b>Electron Beam Surface Modification State of the Art (Review)</b> R. Zenker	459
<b>Electron Beam Mixing in Copper-Aluminium Surface Layers</b> D.G. Rickerby	477
<b>Surface Modification of Materials Produced by Dynamic Ion Mixing</b> J.P. Rivière and J. Delafond	485
<b>Surface Characterization and Tribological Improvements of Ti or (Ti+C) Implanted AISi M2 Steel</b> M.A. El Khakani, G. Marest, N. Moncoffre, J. Tousset and M. Robelet	495
<b>Ion Implantation for Biomaterials</b> J. Rieu, A. Pichat, L.M. Rabbe and M. Robelet	505
<b>Controlled Shot Peening Today</b> C.P. Diepart	517
<b>Chemically Vapour Deposited Alumina Coatings on High Speed Steel Cutting Tools</b> A.B. Smith and Z. Naeem	533
<b>Characteristics of Chromium Carbide Layers Produced on Martensitic Stainless Steel Using Different Chemical Vapour Deposition (CVD) Techniques</b> B. Eastwood, S. Harmer, J. Smith and A. Kempster	543
<b>Multicomponent Hard Coatings for WC-Co Sintered Carbides</b> B. Formanek, L. Swadźba, A. Maciejny and D. Rozlach	553
<b>Plasma Characteristics Related to Thin-Film Microstructures in Unbalanced Magnetron Sputtering Processes</b> S.L. Rohde	563

<b>Possibilities of Suppression of Droplets in Arc Evaporation Process</b> J. Vyskocil	573
<b>Further Developments of the Multiple-Mode Ionised Vapour Source System</b> P. Robinson and A. Matthews	581
<b>Deposition of Ti(C,N) Coatings by Arc Evaporation</b> O. Knotek, H.-. Prengel and J. Brand	591
<b>The Development of (Ti,Al)N and (Ti,Nb)N Ceramic Coatings Produced by Steered Arc Ion-Plating</b> J.P. Celis, J.R. Roos, E. Vancoille, S. Boelens and J. Ebberink	599
<b>Tribological Performance of Plasma Treated and Coated Surfaces</b> A. Leyland, P.R. Stevenson and A. Matthews	615
<b>Performance of TiN-, Ti(C,N)- and (Ti,Al)N-Coated Cutting Tools</b> W. König and D. Kammermeier	623
<b>Deposition of Stabilised Zirconia onto Metallic Substrates Using a DC Thermionic Triode Ion Plating Technique</b> A.S. James and A. Matthews	633
<b>A Comparison of Techniques for Producing Diamond-Like Carbon Coatings</b> P. Holiday, A. Matthews and A. Dehbi-Alaoui	643
<b>Combined Plasma Nitriding/PVD Processes</b> M. Zlatanović and T. Gredic	655
<b>Diffusion Treatment of Surface Coatings by Hot Isostatic Pressing</b> H.-. Steffens, J. Lebküchner-Neugebauer and M. Dvorak	667
<b>Depositions of Welded Coatings to Improve Hot Wear and Thermal Fatigue Resistance of Hot Die Steel</b> P. Gimondo, B. Grifoni and F. Sintoni	679
<b>A Study of the Adherence and Cracking by Deformation in a Multilayer Metallic Coating of Plain Carbon Steels</b> L. Sanchez, F. Gutiérrez-Solana, J.J. Gonzalez and J.A. Alvarez	689
<b>A Study of a Laser Irradiated Molybdenum Plasma Sprayed Coating on Steel</b> A. Koutsomichalis, H. Badekas and C. Panagopoulos	699
<b>Plasma-Spray Coatings on Carbon-Epoxy Substrates</b> F. Alonso, I. Fagoaga and P. Oregui	709
<b>Microstructure and Resistance to Cracking of Modified Protective Diffusion Coatings on Nickel-Base Superalloys</b> L. Swadźba, B. Formanek, A. Maciejny and J. Biedron	721
<b>The Use of Analysis in Surface Treatments</b> B.A. Bellamy	729
<b>Reliable Hardness Testing with a Fast Ultrasonic Method (UCI)</b> E. Schenuit	733
<b>Martens Hardening of Steel - Prediction of Temperature Distribution and Surface Hardness</b> H.M. Tensi and A. Stick	741
<b>Computerized Process Planning in Heat Treating Practice Using Personal Computers</b> T. Réti and M. Gergely	755
<b>Calculation of Distortion during Quenching of a Low Carbon Steel</b> A. Thuvander and A. Melander	767
<b>Computer Aided Simulation of the Temperature and the Distortion of Components during Heating Up in Heat-Treatment Furnaces</b> R. Arola, H. Martikainen and J. Virta	783
<b>Mathematical Modelling of the Heat Treatments (Quenching and Tempering) of a Cr-Mo-B-V, High Strength Low Alloy Steel</b> M. Isac, D. Pascota and S. Ciuca	791
<b>Integrated Computer Control of Induction Hardening</b> N. Kanetake	799
<b>Computer-Aided Optimization of Heat-Treatment Processes for the Automobile Industry</b> F. Kühn	809
<b>A New Generation of Process Computers for the Heat-Treatment Processes</b> W. Stein	821

<b>Oxygen Sensors - A Review of Their Impact on the Heat Treating Industry</b> H.W. Bond	831
<b>Electronic Flow Meter and Valve Integration with Computer Controlled Process Equipment</b> J.E. Powalisz	839
<b>Progress in Vacuum- and Plasma-Technology</b> B. Edenhofer, F. Bless and W. Peter	849
<b>Universal Vacuum Hardening Plant Application and Results</b> H. Altena	859
<b>Gas Quenching with Helium in Vacuum Furnaces</b> B. Lhote and O. Delcourt	867
<b>Multiflow Pressure Quenching in Vacuum Furnaces</b> A. Kay	885
<b>Trends and Developments in Vacuum Furnace Technology</b> D. Pye	897
