

Table of Contents

Preface

Calcium Phosphate Bioceramics: Past, Present and Future	3
R.Z. LeGeros and J.P. LeGeros	
Mechanism of Apatite Formation on Bioactive Tantalum Metal in Simulated Body Fluid	11
H.M. Kim, H. Kaneko, T. Kokubo, T. Miyazaki and T. Nakamura	
Comparative Study of Apatite Formation on Natural and Synthetic Polyamide in a Mimicking Solution to Body Fluid	15
H. Inada, C. Ohtsuki, T. Miyazaki, S. Ogata and M. Tanihara	
Investigation into the Formation of Bone-Like Apatite on Pretreated Metals Using Electrochemical Impedance Spectroscopy	19
M. Wang and C.X. Wang	
Porous Bioceramics Produced with Calcium Phosphate Nanoparticles	23
J.S.V. Albuquerque, J.V.F. Neto, J.I.L.A. Júnior, D.O.d. Lima, R.E.F.Q. Nogueira and M.H. Prado da Silva	
Bonelike Apatite Formation on Calcium-Containing Silica and Titania Gels in Simulated Body Fluid	27
M. Wei and T. Kokubo	
Apatite Formation on Silk Fiber in a Solution Mimicking Body Fluid	31
A. Takeuchi, C. Ohtsuki, T. Miyazaki, S. Ogata, M. Tanihara, H. Tanaka, Y. Furutani and H. Kinoshita	
Synthesis of Biocompatible Calcium Phosphate Powders by Using an Eggshell	35
S.J. Lee and S.H. Oh	
Porous Bioactive Composites from Marine Origin Based on Chitosan and Hydroxyapatite Particles	39
P.B. Malafaya and R.L. Reis	
Hydrothermal Conversion and Sol-Gel Coating of Red Sea Coral	43
J.K. Innes, R. Vago and B. Ben-Nissan	
A Novel Biomimetic Approach for the Manufacture of Hydroxyapatite Fibres	47
E.C. Kolos, A.J. Ruys and G.J. Roger	
Microwave Synthesis of Bioresorbable Carbonated Hydroxyapatite Using Goniopora	51
R. Murugan, K. Panduranga Rao and T.S. Sampath Kumar	
Biomimetic Apatite Deposition on Titanium Substrates Treated with Low Concentrations H₂O₂ Solutions	55
K. Shibata, K. Tsuru, S. Hayakawa and A. Osaka	
Apatite Formation on Polyamide Films Containing Sulfonic Groups by a Biomimetic Process	59
T. Kawai, T. Miyazaki, C. Ohtsuki, M. Tanihara, J. Nakao, Y. Sakaguchi and S. Konagaya	
Control of Dissolution of Porous α-TCP by Coating with Hydroxypropylcellulose	63
T. Miyazaki, C. Ohtsuki, H. Iwasaki and M. Tanihara	
Development of a Bioactive Alumina-based Composite by Electrophoretic Deposition	67
N. Ozawa, Y. Ideta, K. Shimizu and T. Yao	
Apatite Formation on Polymers Coated with Titania Synthesized from an Aqueous Solution	71
N. Ozawa, Y. Ideta, T. Yao and T. Kokubo	
Biomimetic Growth of Calcium Phosphate over ATP Coupled PMMA Films	75
Y. Yokogawa, H.K. Varma and K. Sreenivasan	
The Effect of Organisms on Formation of Bone-Like Apatite on Porous Calcium Phosphate in Simulated Body Fluid	81
C.L. Deng, Y.R. Duan, J.Y. Chen and X.D. Zhang	
Biomimetic Crystallization of Calcium Phosphates under Constant Conditions from the Revised SBF	85
E.I. Dorozhkina, M. Epple and S.V. Dorozhkin	
Fabrication of Porous Titanium and Biomimetic Deposition of Calcium Phosphate	89
Q.Y. Zhang, X. Liu, J. Chen and X. Zhang	
Control of Bioactivity for Silica Gel by Simple Surface Modification with Calcium Ion	93
S.B. Cho, S.B. Kim, K.J. Cho, Y.J. Kim, T.H. Lee and Y. Hwang	

Effects of the Incorporation of Proteins and Active Enzymes on Biomimetic Calcium-Phosphate Coatings	97
I.B. Leonor, H.S. Azevedo, C.M. Alves and R.L. Reis	
Biomimetic Coating of Starch Based Polymeric Foams Produced by a Calcium Silicate Based Methodology	101
A.L. Oliveira, M.E. Gomes, P.B. Malafaya and R.L. Reis	
Deactivation of Active Oxygen Species due to Metals and their Blood Compatibility	105
S. Takashima, T. Yamamoto, K. Tsuru, S. Hayakawa and A. Osaka	
Tailoring the Bioactivity of Natural Origin Inorganic – Polymeric Based Systems	111
A.L. Oliveira, I.B. Leonor, P.B. Malafaya, C.M. Alves, H.S. Azevedo and R.L. Reis	
Biomimetic Hybrids - An Advancement for Biomaterials	143
L. Sharma and G. Pezzotti	
Toughening of Hydroxyapatite through Interpenetrating Organic/Inorganic Microstructure	147
S.H. Li, J.R. de Wijn, P. Layrolle and K. de Groot	
Bioceramics Derived from Polysiloxane – Hydroxyapatite	151
B.S. Jun, H.J. Park, D.J. Kim, H.S. Ryu, J.H. Seo, K.S. Hong and H. Kim	
Flexible Poly(Tetramethylene Oxide) (PTMO)-TiO₂ Hybrid with Apatite-Forming Ability	155
M. Kamitakahara, R. Shineha, K. Masakazu, N. Miyata, T. Kokubo and T. Nakamura	
In Vitro Bioactivity of Sol-Gel-Derived Silica Fiber and P(L/D,L) LA Composite	159
T. Peltola, B.H. Choi, A. Haltia, M. Vehviläinen, S. Areva, M. Jokinen and A. Yli-Urpo	
Preparation of Bioactive Polylactic Acid Composites Containing Calcium Carbonates	163
H. Maeda, T. Kasuga, M. Nogami, Y. Hibino, K.I. Hata, M. Ueda and Y. Ota	
Preparation of Porous Composites Consisting of Apatite and Poly(D,L-Lactide)	167
F. Nagata, T. Miyajima and Y. Yokogawa	
Effect of Calcium Salt Content in the Poly(ϵ-Caprolactone)/Silica Hybrid on the Nucleation and Growth Behavior of Apatite Layer	171
S.H. Rhee	
Effect of Heat Treatment on the Bioactivity and Mechanical Properties of a Poly(ϵ-Caprolactone)/Silica Hybrid Containing Calcium Salt	175
S.H. Rhee	
Effect of Molecular Weight of Poly(ϵ-Caprolactone) on the Bioactivity of a Poly(ϵ-Caprolactone)/Silica Hybrid Containing Calcium Salt	179
S.H. Rhee	
Effect of Silica Content in PMMA/Silica Hybrids Containing Calcium Salt on Calcium Phosphate Formation and Cell Responses	183
S.H. Rhee, M. Hwang and J.Y. Choi	
Effect of Silica Content on the Bioactivity and Mechanical Properties of Poly(ϵ-Caprolactone)/Silica Hybrid containing Calcium Salt	187
S.H. Rhee	
Oriented Needle-Like Apatite and Biodegradable Copolymer Composite Membranes	191
T. Watanabe, S. Ban, T. Ito, S. Tsuruta, T. Kawai and H. Nakamura	
In Vitro Study of Apatite Precipitation on Poly(2-Hydroxyethyl Methacrylate)-Silica Hybrids with Controlled Surface Areas	195
R.O.R. Costa, M. Pereira, F.S. Lameiras and W.L. Vasconcelos	
Dissolution Characteristics of Bioactive Glasses	201
R.S. Pryce and L.L. Hench	
Characterisation of a Novel Nitric Oxide Releasing Bioactive Glass	205
R.S. Pryce and L.L. Hench	
Effect of Porosity on the Mechanical Properties of Bioactive Foam Scaffolds	209
J.R. Jones and L.L. Hench	
Dissolution of Bioactive Gel-Glass Powders in the SiO₂-CaO System	213
P. Saravanapavan and L.L. Hench	
Structural Interpretation of the In Vitro Reactivity of SiO₂-MgO-Na₂O Glasses	217
S. Agathopoulos, M.C. Ferro, J.Y. Xu, J.M. Oliveira, P.A.A.P. Marques, R.N. Correia and M.H.F.V. Fernandes	
Creation of Bioactive Glass Coating on Titanium by Local Laser Irradiation; Part 1: Optimization of the Processing Parameters	221
N. Moritz, E. Vedel, H.O. Ylänen, M. Jokinen, M. Hupa and A. Yli-Urpo	

Creation of Bioactive Glass Coating on Titanium by Local Laser Irradiation; Part 2: Effect of the Irradiation on the Bioactivity of the Glass	225
E. Vedel, N. Moritz, H.O. Ylänen, M. Jokinen, A. Yli-Urpo and M. Hupa	
Preparation of Antibacterial Silver-Doped Silica Glass Microspheres by Sol-Gel Method	229
K. Masakazu, S. Toda, T. Kokubo and N. Masuda	
Effect of Composition and Texture on Controlled Rate Release of an Antibacterial Agent from Bioactive Gel-Glasses	233
P. Saravanapavan, M.H. Patel and L.L. Hench	
Porous Bioactive 3-D Glass Fiber Scaffolds for Tissue Engineering Applications Manufactured by Sintering Technique	237
E. Pirhonen, L. Moimas and J. Haapanen	
Low Melting Temperature Machinable Glass Ceramics	241
M. Wei, Y. Zhang, X. Sun, L. Zhou and K. Wang	
Effect of Particle Size on the Concentration and Rate of Ag⁺ Release from Antimicrobial SiO₂-CaO-P₂O₅-Ag₂O Gel-Glasses	245
P. Saravanapavan, M.H. Patel and L.L. Hench	
Effect of Ionic Variables (SiO₂, Ca²⁺, PO₄³⁻) on Biomimetic Mineralization	249
A. Forsback, J. Korventausta, M. Jokinen and J.I. Salonen	
Treatment of Osteomyelitis with Antibiotic-Soaked Porous A-W Glass Ceramic Blocks	253
K. Kawanabe, J. Tamura, M. Shimizu, H. Iida, H. Hayashi and T. Nakamura	
Effect of the Type of Surfactant on Bioactive Glasses Foam Formation	257
M.B. Coelho, I.R. Soares, H.S. Mansur and M. Pereira	
Characterization of CaO-SiO₂-B₂O₃ Glass-Ceramics and Effect of Composition on Bioactivity	261
H.S. Ryu, J.H. Seo, H. Kim, K.S. Hong, H.J. Park, D.J. Kim, J.H. Lee, D.H. Lee, B. Chang and C.K. Lee	
Calcium Phosphate Invert Glasses and Glass-Ceramics with Apatite-Forming Ability	265
T. Kasuga, T. Fujimoto, Y. Hosoi and M. Nogami	
Quantitative Analysis on the Absorption of Apatite-Wollastonite Glass-Ceramics In Vivo	269
H. Teramoto, A. Kawai, S. Sugihara, A. Yoshida and H. Inoue	
Fabrication of CaO-SiO₂-B₂O₃ Porous Glass-Ceramics by Self-Foaming Method	273
J.H. Seo, H.S. Ryu, K.S. Hong, H. Kim, D.J. Kim, J.H. Lee, D.H. Lee and C.K. Lee	
Novel Bioactive Coatings for Biomedical Applications	279
J. Bibby, P.M. Mummery, N. Bubb and D.J. Wood	
Characterization of Plasma Sprayed Bioglass Coatings on Titanium	283
G. Göller, F.N. Oktar, T. Yazıcı, S. Gurmen and E.S. Kayali	
The Deposition of Calcium Phosphates within Polyelectrolyte Multilayer Films	287
C. Gergely, P. Bar-Yosef, R. Govrin-Lippman, F. Cuisinier and H. Füredi-Milhofer	
Variation in Biological Properties of Thin Calcium Phosphate Films Formed by e-Beam Evaporation	291
I.S. Lee, J.C. Park, S.R. Kim, W.S. Seo, S.B. Cho and Y.C. Jung	
Thin Film Hydroxyapatite as a Model Dental Surface	295
M. Turkington, A. Joiner and B.J. Meenan	
Bond Strength and Microstructure of Radio-Frequency Thermal Plasma Sprayed Hydroxyapatite / Titanium Composite Coatings	299
M. Inagaki, Y. Yokogawa and T. Kameyama	
Synthesis and Properties of Bioactive Ca-P-Ti Thin Films Synthesized by Reactive Plasma Co-Sputtering Deposition	303
J.D. Long, S. Xu, H.Y. Foo and C.H. Diong	
Reactive Species in RF Plasma Sputtering Deposition of Nanocrystalline Calcium Phosphate Bio-Active Films	307
S. Xu, J.D. Long, K.N. Ostrikov and H.Y. Foo	
Effect of Particle Size on Microstructure of High Velocity Oxy-Fuel (HVOF) Sprayed Hydroxyapatite Coatings	311
K.A. Khor, H.L. Li and P. Cheang	
Effects of Bond-Coatings on Plasma Sprayed Calcium Phosphate Coatings	315
F.N. Oktar, G. Göller, M. Yetmez and D. Toykan	

Comparative Study of Bioceramic Coatings in Static and in Simulated Physiological Conditions	
Q.Y. Zhang, Y. Cao, J.Y. Chen, J.M. Feng and X.D. Zhang	319
Fabrication of TiO₂-Apatite Composite Coating on Titanium by a Chemical Method	
B. Feng, J. Weng, J.H. Zhao, L. He, S. Qi and X. Zhang	323
A Radiological Follow-Up Study of Plasma Sprayed Fluorapatite (FA) Coatings	
F.N. Oktar, S. Ozsoy and L.S. Özyegin	327
Revolutionary New Bone Cement Technique by Interposing HA Granules Between Bone and Bone Cement	
H. Oonishi, H. Fujita, S. Itoh, S.C. Kim, H. Dohkawa and K. Oomamiuda	333
Bone Cements Based on Tricalcium Silicate	
R.J. Chung, T.S. Chin, C.W. Huang, P. Lin, T.J. Hsu and F.I. Chou	337
Histological Study of Interface Bioactive Bone Cement (IBBC) Retrieved at 14 Years after THA	
H. Fujita, H. Oonishi, S. Itoh, S.C. Kim, H. Doukawa and K. Oomamiuda	341
Pulpal and Periapical Tissue Responses to a Calcium Phosphate Cement Containing Barium Sulphate	
M. Yoshikawa, T. Toda and Y. Mandai	345
Calcium Phosphate Accelerated Setting Time of o-Ethoxybenzoic Acid (EBA) Temporary Cement	
L.S. Özyegin, F.N. Oktar and N. Heybeli	349
Study of the Manipulation Energy on Fluoride Release by Dental Bioceramic	
H.S. Mansur, J.F.B.G. Giovannini, W.C. Jansen and M.M. Avelar	353
TEM/SEM Morphological Analysis of Dental Tissue-Resin Bonding System in Dry and Wet Conditions	
R.L. Mourão, H.S. Mansur, M.H. Santos, F.R. Tay and L.D. Lanza	357
Bone-Bonding Behaviour of PMMA Bone Cement Modified with Alkoxysilane and Calcium Acetate	
C. Ohtsuki, T. Miyazaki, A. Sugino, M. Tanihara, A. Mori and K. Kuramoto	361
Alumina Powder / PMMA Composite Cements: An Evaluation of Osteoconductivity	
S. Shinzato, T. Nakamura and T. Kokubo	365
Effects of Spherical Tetracalcium Phosphate on Injectability and Basic Properties of Apatitic Cement	
I. Kunio	369
Effects of Neutral Sodium Hydrogen Phosphate on Setting Property and Hemostatic Ability of Hydroxyapatite Putty as a Local Hemostatic Agent for Bone	
Y. Miyamoto, Y. Momota, M. Takechi, T. Yuasa, S. Tatehara, M. Nagayama and I. Kunio	373
Physical Properties Self-Setting Bone Cement with Particle Size Distribution of Dicalcium Phosphate Dihydrate	
J.K. Lee, I.S. Hwang and S.H. Cho	377
Bone Regeneration Therapy with Marrow Mesenchymal Cells in 10 Cases: Short Term Results	
T. Yoshikawa, T. Ohmura, Y. Sen, J. Iida, Y. Takakura, I. Nonaka and K. Ichijima	383
Osteo-Integration of Plasma-Spray, Biomimetic Octacalcium Phosphate and Carbonate-Apatite Coatings on Titanium Implants	
P. Habibovic, C.M. van der Valk, K. de Groot and P. Layrolle	387
Investigation of Bone Formation using Non-Crystalline Calcium Phosphate Glass in Beagle Dogs	
Y.K. Lee, H.S. Kim, K.S. Cho, K.N. Kim and S.H. Choi	391
Bone Formation Induced by Several Carbonate- and Fluoride-Containing Apatite Implanted in Dog Mandible	
T. Sakae, A. Ookubo, R.Z. LeGeros, R. Shimogoryou, Y. Sato, S. Lin, H. Yamamoto and Y. Kozawa	395
Porous Beta-Calcium Pyrophosphate as a Bone Graft Substitute in a Canine Bone Defect Model	
J.H. Lee, D.H. Lee, H.S. Ryu, B. Chang, K.S. Hong and C.K. Lee	399
The Effect of Aging an Injectable Bone Graft Substitute in Simulated Body Fluid	
M. Nilsson, E. Fernández, J.A. Planell, I. McCarthy and L. Lidgren	403

Biodegradable Coralline Hydroxyapatite Composite-Gel Using Natural Alginate	407
R. Murugan and K. Panduranga Rao	
Silica/Calcium Phosphate Sol-Gel Derived Bone Grafting Material and Bone Remodelling. An eight Months In Vivo Study	411
T. Gerber, T. Traykova, K. Henkel, V. Bienengräber, M. Witt and J. Koewitz	
Titanium Dioxide/Ultra High Molecular Weight Polyethylene Composite for Bone-Repairing Applications: Preparation and Biocompatibility	415
M. Hashimoto, H. Takadama, M. Mizuno, Y. Yasutomi and T. Kokubo	
In Vivo Evaluation of Macroporous Calcium Metaphosphate Ceramic as a Bone Substitute	419
H.I. Shin, H.M. Cho, H.M. Ryoo, J.H. Chung, S.H. Oh and S.Y. Kim	
Bioactive Composite Chitosan Membranes to Be Used in Bone Regeneration Applications	423
R.M.P.d. Silva, P.B. Malafaya, J.F. Mano and R.L. Reis	
The Use of New Zealand Animal Bone as Bioceramic Bone Xenografts: Concept to Clinical Study	427
M.R. Mucalo, G.S. Johnson, A. Worth, J.G. Horne, H.M. Burbridge, W.J. Bruce and I.A. Anderson	
Effects of Substrate Morphology on Osteoblastic Response to Thin Film Calcium Phosphate Coatings	433
F. Horgan and B.J. Meenan	
Surface Properties of HAp Particles Obtained by Hydrothermal Decomposition of Urea and Calcium-EDTA Chelates	437
D. Janaćković, I. Jankovic-Castvan, R. Petrović, L. Kostic-Gvozdenovic, S.K. Milonjić and D.P. Uskokovic	
High Osteoconductive Surface for Bioactive Glass by Electrical Polarization	441
A. Obata, S. Nakamura and K. Yamashita	
Crystal Growth Modification by Surface Charges on Ceramic Electret in Simulated Body Fluid	445
S. Nakamura, M. Ueshima, T. Kobayashi and K. Yamashita	
Titanium Oxide Layers Obtained by Different Methods: Effect on Apatite Deposition	449
R. Rohanizadeh, M. Al-Sadeq and R.Z. LeGeros	
The Influence of Polyelectrolytes on the Formation and Phase Transformation of Amorphous Calcium Phosphate	453
H. Füredi-Milhofer, P. Bar-Yosef, R. Govrin-Lippman and N. Garti	
Surface Structural Changes of Sintered Hydroxyapatite in Terms of Surface Charge	457
T. Himeno, H.M. Kim, H. Kaneko, K. Masakazu, T. Kokubo and T. Nakamura	
Chemical Modification of Titanium Surface: Effect on Apatite Deposition	461
R. Rohanizadeh, W.A. Al-Fraih, M. Harsono and R.Z. LeGeros	
Calcium Phosphate Formation on Chemically Modified Titanium	465
S. Areva and M. Linden	
Determination of the Internal Surface of Spongiosa-Like Ceramic Scaffolds using Light Microscopy and X-Ray Refraction Technique	469
G. Berger, U. Mücke and K. Harbich	
Biphasic Calcium Phosphate (BCP) Bioceramics: Preparation and Properties	473
S.J. Lin, R.Z. LeGeros, R. Rohanizadeh, D.Q. Mijares and J.P. LeGeros	
Synthesis and Sintering of Carbonated Apatites	477
J.P. Lafon, E. Champion and D. Bernache-Assollant	
Morphological Stability of Plate-Like Hydroxyapatite	481
A. Milev, G.S.K. Kannangara and B. Ben-Nissan	
Evaluation of the Biocompatibility of Nano-Sized Carbonate-Substituted Hydroxyapatite after Hydrothermal Treatment	485
J. Huang, R.A. Brooks, S. Best and W. Bonfield	
Synthesis and Characterization of Beta Tricalcium Phosphate	489
A. Destainville, A. Rolo, E. Champion and D. Bernache-Assollant	
Effects of Additives on Pore Structures in Freeze Dried Calcium Phosphate Granules	493
S.H. Oh, S.W. Kim, M.H. Ahn, C.K. You, H.I. Shin and S.Y. Kim	
The Characteristics and Properties of Hydroxyapatite Prepared by Spark Plasma Sintering (SPS)	497
K.A. Khor, Y.W. Gu, P. Cheang and F.Y.C. Boey	

Synthesis and Characterization of Ti-Substituted Hydroxyapatite	501
S.R. Kim, Y.H. Kim, D.H. Riu, S.J. Jung and Y.J. Lee	
Ultrastructural Characterisation of Hydroxyapatite and Silicon-Substituted Hydroxyapatite	505
A.E. Porter, S. Best and W. Bonfield	
High Resolution Transmission Electron Microscopy Investigation of Single Crystal Apatite Fibres Synthesized by using a Homogeneous Precipitation Method	509
M. Aizawa, A.E. Porter, S. Best and W. Bonfield	
Control of Crystal Orientation of Hydroxyapatite by using a High Magnetic Field	513
K. Inoue, K. Sassa, Y. Yokogawa, Y. Sakka, M. Okido and S. Asai	
Synthesis and Characterization of c-Axis Oriented Apatite Aggregates	517
K. Ohta, M. Kikuchi, M. Tanaka and H. Eda	
Novel Inorganic Materials for Biomedical Applications	523
T. Kokubo	
Crystallization of a Bone-Like Apatite onto Cholesterol from Aqueous Solutions	529
E.I. Dorozhkina, M. Epple and S.V. Dorozhkin	
Low Temperature Deposition of Bioactive Crystalline Titania Films: Effects of Tantalum	533
J.M. Wu, S. Hayakawa, K. Tsuru and A. Osaka	
Low Temperature Synthesis of Bioactive TiO₂ Thin Film by Two-Step Treatment	537
F. Xiao, K. Tsuru, S. Hayakawa and A. Osaka	
Accurate Geometric Characterization of Macroporous Scaffold of Tissue Engineering	541
S.H. Li, J.R. de Wijn, P. Layrolle and K. de Groot	
Improvement of Porous Titanium with Thicker Struts	547
J.P. Li, S.H. Li, K. de Groot and P. Layrolle	
Preparation and Evaluation of Dense Hydroxyapatite by PECS Method	551
A. Nakahira, M. Tamai, K. Eguchi, S. Nakamura and K. Yamashita	
Synthesis of Hydroxyapatite and Tricalcium Phosphate Nanoparticles – Preliminary Studies	555
C.M. Manuel, M.P. Ferraz and F.J. Monteiro	
Synthesis of New Biocompatible Apatite-Type Rare-Earth Silicates	559
T. Kizuki, M. Ohgaki, S. Nakamura, K. Hashimoto, Y. Toda and K. Yamashita	
Hydroxyapatite Coated Porous Alumina as a New Orbital Implant	563
C.K. You, S.H. Oh, J.W. Kim, T.H. Choi, S.Y. Lee and S.Y. Kim	
Fibrillogenesis of Hydroxyapatite/Collagen Self-Organized Composites	567
M. Kikuchi, S. Itoh, H.N. Matsumoto, Y. Koyama, K. Takakuda, K. Shinomiya and M. Tanaka	
Joining Hydroxyapatite Ceramics and Titanium Alloys by Hydrothermal Method	571
T. Onoki, K. Hosoi and T. Hashida	
Study of the Release Kinetics on some Anticancer Substances from Porous Ceramic Capsule	575
A. Ravaglioli, A. Krajewski, M. Mazzocchi, E. Strocchi and C.M. Camaggi	
Dosimetric Analysis and Characterisation of Radioactive Seeds Produced by the Sol-Gel Method	579
W.S. Roberto, M. Pereira and T.P.R. Campos	
Effect of Fabrication Processes on the Antimicrobial Properties of Silver Doped Nano-Sized HAp	583
K.S. Oh, K.J. Kim, Y.K. Jeong and Y.H. Choa	
Encapsulation of Hydroxyapatite Particles with Fluorapatite by a Multistep Procedure	587
L.M. Rodríguez-Lorenzo and K.A. Gross	
Hydroxyapatite -Zirconia Functionally Graded Bioceramics Prepared by Hot Isostatic Pressing	591
T. Wei, A.J. Ruys and B. Milthorpe	
Highly Interconnected and Functionally Graded Porous Bioceramics	595
X. Miao, Y. Hu, J. Liu, B. Tio, P. Cheang and K.A. Khor	
Adsorption on RF-Sputtered CaP Coatings in SBFs	599
E. van der Wal, A.W. Denier van der Gon, S.J. Oldenburg, J.G.C. Wolke, J.A. Jansen and A.M. Vredenberg	
Biocompatibility of Hydroxyapatite Films Formed on Ti Metal by a Simple Urea and Urease Treatment	603
J. Nozaki, M. Aizawa, H. Suemasu, H. Uchida, K. Itatani, A. Nozue, I. Okada, M. Matsumoto, H. Matsumoto and Y. Toyama	

Long-Term Stable Biomaterials Based on Apatite and Calcium Zirconium Orthophosphate	607
G. Berger and U. Ploska	
Micro-CT Analysis of New Bone Formation Around Implant with Electrochemically Deposited Apatite	611
S. Ban, N. Arimoto, S. Tsuruta, H. Arikawa, T. Kanie and K. Fujii	
Quantitative Analysis of Bone Formation in the Composites of Cultured Marrow Cells and Hydroxyapatite by X-Ray Computed Tomography	615
Y. Tohma, H. Ohgushi, Y. Dohi, H. Shimaoka, Y. Ikeda, Y. Mizuta and Y. Takakura	
The Improvement of Titanium Reinforced Hydroxyapatite for Biomedical Applications	619
G. Gölter, F.N. Oktar, D. Toykan and E.S. Kayali	
Traumatological and Ballistic Aspects of Alumina Ceramics	623
M. Vural, M.Z. Erim, C. Bindal, S. Zeytin and A.H. Ucisk	
The Tissue Response to a Novel Calcium Zirconium Phosphate Ceramics	629
U. Gross, C. Müller-Mai, G. Berger and U. Ploska	
The Effect of Bioceramic Surface Chemistry on Osteogenic Cell and Healing Bone	633
C.R. Howlett	
Gene Expression and Bone Induction Regulated by Bioceramic Substratum	639
M.E. Thomas, W. Richter, T. Matsaba, N. Ramoshebi, J. Teare, L. Renton and U. Ripamonti	
Molecular Biologic Detections of Cell Activation Related Proteins on Polarized Hydroxyapatite	643
M. Nakamura, Y. Sekijima, T. Kobayashi, S. Nakamura and K. Yamashita	
Development and Biological Evaluation of Apatite Fibre Scaffolds with Large Pore Size and High Porosity for Bone Regeneration	647
M. Aizawa, H. Shinoda, H. Uchida, K. Itatani, I. Okada, M. Matsumoto, H. Morisue, H. Matsumoto and Y. Toyama	
Marrow Mesenchymal Stem Cells Cultured on Alumina Ceramics (From Basic Science to Clinical Applications)	651
H. Ohgushi, H. Machida, M. Ikeuchi, T. Tateishi, Y. Tohma, Y. Tanaka and Y. Takakura	
Osteogenic Potential of Cultured Bone/Ceramic Construct: A Comparison with that of Marrow Mesenchymal Cells/Ceramic Composites	655
J. Iida, T. Yoshikawa, K. Ichijima and Y. Takakura	
The Efficiency of FK 506 in In Vitro Bone Formation by Human Bone Marrow Cells	659
N. Okumura, T. Yoshikawa, J. Iida, K. Ichijima and Y. Takakura	
The Use of Mesenchymalpluripotent Cells with Porous Ceramics in the Treatment of Bony Defects	663
B. Niechoda, M. Gianoutsos, Y.N. Yu and W.R. Walsh	
Introduction of Ectopic Bone Formation by BMP-2 Incorporated Biomimetically into Calcium Phosphate Coatings of Titanium-Alloy Implants	667
Y. Liu, E.B. Hunziker, K. de Groot and P. Layrolle	
Cell Attachment and Proliferation on Hydroxyapatite and Ion Substituted Hydroxyapatites	671
M. Wei, D. Vellinga, D. Leavesley, J.H. Evans-Freeman and Z. Upton	
Interactions at the Surface of Oxide Bioceramics with Biological Liquids and Blood Cells	675
S. Agathopoulos, A.J. Calado, J.Y. Xu, M.C. Ferro, M.H.F.V. Fernandes, M. Nedea, P. Nikolopoulos and R.N. Correia	
The Functional Expression of Osteoblasts Grown on Rapidly Resorbable Calcium Phosphates	679
C. Knabe, C.R. Howlett, B. Markovic, G. Berger, R. Gildenhaar and H. Zreiqat	
Response to Osteoblastic Cells of Bioactive Organic-Inorganic Hybrid	683
Y. Aburatani, T. Uchida, Y. Shiroasaki, K. Tsuru, S. Hayakawa and A. Osaka	
Cytocompatibility on Silicone Modified with Organoalkoxysilane due to Emulsion Polymerization	687
Y. Shiroasaki, K. Tsuru, S. Hayakawa, A. Osaka and S. Takashima	
The Early Osteogenesis Induction of Bone-Like Apatite after Implantation into the Muscle of Rats	691
Y.R. Duan, M. Deng, Y. Li, J.Y. Chen and X.D. Zhang	
Fluoride-Substituted Apatites Support Proliferation and Expression of Human Osteoblast Phenotype In Vitro	695
M. Grzanna, R.Z. LeGeros, A. Polotsky, S.J. Lin, D.S. Hungerford and C. Frondoza	

Effect of Prenucleation of RF-Sputtered CaP Coatings on In Vitro Rat Bone Marrow Cell Behaviour	699
E. van der Wal, J.G.C. Wolke, J.J. Jansen and A.M. Vredenberg	
Cytological and Biochemical Evaluation of Osteoblast in Contact with Ionic Products of Bioactive Ceramics	703
P. Valério, A. Goes, M. Pereira and M.F. Leite	
Surface Modification of Bioceramics Affect Osteoblastic Cells Response	707
H. Zreiqat, C.R. Howlett, A. Zannettino, P. Evans, C. Knabe, G. Schulze-Tanzil and G.M. Shakibaei	
Inductive Contact and Adherence Manipulation of Osteoblast-Like Cell on Polarized Hydroxyapatite Ceramics	711
