

Table of Contents

Preface

Chapter 1: Synthesis Technologies and Assessment of Osteoconductivity, Bio- and Cytocompatibility

Opening New Avenues for Bioceramics: Oscillatory Flow Reactors and Upcoming Technologies in Skin-Tissue Engineering

A. Veiga, F. Castro, F. Rocha, B. Bernardes, M.M. Duarte and A.L. Oliveira 3

Calcium Phosphate Nanoparticles as Carriers of Therapeutic Peptides

F. Mancini, L.D. Esposti, A. Adamiano, D. Catalucci, S. Appleton, A. Vitali, F. Bugli, M. Sanguinetti and M. Iafisco 13

Type I Collagen-Apatite Fibrillar Nanocomposites: Mineralization, Crosslinking and Anti-Inflammatory Cocystal Impregnation for Bone Tissue Engineering

I. Páramo-Castillejo, R. Fernández-Penas, I. Romero-Castillo, A. Domínguez-Martín, E. López-Ruiz, J.F. Fernández-Sánchez, D. Choquesillo-Lazarte, J.A. Marchal and J. Gómez-Morales 19

Calcium Carbonate/Hydroxyapatite Microparticles and Osteoblast Responses

L. Bergara-Muguruza, H.E. Abdel Razik, P. Chen, M. Ashida, H. Takao, P. Vallitu and M. Nakamura 25

Osteoblast-Mediated Resorption of Porous Bioactive SCPC Granules Enhances Bone Regeneration in Human Extraction Sockets

H.E. Abdel Razik, M. Nakamura, L. Bergara-Muguruza, U. Sarwar, M. Hassan, R. Horowitz and A. El-Ghannam 31

In Vivo Evaluation of Calcium-Phosphate Ceramics with Highly-Interconnected Pores Using Porcine Tibia Defect Model

Y. Shigemitsu, H. Nagashima, H. Matsunari and M. Aizawa 37

Investigation of Microwave Sintering of B-Type Carbonated Hydroxyapatite Bioceramics

C. Petit, A. Le Tiec, L. Pancrazi and N. Douard 43

New Approach to Identify the Physiological State of Bone Cells at the Surface of Hydroxyapatite Bioceramics

A. Abélanet, E. Champion and A. Magnaudeix 55

Apatite-Graphene and Apatite-Graphene Oxide Nanocomposites: Hybrid Materials with Tailored Biological and Luminescent Properties

F.J. Acebedo Martinez, A. Voltes-Martínez, E.L. Ruíz, D. Choquesillo-Lazarte, J.F. Fernández-Sánchez, J.A. Marchal and J. Gómez-Morales 61

Chapter 2: 3D Technologies in Scaffolds Production and Dental Restoration

Processing by Laser Stereolithography and *In Vitro* Biological Evaluation of Hydroxyapatite Scaffolds Mimicking Human Trabecular Bone Architecture

P. Danty, A. Magnaudeix, E. Renaudie, F. Leborgne, V. Pateloup, V. Valle, E. Champion and P. Pascuad-Mathieu 69

Structural and Mechanical Characterization of 3D Printed Hydroxyapatite Scaffolds Designed for Biomedical Applications

I. Touaiher, M. Saadaoui, P. Reynaud, H. Reveron and J. Chevalier 75

Selective Laser Melting-Sintering Technology: From Dental Co-Cr Alloys to Dental Ceramic Materials

K. Dimitriadis and S. Agathopoulos 81
