

Table of Contents

Preface, Committees

Waste Diatomaceous Earth as Cementitious Binder Constituent T. Staněk	1
Using of Untreated Carbon Nanotubes in Cement Compositions K. Pushkarova, M. Sukhanevych and A. Martsikh	6
Elimination of Negative Influence of Fluidized Bed Combustion Fly Ash on Viscosity of Cement Mix M. Ťažký and R. Hela	12
Rheological and Calorimetric Characterization of the Role of CaCl_2 on Portland Cement Early Hydration M. Boháč and R. Novotný	17
Study of the Effect of Diatomite as a Partial Replacement of Cement in Cement Pastes J. Zahálková and P. Rovnanikova	22
Technological Properties Testing of Blended Portland Cements with Fluidized Filter Ash I. Hájková, K. Dvořák, D. Gazdič and M. Fridrichová	27
Effect of Used Binders in Lightweight Plaster Mixtures on their Thermal Insulation Properties J. Hroudová, J. Zach, M. Sedlmajer and E. Helanová	32
Effect of Curing Regime on the Properties of Alkali-Activated Slag/Limestone Mortar Subjected to High Temperatures B. Fialová and P. Rovnaník	37
Hydrothermal Synthesis of Tobermorite at 170 and 190 °C from Fly Ash and Quartz Sand J. Fleischhacker, E. Helanová and R. Drochytka	42
Testing of Possible Use of Fine-Grained Alkali Activated Composites in the Construction Industry P. Mec, J. Boháčová and P. Závorský	47
Mechanical Properties of Alkali-Activated Material with Waste Aggregate According to Porosity P. Mec, J. Boháčová and S. Staněk	53
Influence of Aluminous Cement on the Hardening Rate of Cement-Based Stucco Mortars W. Siemiński and M. Kaczmarczyk	57
Utilization of Nanofibers in Sintered Ceramic Body Based on Calcium Aluminous Cement R. Sokolař and M. Šveda	62
Effect of Polymer Admixtures on Metakaolin-Based Geopolymer O. Mikhailova and P. Rovnaník	67
Molar Ratio and Polymer Modification Influence to Water Glass Coatings Matrix Basic Properties Z. Šnirch, Á. Dufka and J. Hodná	72
Utilization of Inorganic Binders for the Mineralization of Natural Fibers J. Zach, V. Novák and J. Hroudová	77
Initial Analysis for Study of Pure Limestone Decarbonation J. Bureš, D. Dolák, K. Dvořák and D. Všianský	81
The Development of Coating Systems Based on Alkali Activated Slag for Protecting Reinforced Concrete Structures Á. Dufka, T. Melichar and J. Bydžovský	87
Sulfate Resistance of Alkali Activated Cements P. Kryvenko, S. Guzii, O.Y. Kovalchuk and V. Kyrychok	95
Comparison of Selected Properties of Portland Cement Based Materials and Alkali Activated Materials Based on Granulated Blast Furnace Slag P. Mec, J. Boháčová and J. Koňářík	107
The Development of Materials Based on Alkali-Activated Fly Ash Designed for Special Applications Á. Dufka and T. Melichar	114

Possibilities of Using Recycled Concrete and Silica Binders for Development of Sound Absorbing Concrete M. Reif and J. Zach	120
Study of Ettringite by Hydration of Yeelimite Clinker R. Magrla, K. Dvořák, D. Gazdič and M. Fridrichová	126
Impact of Plasticizers on Technological Properties of Gypsum D. Dolák and K. Dvořák	130
Influence of Fibre Type and Fibre Volume Fraction on Dynamic Properties of Slurry Infiltrated Fibre Concrete M. Drdlová, R. Řídký and R. Čechmánek	135
Use of Fluidized Bed Combustion Fly Ash as Addition Reducing Shrinkage of Concrete L. Osuská and R. Hela	141
Ice Formation as an Indicator of Frost-Resistance on the Concrete Containing Slag Cement in Conditions of Freezing and Thawing O. Moskalenko and R.F. Runova	145
Experimental Tests of Water Vapour Permeability of Plasters Š. Nenadálová, L. Balík, M. Rydval and T. Bittner	151
Evaluation of Thermal Properties of Early-Age Concrete Containing Fly Ash P. Jarošová, S. Šťastník and J. Vala	157
Assessment of the Aggregate in Historical Plasters P. Rezek and P. Martinec	162
Waste from Biomass Combustion - Lightweight Aggregate F. Khestl and J. Knapec	167
Utilization of Waste Glass in Polymer Concrete J. Hodul, J. Hodná, R. Drochytka and M. Vyhnánková	171
The Effect of Modifications on Humidity Parameters of Cement Mortar M. Wesołowska and A. Kaczmarek	178
Selected Factors Determining Appearing of Efflorescences on Facial Walls A. Kaczmarek and M. Wesołowska	183
Failure of Concrete at High Temperatures - The Influence of the Type of Cement J. Válek, L. Bodnárová and P. Novosad	190
Energy Remediation Combining Insulation Materials Based on Calcium Silicate and Expanded Polymers A. Brenek, V. Vaclavik, T. Dvorsky and V. Šimíček	196
Utilization of Fly Ash in High Performance Floor Screed Based on Cement and its Influence on Physical Mechanical Properties M. Fiedlerová, R. Drochytka and P. Dohnálek	201
Effect of Combination of Admixture on the Development of Selected Properties of Concrete and their Comparison K. Křížová and R. Hela	206
Impact of Polysiloxanes of Various Chemical Structure on Water Vapour Permeability in Silicone Plasters Used in Building Renovation W. Brachaczek, Ł. Gradek and E. Sarna	211
Moisture-Related Problems of Historic Concrete Structure J. Pazderka, M. Purkrťová and P. Reiterman	219
Cement Based Heat-Insulating Materials for Use in Floor Constructions K. Mikulica, I. Hájková and A. Hubáček	224
Testing of Technological Properties of Foam Concrete K. Mikulica and I. Hájková	229
Possibilities of Sludge from Physico-Chemical Treatment and Recovery Solidification with the Use of Sorbents and Cement B. Dohnalkova	234
Behaviour of Composites Based on Blended Matrix with CNT during Extreme Temperatures T. Melichar, J. Bydžovský and Á. Dufka	239
The Research of the Waste Sludge with the Content of Hazardous Substances Solidification Using Cement Matrix B. Dohnalkova	244

Optimization of Concrete with High Volume of Fly Ash A. Hubáček, M. Labaj and M. Ťažký	249
Possibilities of Binding Recycled Glass in Production of Advanced Building Materials M. Reif, J. Zach and V. Novák	255
Identification of Thermal Characteristics of Selected Refractory Composites under High Temperature F. Šot, S. Šťastník and J. Vala	261
