

# Table of Contents

## Preface and Organization

### Chapter 1: Cement and Binders Based on Cement

<b>Effect of Superplasticizers on the Cement Hydration Process</b> M. Matysík, T. Vymazal and I. Plšková	3
<b>Physic-Mechanical Properties of Cement Composites Consisting of Organic Raw Materials</b> Š. Keprdová	7
<b>FBC-Ash as a Substitute of Part Material Raw during Production of Portland Cement</b> M. Fridrichová, R. Magrla, D. Gazdič and J. Stachová	11

### Chapter 2: Inorganic Binders

<b>Chemical Analysis of Historic Lime Mortars: Role of Sample Preparation</b> R. Ševčík, P. Sašek, M. Pérez-Estébanez and A. Viani	17
<b>The Influence of Curing and Process of Hydration to Damping Coefficient of Alkali Activated Slag Mortars</b> K. Timcakova, L. Topolář and P. Rypák	21
<b>Effect of Carbon Nanotubes and Hydroxypropyl Methylcellulose on the Mechanical Properties and Cracking Tendency of Alkali-Activated Slag</b> P. Rypák, L. Topolář and P. Rovnaník	25
<b>The Utilization of Waste Aluminosilicate to Prepare Cement Composite with Thermal Insulating and Drying Effect</b> A. Brenek, V. Vaclavík, J. Valíček, T. Dvorský, J. Daxner, M. Bendová and V. Šimíček	30
<b>Mix Design of Hybrid High-Volume Fly Ash Alkali Activated Cement</b> O. Kovalchuk, R. Drochytka and P.V. Krivenko	36
<b>High Strength Alkali Activated Slag Cements with Controlled Setting Times and Early Strength Gain</b> P.V. Krivenko, O. Petropavlovsky, V. Petranek, V. Pushkar and G. Vozniuk	44
<b>The Analysis of the Behavior of Alkali-Activated Materials Applied as a Repair Mortar</b> Á. Dufka and L. Bodnárová	50
<b>Modification of Natural Anhydrite by Mixed Exciter</b> D. Gazdič, J. Stachová and R. Magrla	56
<b>Laboratory Burning of Anhydrite from Phosphogypsum</b> D. Gazdič, K. Dvořák and I. Hájková	60
<b>Production of Alpha Plaster Modification by Pressureless Method</b> M. Fridrichová, I. Hájková and K. Dvořák	64
<b>Burnt Hydraulic Binder on the Basis of FBC Ashes</b> K. Kulísek, K. Dvořák and M. Fridrichová	68
<b>FBC – Ash as Principal Constituent of Mixed Hydraulic Binder</b> K. Dvořák, D. Gazdič and K. Kulísek	73

### Chapter 3: Silicate Materials

<b>Selected Parameters of Mortars Containing Fine-Grain Modification of Glass and Clay Brick</b> M. Draganovska and A. Sicakova	81
<b>The Difference between Traditional and Bone Porcelain Body</b> R. Sokolař and L. Vodová	87
<b>Modelling of Moisture Behaviour of Brick Fittings Masonry with Filled Hollows with Boundary Conditions of Winter Season</b> P. Brichacek, S. Šťastník, I. Rotrek and J. Toman	91

## **Chapter 4: Research and Assessment Properties of Building Materials**

<b>Thermal Insulation Plasters Utilising Natural Fibres</b>	97
J. Hroudová, J. Zach, M. Sedlmajer, E. Helanová and M. Reif	
<b>Sulfuric Acid Attack on Various Types of Fine Grained Concrete</b>	101
M. Vyšvařil and M. Rovnaníková	
<b>The Assessment of Durability of Fibre Concretes with Dense Aggregate and Concrete Recyclate from the Results of Permeability and Diffusion Tests</b>	106
T. Stavař and M. Stehlík	
<b>Impact of External Environment on Long-Term Mechanical Properties of Plasters</b>	112
P. Reiterman and M. Keppert	
<b>Substitution of Cement-Bonded Particleboards Filling and Binding Agent by Selected Types of Alternative Raw Materials</b>	116
T. Melichar, J. Bydžovský and M. Vacula	
<b>Influence of Concrete Curing on Modulus of Elasticity</b>	120
K. Křižová and R. Hela	
<b>Ultrasound Measurements for the Detection of Disintegration of Concrete Slabs Exposed to Fire</b>	124
I. Nováková and P. Macháňová	
<b>Influence of Addition of Fly Ash on Selected Properties of Concrete for Watertight Tunnel Lining</b>	128
A. Hubáček, T. Jarolím and P. Macháňová	
<b>The Development of Sprayed Concrete for Extreme Temperatures</b>	133
Á. Dufka and T. Melichar	
<b>Plasters with Decorative Function Containing Alternative Raw Materials</b>	138
T. Melichar and J. Bydžovský	
<b>Microstructure of Lightweight and Decorative Renders with Modified Composition</b>	142
J. Bydžovský, T. Melichar and N. Žižková	
<b>Effect of High Temperatures on Microstructure of Repair Mortars Containing Artificial Aggregate Based on Sintered Ash</b>	147
J. Bydžovský, T. Melichar, Á. Dufka and M. Fiedlerová	
<b>Effect of Concrete Mixture Composition on Acoustic Emission and Fracture Parameters Obtained from Three-Point Bending Test</b>	152
L. Topolář, H. Šimonová and P. Misák	
<b>The Laboratory Verification of the Absorption of Bitumen Waterproofing Sheets in the Dependence on Selected Parameters</b>	156
J. Plachý, J. Vysoka, Z. Caha, R. Vejmelka and V. Petranek	
<b>Temperature Control in High Performance Concrete</b>	162
M. Sedlmajer, J. Zach, J. Hroudová and L. Bodnárová	
<b>Epoxy Screed as Possible Protection of Floor Surfaces</b>	166
L. Mészárosová, E. Tumova and R. Drochytka	
<b>The Effect of Additives on the Properties of Lightweight Concrete Screed</b>	170
E. Tumova, L. Mészárosová and R. Drochytka	
<b>Possibilities of Sugar Content Reduction in Filler of Cement-Bonded Particleboards</b>	174
Š. Keprdová, T. Melichar, J. Bydžovský and M. Vacula	
<b>Experimental Determination of Mechanical Characteristics of Four Types of Stones and their Influence on the Construction Machinery Parts Wear</b>	178
V. Lazić, D. Arsić, R.R. Nikolić, B. Hadzima and M. Mutavdžić	
<b>Test of Adhesion and Shear Strength of Polyurethane Adhesives to Cement-Bonded Particleboard</b>	185
B. Nečasová, P. Liška and J. Šlanhof	
<b>Testing of Waterproofing Gels Penetration Rate while Exposure to Higher Temperature</b>	189
J. Melichar, R. Drochytka and P. Dohnálek	
<b>Comparison of Dynamic Young's Modulus of Elasticity Values Measured by Ultrasonic Pulse and Resonance Methods</b>	193
J. Brožovský and Á. Dufka	

<b>The Study of Washed Recycled Concrete Aggregates and Blast Furnace Slag Utilization in Concrete Production</b>	
J. Junak and N. Števulová	197
<b>Beneficial Reuse of Reservoir Sediments in Concrete Production</b>	
N. Junakova and J. Junak	202
<b>Secondary Raw Materials Obtained from Solar Panels and their Use in Material Engineering</b>	
J. Hodná, Á. Dufka and V. Petranek	207
<b>The Examination of Waste Industry Sludge Solidification/Stabilization Possibility</b>	
B. Dohnalkova, R. Drochytka, J. Hodul and T. Čažký	211
