## I. Bioceramics Synthesis, Characterization and Testing

|                                                                                                                                                                                                                            |    |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Bioactivity Assessment of Niobate Apatite</b><br>D. Navarro da Rocha, L.R. de Oliveira Cruz, L. de Andrade Gobbo and M.H. Prado da Silva                                                                                | 3  |
| <b>Bioactivity of a Poly(70lactic-co-30glycolic acid)/15CaO-85SiO<sub>2</sub> Composite with a Dual Pore Structure</b><br>H.Y. Shin, S.H. Shin and S.H. Rhee                                                               | 7  |
| <b>The Influence of Biogenic and Synthetic Starting Materials on the Properties of Porous Hydroxyapatite Bioceramics</b><br>K. Salma-Ancane, L. Stipniece, J. Locs, V. Lakevičs, Z. Irbe and L. Berzina-Cimdina            | 11 |
| <b>Biocompatible Porous Scaffolds from Derivatized PVA Composites</b><br>T. Petreus, C.E. Cotrutz, P.D. Sirbu, L.B. Tudoran, D. Olinici, L. Badescu, O. Petreus and B.A. Stoica                                            | 17 |
| <b>Biomimetic Apatite Deposition within Casein-Loaded Hydrogel Scaffolds</b><br>A. Serafim, E. Vasile, I. Cristescu, M. Istodorescu and I.C. Stancu                                                                        | 22 |
| <b>Comparison between the Microstructure of the Mineral Phase in Two Types of Composite Beads for Bone Regeneration</b><br>D.G. Petre, A. Serafim, A. Lungu, E. Vasile, I. Cristescu and M. Istodorescu                    | 26 |
| <b>Effect of Silicon-Doped Calcium Phosphate Bone Substitutes on Bone Formation and Osteoblastic Phenotype Expression <i>In Vivo</i></b><br>C. Knabe, M. Lopez Heredia, D. Barnemitz, A. Genzel, F. Peters and W.D. Hübner | 31 |
| <b>Influence of Time on Thermal Oxidation of CP-Ti Grade II at 850 °C</b><br>B. Istrate, C. Munteanu, S.I. Strugaru, A. Barca, C. Biniuc and C. Carmen Iulia                                                               | 35 |
| <b>Injectable Bioactive Glass/Polysaccharide Polymers Nanocomposites for Bone Substitution</b><br>M. Sohrabi, S. Hesarakhi and A. Kazemzadeh                                                                               | 41 |
| <b>SEM Characterisation of a Tricalcium Phosphate – Chitosan - PMMA Cement</b><br>H. Mahjoub, C. Sarosi, O. Orasan and A. Saplonțai-Pop                                                                                    | 47 |
| <b>Synthesis of Calcium Carbonate Biological Materials: How Many Proteins are Needed?</b><br>F. Marin, N. Le Roy, B. Marie, P. Ramos-Silva, S. Wolf, S. Benhamada, N. Guichard and F. Immel                                | 52 |
| <b>The Effect of α-Tricalcium Phosphate Powder Preparation Methods on Cement Properties</b><br>Z. Irbe and L. Berzina-Cimdina                                                                                              | 62 |
| <b>Structural and Surface Characterization of some Ceramic Coatings Obtained by Plasma Jet Spraying on Metallic Biomaterials Substrates</b><br>I. Razvan, V. Eugeniu, C. Munteanu, B. Istrate and M. Niculescu             | 68 |
| <b>Tribological Tests and SEM Analysis for Titanium Oxide Layers</b><br>B. Istrate, C. Munteanu, D. Luca, K. Earar, E.S. Barca and V.I. Antoniac                                                                           | 74 |

## II. Bioceramics Applications in Dentistry

|                                                                                                                                                                                                                                              |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>2D Versus 3D Aesthetic Preview in Prosthodontic Rehabilitation for Elderly Patients</b><br>M. Pantea, L. Oancea, A.E. Petre and C. Gagliu                                                                                                 | 83  |
| <b>Alveolar Bone Augmentation</b><br>C. Dimova, K. Papakoca and V. Papakoca                                                                                                                                                                  | 89  |
| <b>Effect of Lithium Disilicate Ceramic Thickness on the Color of Discromic Substate</b><br>A. Botos, C. Gasparik, H. Colosi, M. Badea and D. Dudea                                                                                          | 95  |
| <b>Effect on Adhesion to Tooth Structure for some Experimental Dental Adhesive System</b><br>L. Colceriu, S. Cimpean, C. Nicola, S. Sava, M. Trif, T. Buruiana, M. Moldovan, L. Silaghi-Dumitrescu, A. Antoniac, A. Blajan and C. Prejmerean | 100 |

|                                                                                                                          |     |
|--------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Four Implants Connected Bar with an All Ceramic Milled Superstructure Solution Assesment in Mandibular Edantation</b> |     |
| N.A. Bara, D. Chisalita, A. Lazar, C. Sinescu, M.L. Negrutiu and M. Rominu                                               | 105 |
| <b>Hydrolytic Degradation of Dental Composites</b>                                                                       |     |
| C. Sarosi, A. Antoniac, C. Prejmerean, O.C. Pastrav, D. Patroi, G. Popescu and M. Moldovan                               | 113 |
| <b>Instrumental Color Evaluation of Ceramic Materials by Using Two Dental Spectrophotometers</b>                         |     |
| C. Gasparik, A. Botos, B. Culic, M. Badea and D. Dudea                                                                   | 118 |
| <b>Material Defects in Ceramic Crowns Identification by Optical Coherence Tomography and MicroCT</b>                     |     |
| C.A. Madaras, C. Sinescu, M.L. Negrutiu, C.S. Clonda, M. Rominu, C. Ionita, A. Antoniac and A.G. Podoleanu               | 124 |
| <b>Metal-Ceramic Fixed Prosthodontics - An Obsolete Therapeutic Solution?</b>                                            |     |
| E. Jiménez-Castellanos                                                                                                   | 134 |
| <b>Morphologic Characterization of Ceramic-Ceramic Dental Systems Failure</b>                                            |     |
| F. Miculescu, L.T. Ciocan, D. Meghea and M. Miculescu                                                                    | 140 |
| <b>Researches Regarding the Biomechanics Behaviour of some Impressions Biomaterials Used in Dentistry</b>                |     |
| M.E. Antohe, D. Forna and N.C. Forna                                                                                     | 144 |
| <b>Translucence Study through New Experimental Hybrid Composites</b>                                                     |     |
| O.C. Pastrav, A.G. Delean, C. Sarosi, L. Silaghi Dumitrescu, A. Muntean, M. Gociu and M. Moldovan                        | 148 |

### **III. Bioceramics Applications in Orthopedics**

|                                                                                                                                                                                           |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Biomaterials in the Arthroscopic Anterior Cruciate Ligament Reconstruction</b>                                                                                                         |     |
| G.I. Popescu, C. Patru, C. Tecu, T. Bajenescu and G. Soare                                                                                                                                | 157 |
| <b>Bone Substitute Used in a Bilateral Calcaneal Fracture-Case Presentation</b>                                                                                                           |     |
| O. Lupescu, M. Nagea, D. Zamfirescu, A. Dimitriu, M. Coltan, N. Ciurea and C. Deaconescu                                                                                                  | 163 |
| <b>Cement Filling of Contained Defects from Bone Tumor Resections</b>                                                                                                                     |     |
| R. Prejbeanu, J. Patrascu, D. Poenaru, D. Vermesan, I. Popa and H. Hărăgus                                                                                                                | 168 |
| <b>Circumferential Decompression with Posterior Instrumentation and Fusion by Lateral Extracavitary Approach – Effective Solution Aiding the Treatment of Infectious Spondylodiscitis</b> |     |
| I. Popa, D. Negoescu, D. Poenaru and M. Oprea                                                                                                                                             | 173 |
| <b>Comparative Study of Design and PCL-Substituting Systems of Total Knee Prosthesis</b>                                                                                                  |     |
| R. Adam, C. Orban and H. Orban                                                                                                                                                            | 178 |
| <b>Early Degradation of Resurfacing Prostheses</b>                                                                                                                                        |     |
| C. Cîrstoiu, D. Popescu, R. Ene and M. Cîrstoiu                                                                                                                                           | 183 |
| <b>Efficacy of a Biphasic Ceramic Bone Substitute in Management of Complex Tibial Plateau Fractures — Clinical and Radiologic Medium-Term Results</b>                                     |     |
| P.D. Sirbu, G. Berea, T. Petreus, R. Sova, R. Tudor, C. Plaiasu and P. Botez                                                                                                              | 190 |
| <b>Experimental Evaluation on Rat Model of Different Bioresorbable Materials Potentially Used as Orthopedic Biomaterials</b>                                                              |     |
| I. Cristescu, D. Zamfirescu, D. Vilcioiu, L. Marina and F. Safta                                                                                                                          | 196 |
| <b>Formation of Alumina Layer on Ti Alloy for Artificial Hip Joint</b>                                                                                                                    |     |
| R. Khanna, T. Matsushita, T. Kokubo and H. Takadama                                                                                                                                       | 200 |
| <b>Potential Solutions to Increase the Corrosion Resistance of Metallic Surgical Instruments Using Different Types of Ceramic Coatings</b>                                                |     |
| I. Razvan, V.I. Antoniac, M.C. Cotrut, F. Miculescu, V. Eugeniu, C. Munteanu, D. Moldan and M. Niculescu                                                                                  | 206 |
