

Table of Contents

1.1 Phenomenological Law and Non-Equilibrium Thermodynamics	
M. Shimoji and T. Itami	2
1.2 Distribution Functions and the Liouville Equation	
M. Shimoji and T. Itami	15
1.3 Time Correlation Functions and Memory Functions	
M. Shimoji and T. Itami	22
1.4 Theory for Transport Coefficients of Liquid Metals	
M. Shimoji and T. Itami	35
1.5 Theory for Transport Coefficients of Liquid Alloys	
M. Shimoji and T. Itami	62
2.1 Space-Time Correlation in Dynamic Processes	
M. Shimoji and T. Itami	103
2.2 Nuclear Quadrupolar Relaxation	
M. Shimoji and T. Itami	135
3.1 Diffusion	
M. Shimoji and T. Itami	154
3.2 Shear Viscosity	
M. Shimoji and T. Itami	183
3.3 Ultrasonic Attenuation and Bulk Viscosity	
M. Shimoji and T. Itami	208
3.4 Electrotransport	
M. Shimoji and T. Itami	216
3.5 Thermal Diffusion	
M. Shimoji and T. Itami	220
3.6 Neutron Inelastic Scattering	
M. Shimoji and T. Itami	223
3.7 Nuclear Quadrupolar Relaxation (NQR)	
M. Shimoji and T. Itami	231
3.8 "Computer Experiment" (Molecular Dynamics Technique)	
M. Shimoji and T. Itami	248
References	
A1 Diffusion - A1.4 Diffusion in Ternary Liquid Alloys	272
A2 Shear Viscosity - A2.2 Shear Viscosity of Liquid Alloys	305
A3 Ultrasonic Attenuation	331
A4 Electrotransport - A4.2 Electrotransport in Liquid Alloys	334
A5 Thermal Diffusion - A8 Molecular Dynamics	338
