

# Table of Contents

## Preface

## Keynote Lectures

### New Zealand Research Applications of, and Developments in, Low Damage Technology for Steel Structures

G.A. MacRae, G.C. Clifton and M. Bruneau 3

### Reconstructing Christchurch: Quantitative Findings on Shift in Building Structural Systems

M. Bruneau and G.A. MacRae 11

### Development of Structural Metal Energy-Dissipation Techniques for Seismic Disaster Mitigation of Buildings in China

G.Q. Li, H.J. Jin, M.D. Pang, Y.W. Li, Y.Z. Sun and F.F. Sun 18

### Lightweight Steel Constructions for Seismic Areas

R. Landolfo 32

### Buckling-Restrained Brace: History, Design and Applications

T. Takeuchi 50

### Lessons from the Field; Steel Structure Performance in Earthquakes in New Zealand from 2010 to 2016

G.C. Clifton and G.A. MacRae 61

## Chapter 1: Performance Based Design

### An Empirical Methodology for Seismic Damage Control of CFT-MRFs

G.S. Kamaris, K. Skalomenos, G.D. Hatzigeorgiou and D.E. Beskos 75

### Multi-Mode Pushover Procedure to Estimate Higher Modes Effects on Seismic Inelastic Response of Steel Moment-Resisting Frames

M. Ferraioli, A. Lavino and A. Mandara 82

### Earthquake-Induced Collapse Risk and Loss Assessment of Steel Concentrically Braced Frames

S.H. Hwang and D.G. Lignos 90

### Evaluating the Behaviour Factor of Concentric X-Braced Steel Structures

D. Yahmi, T. Branci, A. Bouchaïr and E. Fournely 98

### Comments about the Seismic Behavior of “Inverted Y”- Braced Frames

H. Köber and M. Stoian 106

### Seismic and Robustness Design of Steel Frame Buildings

M. Ferraioli, A. Lavino, A. Mandara, M. Donciglio and A. Formisano 116

### From Design to Earthquake Loss Assessment of Steel Moment-Resisting Frames

L. Macedo, A. Silva and J.M. Castro 124

### Seismic Behavior Investigation of Prefabricated Steel Industrial Buildings

K.A. Korkmaz and M. Uzer 131

## Chapter 2: Behaviour of Connections

### Seismic Design of Gusset Plate Connections in Concentrically Braced Frames

Y. Cui, W. Zhang, J.C. Zhang and Q. Tang 141

### Effect of Column Base Flexibility on Earthquake-Induced Residual Deformations of Steel Columns

H. Inamasu, D.G. Lignos and A.M. Kanvinde 149

### Effect of Beam-Column Connection Fixity on Collapse Performance of a Six-Storey Special Concentrically Braced Frame

V. Mohsenzadeh and L.D.A. Wiebe 157

## **Identifying Critical Connections for the Global Performance of Steel Moment Resisting Frames**

P. Steneker, L.D.A. Wiebe and A. Filiatralult 165

## **Beam Web-Side-Plate Connection Axial Performance**

S. Alizadeh, G.A. MacRae, D. Bull and G.C. Clifton 174

## **Accounting for the Flexibility of Beam-Column Joints within New Zealand Steel Moment-Resisting Frame Structures**

L. Wiles, J. Pethybridge and T.J. Sullivan 182

## **Low Damage Moment Resisting Connection Using Blind Bolts**

T. Pokharel, H. Goldsworthy and E. Gad 189

## **Seismic Requirements for the Welding and Inspection of the K-Area in Hot Rolled Products to AS/NZS 3679.1**

M. Karpenko, A. McClintock, M. Helms and H. Heinzel 197

## **Beam Shear Connections**

R. Koia, J. Needham, S. Alizadeh, J. Scarry and G.A. MacRae 207

## **Braced Frame Symmetrical and Asymmetrical Friction Connection Performance**

R. Xie, J. Chanchi Golondrino, G.A. MacRae and G.C. Clifton 216

## **Chapter 3: Behaviour of Members and Components**

### **Failures and Prediction Methods of Lateral Buckling Strength of H-Shaped Beams Connected by Flush End Plates**

H. Matsubara, J. Takahashi, Y. Ikeguchi and K. Ikarashi 227

### **Required Column Overdesign Factor of 3D Steel Moment Frames with Square Tube Columns**

I. Chan and Y. Koetaka 235

### **Battened Steel Columns with Semi-Continuous Base Plate Connections: Experimental Results vs. Theoretical Predictions**

G. della Corte, G. Cantisani and R. Landolfo 243

### **Estimation Method on Hysteresis Characteristics of Subassemblage with Ductile Knee-Brace Member**

S. Honma, Y. Harada and K. Ebato 251

### **Column Moment Demands from Orthogonal Beam Twisting**

G. Webb, K. Kosinanonth, T. Chaudhari, S. Alizadeh and G.A. MacRae 259

### **Buckling Behavior of Circular Steel Tubes under Fire**

J.H. Seo, D.H. Won, W.S. Park and S.J. Kim 270

### **Effects of Changing Double Angles Configuration Used as Braces in Seismic Resisting Systems**

C. Bermudez and O. Gutierrez 279

### **Seismic Behavior and Design of Innovative Modular Steel Floor System**

T.Y. Yang, S.R. Zhuo and Y.J. Li 287

### **Seismic Ratchetting of Single-Degree-of-Freedom Steel Bridge Columns**

K. Saif, C.L. Lee, T. Yeow and G.A. MacRae 295

### **Portal Frames with a Novel Cold-Formed Tapered Box-Section**

A. Shahmohammadi, J.B.P. Lim and G.C. Clifton 301

### **Compatibility Forces in Floor Diaphragms of Steel Braced Multi-Story Buildings**

H. Rezaeian, G.C. Clifton and J.B.P. Lim 310

### **Capacity Design Criteria of 3D Steel Lattice Beams for Applications into Cultural Heritage Constructions and Archaeological Sites**

A. Formisano, G. di Lorenzo, E. Babilio and R. Landolfo 320

## **Chapter 4: Experimental Studies and Testing**

### **Shake Table Testing of a Low Damage Steel Building with 2-4 Displacement Dependent (D3) Viscous Damper**

N.K. Hazaveh, A.A. Rad, G.W. Rodgers, J.G. Chase, S. Pampanin and Q.T. Ma 331

<b>Full-Scale Cyclic Testing of Self-Centering Modular Panels for Seismic Resilient Structures</b>	339
W. Wang, X.L. Du, Y.F. Zhang, G.L. Chu and Y.Y. Chen	
<b>Shake Table Testing of Steel Braced Frame Considering Member Fracture</b>	347
Y. Terazawa, R. Matsui and T. Takeuchi	
<b>Seismic Testing of the Connecting Joint in a Buckling-Restrained K-Braced RC Frame</b>	354
A.C. Wu, K.C. Tsai and T.L. Lin	
<b>Cyclic Behavior of Panel Zone in Steel Moment Frame under Bidirectional Loading</b>	361
Y.D. Wang, R. Arakida, I. Chan, Y. Koetaka and T. Nakano	
<b>Experimental Study on a Steel-Tube Damper</b>	369
Y.Z. Sun, G.Q. Li and F.F. Sun	
<b>Steel Columns under Multi-Axis Seismic Loading: Experimental Findings and Design Recommendations</b>	376
A. Elkady, J. Cravero and D.G. Lignos	
<b>Experimental Testing and Design of High Performance Shear Links for Eccentrically Braced Frames</b>	384
D. Volynkin-Ewens, G.C. Clifton and P. Dusicka	
<b>Experimental Verification of Design Models in a Static and Dynamic Loading Test</b>	394
V. Kvocak, D. Dubecky and V. Kozlejova	
<b>Shake Table Testing of a Low Damage Steel Building with Asymmetric Friction Connections (AFC)</b>	400
A.A. Rad, G.A. MacRae, N.K. Hazaveh and Q.T. Ma	
<b>Experimental Tests on Extended Stiffened End-Plate Joints within Equal Joints Project</b>	406
M. D'Aniello, R. Tartaglia, S. Costanzo, G. Campanella, R. Landolfo and A. de Martino	
<b>Experimental Test of Welded Wide Flange Fuses</b>	414
T.Y. Yang, W. Banjuradja and L. Tobber	
<b>Shake Table Testing of Lightweight Steel Drywall Nonstructural Components</b>	423
B. Bucciero, T. Pali, M.T. Terracciano, V. Macillo, L. Fiorino and R. Landolfo	
<b>Shake Table Tests of Structures with CFS Strap-Braced Stud Walls</b>	432
M.T. Terracciano, B. Bucciero, T. Pali, V. Macillo, L. Fiorino and R. Landolfo	
<b>Seismic Tests of Welded Moment Resisting Connections Made of Laser-Welded Stainless Steel Sections</b>	440
H. Taheri, G.C. Clifton, P.S. Dong, M. Karpenko, G.M. Raftery and J.B.P. Lim	
<b>Experimental Tests for Pre-Qualification of a Set of Buckling-Restrained Braces</b>	450
A. Stratan, C.I. Zub and D. Dubină	
<b>Behaviour of Square Tubular Columns in Connection to I Beams with Welded Reverse Channel under Experimental Tests</b>	458
L. Magalhães, C. Rebelo and S. Jordão	
<b>Shake Table Test of a Half-Scale 2-Storey Steel Building Seismically Retrofitted Using Rocking Braced Frame System</b>	466
P. Mottier, R. Tremblay and C.A. Rogers	
<b>Contribution of Beam-Column Connections with Bolted Angles in the Reserve Capacity and Full-Scale Cyclic Testing</b>	475
T. Béland, R. Tremblay, J. Sizemore, L.A. Fahnestock, C. Bradley and E. Hines	

## Chapter 5: Numerical Modelling

<b>Comparison of Hysteretic Models for Steel Beams Calibrated by Means of Multi-Objective Optimisation</b>	487
C. Chisari and G. Rizzano	
<b>Finite Element Analysis on K-Type External Braced Steel Frame System</b>	495
G.C. Li, F. Tian, Z.J. Yang and G.Z. Zhang	
<b>High-Performance Computer-Aided Optimization of Viscous Dampers for Improving the Seismic Performance of a Tall Steel Building</b>	502
S.S. Wang and S. Mahin	
<b>On-Line Testing of Steel Brace Connections Using Non-Linear Substructuring and Force-Displacement Combined Control</b>	510
K. Skalomenos, T. Takeda, M. Kurata and M. Nakashima	

<b>Finite Element Analysis of Eccentrically Braced Frames with Removable Link</b> N. Mago, K. Cowie and G.C. Clifton	518
<b>A Finite Element Study of Non-Orthogonal Bolted Flange Plate Connections for Seismic Applications</b> Z.D. Hunn, G.A. Rassati, J.A. Swanson and T.M. Burns	525
<b>Numerical Model of Cold Press-Formed Square Steel Tube Columns Considered with Degradation Behavior due to Local Buckling and/or Fracture</b> Y. Koetaka, K. Taniguchi and I. Chan	533
<b>Cyclic Performance of a Lightweight Rapidly Constructible and Reconfigurable Modular Steel Floor Diaphragm</b> E. Boadi-Danquah, D. MacLachlan and M. Fadden	541
<b>Floor Diaphragm In-Plane Modelling Using Elastic Truss Elements</b> S. Alizadeh, G.A. MacRae, D. Bull and G.C. Clifton	549
<b>Seismic Simulation of U.S. and Japanese Type Steel Moment-Resisting Frame Structures Using Practical FEM Macro Models</b> H. Tagawa and G.A. MacRae	557
<b>Computational Challenges in Real-Time Hybrid Simulation of Tall Buildings under Multiple Natural Hazards</b> C. Kolay, J.M. Ricles, T.M. Marullo, S. Al-Subaihawi and S.E. Quiel	566
<b>Finite Element Analysis of Composite Replaceable Short Links</b> M. Zimbru, M. D'Aniello, A. Stratan, R. Landolfo and D. Dubină	576
<b>Seismic Behaviour of Sheathed CFS Buildings: Shake-Table Testing and Numerical Modelling</b> V. Macillo, A. Campiche, S. Shakeel, B. Bucciero, T. Pali, M.T. Terracciano, L. Fiorino and R. Landolfo	584
<b>Preliminary Finite Element Analyses on Seismic Resistant FREE from DAMage Beam to Column Joints under Impact Loading</b> M. D'Antimo, M. Zimbru, M. D'Aniello, J.F. Demonceau, J.P. Jaspart and R. Landolfo	592
<b>Numerical Study of Asymmetric Friction Connections (AFC) with Large Grip Length Bolts</b> M. Hatami, G.A. MacRae, G.W. Rodgers and G.C. Clifton	600
<b>Development of a Hybrid Simulation Computational Model for Steel Braced Frames</b> A. Imanpour, R. Tremblay, M. Leclerc and R. Siguier	609
<b>Equilibrium Analysis of Pin-Jointed Steel Structures under Large Variations of Configuration</b> I. Corbi, O. Corbi and F. Tropeano	619
<b>Numerical Study on Moment Resisting Frames under Monotonic and Cyclic Loads</b> B. Faggiano, A. Formisano, G. Vaiano and F.M. Mazzolani	625
<b>Numerical Study on Concentric Braced X Frames under Monotonic and Cyclic Loads</b> B. Faggiano, A. Formisano, G. Vaiano and F.M. Mazzolani	633

## Chapter 6: Structural Systems

<b>Design and Assessment of Cold-Formed Steel Shear Wall Systems Located in Moderate-to-High Seismicity Regions</b> S. Kechidi, L. Macedo, J.M. Castro and N. Bourahla	645
<b>Shear Resistance Mechanisms on Steel Sheet Shear Walls with Burring Holes and the Effect of Cross-Rails</b> Y. Kawai, K. Fujihashi, S. Tohnai, A. Sato and T. Ono	653
<b>A Proof-of-Concept Study on Self-Centering Column Feet Equipped with Innovative Shape Memory Alloy Ring Springs</b> C. Fang, W. Wang and X. Yang	661
<b>Collapse Mechanisms of Controlled Rocking Steel Braced Frames: Base Rocking Joint vs. Capacity-Protected Frame Members</b> T.C. Steele and L.D.A. Wiebe	669
<b>Seismic Fragility Analysis of MRFs with PR Bolted Connections Using IDA Approach</b> E. Brunesi, R. Nascimbene and G.A. Rassati	678
<b>Collapse Analysis of Steel Frames Considering Fracture of Braces and End of Beams</b> R. Matsui, T. Takeuchi, S. Urui and M. Tokuno	686

<b>Cyclic Performance of Braces with Different Support Connections in Special Concentrically Braced Frames</b>	694
P. Patra, P.C.A. Kumar and D.R. Sahoo	
<b>Seismic Collapse Analysis of Steel Plate Shear Wall Systems</b>	702
A. Verma and D.R. Sahoo	
<b>Effect of Special Segment Aspect Ratio on Seismic Performance of Special Truss Moment Frames (STMFs)</b>	709
R. Kumar and D.R. Sahoo	
<b>Hysteretic Features of Low Yield Point Steel and its Influence on Shear Plate Damper Behavior</b>	718
Q. He, Y.Y. Chen, W. Wang and H. Tian	
<b>Damage Avoidance Self-Centering Steel Moment Resisting Frames (MRFs) Using Innovative Resilient Slip Friction Joints (RSFJs)</b>	726
A. Hashemi, P. Zarnani, F.M. Darani, A. Valadbeigi, G.C. Clifton and P. Quenneville	
<b>Comparative Analysis of Dual Steel Frames with Dissipative Metal Shear Panels</b>	735
G. de Matteis and G. Brando	
<b>Strip Model Analysis for Steel Plate Shear Walls in Earthquake Resistant Structures</b>	743
E. Totter, A. Formisano, F.M. Mazzolani and F. Crisafulli	
<b>The Sliding Hinge Joint: Final Steps towards an Optimum Low Damage Seismic-Resistant Steel System</b>	751
S. Ramhormozian, G.C. Clifton, G.A. MacRae and H.H. Khoo	

## Chapter 7: Mixed and Composite Structures

<b>Experimental and Numerical Studies on Seismic Behavior of Q460 High Strength Steel Reinforced Concrete Column</b>	763
S.W. Chen, M. Yang, Z.X. Hou, G.Q. Li and Q. Liu	
<b>Composite Frames with Dissipative Beam Splices: Numerical Analyses and Design Guidelines</b>	771
L. Calado, J.M. Proen��a and J.F.A. Sio	
<b>Experimental Behavior of Square Tubed-Reinforced-Concrete Column to RC Beam Joints with Internal Diaphragms under Cyclic Loading</b>	779
D. Gan, Z. Zhou and X.H. Zhou	
<b>Cyclic Response of Steel Cladding Details with Fiber-Reinforced Polymer Shims</b>	787
K. Peterman, M. Webster, J. D'Aloisio and J. Hajjar	
<b>Bidirectional Behaviour of Unstiffened and Stiffened Direct-Welded Connections for Square CFST Columns</b>	794
H. Tjahjanto, G.A. MacRae and A. Abu	
<b>Experimental Study and Numerical Assessment of the Flexural Behaviour of Square and Rectangular CFST Members under Monotonic and Cyclic Loading</b>	804
Y.D. Jiang, A. Silva, J.M. Castro, T.M. Chan and R. Monteiro	
<b>Theoretical Study on Steel Reinforced Concrete Hybrid Walls with Centered and Staggered Openings</b>	812
D. Dan, S.C. Florut, V. Todea and V. Stoian	
<b>Influence of Composite Slab on the Nonlinear Response of Extended End-Plate Beam-to-Column Joints</b>	818
R. Tartaglia, M. D'Aniello, G.A. Rassati, J.A. Swanson and R. Landolfo	
<b>Analytical Methodology to Predict the Beam Overstrength Considering the Composite Slab Effects</b>	826
T. Chaudhari, G.A. MacRae, D. Bull, G.C. Clifton and S. Hicks	
<b>Ductility and Behaviour Factor of RC Frame - Perforated SPSW Dual Systems</b>	835
A. Formisano, H.M. Ahmadi and F.M. Mazzolani	
<b>Seismic Response of Composite Eccentrically Braced Frames with Short Dissipative Element</b>	846
A. V��t��man, A. Ciutina and D. Grecea	
<b>The Effect of Consecutive Earthquakes on a Composite Structure Utilising RBRFs</b>	854
Y. Oktavianus, H. Goldsworthy, E. Gad and S. Fernando	

## **Chapter 8: Buckling-Restrained Braces**

<b>Low-Cycle Fatigue Performance of Buckling Restrained Braces and Assessment of Cumulative Damage under Severe Earthquakes</b>	
Y.S. Liu, K.P. Chen, G.Q. Li and F.F. Sun	867
<b>Seismic Design of Buckling-Restrained Brace in Preventing Local Buckling Failure</b>	
P.C. Lin, T. Takeuchi, R. Matsui and B. Sitler	875
<b>Performance Evaluation of Buckling-Restrained Braces Installed in a Mid-Rise Steel Structure</b>	
R. Narui, K. Koyano, M. Midorikawa, T. Nakagomi and M. Iwata	884
<b>Effects of Out-of-Plane Displacements on Load Capacity of Gusset Plates in Buckling Restrained Braced Frames</b>	
S.Y. Vazquez-Colunga, C.L. Lee and G.A. MacRae	892
<b>Buckling Restrained Brace Deformation Measuring Device</b>	
J.W. Telford, A.W. Sim, G.A. MacRae and D.M. Clucas	900
<b>Finite Element Modelling of Buckling Restrained Braces under Combined In-Plane and Out-of-Plane Loading</b>	
J. Cui, C.L. Lee and G.A. MacRae	908
<b>Flexural Properties of Buckling-Restrained Brace Connections</b>	
B. Sitler, T. Takeuchi and R. Matsui	916
<b>Seismic Stability of Buckling-Restrained Braced Frames</b>	
S.R. Zaruma and L.A. Fahnestock	924
<b>Buckling-Restrained Braces (BRB) Seismic Design - A Consulting Engineer's Consideration</b>	
W.Y. Kam, R. Built, B. Saxe and J. Johnson	932
<b>Verification of Clearance and Gap for Fabricating the Buckling-Restrained Brace Using Steel Mortar Planks</b>	
K. Koyano, M. Fujita and M. Iwata	941
<b>Behavior Factor of Dual Systems with BRBs and Semi-Rigid Connections</b>	
F. Barbagallo, M. Bosco, E.M. Marino and P.P. Rossi	949

## **Chapter 9: Passive Control**

<b>Mechanical Behavior of Assembled Steel Dampers with Optimized Shapes</b>	
B.J. Zhu, T. Wang and L.X. Zhang	959
<b>Seismic Performance of Steel MRF Structures with Nonlinear Viscous Dampers from Real-Time Hybrid Simulations</b>	
B.P. Dong, R. Sause and J.M. Ricles	967
<b>Magnetorheological Fluid with Nano Fe<sub>3</sub>O<sub>4</sub> for Performance Enhancement of MR Damper for Seismic Resistance of Steel Structures</b>	
C. Daniel, G. Hemalatha, L. Sarala, D. Tensing and S. Sundar Manoharan	975
<b>The Use of TPMC for Designing MRFs Equipped with FREEDAM Connections: Performance Evaluation</b>	
R. Montuori, E. Nastri, V. Piluso and S. Streppone	983
<b>Footfall Induced Vibration Response of a Base-Isolated Steel Building</b>	
R. Malhotra, C. Ndarowa, G.A. MacRae, A. Palermo and S. Broglio	992
<b>Base Isolation Design of Steel Structures on Soft Soil</b>	
I. Corbi and O. Corbi	1002
<b>Spectral Analysis and Experimental Validation of a Low-Damage Hybrid Dissipater</b>	
F.G. Golzar, G.W. Rodgers and J.G. Chase	1007

## **Chapter 10: Case Studies**

<b>Application of Buckling-Restrained Braces in the Seismic Design of a Thermal Power Plant in China</b>	
M. Aguaguiña, Y. Zhou, S.M. Gong and Z.Q. Fang	1017

<b>Comparison between a Traditionally Retrofitted Industrial Building and an Alternative Solution Using BRBs</b>	
A. Mora and J. Nazal	1025
<b>The Design of an Iconic 40-Storey Steel Composite Office Tower in Indonesia with a High Seismic Performance Level</b>	
S. Wijanto, T. Andriono, I. Wibawa and W. Setiawan	1033
<b>The Use of TPMC for Designing MRFs Equipped with FREEDAM Connections: A Case Study</b>	
R. Montuori, E. Nastri, V. Piluso and S. Streppone	1041
<b>Design Development of a Four-Story Strongback Braced Frame</b>	
B. Simpson and S. Mahin	1050
<b>Metal Shear Panels for Seismic Upgrading of RC Buildings: A Case Study</b>	
G. de Matteis and M. Ferraioli	1058
<b>Seismic Performance Assessment of Existing Steel Buildings: A Case Study</b>	
L. di Sarno, F. Paolacci and A.G. Sextos	1067
<b>Seismic Design, Analysis and Testing of a Friction Steel Braced Frame System for Multi-Storey Buildings in Vancouver</b>	
L. Tirca, O. Serban, R. Tremblay, Y. Jiang and L. Chen	1077
<b>Seismic Response of Long Span Continuous Rigid-Framed Steel Arch Bridge</b>	
A.R. Liu and Y.L. Pi	1087

## Chapter 11: Assessment and Retrofitting Practice

<b>Seismic Retrofit of a Heritage Building in Wellington Using Buckling Restrained Braces</b>	
A.S.J. Gilani, J. Bothara and H.K. Miyamoto	1097
<b>Seismic Retrofitting of Eccentrically Braced Frames by Rocking Walls and Viscous Dampers</b>	
F. Barbagallo, M. Bosco, A. Ghersi, E.M. Marino and P.P. Rossi	1105
<b>Minimal-Disturbance Arm Damper Retrofitting: Evaluation of Retrofit Effect Using Multi-Span Steel Frame Specimens</b>	
G. Marzano, L. Zhang, Y. Sasaki and M. Kurata	1113
<b>Innovative Suspended Superstructure for the Retrofitting of a Steel Truss Railway Bridge</b>	
M. Mezzi, G. Nestovito, P. Petrella and V. Cefaliello	1121
<b>Seismic Repair by Cover Plate to the Damaged RHS Column with Strength Deterioration due to the Local Buckling</b>	
S. Kishiki, S. Nakada and G.H. Lin	1129

## Chapter 12: Codes, Standards and Design Guides

<b>Multi-Hazard Risk Mitigation through Application of Seismic Design Rules</b>	
D. Dubină, F. Dinu and I. Marginean	1139
<b>Remarks on Seismic Design Rules of EC8 for Inverted-V CBFs</b>	
S. Costanzo, M. D'Aniello, R. Landolfo and A. de Martino	1147
<b>Comparative Response of Earthquake Resistant CBF Buildings Designed According to Canadian and European Code Provisions</b>	
Y.D. Wang, E. Nastri, L. Tirca, R. Montuori and V. Piluso	1155
<b>Seismic Assessment of Existing Eccentrically Braced Frames According to NBCC and ASCE 41-13 Evaluation Procedures</b>	
S. Koboevic, G. Porthier de Bellefeuille and P.E. Maheu	1164
<b>A Design Formulation for Dissipative Metal Shear Panels</b>	
G. de Matteis and G. Brando	1172
