

# Table of Contents

**Preface**

<b>Jump Relaxation and Dynamic Conductivity in Solid Ion Conductors</b>	
K. Funke	1
<b>Structure, Ion-Ion Correlation and Physical Properties of Beta and Beta"-Alumina</b>	
G. Collin and J.P. Boilot	21
<b>Low Temperature Properties of Beta-Alumina</b>	
U. Strom	35
<b>Low-Temperature Electrochemistry at Superconductor/Super Ionic Conductor Interfaces</b>	
W.J. Lorenz, G. Saemann-Ischenko and M.W. Breiter	47
<b>Correlated Percolation and Superionics</b>	
I.V. Petrov and I.I. Stoynev	67
<b>Laser Spectroscopy of Sodium Beta"-Alumina Crystals</b>	
G. Mariotto, M. Montagna, F. Rossi, E. Zanghellini and E. Cazzanelli	77
<b>Time-Resolved Luminescence Spectra of Cr<sup>3+</sup> Ions in Mixed-Cation Beta-Alumina Crystals</b>	
T. Hattori, H. Okamura and Y. Hamanaka	91
<b>Nd<sup>3+</sup> Ion Oscillator Strength Anisotropy in Beta"-Alumina Crystals</b>	
M. Shirokov, V. Eglitis, A. Lusis and G. Mariotto	99
<b>Sodium Beta-Alumina Crystal Growth and Comparative Analysis of Crystals of Different Origin</b>	
V. Eglitis, J. Gabrusenoks, A. Kranevskis, A. Lusis and G. Mariotto	107
<b>Thermoluminescence of Sodium Beta-Alumina Crystals</b>	
A. Nagornyi, V. Eglitis, A. Lusis and G. Mariotto	115
<b>Microstructural Design and Characterization of H<sub>3</sub>O<sup>+</sup> - Beta" - Al<sub>2</sub>O<sub>3</sub> Ceramics</b>	
P.S. Nicholson	119
<b>Preparation of Polycrystalline Divalent Beta Alumina Ceramics by Ion Exchange from K- and Na-Beta"-Alumina Polycrystals</b>	
G.W. Schäfer and W. Weppner	145
<b>Thermodynamic Considerations for the Monovalent - Divalent Ion Exchange Process in Beta-Aluminas</b>	
P.D. Yankulov, S.M. Zimmer, L.G. Salmon, B. Dunn and G. Staikov	155
<b>Dependence of Cell Parameters of Ho<sup>3+</sup>-Exchanged Na-Beta"-Al<sub>2</sub>O<sub>3</sub> on the Na<sup>+</sup>/Ho<sup>3+</sup> Ratio</b>	
F. Tietz and W. Urland	175
<b>Preparation, Structure and Electrical Properties of Polycrystalline Sr-Beta-Alumina Ceramics</b>	
G.W. Schäfer, A. van Zyl, W. Weppner, T.T. Cheng, J. Mayer and M. Rühle	181
<b>A Comparative Thermogravimetric Study of the Beta-Aluminas Hydration</b>	
P.D. Yankulov and G. Staikov	191
<b>Structural Changes in the Process of Sintering and Annealing of Beta-Alumina</b>	
G.B. Telnova, A.G. Ivanova and L.V. Fateyeva	201
<b>The Effect of TiO<sub>2</sub> on the Sinterization of Beta"-Alumina</b>	
J.L. Franco and N.E. Walsöe de Reca	221
<b>Microstructural and Electrical Properties of Ceramic Injection Moulded Sodium Beta/Beta"-Alumina Sensor Tubes</b>	
J. Vangrunderbeek, J. Luyten, A. Smolders and F. De Schutter	227
<b>Impedance Techniques in Beta Battery Studies</b>	
Z.B. Stoynov	237
<b>Separation of Intragranular and Intergranular Impedance for (Na,Sr)and (Na,Ba) Beta"-Alumina</b>	
M.W. Breiter	247
<b>Simulation of Ag Beta"-Alumina Impedance Spectra by Equivalent Circuits</b>	
J.R. Dygas, G. Fafilek and M.W. Breiter	257
<b>Instantaneous Impedance Analysis</b>	
B. Savova-Stoynov and Z.B. Stoynov	273

<b>Interface Phenomena in Beta Battery Systems</b>	283
G. Staikov and P.D. Yankulov	
<b>Current Trends in Sodium-Sulphur Battery Development at CSPL</b>	305
I.W. Jones, S.N. Heavens and F.M. Stackpool	
<b>Status and Prospects of High Energy NaS-Batteries at ABB</b>	315
W. Fischer	
<b>The Present Status of the 1MW/8MWh Na/S Battery Energy Storage Demonstration Plant</b>	
K. Takashima, E. Nomura, K. Matsui, Y. Matsumaru, S. Iijima, Y. Matsuo, K. Sato, T. Hirabayashi and S. Furuta	327
<b>Review and Prospect of Na/S Research in SIC</b>	339
Z.X. Lin	
<b>Preparation and Testing of Molybdenum Carbide Coatings for Na/S (Beta-Alumina) Batteries</b>	
D.C. Topor, K. Pearl, J.R. Selman and M. Stackpool	347
<b>Electrochemical SO<sub>x</sub> and NO<sub>x</sub> Sensors with Ag<sup>+</sup>-Beta"-Alumina as Solid Electrolyte and Ag as Solid Reference Electrode</b>	
N.J. Rao, O.T. Sorensen, J. Schoonman and C.M. van den Bleek	367
<b>Technological Tests with Respect to the Use of Beta Alumina in Alkali-Metal-Thermo-Electric Converters (AMTEC)</b>	
V. Heinzel, F. Huber, W. Peppler and H. Will	381
