

Table of Contents

Preface

Jump Relaxation and Dynamic Conductivity in Solid Ion Conductors

K. Funke 1

Structure, Ion-Ion Correlation and Physical Properties of Beta and Beta" Alumina

G. Collin and J.P. Boilot 21

Low Temperature Properties of Beta-Alumina

U. Strom 35

Low-Temperature Electrochemistry at Superconductor/Super Ionic Conductor Interfaces

W.J. Lorenz, G. Saemann-Ischenko and M.W. Breiter 47

Correlated Percolation and Superionics

I.V. Petrov and I.I. Stoynev 67

Laser Spectroscopy of Sodium Beta"-Alumina Crystals

G. Mariotto, M. Montagna, F. Rossi, E. Zanghellini and E. Cazzanelli 77

Time-Resolved Luminescence Spectra of Cr³⁺ Ions in Mixed-Cation Beta-Alumina Crystals

T. Hattori, H. Okamura and Y. Hamanaka 91

Nd³⁺ Ion Oscillator Strength Anisotropy in Beta"-Alumina Crystals

M. Shirokov, V. Eglitis, A. Lasis and G. Mariotto 99

Sodium Beta-Alumina Crystal Growth and Comparative Analysis of Crystals of Different Origin

V. Eglitis, J. Gabrusenoks, A. Kranevskis, A. Lasis and G. Mariotto 107

Thermoluminescence of Sodium Beta-Alumina Crystals

A. Nagorny, V. Eglitis, A. Lasis and G. Mariotto 115

Microstructural Design and Characterization of H₃O⁺ - Beta" - Al₂O₃ Ceramics

P.S. Nicholson 119

Preparation of Polycrystalline Divalent Beta Alumina Ceramics by Ion Exchange from K- and Na-Beta"-Alumina Polycrystals

G.W. Schäfer and W. Weppner 145

Thermodynamic Considerations for the Monovalent - Divalent Ion Exchange Process in Beta-Aluminas

P.D. Yankulov, S.M. Zimmer, L.G. Salmon, B. Dunn and G. Staikov 155

Dependence of Cell Parameters of Ho³⁺-Exchanged Na-Beta"-Al₂O₃ on the Na⁺/Ho³⁺ Ratio

F. Tietz and W. Urland 175

Preparation, Structure and Electrical Properties of Polycrystalline Sr-Beta-Alumina Ceramics

G.W. Schäfer, A. van Zyl, W. Weppner, T.T. Cheng, J. Mayer and M. Rühle 181

A Comparative Thermogravimetric Study of the Beta-Aluminas Hydration

P.D. Yankulov and G. Staikov 191

Structural Changes in the Process of Sintering and Annealing of Beta-Alumina

G.B. Telnova, A.G. Ivanova and L.V. Fateyeva 201

The Effect of TiO₂ on the Sinterization of Beta"-Alumina

J.L. Franco and N.É. Walsøe de Reca 221

Microstructural and Electrical Properties of Ceramic Injection Moulded Sodium Beta/Beta"-Alumina Sensor Tubes

J. Vangrunderbeek, J. Luyten, A. Smolders and F. De Schutter 227

Impedance Techniques in Beta Battery Studies

Z.B. Stoyanov 237

Separation of Intragranular and Intergranular Impedance for (Na,Sr) and (Na,Ba) Beta"-Alumina

M.W. Breiter 247

Simulation of Ag Beta"-Alumina Impedance Spectra by Equivalent Circuits

J.R. Dygas, G. Fafilek and M.W. Breiter 257

Instantaneous Impedance Analysis

B. Savova-Stoyanov and Z.B. Stoyanov 273

Interface Phenomena in Beta Battery Systems G. Staikov and P.D. Yankulov	283
Current Trends in Sodium-Sulphur Battery Development at CSPL I.W. Jones, S.N. Heavens and F.M. Stackpool	305
Status and Prospects of High Energy NaS-Batteries at ABB W. Fischer	315
The Present Status of the 1MW/8MWh Na/S Battery Energy Storage Demonstration Plant K. Takashima, E. Nomura, K. Matsui, Y. Matsumaru, S. Iijima, Y. Matsuo, K. Sato, T. Hirabayashi and S. Furuta	327
Review and Prospect of Na/S Research in SIC Z.X. Lin	339
Preparation and Testing of Molybdenum Carbide Coatings for Na/S (Beta-Alumina) Batteries D.C. Topor, K. Pearl, J.R. Selman and M. Stackpool	347
Electrochemical SO_x and NO_x Sensors with Ag⁺-Beta"-Alumina as Solid Electrolyte and Ag as Solid Reference Electrode N.J. Rao, O.T. Sorensen, J. Schoonman and C.M. van den Bleek	367
Technological Tests with Respect to the Use of Beta Alumina in Alkali-Metal-Thermo-Electric Converters (AMTEC) V. Heinzl, F. Huber, W. Pepler and H. Will	381
